AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–606]

DEMAMBRO RADIO SUPPLY CO.

Joseph A. DeMambro, doing business as DeMambro Radio Supply Company at 1111 Commonwealth Avenue, Boston, Massachusetts, is a wholesale dealer in electronic equipment. Early in June, 1943, he placed five purchase orders for 15,254 radio tubes with one of his suppliers, an order for 3,865 with another, and four orders for 11,839 with another, in each instance certifying that he was entitled to purchase the items specified under the provisions of Limitation Order L–265. On July 12, 1943, he ordered an additional 625 tubes from one of his suppliers with a similar certification. All these certifications were contrary to the facts but only in the last case was the certification wilfully false, previous certificates having been based on misinterpretation of the order. On July 13 and 14, 1943, he accepted transfer of 1,495 of the tubes under certain of the above orders and on July 15 accepted transfer of 335 more, at which time he was not entitled to accept transfer of over 1,293 tubes. These acts were in knowing and wilful violation of General Limitation Order L–265. By reason of the foregoing facts, it is hereby ordered, that:

§ 1010.606 *Suspension Order No. S–606.* (a) Joseph A. DeMambro, whether doing business as DeMambro Radio Supply Company or otherwise, his and its agents, successors and assigns, shall not directly or indirectly accept the transfer of any electronic equipment, as defined in General Limitation Order L–265, except to fill orders rated A–1–a or higher, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve Joseph A. DeMambro, whether doing business as DeMambro Radio Supply Company or otherwise, his and its agents, successors and assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on August 30, 1944, and shall expire on October 30, 1944.

Issued this 23d day of August 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 933—COPPER

[Conservation Order M–9–c, as Amended Aug. 31, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of copper for defense, for private account, and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 933.4 *Conservation Order M–9–c—*(a) *Restrictions on manufacture of articles appearing on combined list.* No manufacturer of any article on the combined list attached, or of parts (including repair parts[1]) for any such article, may, if such article or parts contain copper products, or copper base alloy products, continue their manufacture by means of processing, assembling or finishing.

(b) *Restrictions on manufacture of articles not appearing on combined list out of inventory on hand on June 30, 1942.* (1) A manufacturer of any article omitted from the combined list or excepted from that list, or of parts (including repair parts[1]) for such an article, may not continue the manufacture thereof by means of processing, assembling or finishing:

(i) Unless all copper products or copper base alloy products contained in such articles or parts were acquired by the manufacturer after June 30, 1942; or

(ii) Unless such articles or parts are being manufactured to fill a purchase order, existing or prospective,[2] bearing a preference rating of AA–5 or higher or, in the case of a controlled materials producer under the Controlled Materials Plan, to fill an authorized controlled material order; and no such article or part so manufactured shall be delivered except to fill such an order; or

(iii) Unless the manufacturer has been specifically authorized in writing by the War Production Board to manufacture the article or parts in question, with the copper products or copper base alloy products being used. Applications for specific authorizations shall be made by letter addressed to the War Production Board, Copper Division, Washington 25, D. C., Reference: M–9–c.

(2) The provisions of paragraph (b) (1) shall not apply to a manufacturer assembling a completed fractional horsepower electric motor into machinery of any kind omitted from the combined list or excepted from that list. The provisions of paragraph (b) (1) shall also not apply to the manufacturing of any machinery omitted from the Combined List or excepted from that list, or of parts (including repair parts) for such machinery, if the only copper products or copper base alloy products used which were in the inventory of the manufacturer on June 30, 1942 are bushings, bearings, nuts, bolts, screws, washers, and wire weighing in the aggregate less than

[1] See also paragraph (f) (3) permitting the manufacture of repair parts to make specific repairs of used articles under certain conditions.

[2] Priorities Regulation No. 1, § 944.14, prohibits the manufacture of more than a practicable minimum working inventory of articles or parts to fill prospective orders.

[1] 8 F.R. 12967; 9 F.R. 2587, 3067, 3288, 4905, 5769, 6395, 8176, 10088, 10147.

5% of the total weight of the article or part.

(c) *General restrictions on manufacture and plating.* (1) The restrictions of this subparagraph are in addition to those contained elsewhere in this order and in other orders and regulations of the War Production Board. No manufacturer may continue the manufacture of any article or parts (including repair parts) omitted from the Combined List or excepted from that list if such article or parts are to contain copper products or copper base alloy products where the use of any less scarce material [1] is practicable. Furthermore, no manufacturer may continue the manufacture of any article or parts (including repair parts) omitted from the combined list or excepted from that list if they are to contain more copper products or copper base alloy products than is necessary for the article's proper operation or a higher type or grade of copper or copper base alloy than is necessary for the article's proper operation.

(2) The restrictions of this subparagraph are in addition to those contained elsewhere in this order and in other orders and regulations of the War Production Board. No person shall use for any purpose in manufacture, any copper base alloy foundry product, either rough or finished, containing more than 74% copper or 2% tin, unless one or more of the following conditions is satisfied:

(i) He was lawfully using copper base alloy for the particular purpose some time during the last six months of 1943;

(ii) A War Production Board order or regulation specifically allows an alloy with a higher copper or tin content;

(iii) The specifications of the Army or Navy of the United States, the U. S. Maritime Commission or the War Shipping Administration, applicable to the contract, subcontract or purchase order call for an alloy with a higher copper or tin content; or

(iv) He has been specifically authorized in writing by the War Production Board to use an alloy with a higher copper or tin content. (Applications for specific authorization under this subparagraph to use copper base alloy foundry products containing more than 74% copper or 2% tin, where such use would otherwise be in violation of the restrictions stated above, should be made by letter in duplicate addressed to the Copper Division of the War Production Board, Washington 25 D. C., Reference: M-9-c. A provision similar to this subparagraph (2) appears in Order M-43 and one application is sufficient under both Orders M-9-c and M-43).

[Paragraph (3) formerly (2) redesignated Aug. 31, 1944]

(3) (i) The use of copper products or copper base alloy products for plating any article on the combined list or for plating any parts (including repair parts) of such an article, is prohibited unless such plating is expressly stated in the list to be permissible or such plating is an undercoating for lead, chromium or nickel. Undercoatings for lead should, in general, be less than 0.00005 inch in thickness.

(ii) The use of copper products or copper base alloy products for plating any article omitted from the combined list or excepted from that list, and the plating of parts (including repair parts) for such an article, is permitted provided that:

(a) Such plating is not for decorative purposes, or part of a decoration.

(b) The use of, or the normal wear on, such article or parts would make impracticable any other form of coating.

(d) *Restrictions on deliveries to manufacturers.* No person shall hereafter deliver copper products or copper base alloy products to any manufacturer, directly or indirectly, if he knows or has reason to believe that such products are to be used in violation of the terms of this order. No person shall deliver or accept delivery of any article or parts (including repair parts) which he knows or has reason to believe was manufactured, processed, assembled or finished in violation of any applicable provision of this order.

(e) *General restrictions on deliveries.* The disposition of frozen and excessive inventories containing certain copper products or copper base alloy products shall be subject to the applicable provisions of Priorities Regulation No. 13 (§ 944.34), as amended from time to time.

(f) *Exceptions*—(1) *Applicability of order to certain Governmental agencies.* The provisions of this order shall not apply to the use of copper products or copper base alloy products in the manufacture of any article on the "Military Exemption List", or part therefor, which is being produced for purchase by, or for the account of, or for use by, the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, or the Coast Guard, where the use of copper products or copper base alloy products to the extent employed is required by the specifications (including performance specifications) of the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, or the Coast Guard applicable to the contract, subcontract or purchase order.

(2) *Installation.* The provisions of this order shall not apply to the installation of any article or part (including a repair part) for the ultimate consumer on his premises when any manufacturing of such article or part is incidental to the installation and is done on the consumer's premises. This exception does not, however, in any way affect or modify the provisions of Supplementary Conservation Order M-9-c-4 (restricting the installation of certain types of copper and copper base alloy pipe, tube, and building materials) or of any other order restricting installation.

(3) *Repair.* The restrictions of this order shall not apply to the manufacture of repair parts to make a specific repair of a used article, or to a person repairing a used article, on or off the premises of the owner, if the manufacturer of the parts or the person making the repair does not use copper products or copper base alloy products weighing in the aggregate more than two pounds and when all manufacturing done by him is with knowledge of the particular used article to be repaired. The restrictions of this order shall also not apply to the manufacture of repair parts to make a specific repair of a used article, or to a person repairing a used article, on or off the premises of the owner, even if the manufacturer of the parts or the person making the repair uses copper products or copper base alloy products weighing in the aggregate more than two pounds, when (i) the copper scrap or copper base alloy scrap derived from the article being repaired weighs within one pound of the copper product or copper base alloy product used, (ii) all such scrap is delivered to a scrap dealer or to any other person to whom such delivery may be made under the provisions of Copper Order M-9 and (iii) all manufacturing done is with knowledge of the particular used article to be repaired.

(4) *Research, developmental and experimental activities.* [2] The provisions of this order shall not apply to the use of copper products or copper base alloy products to make experimental models or test runs, but only the minimum number of models or minimum size run needed to determine the suitability of the item for commercial production. Such models or materials shall not be distributed for the purpose of promoting sales or creating a consumer demand for such items, nor shall such items, if designed primarily for future civilian markets, be exhibited to the public. Research, developmental or experimental activities in connection with products or materials designed primarily for future civilian markets must be carried on without diverting any manpower, technical skill or facilities from activities connected with the war effort.

(g) *Special products; restrictions and exceptions*—(1) *Printing and publishing industries.* After October 3, 1943, the provisions of this order shall not apply to the use of copper products and copper base alloy products in typography, engraving, photo-engraving, gravure plate making, electrotyping, stereotyping, and printing in the printing and publishing industries. In those processes, the use of bronze powder, bronze ink, bronze paste, and bronze leaf is controlled by Supplementary Conservation Order M-9-c-3. All other uses in those industries of copper products, copper base alloy products, copper scrap, and copper base alloy scrap are governed by Conservation Order M-339. Nothing contained in this paragraph (g) (1) shall affect the prohibition against the manufacture of powder containing copper products or copper base alloy products under paragraph (a) and the Combined List of this order.

(2) *Insect screening.* This order does not restrict the sale or delivery of used or second-hand insect screening. However, no person shall sell or deliver to any one person more than 50 sq. ft. of any other copper or copper base alloy insect screening unless the sale or delivery is made to: (i) A jobber, wholesaler or retailer; (ii) the Army or Navy of the United States, the United States Maritime Commission, the War Shipping Administration, the Panama Canal, the Coast Guard, any foreign country pursuant to the Act of March 11, 1941 entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act), or Defense Supplies Corporation, Metals Reserve Corporation or any other corporation organized under section 5 (d) of the Reconstruction Finance Corporation Act as amended (except Defense Plant Corporation) or any person acting as agent of any such corporation (except Defense Plant Corporation); or (iii) any person upon specific authorization of the War Production Board. The order does apply to the manufacture, processing, assembling and finishing of the closures and associated items listed above where the provisions of this order are more restrictive than other orders of the War Production Board.

(ii) The provisions of this order do not apply to the assembling of watch or clock movements finished prior to June 15, 1942, into cases not made of copper or copper base alloy. The provisions of this order do, however, apply to the manufacture, processing and finishing of watch and clock cases and of all other parts of watches and clocks and to assembling watches and clocks except as specifically exempted in this paragraph.

(2) "Copper base alloy" means any alloy metal in the composition of which the percentage of copper metal by weight equals or exceeds 40% of the total weight of the alloy. It shall include alloy metal produced from scrap but shall not include alloyed gold produced in accordance with U. S. Commercial Standard CS 67-38.

(3) "Copper products" means products made of copper fabricated to the extent that they are plate, sheet, strip, rolls, coils, wire, rod, bar, tube, tubing, pipe, extrusions, ingot, powder, anodes, castings, or forgings, or fabricated to any greater extent.

Relief granted pursuant to an appeal under this order shall remain in effect despite any amendment to this order, unless the grant of relief is specifically revoked or modified by the War Production Board.

(3) *Communications.* Any reports required to be filed under this order and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Copper Division, Washington 25, D. C., Reference: M-9-c.

(4) *Applicability of order.* The prohibitions and restrictions contained in this order shall apply irrespective of whether the articles or parts whose manufacture is governed hereby are being manufactured pursuant to a contract made prior or subsequent to the effective date of this order. Insofar as any other order of the War Production Board may have the effect of limiting or curtailing to a greater extent than herein provided the manufacture of any articles or parts, the limitation of such other order shall be observed.

(5) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and, upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

INTERPRETATION 5

USE OF COPPER IN THE MANUFACTURE OF CERTAIN DRAINS AND STRAINERS

Copper Conservation Order M–9–c, as amended December 10, 1941, specifically prohibited any person from using after March 31, 1942, any copper or copper base alloy in the manufacture of gutters, leaders or downspouts, or accessories thereto, and of all roofing items, to go on private buildings. These provisions have remained in the order without interruption.

In addition, since May 7, 1943, paragraph (d) (1) of Order M–9–c (relettered as paragraph (c) (1) when the order was amended on October 4, 1943), has provided that no manufacturer may continue to manufacture from copper or copper base alloy, any article the manufacture of which, with copper or copper base alloy, is not specifically prohibited by the order, if it is practicable to use any material less scarce than copper, brass or bronze to make the article.

For some time, many manufacturers have been making floor, roof, cesspool and shower drains and strainers out of galvanized steel or iron; and it has been demonstrated that the use for such purposes of this type of material instead of copper or copper base alloy is practicable for all uses to which these articles are put except their use in places where explosives are handled or stored or where explosive vapors may be present. Furthermore, the types of iron and steel used as well as zinc, are less scarce materials than copper or copper base alloy.

Accordingly, manufacturers are prohibited by Copper Conservation Order M–9–c from using brass or other copper and copper base alloy materials to make all roof, floor, cesspool and shower drains or strainers, even if the drains or strainers are not accessories to gutters, leaders or downspouts, or roofing items. An exception to the foregoing arises in the case of drains or strainers for floors in places where explosives are handled or stored or where explosive vapors may be present. (Issued Oct. 19, 1943.)

PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[Limitation Order L–38, as Amended Aug. 31, 1944]

INDUSTRIAL AND COMMERCIAL REFRIGERATING AND AIR CONDITIONING MACHINERY AND EQUIPMENT

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of steel, copper, and other materials for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1226.6 *Limitation Order L–38*—(a) *Purpose and scope.* The general purpose of this order is to assure that the limited quantities of refrigeration and air conditioning equipment being produced will be delivered to those persons who need it most; to explain the methods for applying for priority help when a buyer needs such equipment; and to limit manufacture to the extent necessary to avoid interference with war programs. An ultimate consumer may apply a MRO rating to get a new system or new parts to replace his equipment which has worn out, but in most cases he must apply to the War Production Board to get additional equipment. Dealers and distributors must have orders rated AA–5 or higher to get new systems or parts for inventory. Manufacturers may not produce any of certain kinds of equipment, and have quotas for other kinds. It will be noted that certain types of equipment, such as domestic refrigerators, are not included in this order, as they are covered by other orders of the War Production Board.

Definitions

(b) *Definitions.* For the purpose of this order:

(1) "System" means any refrigerating or air conditioning system, consisting of an assembly or combination of machinery, equipment, or other apparatus designed primarily to lower temperature or remove water vapor, directly or indirectly, by mechanical, chemical or physical means. The term does not include a domestic mechanical refrigerator, a domestic ice refrigerator, or heat exchanger equipment, as defined, respectively, in paragraphs (b) (5), (b) (6) and (b) (9) of this order; or coils or low sides which are incorporated into "food processing machinery" (as defined in Order L-292). The term includes the equipment used in a domestic air conditioning system for reducing the temperature of air, but not the furnace or warm air distribution system. It does not include electric fans (see Order L-123 and Order L-176), nor does it include an ice storage house requiring no refrigeration equipment (see Order L-41, as to when permission to construct is necessary).

(2) "Parts" includes any assemblies of parts, equipment, insulated enclosures and cold storage doors (except insulation materials used therein), accessories, implements or devices designed or intended for incorporation or use in a system or for installation therewith in causing it to perform its functions, except the following materials:

Liquid or gaseous refrigerants
Oil or other lubricants
Cleaning fluids or other solvents
Anti-freeze fluids
Drying agents
Paints, enamels, varnishes, thinners and seam fillers
Wax polishes and rust preventives
Soldering and brazing fluxes and welding rods
Non-metallic filters
Belts and belting
Gaskets
Packing
Insulation materials
Small hardware, such as nuts, bolts, washers, screws and cotter pins

(3) "Producer" means any person to the extent that he is engaged in the manufacture, fabrication, or assembly of new systems or parts, or industrial type extended surface heating equipment, or industrial type humidifying equipment. The term does not include any sales or distribution outlet of a producer.

(4) "Deliver" means: (i) to transfer physical possession, title, or ownership; or (ii) to install for use (but not including a temporary installation solely for the purpose of testing the system or part, or the moving of an installed system from one point on the owner's property to another); or (iii) to place in the hands of any carrier or otherwise in transit for transfer of possession to another person; (regardless of whether such transfer, installation, or shipment is for the purpose of sale, trade, loan, lease, consignment, or other type of transaction).

(5) "Domestic mechanical refrigerator" means any refrigerator for household use which operates either by compression or absorption and which has a net capacity of 16 cubic feet or less (National Electric Manufacturing Association rating), but does not include any low temperature mechanical refrigerator designed for the storage of frozen foods or for the quick freezing of food where the low temperature compartment customarily operates at a temperature of not higher than 15 degrees above zero Fahrenheit and contains 75% or more of the total refrigerating space in the refrigerator.

(6) "Domestic ice refrigerator" means any non-mechanical ice chest or ice box for home use.

(7) "Industrial type extended surface heating equipment" means any apparatus employing a heat transfer element and designed primarily to increase the temperature of gaseous matter, in connection with the operation of any refrigerating or air conditioning system.

(8) "Industrial type humidifying equipment" means any apparatus designed primarily to add water vapor to gaseous matter, in connection with the operation of any industrial or commercial refrigerating or air conditioning system, or for any purpose other than the health or comfort of persons.

(9) "Heat exchanger equipment" means an assembly, bundle or nest of bare or finned tubes installed in a shell or pressure vessel, and designed for the transfer or exchange of heat between two or more fluids (liquids, gases, or vapors), without the use, as a refrigerant, of (i) ammonia, carbon dioxide, methyl chloride, sulphur dioxide, or chlorinated hydro-carbon refrigerants (trichloromonofluoromethane monochlorodifluoromethane, dichlorodifluoromethane, dichloromonofluoromethane, trichlorotrifluoroethane, and dichlorotetrafluoroethane), or (ii) brine or water which has been cooled by the use of ice or any of such refrigerants.

(10) "For direct use by the Army, Navy, Maritime Commission or War Shipping Administration" means for direct use by the regular personnel or regular employees of such an agency only (or "for military exchanges or service departments" under Priorities Regulation 17), but regardless of whether delivery is made by the producer or dealer directly to such an agency, or through or to an intermediate dealer or contractor. The term does not mean for use in any privately operated plant or shipyard financed by, or controlled by, any of such agencies, or operated on a cost-plus-fixed-fee basis.

Restrictions on Deliveries

(c) *AA-5 or higher ratings required.* No person shall deliver or accept delivery of any new system, any new parts, any new industrial type extended surface heating equipment, any new industrial type humidifying equipment or any reconditioned system containing a new condensing unit (with or without motor or controls) or containing a new compressor unit, except under an order rated AA-5 or higher. Certain exceptions are made in (f) below. Paragraph (e) explains what form should be used in applying for ratings.

(d) *Restriction on use of blanket MRO ratings; exceptions to this rule.* (1) The blanket MRO ratings (as defined in (e) (2) of Priorities Regulation 3) assigned by CMP Regulations 5 and 5A or any other regulation, order, or certificate may not be used to get any new system, condensing unit (with or without motor or controls), compressor unit, low side, evaporator, cold storage door, insulated enclosure, or any reconditioned system containing a new condensing unit (with or without motor or controls) or containing a new compressor unit, unless it is needed to replace equipment of substantially the same size or capacity which has become worn out or damaged beyond repair while in the purchaser's possession and unless he has had it at least ninety days. In addition, no blanket MRO rating may be used to get any new parts to enlarge the size or capacity of any used or reconditioned system or to improve its design or change its function. If new equipment is needed for the purposes prohibited under these rules, it should be applied for in accordance with (e) below.

(2) The restrictions in (d) (1) above do not apply to the use of AA-1 blanket MRO ratings assigned by CMP Regulation 5, or 5A or any preference rating order, providing the equipment is to be installed and operated in the production area, cafeteria or restaurant of an industrial plant (excluding offices, recreation rooms, conference rooms, drafting rooms, first aid rooms, change and rest rooms, and dispensaries).

(e) *How to apply for ratings.* (1) When an ultimate consumer needs a new system, new parts, new industrial type extended surface heating equipment or humidifying equipment, and may not use his MRO rating to get them, he should apply on Form WPB-617, or other appropriate construction form when permission for construction is required. Form WPB-1319 should be used in all other cases. (These forms are not required for equipment to be delivered for direct use by the Army, Navy, Maritime Commission, or War Shipping Administration.)

(2) Distributors or dealers who need such new equipment for inventory should extend their customers' ratings, and may apply on Form WPB-547 (formerly PD-1X) to get additional inventory from producers, or on Form WPB-541 (formerly PD-1A) if they buy from distributors.

(3) Applications for new systems or parts for export should be made on Form WPB-1319 and such other applicable forms as may be required by FEA regulations, or in accordance with Priorities Regulation 9.

(f) *When rated orders not required.* A rated order is not necessary under this order for the following transactions (although other orders, such as L-123, may still require a rating for particular parts, such as electric motors):

(1) When a repairman under CMP Regulation 9A or Order P-126 installs any part for a farmer or householder, in repairing a system owned or operated by the latter, if the repairman merely replaces a part of substantially the same size or capacity which the repairman knows or has reason to believe has become worn out or damaged beyond repair while in the purchaser's possession and after he has had it for at least ninety days.

(2) The delivery and receipt of a complete new farm milk cooler, or a new system to be used in a farm milk cooler owned by a farmer, when the purchaser has a purchase certificate from a county farm rationing committee under applicable orders of the War Food Administration. A dealer who has received a specific order from a farmer having a purchase certificate may apply a preference rating of AA-3 to his order, in accordance with Priorities Regulation 3, to get a farm milk cooler or system to fill the farmer's order, or to replace in his inventory the cooler or system used to fill the order. Ratings to afford the dealer an additional inventory, however, must be applied for on WPB-547 or WPB-541 as explained in (e) (3) above.

(3) (i) Any transfer to a trustee or receiver for the benefit of creditors or (ii) the return of an unused system or parts to the person from which purchased (although after such return the equipment remains subject to this order as new equipment).

(4) *Deliveries on Z-1 orders.* A rating of AA-5 or higher is not necessary for the delivery of any insulated enclosure or parts on an order identified by the allotment symbol Z-1. However, special restrictions on the delivery of condensing units, compressors, and temperature and refrigerant controls are contained in paragraph (g) (3).

(g) *Restrictions on production—(1) New systems, and parts for new systems.* During the calendar year starting January 1, 1944, and during each subsequent calendar year, no person shall manufacture or assemble more of any "class" of new systems or parts of new systems (not including parts for maintenance and repair) as shown on Schedule A, than his quota for that class. There is no quota for any person for any item which is followed by the figure "0" in the column headed "Quotas" in the schedule; except that the items marked with an asterisk may be produced to the extent necessary to fill accepted orders for items to be delivered for direct use by the Army, Navy, Maritime Commission, War Shipping Administration, or Veterans' Administration. Where a quota is given in that column for a particular item, each person's quota for that class is to be computed in terms of aggregate dollar volume (producer's sales price at the factory, exclusive of installation charges), and is the greater of the following two quantities:

(i) His dollar volume of all unfilled orders on hand rated AA-5 or higher for that class of new system or parts; or

(ii) The percentage, as specified in the "Quotas" column of Schedule A, of the aggregate dollar volume of that class of new systems or parts produced by him during the calendar year 1940, in addition to his current production required to fill all orders, for direct use by the Army, Navy, Maritime Commission, War Shipping Administration, or Veterans' Administration.

Any person may manufacture and assemble parts for maintenance and repair without reference to these quota restrictions and should not include them in the above quotas.

(2) *Production under special authorizations.* Additional quotas may be authorized under special provisions. For example, see Direction 1 on evaporative coolers.

(3) *Production under Priorities Regulation 25.* Any person who wishes to produce any items of a "class" for which he has no quota or a limited quota under Schedule A, may apply for permission to do so as explained in Priorities Regulation 25. The following special restrictions apply to all production authorized under Priorities Regulation 25: No person may use in the manufacture or assembly of any item on Schedule A, as authorized under Priorities Regulation 25, any new condensing unit, compressor, temperature controls, except:

(i) Condensing units, compressors, or controls obtained from excess stock under Priorities Regulation 13, or the use of which in such production has been authorized in accordance with Direction 4 to Priorities Regulation 1; or

(ii) Condensing units, compressors or controls bought on an order identified by the allotment symbol Z-1 assigned under Priorities Regulation 25, and supplied by a manufacturer, either directly, or through a dealer, jobber, or manufacturer's distribution outlet. A dealer, jobber, or outlet must not deliver, to fill such an order, a new condensing unit, compressor or control from stock or one obtained by use of a rating assigned on Form WPB-547 (PD-1X), but may obtain the condensing unit, compressor or control only by extending the Z-1 symbol (and AA-5 rating, if any) to his supplier after he has received a specific order bearing such an allotment symbol.

Miscellaneous Provisions

[NOTE: Paragraph (h) formerly (i) redesignated, former paragraph (h) deleted Aug. 31, 1944]

(h) *Miscellaneous provisions—(1) Applicability of regulations.* This order and all transactions affected by it are subject to all applicable regulations of the War Production Board, as amended from time to time, unless this order states otherwise.

(2) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, materials under priority control, and may be deprived of priorities assistance.

(3) *Appeals.* Any appeal from the provisions of this order, other than the production restrictions of paragraph (g), shall be made by filing a letter in triplicate with the Field Office of the War Production Board for the district in which is located the plant or branch to which the appeal relates, referring to the particular provisions appealed from stating fully the grounds of the appeal. No appeal should be filed from the restrictions of paragraphs (g) (1) or (g) (2).

(4) *Communications.* All reports to be filed and other communications concerning this order (except appeals), unless otherwise directed, should be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref: L-38.

SCHEDULE A—PRODUCTION QUOTAS FOR CLASSES OF SYSTEMS AND PARTS

[Schedule A added Aug. 31, 1944.]

The following classes of systems and parts are to be used in figuring the permitted quotas for any calendar year under paragraph (g) (1). (rated orders) in the Schedule below. If it would be greater under (g) (1) (ii) for the calendar year, his quota for the class is the specified percentage of the dollar volume of that class made by him in 1940, plus the quantity needed to fill all unfilled orders for direct use by the Army, Navy, Maritime Commission, War Shipping Administration, and Veterans' Administration. (Parts for maintenance and repair are not counted in the quotas).

The first column below describes each class of systems or parts for which quotas are fixed. The second column shows the alternative quotas that each producer is allowed.

[2] See (g) (2) of the order.

NOTE: The name or description of any "class," as listed above, includes all fixtures, items or parts which are within the meaning of such name or description as customarily used within the trade or industry; and does not include any fixture, item or part not within such meaning. This applies in all cases, even though a particular fixture or item in a certain class could be used for the same purpose, or a similar purpose, as an item or fixture in another class.

PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[General Conservation Order L–89, as Amended Aug. 31, 1944]

ELEVATORS AND ESCALATORS

The fulfillment of the requirements for the defense of the United States has created a shortage in the supply of certain critical materials used in the manufacture of elevators and escalators for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1226.32 *General Conservation Order L–89*—(a) *Definitions.* For the purpose of this order:

(1) "Elevator" means any hoisting or lowering mechanism, equipped with a car or platform which moves in guides in a substantially vertical direction; including electric, hydraulic and hydro-electric elevators, electric dumbwaiters, home lifts and elevettes; but excluding mine material hoists, man lifts, platform lifts and portable elevators. The term shall also mean inclinators, and electrically operated elevating devices appurtenant to stationary stairways.

(2) "Escalator" means a moving inclined continuous stairway or runway used for raising or lowering persons.

(3) "Order" means any commitment or other arrangement for the ultimate delivery of an elevator, escalator, or parts or accessories therefor within the United States or Canada.

(4) "Export order" means any commitment or other arrangement for the ultimate delivery of an elevator, or elevator or escalator parts or accessories therefor, outside the United States or Canada.

(5) "Approved order" means (i) any order for a new elevator bearing a preference rating of AA–5 or higher authorized on Form WPB–617 (formerly PD–200), except an order for a new elevator to replace the existing one or to install in an existing shaft, (ii) any order for parts or equipment for an elevator or escalator bearing a rating of AA–5 or higher involving less than $500, exclusive of installation labor costs, except an order for spare or maintenance parts not required for immediate use if, by its fulfillment, the parts inventory of the purchaser is increased beyond $50 for each elevator operated by him or if his total purchase of such parts would thereby exceed $100 for each elevator in any calendar year, or (iii) an order for repair or maintenance parts in whatever amount may be the minimum necessary when there has been an actual breakdown, or suspension of operations of an elevator or escalator is imminent because of the necessity for repair and the repair parts are not otherwise available from the purchaser's inventory. No order shall be subdivided for the purpose of coming within subdivision (ii) of this subparagraph. The term "any order" includes a group of orders for equipment for one or more elevators or escalators where all of the equipment is customarily purchased as part of a single order.

(6) "Maintenance" means the minimum upkeep necessary to continued operation of an elevator or escalator in sound working condition, and "repair" means the restoration of an elevator or escalator to sound working condition when rendered unsafe or unfit for service by wear and tear, damage, failure of parts or the like.

(b) *Restrictions on accepting orders or export orders.* (1) No person shall manufacture an escalator except as authorized under Priorities Regulation 25, and no person shall accept an order for delivery of an escalator except for one

manufactured in accordance with authorization given under that regulation.

(2) The following restrictions apply to acceptance of an order or an export order for a new elevator or for elevator or escalator parts or accessories. (i) No person shall accept an order, except an approved order, without authorization in writing from the War Production Board. Application for authorization shall be filed by the purchaser with the War Production Board on Form WPB–1236 in accordance with instructions contained on the Form. The War Production Board may grant an application filed with it on such conditions, if any, as it may prescribe. (ii) No person shall accept an export order without approval by the Foreign Economic Administration of an application for a license to export the items covered by such order to which a rating has been assigned by the Foreign Economic Administration in accordance with authority delegated to it by the War Production Board. Applications for export licenses shall be filed with the Foreign Economic Administration and shall include a description of the elevators or elevator parts or accessories.

(3) Any person may accept and fill an unrated order for an elevator as provided in Priorities Regulation 24. The provisions of Priorities Regulation 24 with respect to unrated orders do not apply to the sale or production of escalators, and escalators may be sold on unrated orders, as provided in paragraph (b) (1) of this order, without regard to the restrictions of that regulation.

(c) *Restrictions on use of materials.* No non-ferrous metals (except aluminum and magnesium) or stainless steel shall be used in the manufacture of car enclosures, facias, hanger covers, car doors or gates, hoistway doors, car or landing thresholds or face plates of operating or signal fixtures; or in the manufacture of parts therefor.

(d) *Exemptions.* (1) The restrictions of paragraphs (b) and (c) of this order shall not apply to any elevator or elevator parts, equipment or accessories, to be installed and used aboard any ships owned or operated by the Army, Navy, Maritime Commission or War Shipping Administration.

(2) The restrictions of paragraph (b) shall not apply to an order placed by a manufacturer or dealer for elevator or escalator parts, equipment or accessories to be delivered for further manufacture or for resale for maintenance and repair purposes.

(e) *Miscellaneous provisions*—(1) *Records and reports.* All persons affected by this order shall keep and preserve for not less than two years accurate and complete records concerning inventories, production and sales. All persons affected by this order shall execute and file with the War Production Board, such reports and questionnaires as the War Production Board shall from time to time require. Specific reports and questionnaires will be subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(2) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time. Where the limitations imposed by other L, M or R orders are applicable to the subject matter of this order, the most restrictive limitation shall apply.

(3) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(4) *Appeals.* Any appeal from the provisions of this order other than the restrictions of paragraph (b) (1) shall be made by filing Form WPB–1477 (formerly PD–500) or by letter in triplicate, referring to the provisions appealed from and stating fully the grounds for the appeal. The appeal shall be filed with the field office of the War Production Board for the district in which is located the plant or branch of the appellant to which the appeal relates. No appeal should be filed from the restrictions of paragraph (b) (1).

(5) *Communications.* All reports required to be filed hereunder, and all communications, concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C. Ref: L–89.

Issued this 31st day of August 1944.

INTERPRETATION 1

Paragraph (b) (2) provides that no person shall accept an order (except an approved order) unless the order has been authorized on Form WPB–1236 (this restriction not applying to acceptance of orders exempted under paragraph (d)). An "approved order" (as defined in paragraph (a) (5) (iii)), includes an order for repair or maintenance parts for an elevator or escalator where suspension of operations is imminent because of the necessity for repair and the repair parts are not otherwise available from the purchaser's inventory. A suspension of operations may be considered imminent if the condition of the cables of an elevator or the steps or hand rails of an escalator or of any other parts of an elevator or escalator would make definitely dangerous its continued operation without making the repairs; and such condition may be assumed where the cables, steps, hand rails, or other parts have been condemned pursuant to a state law or municipal ordinance requiring suspension of operations unless their repair or replacement is made within the period (normally 30 to 90 days) specified on the inspector's report. However, a possible future breakdown cannot be considered as meaning that suspension of operations is imminent. [Issued May 29, 1944]

INTERPRETATION 2

ELEVATORS AND ESCALATORS; ORDERS FOR MATERIAL AND LABOR EXCEEDING $500

Some question has arisen as to whether an order rated as AA–5 or higher pursuant to CMP Regulation 5 or 5A is an "approved order" as defined in paragraph (a) (5) (ii) of Order L–89 if material alone cost less than $500 but material and labor installation together exceed $500. An order for material costing less than $500, other than material to be incorporated in a minor capital addition or capitalized under CMP Regulation 5 or 5A, is an approved order, as defined in Order L–89, even though the cost of both material and labor exceeds $500 and even though installation is made by the seller of the material as a normal business practice under a single fee for both material and labor. However, an MRO order for material costing less than $500, which will be incorporated in a minor capital addition or capitalized under CMP Regulation 5 or 5A, is not an approved order, as defined in Order L–89, if the material and labor together amount to more than $500 and the installation is made by the seller of the material as a normal business practice under a single fee. (See Interpretations 8 and 11 to CMP Regulation 5.) [Issued May 29, 1944]

PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[General Limitation Order L–292, as Amended Aug. 31, 1944]

FOOD PROCESSING MACHINERY

The fulfillment of the requirements for the defense of the United States has created a shortage in the supply of materials used in the production of food processing machinery, for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 1226.77 *General Limitation Order L–292*—(a) *Definitions.* For the purpose of this order:

(1) "Processor" means any person engaged in the business of preparing, processing, canning, packing or packaging human or animal foods or tobacco for distribution, including the operation of a food processing plant on a farm. It does not include (i) a person to the extent

that he engages in the production or raising of crops, livestock, or other farm produce; or (ii) a person to the extent that he prepares food for consumption on the premises (such as a hotel or restaurant), or distributes it at retail (such as a grocery or retail meat market); or (iii) governmental agencies processing food for governmental use, hospitals, charitable institutions processing food for their own use, or educational institutions.

(2) "Food processing machinery" means new machinery and equipment, of the kinds specified in Schedule A with a retail sales value of $50 or more for each machine or piece of equipment, excluding (i) refrigerating machinery and equipment as defined in Limitation Order L–38, (ii) machinery and equipment used on a farm for production of food or tobacco or on a fishing vessel for handling food, prior to delivery to a processor, (iii) scales and balances as defined in limitation Order L–190, (iv) conveying machinery as defined in Limitation Order L–193, (v) machinery and equipment used for packaging, filling or labelling containers, except as otherwise indicated in Schedule A, (vi) oil processing machinery and equipment used in processing animal, fish and vegetable fats, oils and greases, and (vii) water filters as water-treating equipment.

(3) "Manufacturer" means any person engaged in the making or assembling of food processing machinery; and includes his subsidiaries and affiliates in the same business.

(4) "Dealer" means any person except a manufacturer engaged in the business of buying and reselling food processing machinery.

(5) "Approved order" means any order for delivery (under sale, lease, consignment or otherwise) of food processing machinery bearing (i) a rating of AA–5 or higher assigned on any WPB or FEA Form listed in paragraph (c) or (ii) a CMP Regulation 5 or 5A rating applied to replace an existing piece of machinery of substantially the same size and capacity, worn out or damaged beyond repair.

(b) *Restrictions on deliveries.* (1) No person shall deliver or accept delivery of food processing machinery except on an approved order. Any person who places an approved order shall in addition to the certification used in applying the rating (Priorities Regulation 3 or 7) give the form number upon which he received the rating, or if the rating was assigned by CMP Regulation 5 or 5A, he shall add to the certification a statement substantially as follows: "This rating was assigned by CMP Regulation 5 (or 5A) and the machinery is ordered to replace other machinery of substantially the same size and capacity, worn out or damaged beyond repair."

(2) The restrictions of subparagraph (1) above shall not apply to: (i) Deliveries to a manufacturer or dealer to enable him to fill approved orders which he has actually received, or to replace in inventory machinery delivered by him to fill approved orders, (ii) delivery of food processing machinery to be used directly by the Army, Navy, Maritime Commission, or War Shipping Administration, (iii) delivery to a manufacturer of food processing machinery to be incorporated into other food processing machinery, or (iv) delivery of food processing machinery from one portion of an enterprise manufacturing, building or assembling it to a portion using it, when the material for its production was obtained by the manufacturer in accordance with Direction 34 of CMP Regulation 1.

(c) *Instructions for obtaining an approved order other than pursuant to a CMP Regulation.* (1) Processors seeking food processing machinery for delivery within the United States or Canada, in order to get a rating should file:

(i) Form WPB–617 with the War Production Board for any food processing machinery which is to be installed as part of a project approved under Order L–41.

(ii) Form WPB–748 with the War Food Administration for all other dairy, egg or poultry processing equipment.

(iii) Form WPB–576 with the War Food Administration for all other canning machinery or equipment.

(iv) Form WPB–3155 with the War Food Administration for all other meat canning, meat packing and meat processing machinery or equipment.

(v) Form WPB–541 with the War Production Board for any other food processing machinery.

(2) All persons, other than processors, seeking any food processing machinery for delivery within the United States or Canada should file Form WPB–541 with the War Production Board.

(3) All persons, including processors, seeking any food processing machinery for export by them to other than Canada should file Form WPB–541 or Form FEA–419, whichever is appropriate with the War Production Board.

(d) *Restrictions on manufacture.* No manufacturer shall make or assemble any new food processing machinery or equipment of the kinds listed on Schedule B except as permitted by production quotas assigned under paragraph (f) of this order. The limitations and restrictions of this paragraph shall not apply to the manufacture of any food processing machine or piece of equipment for which parts weighing, in the aggregate, not less than 75% of the weight of the finished machine or piece of equipment were made before June 5, 1943.

(e) *Conservation of critical materials.* No person shall use stainless steel or tin, copper or copper base alloys, secondary copper-nickel alloys (white metal) made from scrap or remelt, nickel or chromium, in the manufacture or assembly of any food processing machinery except in contact parts or corrosion points. (As used herein "contact parts" means those parts which come in direct contact with any food products. "Corrosion points" mean those parts or fittings, stationary or movable, which are exposed to corrosive action from food products, water or brine and which, if corroded, will interfere with the normal operation of the machinery or equipment.) These restrictions on the use of materials shall not apply to repair parts for food processing machinery produced before June 30, 1943, if parts made of other material would not be interchangeable with the parts to be repaired or replaced. This paragraph also does not restrict the use of copper and copper-base alloys in electrical conductors, bearings, valves, instruments, motors, worm driven gears, and cappers.

(f) *Production quotas.* The War Production Board may at any time issue schedules as amendments to this order, fixing production quotas for certain types of food processing machinery. From the effective date of any such schedule no manufacturer may carry on production except as permitted by the schedule or schedules applicable to the food processing machinery made or assembled by him. The reference to "quota provisions of paragraph (g) (2) (ii) of Order L–292" in schedules issued by the War Production Board before March 11, 1944 shall, for the purpose of such schedules, mean this paragraph (f) of Order L–292.

(g) *Miscellaneous provisions*—(1) *Reports.* On or before the 15th day of each calendar month, each manufacturer shall file a report on Form WPB–2721. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(2) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board as amended from time to time.

(3) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(4) [Deleted Aug. 31, 1944.]

(5) *Communications.* All reports required to be filed hereunder, and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, General Industrial Equipment Division, Washington 25, D. C., Ref: L–292.

(h) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to make or assemble more food processing machinery or equipment (including the kinds listed in Schedule B) than the quotas fixed under paragraph (f) of this order and schedules issued in accordance with that paragraph (including a person who has no quota under this order or the applicable schedule), may apply for permission to do so as explained in Priorities Regulation 25. Any quota restrictions in the applicable schedules based upon the necessity of having rated orders on hand do not apply to production authorized under that regulation.

(2) *Appeals.* Any appeal from the provisions of this order other than the quota restrictions of paragraph (d), paragraph (f) and the schedules issued under paragraph (f), should be made by filing a letter in triplicate with the field office of the War Production Board for the district in which is located the plant to which the appeal relates. No appeal should be filed from the quota restrictions of paragraph (d), paragraph (f) or the schedules issued under paragraph (f).

Issued this 31st day of August 1944.

INTERPRETATION 1

FOOD PROCESSING MACHINERY

Paragraph (a) (5), in defining "approved orders" for food processing machinery, includes orders bearing a preference rating of AA–5 or higher assigned on certain specified forms (WPB–617, 576, 748, etc.) These forms in some cases call for the name and address of the supplier.

In these cases, the information intended is the name and address of the probable supplier. Provided the model actually obtained is substantially identical in value, quality, size, operation and function with that named in the application form, the preference rating may be used to get the product from any manufacturer, dealer or processor who has the product on hand or is authorized to manufacture or acquire it. For example, a rating assigned to purchase a 1" centifugal sanitary pump may ordinarily be used to purchase that size pump from any manufacturer if the value is substantially the same as that of the pump described in the application. On the other hand, a rating assigned for a 6-can-per-minute dairy can washer costing $1000 may not be used to get a 6-can-per-minute can washer costing $2500. Similarly, a rating for a copper lined cheese vat may not be used to get a stainless steel cheese vat.

Approval of the form does not operate to authorize the supplier, whether or not named, to manufacture or acquire the product if that is otherwise prohibited. [Issued March 31, 1944.]

INTERPRETATION 2

FOOD PROCESSING MACHINERY

In accordance with paragraph (f) of General Limitation Order L–292, as amended, certain quota schedules have been established limiting the amount of controlled materials which may be used in manufacturing certain classes of food processing machinery during a specified quota period. The quota is a percentage of the average annual amount of such material consumed during a specified base period. The percentage applies to each controlled material (steel, copper or aluminum) separately. No part of the percentage of one controlled material shall be added to the total percentage of another. However, the permitted percentage of a particular controlled material may be divided in any way between the several categories of such material. For example: where a manufacturer is permitted to consume during the quota period 110% of the average annual amount of steel and copper he consumed during the base period, he is not permitted to apply part or all of his steel quota to his copper quota and thereby exceed his copper quota of 110%. However, he may consume during the quota period such amount of carbon steel and such amount of alloy steel as he chooses provided the aggregate does not exceed 110% of the average annual amount of steel consumed during the base period. This rule is subject to the restriction of any order of the War Production Board against the use of a higher grade or larger quantity of material than is necessary (for example, see paragraph (c) (1) of Order M–9–c, dealing with copper). PART 3290—TEXTILE, CLOTHING AND LEATHER

[Conservation Order M–138, as Amended Aug. 31, 1944]

ISTLE

§ 3290.261 *Conservation Order M–138*—(a) *Definitions.* For the purposes of this order:

(1) "Istle" means raw unprocessed pita and palma istle of the grade "fair average quality" only.

(2) "Istle product" means yarn, roving, or twine or products made therefrom processed from "istle," alone or in combination with other fibers.

(3) "Processor" means any person who processes "istle" or any "istle product."

(4) "Damaged istle" means "istle" that has been rejected by Defense Supplies Corporation, or "istle" upon which an adjustment has been made by an insurance adjuster as a result of any kind of damage making a given bale or bales unsuitable, wholly or in part, for use in the manufacture of products permitted by this order.

(5) [Deleted July 5, 1944]

(6) [Deleted July 5, 1944]

(b) *Importation of istle.* The importation of istle and istle products is subject to the provisions of General Imports Order M–63 as amended from time to time.

(c) *Processing restrictions.* (1) No person shall put into process any istle or istle product, except for incorporation into any of the following products:

(i) Rope.

(ii) Twine, provided only palma istle is used.

(iii) Any product for ultimate delivery to, or for incorporation into any material for ultimate delivery to the Army or Navy of the United States, the Maritime Commission or War Shipping Administration.

(iv) Any product, for the manufacture of which any istle or istle product is allocated in accordance with paragraph (e).

(2) No processor shall use in any calendar month more than 25 per cent of the quantity of palma istle which he used in the period from January 1, 1944, through March 31, 1944.

(d) *Restrictions on the use of damaged istle and damaged istle products.* Any processor or dealer who has in his possession damaged istle defined in paragraph (a) (4), or istle products defined in paragraph (a) (2) that are damaged, shall report to the War Production Board the nature of the damage and the quantity not suitable for the manufacture of the products, or for the end uses permitted by this order. The report shall be by letter setting forth all pertinent facts, including a statement of the portion of each bale or package actually damaged. After making that report and receiving from the War Production Board an acknowledgment which does not object to his claim of damage, he may then use or dispose of the portion of each bale or package, actually damaged and so reported, free from the restrictions of this order. (Note: See paragraph (i).)

(e) *Control and allocation.* The War Production Board may from time to time allocate the supply of istle, and istle products, and specifically direct the time, manner and quantities in which deliveries to or by particular processors shall be made or withheld. It may also direct, permit, or prohibit particular uses of istle, or istle products, by any processor, in connection with the allocation of such material to him. Any direction, prohibition or allocation, pursuant to this paragraph, must, to be valid, be in writing and in the name of the War Production Board.

(f) *Restrictions on deliveries.* No person shall accept delivery of, or purchase any istle or istle product, for any use prohibited by this order. No person shall sell or deliver any istle or istle product to any person whom he knows or has reason to believe is not entitled to receive the same, or to any person who he has reason to believe will put such material to a use prohibited by this order.

(g) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(h) *Applicability of regulations.* This order and all transactions affected thereby are subject to all the applicable provisions of the regulations of the War Production Board, as amended from time to time.

(i) *Reports.* Any person who acquires or puts into process any istle shall report on Form WPB-914, formerly PD-469-Part 1, as required on the form. The reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942. Persons affected by this order shall file such other reports and questionnaires as may from time to time be required, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(j) *Communications.* All reports required to be filed hereunder and all communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Textile, Clothing and Leather Bureau, Washington 25, D. C., Reference: M-138.

(k) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 3291—CONSUMER DURABLE GOODS

[General Limitation Order L-140-a as Amended Aug. 31, 1944]

CUTLERY

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of metals used in the production of cutlery for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3291.175 *General Limitation Order L-140-a*—(a) *Definitions.* For the purposes of this order:

(1) "Cutlery" means any professional food processing cutlery, as defined in Schedule A, any professional kitchen cutlery, as defined in Schedule B, any household kitchen cutlery, as defined in Schedule C, any household table cutlery, as defined in Schedule D, any pocket cutlery, as defined in Schedule E, any scissors, shears and trimmers, as defined in Schedule F, any hand hair or fetlock clippers, as defined in Schedule G, any industrial cutlery, as defined in Schedule H, and any hunting or fixed blade sheath knife, any carving sets, any poultry shears, any implement designed or intended for manicuring, for pedicuring or for extracting blackheads, including but not limited to nail files, nail nippers, nail clippers, pushers, picks, cuticle scissors, cuticle pushers, cuticle clippers and cuticle nippers, and any other hand operated, fixed or folding, cutting blade or fork with a handle or handles of any material attached so as to become an integral part of the implement. "Cutlery" shall not include any article of flatware, as defined in Order L-140-b, when issued, or any of the articles subject to Order L-30-d, as amended from time to time, or surgical instruments.

(2) "Manufacturer" means any person engaged in the business of fabricating or assembling any new cutlery from any raw material, purchased parts or previously used or fabricated material, or who performs any hand or mechanical fabricating or assembling operation on an article of cutlery.

(3) "Process" means the first change by a manufacturer in the form of material (whether raw material, semi or fully fabricated material or finished parts) from that form in which it is received by him, or the first assembly by a manufacturer of material which is not changed in form by him. Any manufacturer who did not maintain records during the base period as to his processing of metals in terms of weight, but who maintained records in terms of units of cutlery only, may apply all percentages contained in this order and schedules in terms of units rather than in terms of weight.

(4) "Base period" means the period beginning July 1, 1940 and ending June 30, 1941, inclusive.

(5) Gauges when referred to in this order, are subject to commercial tolerances.

(b) *Restrictions on kinds of cutlery which may be manufactured.* No manufacturer shall process any metal for new cutlery which is not of a type defined in a schedule in this order.

(c) *Restrictions on quantity of cutlery produced.* No manufacturer shall process more metal in the production of any new cutlery than the amount specified for that class of cutlery in the appropriate schedule attached to this order.

(d) *Exceptions for military orders.* In addition to the production permitted by paragraph (c) above a manufacturer may process sufficient additional amounts of metal to fill purchase orders or contracts for cutlery to be delivered by him to or for the account of

(1) The War Shipping Administration,

(2) The United States Maritime Commission,

(3) The United States Navy (excluding purchase orders placed by or for delivery to United States Navy Ship's Service Departments or United States Marine Corps post exchanges for resale by them within the 48 United States and the District of Columbia and not for use as equipment). The War Production Board may specifically authorize on Form WPB-1319, pursuant to an application filed on said Form, the filling of purchase orders for cutlery for delivery to United States Navy Ship's Service Departments or United States Marine Corps post exchanges for resale within but for use outside the 48 United States and the District of Columbia. Form WPB-1319 is to be filed and executed only by the Bureau of Naval Personnel, Navy Department, Washington, D. C., and if a specific authorization is granted, such authorization will be forwarded to the manufacturer specified

(4) The United States Army (excluding purchase orders placed by or for delivery to United States Army post exchanges for resale by them within the 48 United States and the District of Columbia and not for use as equipment). The War Production Board may specially authorize on Form WPB-1319, pursuant to an application filed on said form, the filling of purchase orders for cutlery for delivery to and use by post exchanges located in areas designated by the United States Army as "staging areas." Form WPB-1319 is to be filed and executed only by the Army Exchange Service of New York, and if a specific authorization is granted, such authorization will be forwarded to the manufacturer specified.

(e) *Specifications.* No manufacturer shall process any metal for the production of any new cutlery which does not conform to the specifications contained in the applicable schedules in this order.

(f) *Metal restrictions.* No manufacturer shall process any metals other than iron, carbon steel, alloy steel (if not containing nickel), aluminum, magnesium, gold and silver in the production of cutlery, except

(1) Lead for bolsters or rivets;

(2) Chromium for plating;

(3. Zinc as provided in Schedule G and H of this order subject to the restrictions contained in the M-11 series, as amended from time to time.

(4) Copper and copper base alloy not containing nickel, except in impurities, as provided in Schedule E of this order for linings and rivets of pocket knives.

(g) *Hardness of knife blades and sharpening steels.* No manufacturer shall process any steel for the production of:

(1) Knife blades for cutlery which when finished tests less than 45, Rockwell C Scale;

(2) Sharpening steel which when finished tests less than 62, or more than 68, Rockwell C Scale.

(h) *Special provision affecting distribution of overruns, rejects and cancellations.* When material for the production of cutlery is obtained with priorities assistance and, because of cancellations of orders or other reasons, can no longer be used for the purpose for which the assistance was given, such material may only be used as allowed in § 944.11, paragraph (b) of Priorities Regulation No. 1. Similarly, when such material has been manufactured into cutlery to fill a specific contract and that cutlery, because of overruns, rejects, cancellations or other reasons, cannot be used for that purpose, it may be used or disposed of only as allowed in that section. One of the ways in which these materials or products may be used or disposed of is outlined in subparagraph (5) of that paragraph, which permits use and disposal in any manner specifically authorized in writing by the War Production Board. Applications for such authorization may be made on Form WPB-1319.

(i) [Deleted Aug. 31, 1944]

(j) [Deleted Aug. 31, 1944]

(k) *Reports.* (1) Before making any cutlery every manufacturer of cutlery shall execute and file in duplicate with the War Production Board, Washington 25, D. C., Ref: L-140-a, a report as to the aggregate amount of all metals processed by that manufacturer during the base period and grouped in accordance with the classes as specified in the definitions contained in the individual schedules attached to this order. Manufacturers who compute their processing of metals in units in accordance with paragraph (a) (3) of this order may file such report in units. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(2) Every manufacturer affected by this order shall execute and file with the War Production Board, Washington 25, D. C., Ref.: L-140-a, on or before the 10th day of July, 1943, and on or before the 10th day of each calendar month thereafter, Form WPB-1600 (formerly PD-855).

(l) *Applicability of other orders and regulations.* This order and all transactions affected by this order are subject to the applicable regulations of the War Production Board. If any other order of the War Production Board limits the use of any material in the production of cutlery to a greater extent than does this order, the other order shall govern unless it states otherwise.

(m) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

(f) *Restrictions on production of replacement batteries for passenger automobiles, light, medium and heavy trucks, truck tractors, truck trailers, passenger carriers and off-the-highway motor vehicles.* (1) No producer shall, during any calendar quarter of 1944, manufacture automotive replacement storage batteries in excess of the number (hereinafter referred to as "quota") obtained by multiplying the percentage shown below for that calendar quarter of 1944 by the total number of such batteries sold by him during the calendar year 1941:

Calendar Quarter of 1944:	*Percentage of 1941 sales*
January 1 to March 31	22½
April 1 to June 30	22½
July 1 to September 30	30
October 1 to December 31	25

(2) Notwithstanding subparagraph (1) of this paragraph (f), a producer may, in addition to the quotas permitted thereby,

(i) Manufacture during the second, third and fourth calendar quarters of 1944 that number of replacement batteries by which he failed to reach his full quota during the next preceding calendar quarter, *Provided,* That this additional production does not exceed 5% of the number of replacement batteries sold by him during the calendar year 1941; and, in addition,

(ii) Manufacture during the first, second and third calendar quarters of 1944 not in excess of 5% of the number of such batteries sold by him during the calendar year 1941, provided he deducts such number from his quota for the next succeeding calendar quarter of 1944; *And provided further,* That in no event shall any producer manufacture during the calendar year 1944 a number of such replacement batteries in excess of 100% of the number of such batteries which he sold during the calendar year 1941.

(3) *Additional 10% production authorized in 1944.* In addition to the production authorized by subparagraphs (1), (2) (i) and (ii) of this paragraph (f), producers may manufacture replacement batteries during the period January 1, 1944 to December 31, 1944 in an amount equal to 10% of the total number of such batteries sold by the producer during the calendar year 1941 or the calendar year 1943, whichever is higher, except as provided in subparagraph (5) below. In no event, however, shall the production of any producer for the year 1944 exceed 110% of the number of replacement batteries sold by him during the calendar year 1941 or the calendar year 1943, whichever is higher.

(4) *Foregoing not applicable to producers of less than 25,000 units.* The restrictions on production of replacement batteries contained in this paragraph (f) (1) and (2) (i) (ii) and (3) shall not apply to a producer who during the year 1941 sold less than 25,000 replacement batteries; *Provided, however,* That during the year 1944 his total production shall not exceed 25,000 units.

(5) *Plants in Group I Labor Market Areas not authorized to increase production.* On and after January 1, 1944, no producer whose plant is located in a Group I Labor Market Area as classified by the War Manpower Commission as of January 1, 1944, shall produce replacement batteries in any such plant in excess of 100% of his sales of batteries produced in that plant in the calendar year 1941 or the calendar year 1943, whichever is higher.

(6) *Production in excess of 110% limitation may be authorized.* Any producer having a plant which is not located in a Group I or Group II Labor Market Area who believes that such plant has capacity available to produce replacement batteries in excess of 110% of the sales of batteries produced at such plant in the calendar year 1941 or in the calendar year 1943, whichever is higher, may file an application in writing at the Field Office of the War Production Board nearest to such plant, for leave to increase production at such plant. Such application shall contain a full statement of the plant's capacity, the labor presently employed and the additional production which can be secured, by quarters. Thereupon the War Production Board may authorize an increase in the production of replacement batteries at such plant in such quantities and upon such conditions as it shall find requisite in the public interest. Such authority will be issued either in the form of individual letters or by published Directions supplemental to this order.

(g) *Restrictions on inventories of producers of automotive replacement bat-*

teries. (1) No producer shall have in inventory on the first day in any month a stock of replacement batteries and rebuilt batteries as defined in paragraphs (c) (8) and (9) above, in excess of one third of the number of batteries sold by him during the calendar year 1941.

(h) *General restrictions*—(1) *Return of used batteries.* On and after August 29, 1942, no producer or distributor shall sell or deliver a new or rebuilt replacement battery to any consumer unless such consumer delivers to the seller concurrently with his purchase one used battery of the same size or larger for each replacement battery delivered to such consumer. The provisions of this paragraph (h) (1) shall not apply to any Federal or Territorial department, bureau or agency, State or political subdivision thereof, which is forbidden by law from making such disposal of used batteries.

(2) *Consumer's certificate.* Notwithstanding the provisions of paragraph (h) (1) above, a producer or distributor may sell and deliver a replacement battery to a consumer without receiving a used battery in exchange therefor provided that: (i) The producer or distributor does not install such replacement battery in the consumer's vehicle; and (ii) the consumer signs and delivers to the producer or distributor with each purchase order (or written confirmation thereof if such order is placed by telephone or telegraph) a certificate in the following form:

Consumer's Certificate

I hereby certify that: (a) the replacement battery specified on this order is essential for the operation of a vehicle I now own or operate; (b) the replacement battery will be used only to replace a battery, which to the best of my knowledge, cannot be economically reconditioned; and (c) I will, within thirty days after receiving the replacement battery here ordered, dispose of through scrap channels a used automotive battery (excepting in the event of the loss or theft of such battery) of similar size for each replacement battery delivered to me.

A copy of each such certificate must be retained by the producer or distributor as part of his records.

(3) *Electric fence user's certificate.* Notwithstanding the provisions of paragraph (h) (1) above, a producer or distributor may sell or deliver a replacement battery to a consumer without receiving a used battery in exchange therefor, provided that the consumer purchases the battery for use in connection with an electric fence or other piece of farm machinery which had formerly been operated in whole or in part by dry cell batteries, and provided further that the producer or distributor secures from the consumer, for each purchase order (or written confirmation thereof if such order is placed by telephone or telegraph) the consumer's signature to a certificate, to be supplied by the producer or distributor, in the following form:

Provisions Relating to Production

(c) *General policy.* In processing applications for priorities assistance on Form CMP-4B, the War Production Board will be guided by the policy that the total production will not exceed the approved WPB program for the products to which this order applies and that the production in any one plant, or labor requirements therefor, will not interfere with war production in that plant or in any other plant located in the same area.

(d) *Restrictions on production of individual items*—(1) *No production of Schedule A items.* Except to fill military orders, no producer shall manufacture any item listed in Schedule A.

(2) *Limitation on production of Schedule B items.* Except to fill military orders, no producer shall manufacture in any calendar quarter any item listed in Schedule B in excess of fifty (50) percent of the number of the like item manufactured by him in the corresponding calendar quarter in 1941.

(i) *Provision for minimum factory runs.* In the event that the limitation imposed by this paragraph (d) (2) should result in restricting production to less than his minimum practical factory run of any item listed in Schedule B, a producer may, notwithstanding the provisions of paragraph (d) (2), manufacture a minimum practical factory run: *Provided,* That the total number of any such item manufactured by him in any two consecutive calendar quarters shall not exceed fifty (50) percent of the total number of the like item manufactured by him in the two corresponding calendar quarters of 1941.

(3) *Limitation on production of Schedule C items.* Except to fill military orders, no producer shall manufacture in any calendar quarter any item listed in Schedule C in excess of one hundred (100) percent of the number of the like item manufactured by him in the corresponding calendar quarter of 1941.

(4) *Limitation on production of Schedule D items.* Except to fill military orders, no producer shall manufacture in any calendar quarter any item listed in Schedule D in excess of one hundred (100) percent of the number of the like item manufactured by him in the corresponding calendar quarter of 1941, unless a quarterly quota in excess of one hundred (100) percent of the corresponding quarter of 1941 production has been assigned to the producer under the following procedure:

(i) *Special quotas on Schedule D items.* A request for assignment of a special quota for production of any item listed in Schedule D, in excess of one hundred (100) percent of the number of the like item manufactured by him in the corresponding quarter of 1941, may be made by a producer who can increase production within the limitations of paragraph (c).

Such a producer may file an application in writing with the Automotive Division of the War Production Board, Washington 25, D. C., Ref: L-270, for permission to increase production at such plant by giving complete explanation of the circumstances justifying such increase. Thereupon the War Production Board may authorize an increase in the production of the item at such plant in such quantities and upon such conditions as it shall find requisite in the public interest. Such authority will be issued either in the form of individual letters or by published directions supplemental to this order.

The War Production Board may likewise direct an increase in the production of items on Schedule D in conformity with paragraph (c), in such quantities and upon such conditions as it shall find requisite in the public interest.

(e) *Limitation on production of repair parts.* Except to fill military orders, no producers shall manufacture in any calendar quarter a dollar volume of repair parts for automotive maintenance equipment in excess of ten (10) percent of the total dollar volume of automotive maintenance equipment manufactured by him in the corresponding calendar quarter of 1941.

Provisions Relating to Critical Materials

(f) *Use of steel.*[1] No producer shall use any steel or other critical materials in the manufacture of automotive maintenance equipment where the use of less critical materials is practicable, and when so used such steel or other critical materials shall be reduced to the minimum quantity and grade necessary for the proper operation of the automotive maintenance equipment.

(g) *Use of copper.*[1] No producer shall use any copper products or copper base alloy products in the manufacture of automotive maintenance equipment other than in the following: (i) conductors of electrical current, (ii) bearings, bushings, thrust washers and similar parts which require oil, grease or water lubrication, (iii) valve seats, tubes, and similar parts where condensation or corrosion make substitutions of less critical materials impracticable: *Provided,* That any copper products or copper base alloy products so used shall be reduced to the minimum practical gauge, size and grade necessary for the proper operation of the automotive maintenance equipment.

Provisions Relating to Distribution

(h) *Sales by producers only on rated orders.* No producer shall sell, transfer or deliver, on consignment or otherwise, any item on Schedules A, B, C or D, except pursuant to orders bearing preference ratings of AA-5 or higher:

(1) Assigned on Forms WPB-541 (PD-1A), on Form WPB-542 (PD-3A), on Form WPB-547 (PD-1X), or on Canadian Form PB-1010.

(2) Assigned on export licenses or requisitions approved by Foreign Economic Administration.

(3) Assigned pursuant to application on Form CMP-4B, on CMP-4A, on Canadian Forms PB-1005, on PB-1006, or on PB-1007 and used only for the procurement of items on Schedules A, B, C or D to be physically incorporated in other end-products. The use of preference ratings assigned on these forms is prohibited for the procurement of any items on Schedules A, B, C or D for resale as such.

(i) *Sales of stationary crankshaft regrinders only on WPB-1319 ratings.* On and after June 1, 1944, notwithstanding the provisions of paragraph (h), no producer shall sell, transfer or deliver, on consignment or otherwise, any stationary crankshaft regrinders, except to fill military orders or pursuant to ratings assigned on Form WPB-1319.

(j) *No ratings required for repair parts.* No preference ratings are required for the purchase of repair parts for automotive maintenance equipment.

Miscellaneous Provisions

(k) *Quarterly reports by producers on Form WPB-3614.* Each producer of automotive maintenance equipment shall execute and file with the Automotive Division of the War Production Board within fifteen days after the close of each calendar quarter a report, (on Form WPB-3614), of the number of units of

[1] See latest quarterly copy of publication entitled, *Material Substitution and Supply List.* Conservation Division, War Production Board.

each item listed in Schedules A, B, C or D produced by him in such calendar quarter. The reporting provision of this order has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(l) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to manufacture any automotive maintenance equipment or repair parts which he is not permitted to make under paragraphs (d) or (e), or who wants to make more automotive maintenance equipment or repair parts than permitted under those paragraphs, may apply for permission to do so as explained in Priorities Regulation 25. SUN GLASSES

The fulfillment of requirements for the defense of the United States has created a shortage in the supply for defense, for private account and for export of materials entering into the production of sun glasses and sun glasses cases; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3296.76 *General Limitation Order L–238*—(a) *Definitions.* For the purposes of this order:

(1) "Sun glasses" means spectacles or goggles designed primarily to protect the wearer's eyes from sun-glare and other harmful or discomforting rays of the sun.

(2) "Sun glasses case" means a case or container designed for carrying sun glasses when not being worn.

(3) "Aviation sun glasses" means sun glasses designed for use in aircraft by pilots, observers and other aircraft personnel.

(4) [Revoked May 9, 1944]

(b) *Restrictions on the use of metals.* Except as provided in paragraph (c) of this order, no person shall incorporate any metal in the manufacture of sun glasses or any part thereof or sun glass cases or any part thereof.

(c) *Exceptions to paragraph (b).* (1) The provisions of paragraph (b) of this order shall not apply to the manufacture of sun glasses or sun glasses cases which are manufactured:

(i) [Revoked May 9, 1944]

(ii) From metal to the extent permitted by Appendix A, attached to this order.

(iii) From copper base alloys obtained from idle or excess inventories pursuant to Priorities Regulation 13. (Any person who purchases component parts containing copper base alloy may use those parts in the manufacture of sun glasses or sun glasses cases, unless he knows or has reason to believe that the parts were not made from copper base alloy obtained from idle or excess inventories pursuant to Priorities Regulation 13.)

(2) The provisions of paragraph (b) of this order shall not apply to the manufacture of aviation sun glasses which are manufactured pursuant to a contract or purchase order for delivery to or for the account of (i) the Army or Navy of the United States, or (ii) any agency of the United States Government for delivery to or for the account of the Government of any country pursuant to the Act of March 11, 1941, entitled, "An Act to Promote the Defense of the United States" (Lend-Lease Act), *Provided*, That the specifications of such contract or purchase order specify aviation sun glasses which cannot be manufactured within the limitations of paragraph (b) and (c) (1) of this order. Notwithstanding the provisions of Priorities Regulation 17, the foregoing provisions of this paragraph (c) (2) shall not apply to any contract or purchase order for delivery to or for the account of any United States Army or Marine Corps Post Exchange or any United States Navy Ship's Service Department. (f) *Violations and false statements.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(g) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to manufacture more sun glasses than the quota fixed in paragraph (d) (including a person who has no quota under this Order) may apply for permission to do so as explained in Priorities Regulation 25. The restrictions of paragraph (b) on the use of metals continue to apply to production which may be authorized under Priorities Regulation 25.

(2) *Appeals.* Any appeal from the provisions of this Order, other than the restrictions of paragraph (d), shall be made by filing a letter in triplicate to the War Production Board, Washington 25, D. C., Reference L–238, referring to the particular provision appealed from and stating fully the grounds of the appeal. No appeal should be filed from the restrictions of paragraph (d)."

(h) *Communications.* All reports to be filed hereunder and communications concerning this order shall, unless otherwise directed, be addressed to the War Production Board, Safety and Technical Equipment Division, Washington 25, D. C., Ref: L–238.

Issued this 31st day of August 1944.

The use of certain material in the manufacture of sun glasses or parts and the number of sun glasses which may be manufactured are prohibited or restricted by the terms of General Limitation Order L–238, with certain exceptions stated in the order.

Such provisions also apply to the assembly of sun glasses. Thus, any person who assembles or combines parts of sun glasses, such as frames and lenses, is manufacturing sun glasses and is governed by the terms of General Limitation Order L–238. [Issued May 11, 1944.]

PART 1226—GENERAL INDUSTRIAL EQUIPMENT

[Limitation Order L–128, as Amended Aug. 31, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of certain critical materials (including components) and facilities used in the manufacture of general industrial equipment for defense, for private account and for export; and the following order

is deemed necessary and appropriate in the public interest and to promote the national defense.

§ 1226.1 *General Limitation Order L–123*—(a) *Equipment which may not be delivered without an AA–5 or better rating.* No person (including a manufacturer, distributor, or dealer) shall accept any order for or deliver, and no person shall accept delivery of, any new item of the following equipment (more fully described in the attached List A) except for an order bearing a preference rating of AA–5 or higher:

Deliveries within a company. The above restriction applies to deliveries from one department (a branch, division, or section) of a single organization to another department of the same organization when the item is for incorporation into other machinery produced by that organization, or when it is for installation and operation for the organization's own use.

The restriction does not apply to deliveries from one department to another of the same organization, of items which it is to resell as such.

(b) *Certain transactions for which no rating is required by this order.* The above restriction does not apply to the following transactions:

(1) *Repair parts.* Delivery of repair parts for any item (but no complete item may be considered as a repair part and delivered under this exemption, even though it could be used as a component part of another item or of machinery not covered by this order).

(2) *Farm supplies.* When items which are farm supplies under Priorities Regulation 19 are delivered to a farmer or dealer upon a certificate in accordance with that regulation.

(3) *Petroleum industry item.* When items used in the petroleum industry and covered by Order P–98–c are delivered in accordance with that order.

(4) *Items no longer needed.* When an item is returned to the person from whom it was obtained, or when it can no longer be used for the purpose for which priorities assistance was given to help obtain it and the holder disposes of it in accordance with applicable provisions of Priorities Regulations 1 or 13.

(5) *Items ordered and put in transit before the restriction became applicable.* The completion of delivery of items which had been placed in the hands of a common or contract carrier for shipment to the customer prior to the date upon which the restriction in (a) became applicable.

(6) *Certain orders rated below AA–5 but unfilled when restriction became applicable.* Delivery to fill any rated order which was rated below AA–5 and could have been filled just before the date upon which the restriction in (a) became applicable without violating any WPB order, rule or regulation.

(7) *Deliveries of machinery not covered by this order.* The delivery of new machinery, not covered by this order, into which an item has been incorporated as a necessary component part (or which is delivered in unassembled condition with an item which is a necessary component part, for assembly at the site of installation).

(8) *Used items.* The delivery of any item which has been sold to a person acquiring it for use, and put into regular use by him.

(9) *Specific authorizations.* Deliveries specifically authorized or directed by the War Production Board.

(10) *The replacement of a fractional horsepower electric motor or generator which is traded-in when repair is needed.* When a fractional horsepower electric motor or generator is delivered to a householder or other user solely for replacement of a used one which needs repair and the seller, in accordance with his regular business practice, takes the broken down or defective motor or generator in trade and repairs it or delivers it to another person who will repair it (whenever repair is practicable) so that it will be resold under similar conditions (or scraps it promptly when repair is impracticable).

(It must be noted that no repairman or other person may deliver such an item unless he either complies with the foregoing conditions, or receives a AA–5 or higher rating for the delivery from his customer, even though he has obtained the items under a regulation or order which assigns a rating for repair or maintenance purposes, such as the following: CMP Regulations 5, 5A, or 9A; or Orders L–79, P–126, or P–148.)

This exemption permits a dealer not having repair facilities to deliver such a traded-in motor or generator, if it is repairable, to the manufacturer or some other supplier who will repair it or have it repaired within a reasonable time, and get one in exchange without a AA–5 or higher rating. The manufacturer or other supplier who is asked to deliver a new item to a dealer in exchange for a used one is responsible for determining if the traded-in item is repairable.

(11) *Portable air compressors owned and used in a rental business.* When portable air compressors owned by a person engaged in the business of renting them, are leased by the owner. This exemption does not apply to the sale of a new item by such owner, or to the original purchase of the items by him.

(12) *Delivery to a consumer of an item for plumbing or heating repair.* When an item is delivered to a consumer for plumbing or heating repair upon a certificate from the latter in accordance with Order L–79.

(13) *Deliveries of replacement parts for motor vehicles.* When replacement parts for motor vehicles are delivered to any person in accordance with Order L–158.

(14) *Deliveries under Priorities Regulation 24.* Delivery of any item under and in accordance with Priorities Regulation 24.

(c) *Miscellaneous provisions*—(1) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as issued and amended from time to time.

(2) *Violations.* Any person who wilfully violates any provision of this order or who, in connection with this order wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(3) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter, in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal. The letter should be filed with the field office of the War Production Board in the district in which is located the plant or branch of the appellant to which the appeal relates.

(4) *Communications.* All reports required to be filed hereunder, and all communications (except appeals) concerning this order, shall, unless otherwise directed, be addressed to the War Production Board, General Industrial Equipment Division, Washington 25, D. C. Ref. L–123.

Issued this 31st day of August 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

PART 1029—FARM MACHINERY

[Limitation Order L-257, as Amended Aug. 31, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of critical materials entering into the manufacture of farm machinery and equipment and repair parts therefor, for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1029.15 *Limitation Order L-257*—(a) *What this order does.* This order describes the rules governing the manufacture of farm machinery and equipment and repair parts for sale in the continental United States and possessions. (Manufacture for export is covered by Order L-257-a.) To aid manufacturers in planning a continuour production cycle, it is the intention that this will be the basic order from year to year. However, it is expected that a new schedule of quota percentages will be issued as a part of the order each year for the "current quota period" starting July 1 of that year, and this will become the "applicable schedule" for that period. For example, the applicable schedule for the period July 1, 1943 to June 30, 1944, is Schedule A; for the following twelve-month period starting July 1, 1944, the new applicable schedule might be called Schedule B, etc. In order that producers may plan their production and order materials in advance, they may assume that the schedule in effect at any particular time will continue into the next "current quota period", until such time as a new schedule is issued. There is no quota limitation on repair parts or attachments:

In addition to quota and other limitations on manufacture, this order also has rules on the filing and approval of production schedules, covering machinery and equipment (both farm and non-farm) and repair parts. Producers affected must stick to their schedules, with certain exceptions, so that the various programs, both farm and non-farm, can be met on time.

(b) *Definitions.* For the purpose of this order (and any orders supplementary hereto, unless otherwise indicated):

(1) "Producer" means any person, other than a supplier, engaged in the manufacture (in the United States) of farm machinery and equipment or of attachments or repair parts for farm machinery and equipment.

(2) "Small producer" means any producer whose total net sales (including exports and sales by affiliates) of all products did not exceed $100,000 during the calendar year 1941; and includes any other producer who has been classified by the Smaller War Plants Corporation as a "smaller, distressed producer" and is specifically designated as such for the purpose of this order by the War Production Board, on such terms and conditions as may be proper.

(3) "Manufacture" means to put into process, machine, fabricate, or otherwise alter materials by physical or chemical means.

(4) "Supplier" means any person engaged in the manufacture (for sale to a producer in the United States) of materials, parts, assemblies or subassemblies to be physically incorporated into farm machinery and equipment or repair parts manufactured by such producer, or to be resold by such producer as repair parts.

(5) "Machinery and equipment" means agricultural machinery, mechanical equipment and implements (including all attachments used in conjunction therewith) of the types ordinarily manufactured for farm use, and listed on the applicable schedule attached hereto.

(6) "Farm use" means use for the production or care of crops, livestock, livestock products, or other produce on a farm (or elsewhere in the case of poultry). The term also includes use for the production or care of crops in "victory gardens" with respect to atomizing hand sprayers, hand dusters, wheel-type hand cultivators and wheel-type hand plows, and use for any civilian purpose with respect to horseshoes, muleshoes, oxenshoes and harness hardware.

(7) "Farm machinery and equipment" means machinery and equipment which is manufactured specifically for farm use, including irrigation and drainage equipment (excluding tile), horseshoes, muleshoes, oxenshoes, harness hardware, and water well casing (fabricated by other than pipe mills); but excluding repair parts, and also excluding all of the following: tracklaying type tractors, fencing, poultry netting and wire, wire fencing, bale ties or straps, oil well casing and water pipe, grain bins and corn cribs, water storage tanks, nails (all kinds), and sundry hardware (including hand tools, chains, barn door track, pulleys, scales, and similar items not specified on the applicable schedule).

(8) "Non-farm machinery and equipment" means machinery and equipment, as defined in paragraph (b) (5) above, which is manufactured pursuant to rated orders for any purpose other than farm use and includes industrial models of wheel-type tractors (CMP Code 319) not ordinarily manufactured for farm use.

(9) "Attachment" for machinery and equipment means a supplementary appliance which may be added to an otherwise complete machine to extend the utility of such machine. No item (other than Item No. 313) listed on the applicable Schedule shall be deemed an attachment.

(10) "Repair parts" means all types of replacement parts considered separately or as assemblies which are manufactured for use and used in the repair and maintenance of "farm machinery and equipment" and shall include plow shares and shapes, and water pump cylinders. No item listed on the applicable schedule shall be deemed a repair part.

(11) "Base production" means the weight of a producer's total manufacture in the United States of any item of farm machinery and equipment for sale in the United States during either the calendar year 1940 or 1941, in whichever year such weight was the greater.

(12) "United States" means the forty-eight states, the District of Columbia, Alaska, Hawaii, Puerto Rico, the Virgin Islands, and all other territories and possessions of the United States.

(13) "Current quota period" means the twelve-month period which starts July 1 of any year and ends June 30 of the following year, as identified on the applicable schedule.

(14) "Applicable schedule" means the particular schedule relating to a current quota period, and fixing manufacturing quotas (for sale in the United States) for each item listed for that period.

(c) *Restrictions on production for domestic farm use*—(1) *Manufacturing quotas.* During any current quota period, no producer shall manufacture, for sale in the United States, more of any item of farm machinery and equipment (by weight) than his quota for that item. This quota is figured by taking the percentage shown for the item on the applicable schedule, and multiplying it by his base production of the item. Exceptions to this general rule are stated in paragraph (d). Special restrictions are set forth in subparagraph (2) below and in paragraph (f).

(2) *Special restrictions.* (i) The quota for items of farm machinery and equipment for any person who had no "base production" in 1940 or 1941 is limited to an aggregate value of not more than $2,500 during any current quota period. This limit does not apply to repair parts or attachments under paragraphs (d) (1) and (d) (3), nor to any production under Direction 3 to this order, nor to any item which may be specifically removed from quota limitations.

(ii) No item which is not provided for in the applicable schedule shall be manufactured as "farm machinery and equipment" for sale in the United States.

(iii) No person shall manufacture for sale in the United States any item of farm machinery and equipment requiring rubber tires except the following items:

Wheel type tractors including garden type.
Combines.
Pick-up hay balers and field hay harvesters.
Corn pickers.
Power sprayers over ten gallons per minute.
Any item requiring tires to be mounted on wheel rims of the following sizes (diameter): 15", 16", 18", 20" and 21".

(iv) No producer who is not a "small producer" shall manufacture, for sale in the United States, any item of farm machinery and equipment or repair parts (or non-farm machinery and equipment) except to the extent listed on an approved production schedule under paragraph (e).

(3) *Adjustments in quotas.* The War Production Board may, by specific written directions or authorizations issued to any producer or other person affected by this order, increase or decrease any quota or authorized use of materials; and may transfer any portions of quotas between producers, taking into account the amount and weight of materials to be used, the need for particular items at the time required in particular areas, the labor and transportation situation in the manufacturing areas involved, and such other factors as may be proper.

(d) *Exceptions*—(1) *No quota for repair parts.* Producers may manufacture repair parts for sale in the United States without any restrictions as to quota. However, they must comply with paragraph (e) with respect to production schedules.

(2) *Bracketed items.* Wherever, in an applicable Schedule, two or more items are bracketed together, the producer must apply the individual percentages to his base production of each item in the bracket and add up the various weights. This total permissible weight may then be distributed among all or any one or more of the items in that bracket as he chooses (regardless of the individual quota percentages).

(3) *No quota restrictions on attachments.* "Attachments" may be manufactured for sale in the United States without any restrictions as to quota. However, it is necessary to comply with paragraph (e) with respect to production schedules.

(4) *Small producers.* Any "small producer" may use the quota percentage "100%" instead of the quota percentage listed on any applicable schedule for any item or items which he makes, but only to the extent that the weight of his total manufacture of all items of farm machinery and equipment during the current quota period does not exceed, in the aggregate 100% of his base production of these items. In addition, small producers do not have to comply with certain provisions of this order with respect to production schedules or monthly reports, as stated in subparagraph (c) (2) (iv) and paragraphs (e) and (k). However, this does not relieve them from complying with all CMP Regulations and procedures.

(5) *Production before or after current quota periods*—(i) *Advance planning of production.* Before the beginning of any current quota period, producers may plan their production, order materials and start initial fabrication in accordance with the applicable schedule for the coming period. For this purpose, until such time as a new applicable schedule is issued, it may be assumed that the schedule currently in effect will apply for this next period. In other words, the schedule in effect is always the "applicable schedule" unless and until displaced by a new schedule.

(ii) *Carry-over of uncompleted portions of quotas.* Any portions of quotas for sale in the United States under an applicable schedule (including all amendments appeals and specific authorizations) which are not completely manufactured by the end of the current quota period, may be carried over and added to the corresponding quotas of the next current quota period but only to the extent that they can be completed by July 31 of this next period. However, uncompleted quotas (domestic, and those under Schedule B-6) under Order L-170 may be carried over as explained above for completion any time before June 30, 1944. In addition, uncompleted quotas for the following items of harvesting machinery and equipment under Schedule A (including special authorizations, etc.) may be carried over for completion any time before September 30, 1944:

Combines (Items 126 and 126a only).
Corn binders (Items 132 and 132a only).
Corn pickers (Items 133–136).
Field ensilage harvesters (Item 137).
Peanut pickers (Item 161).
Corn shellers (Items 166 and 167 only).
Hay balers (Items 172, 172a and 172b only).
Feed grinders and crushers (Items 174, 175, and 175a only).
Portable elevators (Item 188).

(6) *Substitute materials.* Any person may manufacture for sale in the United States the following items, without regard to the restrictions of this order, if they are made from the substitute materials listed:

Bee hives.
Farm gates.
Feed trucks.
Grit boxes.
Hog troughs.
Laying nests.
Livestock feeders.
Milk stools.
Poultry feeders.
Poultry waterers.

These items are unrestricted only if they are made entirely (except for nails and essential strappings and fastenings, and except for doors in the case of livestock feeders) from any one or more of the following materials:

NOTE: List amended July 14, 1944.

Glass or other ceramic products.
Plain concrete.

Some of the items listed above are also given quotas on the applicable schedule. These quotas apply only to the extent that the items are to be made from iron or steel.

NOTE: See Direction 3 to this order which removes quota restrictions under certain conditions.

(7) *Substitution for critical materials encouraged.* If the weight of any item of farm machinery and equipment manufactured by a producer has been or will be increased by his substituting for more critical materials any of the materials listed above in subparagraph (d) (6), he may still manufacture in any current quota period the number of units which would have been within his domestic quota before making the substitution. Also a producer may apply for additional quota for any item in which he can substitute these materials entirely for more critical materials.

(8) *Assignments of quota.* All assignments of quota specifically authorized by appeal under Limitation Order L-170 for the period starting November 1, 1942, or under this Order L-257, are re-authorized for each current quota period. The assignee, in figuring his additional quota, must take the percentage on the applicable schedule for each item transferred and multiply it by the assignor's base production of that item. The assignor's quota is, to that extent, revoked.

(e) *Production schedules*—(1) *AA-2 for purpose of scheduling production.* Producers and other persons authorized to manufacture under this order may schedule their production of items of farm machinery and equipment and repair parts as if the orders for these items bore a rating of AA-2.

(2) *Production schedules must be filed: exemption for "small producers".* With respect to each item of machinery and equipment (both farm and non-farm) and repair parts, each producer must file a production schedule on Form WPB-3181, listing the quantities he plans to have available for shipment (within his quota and other authorizations under this order) to various classes of customers, in accordance with the instructions on the form. This production schedule is deemed approved as filed, unless the producer is notified in writing to the contrary by the War Production Board. "Small producers" do not have to file this form.

(3) *Items on approved schedule to be available for shipment; changes in schedule.* Each producer must have available for shipment each month to each class of customer the quantities of each item and of repair parts as indicated on his approved schedule. However, he may complete (within his approved total) more than his schedule in any month, except that, in the case of wheel-type tractors, a producer may not complete in any calendar quarter more tractors than the total shown on his approved schedule for that quarter, plus any approved amounts scheduled but not completed in previous quarters. He may also, if necessary, delay completion of any quantities scheduled for any class of customer for any month up to the last day of the next month. Any other change in an approved schedule must be reported on Form WPB-3181 and the change will be deemed approved as filed, unless the producer is notified in writing to the contrary by the War Production Board.

(4) *Deliveries for farm use protected.* A producer must deliver all quantities of items and repair parts listed on an approved schedule (WPB-3181) for farm use and for export without regard to preference ratings, unless otherwise specifically directed in writing by the War Production Board. Small producers may deliver items for farm use and for export without regard to any orders bearing preference ratings of AA-2x or lower.

(f) Further restrictions. (1) [Deleted Mar. 23, 1944]

(2) *Restrictions on sale for domestic use.* Subject to such directions as may be issued from time to time as to rationing control by the War Food Administrator, no person shall sell any item of new farm machinery and equipment (except poultry equipment, horseshoes, muleshoes, oxenshoes, and harness hardware) which was manufactured for sale in the United States, and which he knows or has reason to believe will not be used in the hands of the ultimate consumer for farm use, except to fill a contract or purchase order bearing a preference rating of AA-4 or higher. If the rated order is for an item which farmers can get only by furnishing purchase certificates under Food Production Order 14 or any other applicable regulation of the War Food Administration, the seller must not fill the order from stock. However, in the following special cases,

the seller may sell any of these items from stock for non-farm use on an order rated AA–4 or higher:

(i) If the item is in his stock as a replacement for one previously sold on a rated order, or

(ii) After he has extended the rated order to his supplier and has actually received the particular item, or

(iii) If the rated order is placed with him directly by the Army or Navy (and not indirectly by a contractor or otherwise), or

(iv) If he is a producer (but producers must comply with all applicable orders and regulations, particularly paragraph (e) (4) of this order).

(g) *Excess inventory.* Any producer may sell to any other producer any material in his inventory which is in excess of his requirements for the items of farm machinery and equipment and repair parts authorized to be manufactured under the provisions of this order. Such sales shall be expressly permitted within the terms of paragraph (c) (3) of Priorities Regulation No. 13.

(h) *Conservation of materials.* (1) If any other order of the War Production Board limits the use of critical materials in the manufacture of farm machinery and equipment, non-farm machinery and equipment, or repair parts to a greater extent than this order does, the other order shall govern unless it states otherwise.

(2) The War Production Board may also from time to time issue special orders requiring standardization, simplification, substitution, or other measures to save critical materials in the manufacture of farm machinery and equipment, non-farm machinery and equipment, or repair parts.

(i) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact, or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(j) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to manufacture for sale in the United States more farm machinery and equipment (except tractors) than the quotas fixed in the applicable schedule or paragraph (c) (2) (i), or who wants to manufacture as "farm machinery and equipment" any item not provided for in the applicable schedule, may apply for permission to do so as explained in Priorities Regulation 25. He may still, of course, apply for authorization to increase his quota under paragraph (c) (3), or (until September 15, 1944) under Direction 4 to this order. With respect to repair parts, attachments, and other items not subject to quota restrictions, a person may also apply as explained in Priorities Regulation 25 if he wants to make more of any of those items than are shown on his approved production schedule, or if he has no approved schedule for the item. The provisions of paragraphs (c) (2) (iv), (e) and (k) with respect to approved production schedules and reports do not apply to production authorized under Priorities Regulation 25, but the delivery restrictions of paragraph (f) (2) continue to apply to such production.

(2) *Appeals.* Any appeal from the provisions of this order, other than the restrictions of paragraphs (c) (1), (c) (2) (i) and (c) (2) (ii), shall be made by filing a letter in triplicate with the field office of the War Production Board for the district in which is located the plant or branch to which the appeal relates, referring to the particular provision appealed from and stating fully the grounds of the appeal. No appeal should be filed from the restrictions of paragraph (c) (1), (c) (2) (i), or (c) (2) (ii).

(k) *Reports.* Each producer who is not a "small producer" must file by the 10th day of each month a report on Form WPB–1768 of his production during the previous month in accordance with the accompanying instructions. The first report must be filed on or before September 10, 1943. In addition, if any serious production trouble or delay develops between dates of filing the above Form WPB–1768, the producer should immediately advise the War Production Board, including the following information where applicable:

(1) The name of any material or component part, the non-delivery of which is, or will be, materially retarding his production.

(2) The name of the manufacturer or supplier with whom the order was placed.

(3) Producer's purchase order number.

(4) Date of the order.

(5) Supplier's order number.

(6) Promised date of delivery.

"Small producers" and all other persons authorized to manufacture under this order who do not report monthly on Form WPB–1768, must file by August 10, 1944, a report on Form WPB–3808 of their production during the entire current quota period starting July 1, 1943. This report should be filled out in accordance with the instructions on the form.

(l) *Applicability of regulations.* This order and all transactions affected by it are subject to all present and future regulations of the War Production Board, unless this order states otherwise.

(m) *Order L–170.* Except as otherwise stated in this order, it supersedes Limitation Order L–170 as of July 1, 1943.

(n) *Communications.* All communications concerning this order shall, unless otherwise directed, be addressed to: War Production Board, Farm Machinery and Equipment Division, Washington 25, D. C. Ref: L–257.

NOTE: The reporting requirements in paragraphs (k), (e) (2) (iii), (e) (2) and (e) (3) have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 31st day of August 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

NOTE: Schedule A deleted August 31, 1944, since it expired June 30, 1944. Any quotas under that Schedule which are not completed by the end of the grace period specified in paragraph (d) (5) (ii) of L–257 are cancelled. Production for farm use for the current quota period July 1, 1944 to June 30, 1945, is covered by Schedule B.

PART 1029—FARM MACHINERY

[Limitation Order L–257, Schedule B, as Amended Aug. 31, 1944]

SCHEDULE B QUOTAS, DOMESTIC FARM USE, JULY 1, 1944 TO JUNE 30, 1945

§ 1029.17 *Schedule B to Limitation Order L–257.* In accordance with the provisions of Order L–257, this Schedule B is the "Applicable Schedule" for the current quota period July 1, 1944 to June 30, 1945. With a few minor changes, such as consolidations of certain items, it contains the same items and corresponding item numbers as shown on Schedule A. However, there have been important changes in the quota percentages for the new "current quota period", and also more liberal "bracketing" of many items is permitted.

The production quotas set forth in this Schedule B should be used by producers as the basis for planning their production, establishing production schedules and ordering material under CMP. The War Production Board may establish a final distribution pattern which is not in accord with these quotas. Any additional controls or exemptions which may be desirable with regard to production quotas, and any modifications with respect to final distribution of completed machines, will be issued as the need arises. In figuring his permitted production, each producer must comply with the provisions of the basic Limitation Order L–257, unless this Schedule B states otherwise.

EXPLANATORY NOTES TO SCHEDULE B

Quotas for new machinery and equipment for farm use are expressed as a percentage of the net shipping weight of each item produced during 1940 or 1941, whichever was higher.

There are no quota limitations on the manufacture of repair parts or attachments. There are also no quota limitations on any item having no quota percentage and marked "not limited".

In accordance with paragraph (d) (2) of L–257, production of "bracketed items" may be distributed among all or any one or more items included in the particular bracket, so long as the total weight does not exceed that determined by applying the various quota percentages to the items in the particular bracket.

"Small producers" may use the quota percentage of 100% for any item or items they manufacture, so long as their aggregate production of all items (excluding repair parts and attachments) does not exceed 100% of their total 1940 or 1941 production, whichever was higher, as provided in paragraph (d) (4).

Any item of farm machinery and equipment not provided for in this schedule B is not to be manufactured for sale in the United States, unless specifically exempted under the order. Moreover, any manufacture of an item in excess of the percentages established in this Schedule B, even though it may be scheduled for production under paragraph (e), is permitted only if specifically authorized pursuant to paragraph (c) (3) or under a direction to this order.

PART 3292—AUTOMOTIVE VEHICLES, PARTS AND EQUIPMENT

[Limitation Order L-1-e, Direction 1]

INFORMATION REQUIREMENT CONCERNING END-USE OF COMPONENTS

The following direction is issued pursuant to Limitation Order L-1-e:

Limitation Order L-1-e enumerates in Schedule A certain automotive components. Of these components, axles, transmissions and wheels, are now being scheduled pursuant to that order and other components may be scheduled later on. These components go into motor trucks and a great variety of other products being produced under other programs. In preparing component schedules under Order L-1-e, the War Production Board finds it essential to determine the relative urgency of the use to be made of the components, whether in trucks, trailers, construction machinery, farm equipment or otherwise. In many instances the manufacturer of the component does not have information in sufficient detail to inform the War Production Board as to the end-use of the component, since this information is frequently known only to the purchaser of the component and in some cases only to the customer of that purchaser. Unless purchase orders for automotive components already placed, as well as future orders, are properly identified, the War Production Board may be compelled to postpone delivery by the component manufacturer or to remove the orders entirely from his shipping schedule.

Consequently, in order that each manufacturer of the automotive components scheduled under Order L-1-e may be in a position to furnish the War Production Board with the required information, all purchasers of any such components are directed to furnish immediately to the manufacturer of the component the following information in respect to the items which he has ordered:

1. The specific use the purchaser will make of the component: for example—truck, landing craft, farm tractors, truck replacements, etc.

2. The program or project for which the component is required: for example—farm machinery, advanced naval base, heavy truck, truck replacement, etc.

3. The Government Contract Number (if any) identifying the prime contract placed by the claimant agency for such program or project: for example—W-04-353-Eng-339 (this indicates Army Engineer Corps—Contract No. 399); NOBe-1161 (this indicates Navy-Bureau of Ships—Contract No. 1161).

4. The claimant agency sponsoring the program or project: for example—the Army, Navy, War Food Administration, Office of Defense Transportation, etc.

The foregoing information must also be furnished to manufacturers of components by purchasers of components in respect to all future orders for any components scheduled under Order L-1-e, at the time the orders are given the manufacturer.

In supplying the information to the manufacturer, the purchaser should furnish a separate statement for purchase orders involving different programs or covered by more than one Government Contract Number.

If the purchaser of the component does not have any part of the foregoing information, he may get it from his customer and the customer likewise, if he does not have the information, may get it from his customer.

This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 31st day of August 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

§ 4500.1 *Utilities Order U-1—(a) Definitions.* (1) "Producer" means any individual, partnership, association, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not, located in the United States, its territories, or possessions, supplying, or having facilities built for supplying, directly or indirectly for general use by the public, one or more of the following services:

(i) Electric power,

(ii) Gas, natural or manufactured, exclusive of the production and transmission of natural gas up to the point of its entry into gas transmission lines from field gathering lines,

(iii) Water, other than exclusively for irrigation purposes,

(iv) Central steam heating, or

(v) Any of the foregoing services but not for general use by the public, if a specific direction from the War Production Board entitles such person or agency to apply the ratings herein assigned. Application for such a specific direction should be made by letter to the War Production Board, Washington 25, D. C., Ref.: U-1.

(2) "Material" means any commodity, equipment, accessory, part, assembly or product of any kind.

(3) "Controlled materials" means controlled materials as defined in Schedule I of CMP Regulation 1.

(4) "Maintenance" means the upkeep of a producer's property and equipment in sound working condition. It does not include any plant addition.

(5) "Repair" means the restoration of a producer's property and equipment to sound working condition after wear and tear, damage, destruction of parts, or the like have made such property or equipment unfit or unsafe for service. It does not include any plant addition.

(6) "Plant addition" means the construction or installation of new facilities or the replacement of existing facilities with facilities of greater capacity.

(7) "Minor plant addition" means a plant addition having a net material cost of not more than $10,000. No job or project may be subdivided to come within this limit.

(8) "Major plant addition" means a plant addition having a net material cost of more than $10,000.

(9) "Net material cost" means the cost of material incorporated in plant less the cost of material removed from plant, priced in accordance with the producer's regular accounting practice.

(10) "Operating supplies" means material, other than fuel, which is used or consumed in the course of a producer's operations, except in maintenance, repair, and plant additions.

(11) "Inventory" means all material in the producer's possession, without regard to its accounting classification, excluding, however, (i) material incorporated in plant, (ii) appliances and merchandising supplies, (iii) fuel, (iv) water purification and treatment material except equipment, (v) gas chemical material, (vi) material segregated for use in approved major plant additions, and (vii) scrap.

(12) "Class" means any one of those categories of material established as a basis for classification of inventory in Schedule A of this order.

How To Obtain Material

(b) *Preference ratings.* (1) A preference rating of AA-1 is hereby assigned to orders to be placed by a producer for material (other than controlled materials) in every class except (i) the transmission and distribution class and (ii) the meter class, for use in maintenance and repair, as operating supplies, and for minor plant additions.

(2) A preference rating of AA-1 is hereby assigned to orders to be placed by a producer for material (other than controlled materials) in (i) the transmission and distribution class and (ii) the meter class, for use in the repair of an actual or imminent breakdown.

(3) A preference rating of AA-3 is hereby assigned to orders to be placed by a producer for material (other than controlled materials) in (i) the transmission and distribution class and (ii) the meter class, for use in maintenance and repair, as operating supplies, and for minor plant additions, except where an AA-1 rating is assigned in paragraph (b) (2) above.

(4) Material obtained with the AA-1 rating may be used for purposes which are assigned lower ratings, but it may be replaced in inventory only by applying the lower rating to an equivalent dollar value of material in the same class. Material obtained with the AA-3 rating may be used for purposes which are assigned the AA-1 rating and may be replaced in inventory with either the AA-1 rating or an authorized AA-3 rating. The provisions of this paragraph (b) (4) supersede those of § 944.11, paragraph (a), of Priorities Regulation 1.

(5) Preference ratings for major plant additions may be obtained by filing an application on Form WPB-2774.

(c) *CMP allotment number.* (1) The abbreviated CMP allotment number U-9 is hereby assigned to orders to be placed by a producer for controlled materials for use in maintenance and repair, as operating supplies and for minor plant additions. Allotments of material for major plant additions may be obtained by filing an application on Form WPB-2774.

(2) An order for controlled materials for use in maintenance and repair, as operating supplies, and for minor plant additions bearing the abbreviated CMP allotment number U-9 and the certification required by paragraph (d) of this order shall be deemed an authorized controlled materials order. This abbreviated CMP allotment number shall constitute an "allotment number or symbol" for the purpose of CMP Regulation 3.

(d) *Certification.* The ratings assigned by subparagraphs (b) (1), (2) and (3) of this order and the abbreviated CMP allotment number U-9 may be applied by a producer only by the use of a certification in substantially the following form unless an order of the War Production Board affecting a particular item of material requires some other form of certification:

Preference Rating ....., Abbreviated CMP Allotment Number U-9. The undersigned producer certifies, subject to the penalties of Section 35 (A) of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order, to receive, for utility uses under Utilities Order U-1, the material ordered, and to use the preference ratings or allotment numbers which the undersigned has placed on this order.

The certifications set forth in Priorities Regulation 3 and CMP Regulations 1 and 5 may not be used but the standard form of certification provided in Priorities Regulation 7 is permissible if the producer adds a statement saying that material ordered is for utility uses under Utilities Order U-1.

Restrictions on Ordering Material

(e) *Scheduling deliveries.* Except as permitted by paragraphs (f) and (g) below, no producer shall schedule for delivery to it in any calendar quarter any material to be used for maintenance and repair, as operating supplies, or for minor plant additions, unless both of the following conditions are satisfied:

(1) [Deleted Aug. 31, 1944.]

(2) The producer does not have reason to believe that its inventory of material in the same class is or will, by virtue of its acceptance of the delivery when made, become in excess of a practical working minimum. A practical working minimum inventory is that amount of material which a producer, exercising prudent operating judgment, considers the smallest quantity of material it can hold and render war-time service at minimum standards. It may be less than the values established in Schedule C, but it shall in no case exceed them.

(3) No producer may place an order for any item of material, including material for major plant additions, if the required item or a practical substitute therefor is in the producer's inventory in excess of minimum requirements for that item.

(f) *Exceptions to paragraph (e) (2).* (1) The restrictions of paragraph (e) (2) do not apply to a producer so long as its inventory does not exceed $25,000 in value, except that such a producer must restrict its inventory to that amount of material which, in the exercise of prudent operating judgment, it considers the smallest quantity it can hold and render war-time service at minimum standards. Each purchase of material by such a producer, however, must be treated as the purchase of a "short item", and is subject to the provisions of paragraph (g) below. A producer engaged in furnishing more than one of the services named in paragraph (a) (1) may consider its inventory for each service separately for the purposes of this paragraph.

(2) The restrictions of paragraph (e) (2) do not apply to material excepted from inventory by the definition in paragraph (a) (11).

(3) [Deleted Aug. 31, 1944.]

(4) [Deleted Aug. 31, 1944.]

(5) The War Production Board may from time to time establish specific limits for permissible inventory for individual producers, modifying the provisions of Schedule C.

(6) [Deleted Aug. 31, 1944.]

(7) Notwithstanding the restrictions of paragraph (e) or of paragraph (g) below a producer may schedule an item of material for delivery in a minimum procurable commercial quantity, and in the case of cast iron, carbon steel, and non-metallic pipe, may schedule for delivery a minimum carload quantity.

(g) *Short item deliveries.* Even though it cannot schedule deliveries without exceeding the limits of paragraph (e) (2), a producer may schedule for delivery material which it will require for use in maintenance and repair, as operating supplies, and for minor plant additions during the ninety-day period following the date it expects to receive such material, so long as the producer's inventory of the required material, together with material already scheduled for delivery, will be insufficient to meet requirements during such ninety-day period.

(1) [Deleted Aug. 31, 1944.]

(2) [Deleted Aug. 31, 1944.]

Restrictions on Use of Material

(h) *Restrictions on use of material for maintenance and repair.* A job which can be classed as maintenance or repair, as those terms are defined in paragraphs (a) (4) and (5), may be done without regard to the dollar value of the material required when the following standards are met:

(1) The job must be necessary to maintain or restore service at minimum service standards or to prevent damage to facilities from serious overload, deterioration, storm, flood, climate, soil conditions, or similar contingencies.

(2) Design must emphasize economy of manpower and material as well as the substitution of the more plentiful for scarce material.

(3) No facility or part which is serviceable in its existing installation may be replaced except to avoid an imminent breakdown.

(i) *Restrictions on use of material for minor plant additions.* A job which is a plant addition, as defined in paragraph (a) (6), rather than maintenance and repair, may be done without special permission from the War Production Board, if it is a "minor plant addition"; that is, if its net material cost does not exceed $10,000. Paragraph (a) (9) explains what is meant by net material cost. However, all minor plant additions are subject to the following restrictions:

(1) No facility or part which is serviceable in its existing installation may be replaced except to avoid an imminent breakdown.

(2) Design must emphasize economy of manpower and material as well as the substitution of the more plentiful for scarce material.

(3) New facilities must be necessary for rendering service at minimum standards

(4) No extension of a line to consumer premises may be made or connected by a producer unless it is authorized by a Supplementary U-1 order or by the approval of an application filed on Form WPB-2774. In an emergency approval may be obtained by telephone or telegraph. Confirmation must be obtained, however, by the submission of an application on Form WPB-2774.

(5) In the case of any building construction or alteration involving a cost in excess of $800 for materials and labor, the provisions of paragraph (e) of Schedule A to CMP Regulation 6, relating to structural design, and the restrictions on the use of certain materials contained in Appendix I, Schedule A to CMP Regulation 6 must be observed. Applications for relief from these restrictions must be filed by producers on Form WPB-2774.

(j) *Restrictions on use of material for major plant additions.* No material may be used for a major plant addition unless the job has been authorized by the approval of an application filed on Form WPB-2774. In an emergency approval may be obtained by telephone or telegraph. Confirmation must be obtained, however, by the submission of an application on Form WPB-2774.

Selling Material

(k) *Sales of material.* A producer may sell material which is in its inventory or which it acquired for major plant additions only in accordance with the following rules:

(1) It may be sold without a preference rating or allotment number to any producer as defined in Order U-1, unless it is:

(i) Printing machinery and equipment, subject to Order L-226;

(ii) Construction machinery, subject to Orders L-192 and L-196;

(iii) Electric generating equipment, subject to Orders L-102 and L-94; or

(iv) Industrial power trucks, subject to Order L-112.

(2) It may be sold without a preference rating or allotment number to any person if it is used material or equipment unless it is one of the items in paragraph (k) (1) above, or:

(i) Controlled materials; or

(ii) Scrap.

(3) It may be sold pursuant to a specific written authorization from the War Production Board to the seller or to the purchaser.

(4) It may be sold without a preference rating or allotment number to a person who produces, or to the person from whom the producer purchased, the material in its present form.

(5) It may be sold without a preference rating or allotment number to a scrap dealer as scrap unless it is rubber tires or automotive parts.

(6) It may be sold without a preference rating or allotment number to the Army, Navy, Maritime Commission, or a public housing authority for the repair of an actual or threatened breakdown of their electric, gas, water or central steam heating facilities.

(7) Producers may sell material pursuant to this paragraph (k). However, if a producer chooses to do so he may sell pursuant to the provisions of Pri. Reg. 13.

(l) *Refusal to sell to other producers.* Any producer may, by specific direction from the War Production Board, be prohibited from applying or extending preference ratings assigned by this order or by any other certificate or order, upon a determination by the War Production Board, that such producer has wilfully refused to sell (after receiving a bona fide offer to purchase at not less than maximum prices established by regulations of the Office of Price Administration, made by any financially responsible producer who is authorized—under applicable regulations—to accept delivery of the material specified in such offer) material in inventory when such material is required by another producer for the repair of an actual breakdown of facilities or equipment.

General Provisions

(n) *Appeals.* Relief from any of the restrictions of this order may be requested by filing a letter with the War Production Board, Office of War Utilities, Washington 25, D. C., Ref.: U-1, stating the reasons why relief is necessary. If the relief requested involves a request to make a plant addition, the request should be filed on Form WPB-2774.

(o) *Records.* In addition to the records required to be kept under Priorities Regulation 1, each producer who applies the preference ratings or allotment number hereby assigned shall maintain a continuing record of inventory and of segregated material in his possession.

(p) *Communications to War Production Board.* All reports required to be filed hereunder and all communications concerning this order, shall, unless otherwise directed, be addressed to: Office of War Utilities, War Production Board, Washington 25, D. C., Ref.: U-1.

In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priorities control and may be deprived of priorities assistance.

(r) *Applicability of WPB regulations.* This order and all transactions affected hereby are subject to all applicable regulations of the War Production Board, as amended from time to time, unless there is a conflict between this order and such regulations, in which case this order shall govern, if it specifically so provides. No producer is, however, subject to the restrictions of CMP Regulation 5 nor may any producer in any way use the preference ratings therein assigned.

(s) *Special delivery quota and inventory directions.* Nothing in this order is intended to supersede any special inventory base established by a specific direction from the War Production Board to a named producer. All such directions shall remain in effect unless modified by a further specific direction to the producer affected. Special quotas for scheduled deliveries heretofore established by a specific direction from the War Production Board to a named producer are revoked.

(t) *Special provisions relating to Form WPB-2774 approvals issued prior to this amendment.* With respect to WPB-2774 authorizations issued prior to the date of this amendment and involving between $1,500 and $10,000 net material cost, producers may:

(1) Use the preference ratings and allotment numbers assigned in paragraphs (b) and (c) of this order in lieu of those specifically assigned on such a Form WPB-2774 authorization.

(2) Treat as segregated under paragraph (a) (11) any material to be used pursuant to such a WPB-2774 authorization.

PART 4500—POWER, WATER, GAS AND CENTRAL STEAM HEAT

[Utilities Order U-1, Direction 2, as Amended Aug. 31, 1944]

The following direction is issued pursuant to Utilities Order U-1.

(a) *What this direction does.* This direction makes applicable the simplified procedures provided for in the June 1944 revision of application form WPB-2774, to authorizations issued to producers on form WPB-2774 before the revised application form came into use.

(b) *Provisions applicable to certain WPB-2774 authorizations.* Except as noted in paragraph (d) below, the following special provisions are hereby made applicable to all WPB-2774 authorizations issued to electric, water, gas, or central steam heat producers and in effect on June 10, 1944, even though contrary provisions appear on the face of such authorizations:

(1) The applicant may use for the job authorized in his approved WPB-2774 application only materials and equipment of the kind, type, size and capacity listed in section III of his application and approved by the War Production Board, but he may use such materials and equipment in quantities required, irrespective of the quantities authorized on WPB-2774, except that transformers, poles, crossarms and meters must not be used in quantities which exceed those specifically approved on the application. No change may be made in the kind, type, size, and capacity of the materials and equipment listed in section III of the application and approved by the War Production Board, unless an amendment is filed and specific approval obtained. Nor may more materials and equipment be used than are required for the construction, installation or purchase authorized.

(2) The applicant is authorized to use the abbreviated allotment number U-2 for the purchase of controlled materials and Class A products to the extent authorized for use by paragraph (b) (1) above, except for purchase of:

(i) Carbon steel for jobs for which more than 100 tons of carbon steel have been allotted for all quarters;

(ii) Copper wire and cable for jobs for which more than 10,000 pounds of copper wire and cable have been allotted for all quarters; and

(iii) Aluminum wire and cable for jobs for which more than 5,000 pounds of aluminum wire and cable have been allotted for all quarters.

Where specific allotments of these three materials have been made in quantities which exceed the quantities indicated, these specific allotments remain in force, subject to the provisions of CMP Regulation 6 and the su-

thorization under which the allotment was made.

(3) Producers are hereby authorized, without making a formal return to the War Production Board, to cancel on their books controlled materials balances remaining from specific allotments other than those which remain in force under paragraph (b) (2) above.

(4) The preference rating AA-9 is hereby assigned for the purchase of quantities of equipment and materials (other than controlled materials) additional to those rated for purchase in the approved application, to the extent that such additional quantities are authorized for use by paragraph (b) (1) above; except that the rating must not be used to purchase transformers, poles, crossarms and meters in quantities which exceed those specifically rated for purchase on the application.

(5) The abbreviated allotment number and preference rating assigned herein may not be used to order materials and equipment available in the applicant's inventory in excess of a practical working minimum. The allotment number and preference rating may be used to replace materials and equipment in inventory, but only to the extent that inventory has been reduced below a practical working minimum, or to the extent that the applicant is permitted to replace the item used in accordance with the "short item" procedure of Utilities Order U-1.

(6) The abbreviated allotment number and preference rating assigned herein must not be used to order materials and equipment earlier or in greater quantity than is required for the construction, installation or purchase authorized.

(7) Orders for controlled materials placed pursuant to this direction must show the abbreviated allotment number U-9 and must specify the month in which delivery is requested. Orders for Class A products shall be placed as provided in Direction 4, CMP Regulation 3. Orders for materials and equipment other than controlled materials to which the preference rating assigned herein is applied must also show the abbreviated allotment number U-9 for identification purposes.

(c) [Deleted Aug. 31, 1944]

(d) *Cases to which paragraph* (b) *does not apply.* The provisions of paragraph (b) above do not apply to authorizations which were revoked or on which all authorized work was completed prior to the effective date of this direction. Nor do such provisions set aside or supersede any specific exceptions or conditions which were made in the blank space below Section V of any approved WPB-2774 application.

(e) *Section headings on WPB-2774.* References herein to "section III" and "section V" of form WPB 2774 may be considered to mean "section C" and "section E" respectively on an edition of Form WPB-2774 prior to that of February 21, 1944.

Issued this 31st day of August 1944.

[Supplementary Utilities Order U-1-c, as Amended Aug. 31, 1944]

CERTAIN GOVERNMENT AGENCIES

§ 4500.2 *Supplementary Utilities Order U-1-c*—(a) *Permission to build certain extensions.* In accordance with the provisions of paragraph (i) of Utilities Order U-1, extensions of electric, water, gas, and central steam heating facilities may be made or connected by producers to serve facilities of the Army, Navy, Maritime Commission, War Shipping Administration, or Civil Aeronautics Authority, upon the direct order of such agencies when all of the following conditions are satisfied:

(1) The total cost of material for each extension, exclusive of any part built by or for the consumer, does not exceed $10,000. No job or project may be subdivided to come within these limits.

(2) [Revoked Aug. 31, 1944]

(3) The extension does not duplicate an adequate service of the same type already installed or constitute a stand-by service.

(b) *Other orders.* This order does not constitute a release, in the case of gas producers or consumers, from the restrictions of Utilities Order U-7 or Limitation Order L-174.

PART 4500—POWER, WATER, GAS, AND CENTRAL STEAM HEAT

[Supplementary Utilities Order U-1-c as Amended Aug. 31, 1944]

§ 4500.4 *Supplementary Utilities Order U-1-c*—(a) *Permission to build certain extensions.* In accordance with the provisions of paragraph (i) of Utilities Order U-1, extensions of electric facilities may be made or connected by producers to permit the operation of farm production equipment when all of the following conditions are satisfied:

(1) The prospective consumer possesses one of the following types of electric farm equipment of sufficient capacity for the use contemplated, or can obtain such equipment without priorities assistance, or a preference rating of AA-5 or better has been assigned to deliveries of such equipment to him:

(i) Water pump for livestock.
(ii) Milking machine.
(iii) Milk cooler.
(iv) Incubator.
(v) Brooder.
(vi) Feed grinder.
(vii) Milk sterilizer.

(2) There is no other means of operating such equipment on the premises.

(3) The length of such extension, including any part built by or for the consumer, will not exceed 100 feet per animal unit, determined in accordance with Schedule I annexed hereto.

(4) The prospective consumer will use electric service to operate equipment for farm production and has livestock on hand aggregating not less than five animal units, determined in accordance with Schedule I of this order.

(5) Primary and secondary lines and service drops will be constructed of the following types and sizes of conductor:

(i) Any type or size having conductivity equal to or less than that of No. 4 AWG copper, or

(ii) Any type or size of conductor which can be obtained from the excess inventory of any producer.

(6) The prospective consumer's application for service is accompanied by a certification from his County Agricultural Conservation Committee in substantially the following form:

(To the Utility Addressed):

Mr. ----------, who has livestock on hand aggregating not less than five animal units is eligible for an electric connection of -------- feet under the terms of Supplementary Utilities Order U-1-c. In the opinion of this County Agricultural Conservation Committee this connection will result in a substantial increase in farm production, or a substantial saving of farm labor, and is in accord with the spirit, as well as the letter, of Supplementary Utilities Order U-1-c.

(For County Agricultural Conservation Committee)

(7) The length of any continuous extension built in any calendar quarter, including any part built by or for the consumer, does not exceed 5,000 feet.

(8) The extension does not duplicate an adequate service already installed or constitute a standby service.

(9) Distribution transformers are so located that the maximum number of consumers will be served from each transformer; and no transformer is installed to serve a consumer if the service can be rendered by an extension of secondary of 750 feet or less except where such an extension would result in unworkably low voltage at the consumer's premises. Transformers relocated in compliance with this paragraph may be replaced with transformers of a larger size if necessary to avoid overload.

(b) *Exception for certain extensions.* Extensions which would have been permitted by Supplementary Utilities Order U-1-c prior to the amendment of April 6, 1944, may be made or connected if both of the following conditions are satisfied:

(1) The prospective consumers' request for a certification by the County Agricultural Conservation Committee was filed with such committee on or before April 20, 1944; and

(2) A certification, in the form required by Supplementary Utilities Order U-1-c prior to the amendment of April 6, 1944, has been issued by the County Agricultural Conservation Committee to the prospective consumer on or before June 1, 1944.

Issued this 31st day of August 1944.

NOTICE TO WHOLESALERS AND RETAILERS

Our OPA ceiling price for direct-consumption sugar (describe item by variety, grade, brand, if any, container type and size) has been established by the Office of Price Administration. PART 1340—FUEL

[MPR 510, Amdt. 3]

LUBRICATING OILS, GREASES, AND CERTAIN OTHER PETROLEUM PRODUCTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation No. 510 is amended in the following respects:

1. Section 1 (b) is amended to read as follows:

(b) *Commodities.* Motor oils including aviation oils, stock oils (neutrals, bright stocks, steam refined and other stock oils), greases, industrial oils, petroleum sulfonates, petroleum coke (except when sold by resellers as fuel), industrial naphthas and solvents, mineral oil polymers, any petroleum product sold for lubricating purposes including upper motor lubricants, and any other fraction of crude petroleum which is sold as a source of any of the foregoing commodities, unless specifically excluded in the following paragraph.

The following commodities are not included in this regulation: Insecticides; germicides; core oils and core washing oils; household oils and other specialty lubricants and compounds normally sold to consumers by sellers other than petroleum refiners, compounders, jobbers and service stations; petrolatum, paraf-

fin wax, microcrystalline wax, slop wax, and any compound a major portion of which consists of any of these products; asphalt and asphalt products; crude petroleum; naphthenic acids; those petroleum products coming under Maximum Price Regulation No. 88 or any superseding regulation; and those petroleum products excepted from price control by any applicable price regulation.

2. Section 1 (c) is amended to read as follows:

(c) *Area.* This regulation applies in the forty-eight states of the United States, the District of Columbia and the territories and possessions of the United States, except the Panama Canal Zone and the Territory of Alaska.

3. Section 10 (b) (2) (i) is amended by changing the "24–40 Pour point" to read "25–40 Pour point."

4. Section 14 (c) is revoked, and the reference thereto in the index of section 9 (a) is deleted and the pricing notes of Article II, 1 (c) and 2 (b), are deleted. The headnote of section 14 is amended to read as follows:

SEC. 14. *All products; minor differences and blending methods (to be used only where a maximum price cannot be determined under the preceding pricing methods).*

5. Section 15 (c) is amended to read as follows:

(c) If a maximum price for a product was heretofore approved for a seller under the Third Pricing Method contained in § 1340.159 (b) (4) (iii) (a) of Revised Price Schedule No. 88 (changes necessitated by shortages of ingredients) such approval shall continue in full force and effect.

6. Section 13 (a) (1) is amended to read as follows:

(1) A maximum price properly established in accordance with the provisions of the General Maximum Price Regulation, prior to February 25, 1943, for industrial oils and greases; prior to May 13, 1943, for petroleum sulfonates and mineral oil polymers; or prior to the date of inclusion under this regulation for any other product, may be continued as the maximum price under this regulation provided a sale was made at such price, or such price was evidenced by publication in the seller's published price list or other customary method of publication used by the seller.

7. Section 16 is amended to read as follows:

SEC. 16. *All products, all sellers; final pricing methods*—(a) *Comparable products margin.* A seller, unable to arrive at a maximum price for a product under the preceding pricing methods, shall establish his maximum price on the basis of the average of the mark-ups on two comparable products. This maximum price shall be calculated by the steps set forth below and filed, prior to making a sale, with the Petroleum Branch of the Office of Price Administration at Washington, D. C., on the form indicated. Upon filing, the price shall be the seller's maximum price until changed or disapproved by the Office of Price Administration.

(1) *Resellers.* A reseller shall:

(i) Select two products of similar end-use on which he has established maximum prices. If he has more than two products of similar end-use he shall select the two products closest in current delivered costs to the current delivered cost of the product being priced, and in any case no product shall be selected which varies in current delivered cost more than 25% from the current delivered cost of the product being priced. When the reseller has only one product of similar end-use he shall so state and shall establish and file his maximum price on the basis of the one product.

End-use. Two products shall be considered as having similar end-use if sold for the same general purpose; for example, products in each of the following categories may be considered as having similar end use; motor oils; pressure gun greases; gear lubes; wheel bearing greases; hydraulic oils; rust preventives; cutting oils (except that where possible the seller must show oils sold for the same type of cutting operation) turbine oils; quenching oils; textile oils; ink oils.

(ii) Divide the maximum price for each such product by its current delivered cost.

(iii) Add the resulting figures and divide by two.

(iv) Multiply the current delivered cost of the product being priced by the figure obtained in (iii).

(v) Copy form, fill it in and forward to Petroleum Branch, Office of Price Administration, Washington, D. C.

(2) *Producers.* A producer shall determine his maximum price by the procedure for resellers in (1) above but shall use the total of the current delivered costs of the ingredients in each product in place of "current delivered cost" of the product in determining margins. A refiner for an ingredient which he manufactures shall use in the place of current delivered cost of the ingredient its inventory value, works billing price, refinery value, or any other value which will serve as a basis for comparing the products.

(3) *Government specification products.* A product manufactured to meet a particular government specification may be priced under paragraph (b) below on the basis of competitive prices for products meeting the same specification if the seller prefers not to use the comparable products method in (a) above.

(b) *Sellers unable to establish a maximum price under (a) above.* If a seller is unable to use the comparable products margin method set forth in (a) above, the seller shall establish his maximum price on the basis of his most comparable product, competitive products or by any method which results in a maximum price in line with the level of maximum prices otherwise established by this regulation. This maximum price shall be filed, prior to making a sale, with the Petroleum Branch of the Office of Price Administration at Washington, D. C., together with the following information:

(1) Why the "comparable margin method" set forth in (a) above is not applicable, indicating the name, established maximum price, end-use, and current delivered cost of the seller's product which is most comparable to the new product.

(2) Names and established maximum prices of two competitive products which are comparable, giving all the information which the seller is able to obtain regarding the specifications and composition of such products.

(3) Any other information which the seller can give to substantiate the maximum price he is filing.

(c) *Effect of a filing.* If a seller files the information required, the maximum price he sets under this section shall be his maximum price until it is disapproved in writing by the Office of Price Administration or until the seller is notified in writing that a substitute maximum price has been set by the Office of Price Administration. Either an approved maximum price or a substitute maximum price set by the Office of Price Administration may be replaced by another maximum price upon written notice to the seller. All maximum prices established under this section 16 shall be in line with the level of maximum prices otherwise established by this regulation.

(d) *Failure to file a maximum price.* If a seller shall fail to report a maximum price as required by this section, the Office of Price Administration may at any time upon written notice to the seller establish his maximum price for the particular product at the particular point effective retroactively to the date of the making of a sale of the product.

(e) *Customary allowance, discounts, etc.* All customary allowances, discounts, or other price differentials and all practices relating to the payment of transportation charges in effect with respect to the most comparable products shall apply to the product being priced.

This amendment shall become effective September 5, 1944.

NOTE: The reporting and record-keeping requirements of this Regulation have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 31st day of August 1944.

PACKED FRUITS, BERRIES AND VEGETABLES OF THE 1944 AND LATER PACKS

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.*

1. The table in section 1 (a) is amended by adding item 8 to read as follows:

Column 1	Column 2	Column 3	Column 4	
Item No.	Product	Section	Section	Appendix
8	Snap beans (except New Jersey and Maryland).	8	15	D

2. In the table headed "Metal Containers" in section 12, the item "No. 2 cyl.....307 x 512" is amended to read as follows:

No. 2 cyl.....307 x 510 or 307 x 512

3. In section 15, Appendix D is added to read as follows:

APPENDIX D—SNAP BEANS

Explanation of how maximum prices for packed snap beans are figured. For packed snap beans, conversions for grade, for styles of pack, for sieve size, and for container type and size under subparagraph (2), (3), or (4) of section 5 (a) of this supplement are to be made in the same order and in the same manner as those for packed peas. The explanation at the beginning of Appendix C applies to this appendix for that purpose, except that for packed snap beans conversions are made for style of pack (whole or cut) and sieve size instead of for variety and sieve size (step 3). This conversion from one style of pack and sieve size to another (for example, from cut snap beans to whole snap beans) must be made in the same manner a conversion from one variety and sieve size of packed peas to another is made under Appendix C.

The term "ungraded," as used in connection with sieve size, means not separated by sieve size. Also, the term includes all blends of more than three sieve sizes.

Special pricing provisions applicable to packed pole beans in areas other than Area 11, packed bush beans in Area 11, asparagus style of pack, French style of pack, and blends of sieve sizes, appear at the end of the tables.

TABLE 8—GRADE DIFFERENTIALS

In each case in figuring prices based on grade differentials, if the processor has base prices for both a higher and lower grade than the item being priced, he shall use the differential between the item being priced and the next higher grade. (For example, if the item being priced is Extra Standard and he has base prices for both Fancy and Standard grades and now wishes to price Extra Standard he takes the difference between Extra Standard and Standard.)

TABLE 9—DIRECT SUBSIDY PAYABLE PER DOZEN CONTAINERS

[All areas, varieties, sieve sizes and grades]

Amount of subsidy to be subtracted from gross maximum price per dozen containers in making sales to purchasers other than government procurement agencies:

No. 2 cans, $0.11.
No. 10 cans, $0.54.

To figure amount of subsidy for other container sizes, multiply the amount named above for No. 2 cans by the appropriate conversion factor in Table 5.

Special pricing provisions applicable to packed pole beans in areas other than Area 11, packed bush beans in Area 11, certain styles of pack, and blends of sieve sizes. The following special pricing provisions are applicable to packed pole beans in areas other than Area 11, packed bush beans in Area 11, asparagus style of pack, French style of pack, and blends of sieve sizes. In each case, the maximum price referred to in the provisions is the gross maximum price (after all appropriate conversions made under subparagraph (2), (3) or (4) of section 5 (a), and before subtraction of the direct subsidy payable per unit of the finished product).

(a) *Maximum prices for packed pole beans in areas other than Area 11.* In each area other Area 11, the maximum prices for packed pole beans shall be: In No. 2 cans, five cents per dozen, in No. 2½ cans, seven and one-half cents per dozen, and in No. 10 cans twenty-five cents per dozen, higher than the maximum prices for packed bush beans in the same area.

(b) *Maximum prices for packed bush beans in Area 11.* In Area 11, the maximum prices for packed bush beans shall be: In No. 2 cans, five cents per dozen, in No. 2½ cans, seven and one-half cents per dozen, and in No. 10 cans, twenty-five cents per dozen, lower than the maximum prices for packed pole beans in that area.

(c) *Maximum prices for asparagus style of pack.* The maximum prices for asparagus style, horizontal style or vertical style of pack, shall be: In No. 2 cans twenty-five cents per dozen, in No. 2½ cans, thirty-two and one-half cents per dozen, and in No. 10 cans, $1.25 per dozen, higher than the maximum prices for packed whole beans of the same variety and grade.

(d) *Maximum prices for French style of pack.* The maximum prices for French style of pack shall be: In No. 2 cans, five cents per dozen, in No. 2½ cans, seven and one-half cents per dozen, and in No. 10 cans, twenty-five cents per dozen, higher than the maximum prices for packed whole beans of the same variety and grade.

(e) *Maximum prices for blends of sieve sizes.* (1) The maximum price of a blend of two sieve sizes of a variety, style of pack and grade shall be the maximum price of the larger sieve size in the blend.

"Blend of two sieve sizes" means a combination of two sieve sizes, which contains not more than 10 per cent by volume of snap beans which are larger than the larger sieve size declared in the blend, and not more than 2 percent by volume of snap beans which are two or more sieve sizes larger than the larger sieve size declared in the blend.

If the combination contains more than the specified percentage by volume of sieve sizes larger than the larger sieve size declared in the blend, the maximum price shall be the same as the maximum price for the same variety, style of pack and grade, ungraded as to sieve size, packed in the same container.

(2) The maximum price of a blend of three sieve sizes containing only No. 4 sieve size and larger shall be the same as the maximum price for the same variety, style of pack and grade, ungraded as to sieve size, packed in the same container. The maximum price of a blend of three sieve sizes of a variety, style of pack and grade, which blend includes at least one sieve size which is smaller than No. 4 sieve size shall be: In No. 2 cans, five cents per dozen, in No. 2½ cans, seven and one-half cents per dozen, and in No. 10 cans, twenty-five cents per dozen, more than the maximum price of the largest sieve size in the blend, packed in the same container.

"Blend of three sieve sizes" means a combination of three sieve sizes, which contains not more than 5 per cent by volume of snap beans which are larger than the largest sieve size declared in the blend, and not more than 1 per cent by volume of snap beans which are two or more sieve sizes larger than the largest sieve size declared in the blend.

If the combination contains more than the specified percentage by volume of sieve sizes larger than the largest sieve size declared in the blend, the maximum price shall be the same as the maximum price for the same variety, style of pack and grade, ungraded as to sieve size, packed in the same container.

(3) The maximum price of a blend of four or more sieve sizes of a variety, style of pack and grade shall be the same as the maximum price for the same variety, style of pack and grade, ungraded as to sieve size, packed in the same container.

(a) Notwithstanding the terms of any contract, agreement or other obligation, no hotel supply house, packing or slaughtering plant, packer's branch house, wholesaler's or other seller's establishment shall sell and/or deliver to purveyors of meals other than contract schools, during any three month quota period beginning June 1, September 1, December 1 or March 1, a total volume by weight of hotel supply cuts (fabricated meat cuts) in excess of 90 percent of the total volume by weight of beef, veal, lamb and mutton, not including canned meats of any kind, variety meats and edible by-products of any kind, and/or sausage and similar products thereof, sold or delivered by such selling establishment from September 15, 1942, through December 15, 1942, to purveyors of meals, other than to contract schools (in no event shall a war procurement agency be deemed to be a purveyor of meals), except that any selling establishment which was not engaged in sales of beef, veal, lamb and mutton to purveyors of meals from September 15, 1942, through December 15, 1942, for the reason that the selling unit and all facilities thereof were under the contr l of an agency of the United States Government, may determine its quota by reference to the three month quota period of 1942 immediately prior to such assumption of control:

8. Section 1364.168 (b) is amended to read as follows:

(b) Any selling establishment which has established a quota pursuant to paragraph (a) of this § 1364.168 may, subject to the conditions hereinafter set forth, redetermine its quota for sales to purveyors of meals for each three month quota period beginning September 1, 1944, on the basis of its sales to purveyors of meals during the corresponding three month period of 1942: *Provided*, That such selling establishment shall fix its quota for each three month quota period thereafter, other than the period beginning December 1, by reference to sales made by it during the corresponding three month period of 1942. For the three month quota period beginning December 1, such selling establishment shall determine its quota on the basis of its sales to purveyors of meals during the three month period beginning December 1, 1941. Any selling establishment which elects to fix its quotas for sales to purveyors of meals, pursuant to the alternative method stated herein, shall file not later than September 1, 1944, the records required under § 1364.159 (b) (2) for each three month period beginning December 1, 1941, and ending November 30, 1942. The right to elect the alternative method of computing quotas shall be exercised on or before September 1, 1944, and such election shall be made by the filing of the alternative quota data required herein. After September 1, 1944, no selling establishment may elect the alternative quota and any selling establishment which has failed to file the alternative quota reports as required herein shall remain subject to the quota computed by reference to sales made from September 15, 1942, through December 15, 1942. Sales or deliveries by any selling establishment during the three month quota period beginning September 1, shall not exceed the quota fixed on the basis of sales made from September 15, 1942, through December 15, 1942, unless the alternative method of computation has been elected through the timely filing of the alternative quota computations and such computations permit a higher quota. If the alternative quota computation for the three month period beginning September 1, is less than the quota computed by reference to sales made by it from September 15, 1942, through December 15, 1942, sales during the quota period beginning September 1, shall not exceed the lower quota.

9. Section 1364.168 (e) is added to read as follows:

(1) *For transportation from the point at which the meat was slaughtered to the seller's distribution point.* (i) For transportation from the point at which the meat was slaughtered in Price Zone 2, 3 or 4 to a distribution point located in any of those price zones, other than another slaughter or packing plant owned or controlled by the same seller, the seller may add the actual cost of transportation computed at the lowest common carrier rate for the method of transportation used, but in no event more than 75 cents per hundredweight.

(ii) For transportation from the point at which the meat was slaughtered in Price Zone 1 or 5 to 10, inclusive, to a distribution point located in the same price zone as the slaughter point, other than another slaughter or packing plant owned or controlled by the same seller, the seller may add the actual cost of transportation computed at the lowest common carrier rate for the method of transportation used, but in no event more than 25 cents per hundredweight.

(2) *For delivery from the distribution point to the buyer's place of business.* (i) If meat is delivered by the seller to the place of business of a retailer, wholesaler, hotel supply house, purveyor of meals or commercial user, or to the designated delivery point of a war procurement agency or other government agency located within a radius of 25 miles from

the distribution point, the seller may add 25 cents per hundredweight.

(ii) If meat is delivered by the seller to the place of business of a retailer, wholesaler, hotel supply house, purveyor of meals or commercial user, or to the designated delivery point of a war procurement agency or other government agency located more than 25 miles from the point of distribution, the seller may add the actual cost of transportation, but not to exceed $.50 per hundredweight from a distribution point in Price Zones 1, or 5 to 10, inclusive, and $.75 per hundredweight from a distribution point in Price Zones 2, 3 or 4.

(iii) Where the distribution point and the buyer's place of business coincides, as in the case of truck routes, the seller may, at his option, treat the point of origin of the truck route as the distribution point.

(3) *For delivery by a packer's branch house, wholesaler or hotel supply house.* If the seller is a packer's branch house, wholesaler or hotel supply house who has paid a charge under paragraph (i) of this section for delivery and/or transportation, he may upon resale of lamb or mutton carcasses and wholesale cuts, upon which the charge has been made, add the amount of such charge up to $.25 upon sales made from a distribution point located in Price Zones 1 and 5 to 10, inclusive, and up to $.50 in Price Zones 2, 3 and 4.

(4) *Limitation on total charge for transportation and delivery.* Notwithstanding any of the provisions of paragraph (i) (1) to (i) (3), inclusive, of this section, nothing therein contained shall be construed to permit a total charge for transportation and/or delivery from the point at which the meat was slaughtered to the place of business or receiving point of a retail seller, purveyor of meals, war procurement agency, other government agency or commercial user of more than 50 cents per hundredweight in Price Zone 1 or 5 to 10, inclusive, or $1.00 per hundredweight in Price Zone 2, 3 or 4. The additions specified in this paragraph (i) for transportation and for delivery may be charged: *Provided*, That the seller shall itemize separately on an invoice to the buyer the amount charged the buyer for transportation and/or delivery, except that if such separate statement of transportation charges is prohibited by local law, the seller shall maintain in his own record of the transaction a separate statement of any addition for transportation or delivery which is included in the maximum price charged.

(5) *How to compute cost.* The cost of transportation or delivery is to be computed on the basis of the lowest common carrier rate for the method of transportation employed.

(6) *Railway express shipments.* Where lamb or mutton is shipped by express to a purveyor of meals by a hotel supply house, no charge may be made by the seller for transportation or delivery. The buyer pays the shipping charges directly to the carrier.

11. Section 1364.170 (j) is amended to read as follows:

(j) *Peddler truck selling addition.* On a peddler truck sale involving delivery of not more than 100 pounds of lamb or mutton in a total delivery of not more than 150 pounds of meats and meat products in any one day from such peddler truck to any buyer's store door, a peddler may add to the applicable zone wholesale prices, the sum of $1.25 per hundredweight. If such sale involves a delivery of more than 100 pounds of lamb or mutton or a total delivery of more than 150 pounds of meats and meat products, the peddler may add to the applicable zone wholesale prices an amount not in excess of 75 cents per hundredweight, applicable to the total delivery of lamb or mutton in the one day from such peddler truck to the buyer's store door. These additions shall be in lieu of any delivery and/or transportation addition permitted under paragraph (i) of this section.

charge more than 65¢ per 100 lbs. not including sack.

(v) *Treated coals.* If a dealer's supplier has subjected the coal to oil or calcium chloride treatement to allay dust or to prevent freezing and makes a charge to the dealer therefor, the dealer selling such coal may add to the applicable maximum price set by this order the amount of such charge, not to exceed 10¢ per net ton. Any such treatment charge shall be stated separately from all other items on the invoice.

(vi) *Discounts.* On deliveries of five tons or more dealer must reduce the price specified by 50¢ per ton.

(vii) *Delivery zone.* The dealer may make no extra charge for delivery within the corporate limits of New Bern, North Carolina. (2) *The transportation tax.* Only the transportation tax imposed by section 620 of the Revenue Act of 1942 may be collected, in addition to the maximum prices set by this order. It may be collected only if the dealer states such tax separately from the price of the coal on the invoice. (The tax need not be stated separately on sales to the United States or any agency thereof. See Amendment 12 to Revised Maximum Price Regulation No. 122.) No part of this tax may be collected in addition to the maximum prices specified on sales of one-quarter ton or lesser amounts of coal, or on sales of any quantity of bagged coal.

(e) *Addition of increases in supplier's prices prohibited.* The maximum prices set by this order may not be increased by a dealer to reflect increases in his purchase cost or in his supplier's maximum prices occurring after the effective date hereof, but increases in the maximum prices set hereby, to reflect such increases are within the discretion of the Administrator or of the Regional Administrator of Region IV.

(f) *Power to amend or revoke.* This order, or any provision thereof, may be revoked, amended, or corrected at any time by the Administrator or by the Regional Administrator of Region IV.

(g) *Petitions for amendment.* Any person seeking an amendment of this order may file a petition for amendment with the Administrator in accordance with the provisions of Revised Procedural Regulation No. 1, or in the alternative, may file such petition with the Regional Administrator, Region IV, Office of Price Administration, Candler Building, Atlanta, 3, Georgia. If such petition is filed with the Regional Administrator, action thereon shall be taken by him. When such a petition is filed with the Regional Administrator, all requirements of Revised Procedural Regulation No. 1, relative to the filing of such petitions, are applicable except the place of filing specified therein.

(h) *Applicability of other regulations*—(1) *Licensing and registration.* Every dealer subject to this Order is subject to the licensing and registration provisions of Sections 15 and 16 of the General Maximum Price Regulation. These sections provide, in brief, that a license is required of all persons selling, at retail, commodities for which maximum prices are established. A license is automatically granted. It is not necessary to apply for a license, but a dealer may later be required to register. A license may be suspended for violations in connection with the sale of any commodity for which maximum prices are established. If a dealer's license is suspended, he may not sell any such commodity during the period of suspension.

(2) *Effect of this order on Revised Maximum Price Regulation 122.* To the extent applicable, the provisions of this order supersede the provisions of Revised Maximum Price Regulation No. 122.

(i) *Records and reports.* Every person making sales of solid fuels for which maximum prices are established by this order shall keep a record thereof showing the date, the name and address of the buyer, if known, the per net ton price charged, and the solid fuel sold. The solid fuel shall be identified in the manner in which it is described in this order. This record shall also separately state each service rendered and the change made therefor.

(1) It is not necessary that these records or your maximum prices be filed with the War Price and Rationing Board.

(j) *Posting of maximum prices; sales slips and receipts.* (1) Each dealer subject to this order shall post all the maximum prices set hereby for all of his types of sales. He shall post his prices in his place of business in a manner plainly visible to, and understandable by, the purchasing public. He shall also keep a copy of this order available for examination by any person inquiring as to his prices for solid fuels.

(2) Every dealer selling solid fuels for the sale of which a maximum price is set by this order shall, within 30 days after the date of delivery of the fuel, give to the buyer a statement showing: the date of the sale, the name and address of the dealer and of the buyer, the kind, size, and quantity of the solid fuel sold, the price charged, and separately stating any item which is required to be separately stated by this order. This paragraph (j) (2) shall not apply to sales of quantities of less than one-quarter ton or to sales of bagged coal unless the dealer customarily gave such a statement on such sales.

(3) In the case of all other sales, every dealer who during December 1941 customarily gave buyers sales slips or receipts shall continue to do so. If a buyer requests of a seller a receipt showing the name and address of the dealer, the kind, size, and quantity of the solid fuel sold to him, or the price charged, the dealer shall comply with the buyer's request as made by him.

(k) *Enforcement.* (1) Persons violating any provisions of this order are subject to the civil and criminal penalties, including suits for treble damages, provided for by the Emergency Price Control Act of 1942, as amended.

(2) Persons who have any evidence of any violations of this order are urged to communicate with the Raleigh District Office of the Office of Price Administration.

Any such treatment charge shall be stated separately from all other items on the invoice.

(v) The dealer may make no extra charge for delivery within the corporate limits of Wilson, North Carolina. For deliveries beyond the free delivery zone thus described, the dealer may add not more than 10¢ per ton per mile with a minimum charge of 50¢ for such delivery. Such delivery charge, if added, must be stated separately from all other items on the invoice.

(vi) Sales tax. The North Carolina State sales tax of 3% may be added to the prices established by this order.

(vii) *Credit.* No additional charge in excess of the prices listed in this schedule may be made for the extension of credit.

(d) *Ex Parte 148 freight rate increase; transportation tax*—(1) *The freight rate increase.* Since the Ex Parte 148 freight rate increase has been rescinded by the Interstate Commerce Commission, the dealer's freight rates are the same as those of December, 1941; therefore, no dealer may increase any price specified herein on account of freight rates.

(2) *The transportation tax.* Only the transportation tax imposed by section 620 of the Revenue Act of 1942 may be collected, in addition to the maximum prices set by this order. It may be collected only if the dealer states such tax separately from the price of the coal on the invoice. (The tax need not be stated separately on sales to the United States or any agency thereof. See Amendment 12 to Revised Maximum Price Regulation No. 122.) No part of this tax may be collected in addition to the maximum prices specified on sales of one-quarter ton or lesser amounts of coal, or on sales of any quantity of bagged coal.

(e) *Addition of increases in supplier's prices prohibited.* The maximum prices set by this order may not be increased by a dealer to reflect increases in his purchase cost or in his supplier's maximum prices occurring after the effective date hereof, but increases in the maximum prices set hereby, to reflect such increases are within the discretion of the Administrator or of the Regional Administrator of Region IV.

(f) *Power to amend or revoke.* This order, or any provision thereof, may be revoked, amended, or corrected at any time by the Administrator or by the Regional Administrator of Region IV.

(g) *Petitions for amendment.* Any person seeking an amendment of this order may file a petition for amendment with the Administrator in accordance with the provisions of Revised Procedural Regulation No. 1, or in the alternative, may file such petition with the Regional Administrator, Region IV, Office of Price Administration, Candler Building, Atlanta, 3, Georgia. If such petition is filed with the Regional Administrator, action thereon shall be taken by

him. When such a petition is filed with the Regional Administrator, all requirements of Revised Procedural Regulation No. 1, relative to the filing of such petitions, are applicable except the place of filing specified therein.

(h) *Applicability of other regulations*—(1) *Licensing and registration.* Every dealer subject to this order is subject to the licensing and registration provisions of sections 15 and 16 of the General Maximum Price Regulation. These sections provide, in brief, that a license is required of all persons selling, at retail, commodities for which maximum prices are established. A license is automatically granted. It is not necessary to apply for a license, but a dealer may later be required to register. A license may be suspended for violations in connection with the sale of any commodity for which maximum prices are established. If a dealer's license is suspended, he may not sell any such commodity during the period of suspension.

(2) *Effect of this order on Revised Maximum Price Regulation No. 122.* To the extent applicable, the provisions of this order supersede the provisions of Revised Maximum Price Regulation No. 122.

(i) *Records and reports.* Every person making sales of solid fuels for which maximum prices are established by this order shall keep a record thereof showing the date, the name and address of the buyer if known, the per net ton price charged, and the solid fuel sold. The solid fuel shall be identified in the manner in which it is described in this order. This record shall also separately state each service rendered and the charge made therefor.

(1) It is not necessary that these records or your maximum prices be filed with the War Price and Rationing Board.

(j) *Posting of maximum prices; sales slips and receipts.* (1) Each dealer subject to this order shall post all the maximum prices set hereby for all of his types of sales. He shall post his prices in his place of business in a manner plainly visible to, and understandable by, the purchasing public. He shall also keep a copy of this order available for examination by any person inquiring as to his prices for solid fuels.

(2) Every dealer selling solid fuels for the sale of which a maximum price is set by this order shall, within 30 days after the date of delivery of the fuel, give to the buyer a statement showing: the date of the sale, the name and address of the dealer and of the buyer, the kind, size and quantity of the solid fuel sold, the price charged, and separately stating any item which is required to be separately stated by this order. This paragraph (j) (2) shall not apply to sales of quantities of less than one-quarter ton or to sales of bagged coal unless the dealer customarily gave such a statement on such sales.

(3) In the case of all other sales, every dealer who during December 1941 customarily gave buyers sales slips or receipts shall continue to do so. If a buyer requests of a seller a receipt showing the name and address of the dealer, the kind, size, and quantity of the solid fuel sold to him, or the price charged, the dealer shall comply with the buyer's request as made by him.

(k) *Enforcement.* (1) Persons violating any provisions of this order are subject to the civil and criminal penalties, including suits for treble damages, provided for by the Emergency Price Control Act of 1942, as amended.

(2) Persons who have any evidence of any violations of this order are urged to communicate with the Raleigh District Office of the Price Administration.

SEC. 3. *Control of hiring and solicitation of workers.* All hiring and solicitation of workers in, or for work in, the Hartford Area shall be conducted in accordance with this employment stabilization program.

This shall include any hiring or solicitation, whether conducted within or outside the area, if the work is to be performed within the Area.

SEC. 4. *Authority and responsibility of Management-Labor Committee.* The Area Management-Labor War Manpower Committee for the Hartford Area is authorized to consider questions of policy, standards, and safeguards in connection with the administration of this employment stabilization program, and to make recommendations concerning the same to the Area Manpower Director.

Notices of referral received by any employer pursuant to this program shall be retained during the continuance of this program and for a reasonable time thereafter. They shall be made accessible to the Area Manpower Director or his representative upon request.

SEC. 6. *Issuance of statements of availability by employers.* An individual whose last employment is or was in an essential or locally needed activity shall receive a statement of availability from his employer if:

(a) He has been discharged, or his employment has been otherwise terminated by his employer, or

Workers receiving statements of availability from their employers may not be hired upon presentation of the statement of availability to a new employer. A worker shall present the statement of availability to the local office of the United States Employment Service of the War Manpower Commission for referral by it to a new job.

SEC. 7. *Referrals by the United States Employment Service.* (a) When any of the circumstances set forth in section 6 are found to exist in an individual's case and the employer fails or refuses to issue a statement of availability to an individual entitled to such statement, the United States Employment Service of the War Manpower Commission, upon finding that the individual is entitled thereto, shall refer such individual to a job opening. Pending such finding the United States Employment Service shall either request the worker to remain on his job or return to it in instances where the worker has voluntarily terminated his employment. When none of the circumstances set forth in section 6 are found to exist in an individual's case the United States Employment Service shall attempt to pursuade such individual to return to his former employment in an essential or locally needed activity providing the employer will reemploy the worker without prejudice.

(b) The United States Employment Service shall refer any individual in the employ of an employer who the War Manpower Commission finds after notice, hearing, and final decision has not complied with any War Manpower Commission stabilization program, regulation, or policy, or has not made a reasonable effort to comply with a recommendation of a duly authorized representative of the War Manpower Commission with respect to the more effective utilization of labor and for so long as such employer continues his non-compliance after such finding. An employer who continues to be in non-compliance after notice, hearing, and final decision shall not receive any referrals of labor from the United States Employment Service.

(c) If an individual is employed at less than full time or at a job which does not utilize his highest recognized skill for which there is a need in the war effort, the United States Employment Service may, upon his request, refer him to other available employment in which it finds that the individual will be more fully utilized in the war effort.

(d) The United States Employment Service, upon the request of an individual, shall refer him to a former employer, when it is found that he has received from such employer with whom he has reemployment rights under an existing collective bargaining agreement, a notice that he must return to his former employment in order to preserve his seniority status.

(e) The United States Employment Service shall refer any worker who has not been engaged in an essential or locally needed activity during the preceeding 60-day period.

(f) If a worker's last regular employment was in agriculture, he shall not be referred to non-agricultural work except after consultation with a designated representative of the War Food Administration and provided further that such an individual may be hired for non-agricultural work for a period not to exceed six weeks without referral.

SEC. 8. *Seniority.* Workers referred or transferred under the terms of this employment stabilization program shall, to the maximum extent possible, consistent with existing contractual relations between the employer and the employee:

(a) Preserve and accrue their seniority rights with their home employer in the same manner and with the same qualifications provided either by union agreement or by plant custom, and

(b) Be reemployed by their home employer according to the seniority agreement or custom in effect, provided they apply for reemployment within 40 days of either the date they terminate from the plant to which they first transferred, or the date when the United States Government declares an end to the war emergency, whichever is sooner.

Workers transferred with statements of availability and later entering the armed forces under the Selective Service Act will have the same rights for reemployment with their home employer as provided in (a) and (b).

SEC. 9. *Hiring contrary to the program.* An employer shall, upon written request of the United States Employment Service, promptly release from employment any worker hired in violation of this program.

SEC. 10. *Exclusions.* No provision of this employment stabilization program shall be applicable to:

(a) The hiring of a new employee for agricultural employment, or

(b) The hiring of a new employee for work of less than seven days' duration, or for work which is supplemental to the employee's principal work; but such work shall not constitute the individual's "last employment" for the purposes of this program, unless the employee is customarily engaged in work of less than seven days' duration, or

(c) The hiring of an employee in any Territory or possession of the United States, except Alaska and Hawaii, or

(d) The hiring by a foreign, state, county, or municipal government, or their political subdivisions or their agencies and instrumentalities, or to the hiring of any of their employees, unless such foreign, state, county, or municipal government or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the constitution and laws applicable to it, with the program, or

SEC. 13. *Solicitation of workers.* No employer shall advertise or otherwise solicit for the purposes of hiring any individual if the hiring of such an individual would be subject to restrictions under this employment stabilization program, except in a manner consistent with such restrictions as determined by the Area Manpower Director or his representative.

SEC. 14. *Hiring.* The decision to hire or refer a worker shall be based on qualifications essential for performance of or suitability for the job, and shall be made without discrimination as to race, color, creed, advanced age, sex, national origin, or except as required by law, citizenship.

However, the establishment by an employer of unreasonable physical or experience standards for employment will be considered as evidence of under utilization of available manpower and each such case will be referred to the attention of the Area Management-Labor War Manpower Committee.

The Federal Government shall be considered as a single essential employer for the purposes of this program, and all hiring for departments and agencies of the Federal Government subject to the Civil Service Act, rules and regulations, shall be conducted by the United States Civil Service Commission which shall recruit in accordance with the policies of the War Manpower Commission.

SEC. 15. *Representation.* Nothing contained in this program shall be construed to restrict any individual from seeking the advice and aid of, or from being represented by the labor organization of

which he is a member or any other representative freely chosen by him, at any step in the operation of the program.

SEC. 16. *General referral policies.* No provision in this program shall limit the authority of the United States Employment Service or any other governmental agency designated by the War Manpower Commission to make referrals in accordance with approved policies and instructions of the War Manpower Commission.

SEC. 17. *Effective date.* This program shall be effective as of May 1, 1944 and is in substitution for and supersedes the employment stabilization program in effect prior to such date. Chapter XI—War Food Administration (Distribution Orders)

[WFO 79–111, Amdt. 2]

PART 1401—DAIRY PRODUCTS

FLUID MILK AND CREAM IN MUSKEGON, MICH., SALES AREA

Pursuant to War Food Order No. 79 (8 F.R. 12426, 9 F.R. 4321, 4319), dated September 7, 1943, as amended, and to effectuate the purposes thereof, War Food Order No. 79–111 (9 F.R. 145, 4321, 4319), as amended, relative to the conservation and distribution of fluid milk, milk byproducts, and cream in the Muskegon, Michigan, milk sales area, is hereby further amended, so as to read as follows:

§ 1401.140 *Quota restrictions*—(a) *Definitions.* (1) Each term defined in War Food Order No. 79, as amended, shall, when used herein, have the same meaning as is set forth for such term in War Food Order No. 79, as amended.

(2) The term "WFO 79" means War Food Order No. 79, dated September 7, 1943, as amended.

(3) The term "sub-handler" means any handler, such as a peddler, vendor, sub-dealer, or secondary dealer, who (i) receives in a previously packaged and processed form milk, cream, or milk byproducts for delivery, and (ii) does not operate facilities for the processing and bottling of milk.

(4) The term "industrial user" means a person, as determined by the market agent, in his capacity as a manufacturer of products using as an ingredient therein milk, cream, or milk byproducts, which products are disposed of primarily for resale to consumers off the premises where made.

(5) The term "base" means the total pounds delivered by a handler within the sales area during the base period (i) of milk solids in milk, (ii) of butterfat in cream, or (iii) of milk solids in milk byproducts, minus the quota exempt deliveries described in (j) hereof, and then divided by the number of days in the base period. (For the purpose of this order, the milk solids content of milk or milk byproducts shall be computed as follows: Each hundredweight of milk, or milk byproducts other than cottage, pot, or baker's cheese, shall be considered the equivalent of 9.375 pounds of milk solids plus the number of pounds of solids calculated by multiplying the pounds of butterfat content of such milk or milk byproducts by .906, and each hundredweight of cottage, pot, or baker's cheese shall be considered the equivalent of 65.63 pounds of milk solids minus .953 pound of milk solids for each one-half percent of butterfat content of such cheese.)

(b) *Milk sales area.* The following area is designated as a "milk sales area" to be known as the Muskegon, Michigan, milk sales area, and is referred to hereinafter as the "sales area":

The cities of Muskegon, Muskegon Heights and North Muskegon and the townships of Laketon, Muskegon, Fruitport, and Norton, all in the county of Muskegon, Michigan.

(c) *Base period.* The calendar month of June 1943 is designated the base period.

(d) *Quota period.* Each calendar month is designated as a quota period.

(e) *Handler quotas.* Quotas for each handler other than a sub-handler or producer-handler shall be determined for each quota period as follows:

(1) For milk, multiply his base of milk solids in milk by 100 percent;

(2) For cream, multiply his base of butterfat in cream by 75 percent;

(3) For milk byproducts, multiply his base of milk solids in milk byproducts by 100 percent; and

(4) Multiply each of the foregoing results by the number of days in the quota period.

(f) *Quotas for handlers who are also producers.* Quotas for each handler who is also a producer and who purchases no milk shall be computed in accordance with (e) hereof, except:

(1) His base period shall be either June or December, 1943, whichever represents his larger total deliveries; and

(2) The applicable percentages shall be 100 percent in lieu of those specified in (e).

(g) *Quota adjustments.* Each handler may, within any quota period, (1) increase his quota of milk solids in milk by one pound for each one pound of milk solids by which he decreases his quota for milk byproducts, *Provided*, That his quota of milk solids in milk shall not be so increased by more than 3 percent, and (2) increase his quota of milk solids in milk byproducts by one pound for each one pound of milk solids by which he decreases his quota for milk.

(h) *Handler exemptions.* Quotas shall not apply to any handler who delivers in a quota period a daily average of less than 300 units of milk, cream, and milk byproducts, unless more than 150 units of such daily average shall consist of cream. For the purpose of this order, a unit shall be the equivalent in volume of the following: (1) One quart of milk, buttermilk, or fluid milk byproducts; (2) one-half pint of cream; and (3) one-half pound of cottage, pot, or baker's cheese.

(i) *Transfers of bases.* The market agent is empowered to transfer base from one handler to another:

(1) Upon receipt of a request in writing from each handler involved; or

(2) Upon application and after written notice to the Director and each handler involved, whenever (i) a handler has denied service to an existing account; (ii) an account customarily rotates among handlers, inclusive of any account with a public agency or institution which is let on a bid basis; (iii) a sub-handler regularly making 50 percent or more of his deliveries under his own brand or trade name submits an application; or (iv) a sub-handler applies in order to consummate a bona fide sale of business: *Provided*, That any ruling by a market agent under this authority may be reviewed by the Director upon petition, or upon the initiative of the Director.

(j) *Quota exclusions and exemptions.* Deliveries of milk, cream, or milk by-

products, (1) to other handlers, except for such deliveries to sub-handlers, (2) to plants engaged in the handling or processing of milk, milk byproducts, cream, or other dairy products, from which no milk, milk byproducts, or cream is delivered in the sales area, (3) to industrial users, and (4) to the agencies or groups specified in (d) of WFO 79, shall be excluded from the computation of deliveries in the base period and exempt from charges to quotas.

(k) *Consumer priorities.* In the distribution of milk subject to quotas established hereunder, a handler shall give preference in the order listed, taking into consideration the type of purchasers served by him in the base period, to:

(1) The need of children, expectant mothers, and invalids requiring milk;

(2) Homes and retail stores handling milk for consumption off the premises; and

(3) Establishments serving milk for consumption on the premises.

(l) *Petition for relief from hardship.* (1) Any person affected by WFO 79 or the provisions hereof, who considers that compliance therewith would work an exceptional and unreasonable hardship on him, may file with the market agent a petition addressed to the Director. The petition shall contain the correct name, address, and principal place of business of the petitioner, a full statement of the facts upon which the petition is based, the hardship involved, and the nature of the relief desired.

(2) Upon receiving such petition the market agent shall immediately investigate the representations and facts stated therein.

(3) After investigation, the petition shall be certified to the Director, but prior to certification the market agent may (i) deny the petition or (ii) grant temporary relief for a total period not to exceed 60 days.

(4) Denials or grants of relief by the market agent shall be reviewed by the Director and may be affirmed, modified, or reversed by the Director.

(m) *Reports.* Each handler shall transmit to the market agent on forms prescribed by the market agent the following reports:

(1) Within 20 days following the effective date of this order, reports which show the information required by the market agent to establish such handler's quotas;

(2) Within 10 days following the close of each quota period, the information required by the market agent to establish the volume of deliveries of milk, cream, and milk byproducts, under the provisions of this order, during the preceding quota period; and

(3) Handlers exempt from quotas pursuant to (h) hereof shall, upon the request of the market agent, submit the information required by the market agent to establish volumes of deliveries of milk, cream, and milk byproducts.

(n) *Records.* Handlers shall keep and shall make available to the market agent such records of receipts, sales, deliveries, and production as the market agent shall require for the purpose of obtaining information which the Director may require for the establishment of quotas.

(o) *Violations.* The market agent shall report all violations to the Director together with the information required for the prosecution of such violations.

(p) *Effective date.* This order shall take effect at 12:01 a. m., e. w. t., September 1, 1944. With respect to violations of said War Food Order No. 79–111, as amended, rights accrued, or liabilities incurred thereunder, prior to the effective time of this amendment, said War Food Order No. 79–111, as amended, shall continue in full force and effect for the purpose of sustaining any suit, action, or other proceeding with respect to any such violation, right, or liability.

NOTE: All reporting and record-keeping requirements of this order have been approved by, and subsequent reporting and record-keeping requirements will be subject to the approval of, the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(3) The term "sub-handler" means any handler, such as a peddler, vendor, sub-dealer, or secondary dealer, who (i) receives in a previously packaged and processed form milk, cream, or milk byproducts for delivery, and (ii) does not operate facilities for the processing and bottling of milk.

(4) The term "industrial user" means a person, as determined by the market agent, in his capacity as a manufacturer of products using as an ingredient therein milk, cream, or milk byproducts, which products are disposed of primarily for resale to consumers off the premises where made.

(5) The term "base" means the total pounds delivered by a handler within the sales area during the base period (i) of milk solids in milk, (ii) of butterfat in cream, or (iii) of milk solids in milk byproducts, minus the quota exempt deliveries described in (j) hereof, and then divided by the number of days in the base period. (For the purpose of this order, the milk solids content of milk or milk byproducts shall be computed as follows: Each hundredweight of milk, or milk byproducts other than cottage, pot, or baker's cheese, shall be considered the equivalent of 9.375 pounds of milk solids plus the number of pounds of solids calculated by multiplying the pounds of butterfat content of such milk or milk byproducts by .906, and each hundredweight of cottage, pot, or baker's cheese shall be considered the equivalent of 65.63 pounds of milk solids minus .953 pounds of milk solids for each one-half percent of butterfat content of such cheese.)

(b) *Milk sales area.* The following area is designated as a "milk sales area" to be known as the Corpus Christi, Texas, milk sales area, and is referred to hereinafter as the "sales area":

The city of Corpus Christi and the remainder of the area included in Justices' precinct 1, all in Nueces County, Texas.

(3) For milk byproducts, multiply his base of milk solids in milk byproducts by 100 percent; and

(4) Multiply each of the foregoing results by the number of days in the quota period.

(f) *Quotas for handlers who are also producers.* Quotas for each handler who is also a producer and who purchases no milk shall be computed in accordance with (e) hereof, except:

(1) His base period shall be either June or December, 1943, whichever represents his larger total deliveries; and

PART 1401—DAIRY PRODUCTS

FLUID MILK AND CREAM IN COLUMBIA, S. C., SALES AREA

Pursuant to War Food Order No. 79 (8 F.R. 12426, 9 F.R. 4321, 4319), dated September 7, 1943, as amended, and to effectuate the purposes thereof, War Food Order No. 79–137 (9 F.R. 1410, 4321, 4319), as amended, relative to the conservation and distribution of fluid milk, milk byproducts, and cream in the Columbia, South Carolina, milk sales area, is hereby further amended, so as to read as follows:

§ 1401.172 *Quota restrictions*—(a) *Definitions.* (1) Each term defined in War Food Order No. 79, as amended, shall, when used herein, have the same meaning as is set forth for such term in War Food Order No. 79, as amended.

(2) The term "WFO 79" means War Food Order No. 79, dated September 7, 1943, as amended.

(3) The term "sub-handler" means any handler, such as a peddler, vendor, subdealer, or secondary dealer, who (i) receives in a previously packaged and processed form milk, cream, or milk byproducts for delivery, and (ii) does not operate facilities for the processing and bottling of milk.

(4) The term "industrial user" means a person, as determined by the market agent, in his capacity as a manufacturer of products using as an ingredient therein milk, cream, or milk byproducts, which products are disposed of primarily for resale to consumers off the premises where made.

(5) The term "base" means the total pounds delivered by a handler within the sales area during the base period (i) of milk solids in milk, (ii) of butterfat in cream, or (iii) of milk solids in milk byproducts, minus the quota exempt deliveries described in (j) hereof, and then divided by the number of days in the base period. (For the purpose of this order, the milk solids content of milk or milk byproducts shall be computed as follows: Each hundredweight of milk, or milk byproducts other than cottage, pot, or baker's cheese, shall be considered the equivalent of 9.375 pounds of milk solids plus the number of pounds of solids calculated by multiplying the pounds of butterfat content of such milk or milk byproducts by .906, and each hundredweight of cottage, pot, or baker's cheese shall be considered the equivalent of 65.63 pounds of milk solids minus .953 pound of milk solids for each one-half percent of butterfat content of such cheese.)

(b) *Milk sales area.* The following area is designated as a "milk sales area" to be known as the Columbia, South Carolina, milk sales area, and is referred to hereinafter as the "sales area":

The city of Columbia and the school districts of Columbia, Hyatt Park, Edgewood, Olympia, and St. Andrews in Richland County, and the township of Congaree in Lexington County, all in the State of South Carolina.

(c) *Base period.* The calendar month of June 1943 is designated the base period.

(d) *Quota period.* Each calendar month is designated as a quota period.

(e) *Handler quotas.* Quotas for each handler other than a sub-handler or producer-handler shall be determined for each quota period as follows:

(1) For milk, multiply his base of milk solids in milk by 100 percent;

(2) For cream, multiply his base of butterfat in cream by 75 percent;

(3) For milk byproducts, multiply his base of milk solids in milk byproducts by 100 percent; and

(4) Multiply each of the foregoing results by the number of days in the quota period.

(f) *Quotas for handlers who are also producers.* Quotas for each handler who is also a producer and who purchases no milk shall be computed in accordance with (e) hereof, except:

(1) His base period shall be either June or December, 1943, whichever represents his larger total deliveries; and

(2) The applicable percentages shall be 100 percent in lieu of those specified in (e).

(g) *Quota adjustments.* Each handler may, within any quota period, (1) increase his quota of milk solids in milk by one pound for each one pound of milk solids by which he decreases his quota for milk byproducts: *Provided*, That his quota of milk solids in milk shall not be so increased by more than 3 percent, and (2) increase his quota of milk solids in milk byproducts by one pound for each one pound of milk solids by which he decreases his quota for milk.

(h) *Handler exemptions.* Quotas shall not apply to any handler who delivers in a quota period a daily average of less than 300 units of milk, cream, and milk byproducts, unless more than 150 units of such daily average shall consist of cream. For the purpose of this order, a unit shall be the equivalent in volume of the following: (1) One quart of milk, buttermilk, or fluid milk byproducts; (2) one-half pint of cream; and (3) one-half pound of cottage, pot, or baker's cheese.

(i) *Transfers of bases.* The market agent is empowered to transfer base from one handler to another:

(1) Upon receipt of a request in writing from each handler involved; or

(2) Upon application and after written notice to the Director and each handler involved, whenever (i) a handler has denied service to an existing account; (ii) an account customarily rotates among handlers, inclusive of any account with a public agency or institution which is let on a bid basis; (iii) a sub-handler regularly making 50 percent or more of his deliveries under his own brand or trade name submits an application; or (iv) a sub-handler applies in order to consummate a bona fide sale of business: *Provided*, That any ruling by a market agent under this authority may be reviewed by the Director upon petition, or upon the initiative of the Director.

(j) *Quota exclusions and exemptions.* Deliveries of milk, cream, or milk byproducts, (1) to other handlers, except for such deliveries to sub-handlers, (2) to plants engaged in the handling or processing of milk, milk byproducts, cream, or other dairy products, from which no milk, milk byproducts, or cream is delivered in the sales area, (3) to industrial users, and (4) to the agencies or groups specified in (d) of WFO 79, shall be excluded from the computation of deliveries in the base period and exempt from charges to quotas.

(k) *Consumer priorities.* In the distribution of milk subject to quotas established hereunder, a handler shall give preference in the order listed, taking into consideration the type of purchasers served by him in the base period, to:

(1) The need of children, expectant mothers, and invalids requiring milk;

(2) Homes and retail stores handling milk for consumption off the premises; and

(3) Establishments serving milk for consumption on the premises.

(l) *Petition for relief from hardship.* (1) Any person affected by WFO 79 or the provisions hereof, who considers that compliance therewith would work an exceptional and unreasonable hardship on him, may file with the market agent a petition addressed to the Director. The petition shall contain the correct name, address, and principal place of business of the petitioner, a full statement of the facts upon which the petition is based, the hardship involved, and the nature of the relief desired.

(2) Upon receiving such petition the market agent shall immediately investigate the representations and facts stated therein.

(3) After investigation, the petition shall be certified to the Director, but prior to certification the market agent may (i) deny the petition or (ii) grant temporary relief for a total period not to exceed 60 days.

(4) Denials or grants of relief by the market agent shall be reviewed by the Director and may be affirmed, modified, or reversed by the Director.

(m) *Reports.* Each handler shall transmit to the market agent on forms prescribed by the market agent the following reports:

(1) Within 20 days following the effective date of this order, reports which show the information required by the market agent to establish such handler's quotas;

(2) Within 10 days following the close of each quota period, the information required by the market agent to establish the volume of deliveries of milk, cream, and milk byproducts, under the provisions of this order, during the preceding quota period; and

(3) Handlers exempt from quotas pursuant to (h) hereof shall, upon the request of the market agent, submit the information required by the market agent to establish volumes of deliveries of milk, cream, and milk byproducts.

(n) *Records.* Handlers shall keep and shall make available to the market agent such records of receipts, sales, deliveries, and production as the market agent shall require for the purpose of obtaining information which the Director may require for the establishment of quotas.

(o) *Violations.* The market agent shall report all violations to the Director together with the information required for the prosecution of such violations.

(p) *Effective date.* This order shall take effect at 12:01 a. m., e. w. t., September 1, 1944. With respect to violations of said War Food Order No. 79–137, as amended, rights accrued, or liabilities incurred thereunder, prior to the effective time of this amendment, said War Food Order No. 79–137, as amended, shall continue in full force and effect for the purpose of sustaining any suit, action, or other proceeding with respect to any such violation, right, or liability.

NOTE: All reporting and record-keeping requirements of this order have been approved by, and subsequent reporting and record-keeping requirements will be subject to the approval of, the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(2) Cause to be retained in storage in a refrigerated storage facility, restricted commodities.

(3) Hold, for a period in excess of seventy-two (72) hours from the time the reservation is made, storage space reserved by any person in a refrigerated storage facility, unless the person operating such facility is furnished with car numbers or copies of the bills of lading covering commodities which have been shipped to such facility by common carrier, or, when means of transportation other than common carrier are used, other adequate evidence that the commodities to be stored have been shipped or are otherwise enroute to such facility: *Provided*, That space may be held for the account of a Government agency for a period not to exceed seven (7) days from the date the reservation is made: *Provided, further*, That this paragraph (b) (3) shall not apply to the reservation of storage space for fruits and vegetables packed in the field and moving to the first refrigerated storage facility.

The Order Administrator may issue such permits consistent with the authority delegated to the Order Administrator by the Director, and when the issuing of such permits would be compatible with the purposes of this Order. Permits heretofore issued under War Food Orders No. 70 and No. 90 shall remain in effect until the expiration date stated in each such permit unless they shall be sooner terminated by the Order Administrator.

(h) *Contracts.* The restrictions of this order shall be observed without regard to contracts heretofore or hereafter entered into, or any rights accrued, or payments made thereunder.

Petition for such relief shall be in writing and shall set forth all pertinent facts and the nature of the relief sought. AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1943, 8 F.R. 3666, 3996; Prl. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 1029—FARM MACHINERY

[Limitation Order L–257–a, as Amended Aug. 31, 1944]

EXPORTS

§ 1029.16 *Limitation Order L–257–a*—(a) *What this order does.* This order describes the rules governing the manufacture for export of machinery and equipment (both farm and non-farm) and repair parts, and supplements Limitation Order L–257 covering domestic production. All general provisions of the domestic order, such as definitions and rules for production schedules, will apply to producers for export under this order, unless this order indicates otherwise. It is expected that this order L–257–a will be the basic export order from year to year, but that "applicable export schedules" of quotas will be issued for each "current quota period", just as explained in Order L–257 for domestic quotas. It may be assumed that the applicable export schedules in effect at any particular time will continue into the next "current quota period", until such time as new schedules are issued.

(b) *Additional definitions.* The definitions of Order L–257, unless otherwise indicated in this order, shall apply for the purpose of this order, and also the following:

(1) "Base shipment" means one-half the net shipping weight of the total quantity (as reported on Form PD–388) of farm machinery and equipment and

repair parts in the aggregate exported by a producer during the calendar years 1940 and 1941 combined to any country or group of countries (except Canada) listed on an applicable export schedule.

(2) "Lend-Lease order" means any order for machinery and equipment (both farm and non-farm) or repair parts placed by any agency of the United States Government in response to a requisition filed pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(3) "Applicable export schedule" means any schedule which relates to a current quota period and fixes manufacturing quotas for the foreign country or countries listed for that period.

(c) *Restrictions on production for export*—(1) *General export quotas (except Canada).* During any current quota period, no producer shall manufacture for shipment, or ship, to foreign countries more machinery and equipment (both farm and non-farm) and repair parts than his quota for the particular country or countries, as indicated on the applicable export schedule. Where countries are listed on an applicable export schedule as a group with only one quota percentage, the producer's quota for all countries in the group as a whole is the listed percentage of his base shipments to those countries. Where countries are listed individually with separate quota percentages, the producer's quota for each country is the applicable percentage of his base shipment to that country. Where the quota percentage is 0% for any country or group of countries listed, or where a particular foreign country is not listed at all, shipments can be made only by getting a special quota under paragraph (c) (4). These special quotas will be given only as the need arises.

Each export quota for a country or group of countries (except Canada) is an over-all tonnage, which the producer can divide up among farm machinery and equipment, non-farm machinery and equipment, and repair parts, as he chooses.

Exceptions to these general rules are stated in paragraph (d).

(2) *Canadian quotas.* During any current quota period, no producer shall manufacture for shipment to Canada more of any item of farm machinery and equipment (in units) or attachments (by weight) than his quota as indicated on the applicable export schedule. For each item of farm machinery and equipment (excluding attachments) the producer's quota is half the number of that item (in units) shipped by him to Canada during the calendar years 1940 and 1941, multiplied by the percentage shown for the item on the schedule. (Non-farm machinery and equipment is not included in the above quotas and may not be shipped to Canada.

For each item of attachments, the quota is half the net shipping weight of that item shipped by the producer to Canada during the calendar years 1940 and 1941, multiplied by the percentage shown for the item on the schedule. However, the producer may choose to lump all attachments as explained in paragraph (d) (3).

There is no quota limitation on the manufacture of repair parts for Canada. However, it is necessary to comply with paragraph (e) with respect to production schedules.

Exceptions to these general rules are stated in paragraph (d).

(3) *Special restrictions.* No producer shall manufacture for shipment, or ship, to any foreign country (including Canada):

(i) Any item of farm machinery and equipment requiring rubber tires except the following items:

Wheel type tractors including garden type.
Combines.
Pick-up hay balers and field hay harvesters.
Corn pickers.
Power sprayers over ten gallons per minute.
Any item requiring tires to be mounted on wheel rims of the following sizes (diameter): 15", 16", 18", 20" and 21".

(ii) Any item of farm machinery and equipment or repair parts except to the extent listed on an approved production schedule under paragraph (e).

(4) *Adjustments in quotas.* The War Production Board may, by specific written directions or authorizations issued to any producer or other person affected by this order, increase or decrease any export quota or authorized use of materials; and may transfer any portions of quotas between producers, taking into account the amount and weight of materials to be used, the need for particular items at the time required in particular countries, the labor and transportation situation in the manufacturing areas involved, and such other factors as may be proper.

(d) *Exceptions*—(1) *Production before or after current quota periods*—(i) *Advance planning of production.* Before the beginning of any current quota period, producers may plan their advance production for export as explained for domestic production in subparagraph (d) (5) (i) of Order L–257.

(ii) *Carry-over of uncompleted portions of quotas.* Any portions of export quotas under an applicable export schedule (including all amendments, appeals and specific authorizations) which are not completely manufactured by the end of the current quota period, may be carried over and added to the corresponding quotas of the next current quota period, but only to the extent that the particular items are covered by an export license or release certificate issued by or under authority of the Foreign Economic Administration, or by a Lend-Lease order, dated before July 1 of this next period. However, items for Canada may be carried over to the extent that they can be completed by July 31 of this next period. In addition, uncompleted quotas for the following items of harvesting machinery and equipment for Canada under Export Schedule X–10 (including special authorizations, etc.) may be carried over for completion any time before September 30, 1944:

Combines (Item 128 only).
Corn binders (Item 133).
Corn pickers (Items 133–136).
Field ensilage harvesters (Item 137).
Corn shellers (Items 166 and 167 only).
Feed grinders and crushers (Items 174, 175, and 175a only).
Portable elevators (Item 186).

(iii) [Deleted July 10, 1944.]

(2) *Bracketed items for Canada.* Wherever, in an applicable export schedule for Canada, two or more items are bracketed together, the producer may distribute his total quota (in units) for that bracket among all the items in that bracket, as set forth for domestic items in paragraph (d) (2) of Order L–257.

(3) *Attachments for Canada.* Any producer may choose not to follow the individual quota percentages for attachment items for Canada as indicated on the applicable export schedule, and instead manufacture up to 100% of half his total 1940 and 1941 shipments of all attachments (by weight) to Canada, under the terms set forth for domestic attachments in paragraph (d) (3) of Order L–257.

NOTE: The over-all quota for attachments under Schedule X–10 is 75%.

(e) *Production schedules.* Each producer who is not a "small producer" must have available for shipment export the quantities of items of machinery and equipment (both farm and non-farm) and repair parts as indicated on his production schedules which have been filed and approved in accordance with paragraph (e) of Order L–257. All provisions of that paragraph apply to production schedules for export, unless otherwise indicated. However, any item manufactured for export, whether for an O. E. W. country or Lend-Lease country (excluding Canada), may be shipped to any foreign country (except Canada) regardless of the schedule filed on Form WPB–3053 or WPB–3181, *Provided*, That the total shipments to any country or group of countries during the current quota period must not be more than the quota for that country or group of countries established under this order. Shifts of this nature do not have to be reported on Form WPB–3181.

(f) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(g) *Reports.* Each producer must file by the 10th day of each month a report on Form WPB–813 of his export shipments to all foreign countries (except Canada) during the previous month in accordance with the instructions on the form. However, producers whose total export quota for all countries, except Canada, is 15,000 pounds or less for any current quota period, need not file this form.

(h) *Communications.* All communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Farm Machinery and Equipment Division, Washington 25, D. C., Ref.: L–257–a.

NOTE: This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

Issued this 31st day of August 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

NOTE: Export Schedules X–1 through X–10 deleted August 31, 1944, since they expired June 30, 1944. Any export quotas under those Schedules which are not completed within the "carry-over" provisions of paragraph (d) (1) (ii) or L–257–a are cancelled.

PART 944—REGULATIONS APPLICABLE TO THE OPERATION OF THE PRIORITIES SYSTEM

[Priorities Reg. 11B, as Amended Sept. 1, 1944]

PREFERENCE RATINGS FOR MANUFACTURERS NOT OBTAINING PRODUCTION MATERIALS UNDER THE CONTROLLED MATERIALS PLAN

§ 944.32b *Priorities Regulation 11B*—(a) *Purpose and scope.* The purpose of this regulation is to provide priorities assistance in obtaining production materials for the manufacture of products other than Class A or Class B products. The use of this regulation in obtaining priorities assistance is optional. Persons who can get production materials without ratings should not apply for priorities assistance. A manufacturer of a Class A or a Class B product cannot use this regulation to get priorities assistance to buy production materials needed for the manufacture of a Class A or a Class B product.

(b) *Definitions.* For purposes of this regulation:

(1) "Unclassified product" means any product which is neither a controlled material, a Class A product, nor a Class B product, as those terms are defined in CMP Regulation No. 1.

(2) "Production material" means, with respect to any person, material or products (including fabricated parts and subassemblies) which will be physically incorporated in his unclassified product, and includes the portion of such material normally consumed or converted into scrap in the course of processing. It also includes items purchased by a manufacturer for resale to round out his line if such items do not represent more than 10 percent of his total sales. The term "production material" does not include manufacturing equipment or maintenance, repair or operating supplies as defined in CMP Regulation No. 5.

(c) *Applications for priorities assistance for production of unclassified products*—(1) *Application on Form WPB–2613.* Any person who produces unclassified products and needs priorities assistance to obtain production materials may file an application on Form WPB–2613. The application must not be based on a rate of production greater than that permitted under the restrictions of existing Limitation Orders or other applicable orders or regulations of the War Production Board.

The application must show all production materials (including products to round out a line) for which priorities assistance is requested. If an applicant desires priority assistance for materials where under an order or regulation of the War Production Board specification of quality and quantity must be shown, (for example, M–328—"Textiles, Clothing, Leather and Related Products"), the applicant must describe the material on the application form in sufficient detail to meet the requirements of the order or regulations before priorities assistance will be granted.

(2) *Applications under Priorities Regulation 25.* If a person wants to produce unclassified products covered by orders in which reference is made to Priorities Regulation 25, or which are listed on a direction to that regulation, he may apply for authorization as explained in Priorities Regulation 25.

(d) *Holders of Form WPB–2613 prohibited from extending customers' ratings.* A person who has received a rating or ratings on Form WPB–2613 or CMPL–150c for production materials for a specified product shall not extend ratings received from his customers to purchase production materials for the same product during the quarters covered by the form except that:

(1) Orders calling for delivery in the same quarter which have already been rated in accordance with applicable regulations or orders of the War Production Board need not be rerated, and

(2) A rating of AAA may be extended where necessary to obtain production material actually required to fill an order rated AAA, if such material is not actually on hand, but the rating may not be extended to replace inventories, and

(3) A rating may be extended to get cotton textiles as defined in Order M–317 required for direct or ultimate delivery or for incorporation into any material for ultimate delivery to the Army or Navy of the United States, the Maritime Commission, or the War Shipping Administration.

(e) *Authorized production schedules.* (1) Every assignment of rating on Form WPB–2613 or CMPL–150c will include authorization of a production schedule for the product for which the production materials are required. The authorization will set a maximum limit of production for the quarter.

(2) No producer who has received any rating on Form WPB–2613 or CMPL–150c shall produce the product covered by the form in an amount exceeding his authorized production schedule.

(3) A producer shall be deemed to exceed an authorized production schedule if his completion of finished products exceeds the limits authorized, or if his rate of fabricating, assembling or otherwise processing, or acquiring raw materials or parts exceeds the practicable working minimum required to meet the authorized production schedule.

(e–1) *Restrictions on use of ratings.* No rating assigned on form WPB–2613 may be used to buy any production material not listed on the form, nor may it be used to buy any item shown on List A of Priorities Regulation No. 3.

(f) *Miscellaneous provisions*—(1) *Applicability of other regulations and orders.* This order and all transactions affected hereby are subject to all applicable regulations and orders of the War Production Board, as amended from time to time.

(2) *Violations.* Any person who willfully violates any provision of this regulation, or who, in connection with this regulation, willfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime and upon conviction may be punished by fine up to $10,000, of by imprisonment or both. In addition, such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(3) *Communications to War Production Board.* All applications filed hereunder, and all communications concerning this regulation, shall, unless otherwise directed, be addressed to the War Production Board, Washington 25, D. C., Ref.: Priorities Regulation No. 11B.

Issued this 1st day of September 1944.

WAR PRODUCTION BOARD,
By J. JOSEPH WHELAN,
Recording Secretary.

INTERPRETATION 1

The term "production material" in paragraph (b) (1) includes material which, at any stage of production, enters into the chemical reaction necessary to the manufacture of an unclassified product. It also includes any material which is used as a solvent, wash or extractant at any stage of the production of chemicals. (Issued June 16, 1943.)

PART 3289—RADIO AND RADAR

[General Limitation Order L–151, as Amended Sept. 1, 1944]

DOMESTIC WATTHOUR METERS

§ 3289.11 *General Limitation Order L–151*—(a) *Definition.* Wherever it appears in this order, the term "domestic watthour meter" is used to mean any device designed and manufactured for the purpose of measuring the consump-

tion of electrical energy with respect to time, and includes single phase, two and three wire types, with capacities up to 25 amperes and voltages up to 240 volts, for use on alternating current of any frequency. The term does not include electric energy meters for use on direct current or on polyphase circuits, maximum demand meters, or integrating meters, calibrated in terms other than electric energy (i. e., meters integrating weight, pressure, etc.).

(b) *Restrictions on production.* (1) No person shall manufacture or assemble any new domestic watthour meters or any new parts for the conversion of domestic watthour meters from one to another type, except as authorized by the War Production Board on Form GA-1850.

(2) The above provision in paragraph (b) (1) does not prohibit the use or delivery of existing parts for the conversion of domestic watthour meters from one to another type, such as the conversion of non-socket to socket type meters, three-wire to two-wire or two-wire to three-wire meters, or meters from one current rating to a higher current rating.

(3) A person wishing to manufacture domestic watthour meters or conversion parts, should apply for authorization by letter addressed to the War Production Board, Radio and Radar Division, Washington, 25, D. C., Reference L-151. This letter should give all pertinent information with respect to proposed production. Where the applicant will need controlled materials in order to produce the equipment, the letter requesting authorization should be accompanied by application on Form CMP-4B, for the controlled materials.

(4) Production will be authorized for the several manufacturers as nearly as practicable according to ratios comparable to the pre-war ratios of the several companies. Production will be so authorized that the total production will not exceed the approved War Production Board program, and the production in any one plant, or labor requirements therefor, will not interfere with war production in that plant, or in any other plant located in the same area. Individual authorizations will be issued in amounts sufficient to carry out the presently approved program of 260,000 domestic watthour meters for the last six months of 1944, and any other program which may be approved later by the War Production Board.

(c) *Restrictions on delivery.* No person shall deliver or accept delivery of any new domestic watthour meter unless it is a delivery:

(1) To or for the account of the Army, Navy, Maritime Commission or War Shipping Administration.

(2) Between persons who own or operate electric power utilities which serve the public generally.

(3) Authorized by the War Production Board on Form WPB-1319. Any prospective purchaser may apply for such an authorization by filing Form WPB-1319 in accordance with the current instructions for filing such forms. These form applications should be filed with the nearest Utility Inventory Control Office of the War Production Board, addressed to the attention of the Regional Utility Engineer. The locations of these Regional Utility Inventory Control Offices are given on List A at the end of this order. As a general rule, favorable consideration will be given to the purchase of new domestic watthour meters only where one or more of the following factors appear to establish the need for them:

(i) The meters are to measure the consumption of electric energy by individual homes in a war housing project, which cannot be metered with a master meter, and delay in obtaining individual used meters would delay the occupancy of such dwellings.

(ii) The meters are required for the replacement in service of damaged meters, and the applicant cannot obtain prompt delivery of used meters for that purpose, and does not have such meters available in his own inventory for replacements.

(iii) Special or emergency conditions require the prompt delivery of new meters.

Unless one of the above conditions exists, a prospective purchaser should obtain his requirements of domestic watthour meters from such sources of supply as the excess inventories of electric utilities, used meter dealers, and meter repair shops. Information as to excess stocks of such meters in the hands of utilities may be obtained from Regional Utility Inventory Control Offices (See List A at the end of this order).

(d) *Parts for maintenance or repair.* The provisions of paragraphs (b) and (c) of this order on production and delivery do not apply to the production or delivery of parts for the maintenance or repair of domestic watthour meters. No person, however, shall manufacture so many of such parts that his inventory thereof will at any time exceed his average monthly inventory of such parts during the calendar year 1941.

(e) *Monthly reports.* On or before the tenth day of each calendar month each manufacturer of domestic watthour meters shall file with the War Production Board a report, in duplicate, in letter form, which shall show the following information as of the first of the month:

(1) Inventory of domestic watthour meters.

(2) Deliveries of domestic watthour meters during the preceding calendar month.

(3) Unfilled orders on hand for domestic watthour meters.

(f) *Applicability of War Production Board regulations and orders.* This order and all things done under it are subject to the provisions of all applicable regulations and orders of the War Production Board.

(g) *Violations and penalties.* Any person who wilfully violates any provision of this order, or who conceals any material information or furnishes false information to any department or agency of the United States is guilty of a crime. If convicted, he may be punished by fine or imprisonment; or any such person may be deprived of any or all priorities assistance. For example, he may be prohibited from getting, delivering, processing, or using anything which is subject to priority control by the War Production Board.

(h) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to manufacture or assemble more new domestic watthour meters or new parts for the conversion of domestic watt-hour meters from one to another type than have been authorized on Form GA-1850 (including a person who has no such authorization), and any person who wants to manufacture more parts than he is permitted by paragraph (d) (including a person who did not make parts in 1941) may apply for permission to do so as explained in Priorities Regulation 25. He may still, of course, apply for authorization under paragraph (b) (3) of this order if he desires.

(2) *Appeals.* Any appeal from the provisions of this order other than the restrictions of paragraphs (b) (1) or (d) should be made by writing a letter which explains fully what provisions the person is appealing from and why he thinks he should be relieved from those provisions. He should send this letter with two signed copies, to the War Production Board. No appeal should be filed from the provisions of paragraphs (b) (1) or (d), because applications for relief under those paragraphs are handled in the ways described in paragraphs (b) (3) and (h) (1) of this order.

(i) *Letters and reports.* Letters about this order, or reports filed under it, should be addressed to the War Production Board, Washington 25, D. C., Ref: L-151; and the reports required by paragraph (e) of the order should be addressed to the attention of the Office of War Utilities. All other letters or reports, however, should be addressed to the attention of the Radio and Radar Division. All reports and forms required by this order have been approved by the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

Issued this 1st day of September 1944.

PART 3302—SERVICE EQUIPMENT

[Limitation Order L-54-a, as Amended Sept. 1, 1944]

TYPEWRITERS

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of the materials and facilities used in the production of typewriters for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3302.6 *Limitation Order L-54-a*—(a) *Definitions.* For the purpose of this order:

(1) "Manufacturer" means any person manufacturing typewriters, including sales and distribution outlets controlled by such a person.

(2) "Dealer" means any wholesaler, retailer or other distributor of typewriters, other than sales and distribution outlets controlled by a manufacturer.

(3) "Importer" means any person who imports typewriters into the United States for sale and distribution in the United States.

(4) "Typewriter" unless expressly otherwise stated, means non-portable and portable typewriters (including noiseless and electric types), and unless expressly otherwise stated, refers only to new typewriters. The term shall not include: billing machines (accounting principle); continuous forms handling machines, typewriter principle, having carbon paper handling devices constructed as an integral part of the machine; shorthand writing machines; telegraphically controlled typewriters; braille typewriters; toy typewriters; office composing machines, linotype machines or monotype machines. The term "new typewriters" means any typewriter which has never been delivered to a person acquiring it for use. This does not include rebuilt typewriters.

(5) "Sets of parts" means parts for typewriters fabricated at plants in the United States for shipment to foreign countries for assembly into typewriters.

(6) "Repair parts" means typewriter parts produced by a manufacturer to use or sell for repairing and servicing of typewriters.

(b) *Restrictions on production.* Manufacturers may produce typewriters or sets of parts only in accordance with written instructions from the War Production Board. Production will be authorized so that the total production will not exceed the approved War Production Board program and so that the production in any one plant, or labor requirements therefor, will not interfere with war production in that plant or in any other plant located in the same area.

(c) *Restrictions on delivery.* Manufacturers may deliver new typewriters only to persons who are authorized by the War Production Board in writing to receive them. Importers may deliver imported new non-portable typewriters only to persons who are authorized in writing to receive them. Persons who want authorization to receive new typewriters for export should submit Form WPB-1319 to the Foreign Economic Administration, Washington 25, D. C. Non-military agencies of the United States Government which want authorization to receive new typewriters should submit Form WPB-1319, to the Procurement Division of the United States Treasury. All other non-military applicants should submit Form WPB-1319 to the nearest field office of the War Production Board. Instead of using Form WPB-1319, the Army of the United States, the Navy of the United States, and the United States Maritime Commission should continue to use the same method of requesting authorization to receive new typewriters which they were using when this order was amended on May 15, 1944.

Applications on Form WPB-1319 should be made in accordance with the official instructions for the use of the form. These instructions can be obtained from any War Production Board office. In the alternative, until June 1, 1944, applications may be submitted to the War Production Board at Washington on Form WPB-1688 instead of Form WPB-1319. These forms of application have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

When a person has been authorized to receive delivery of a new typewriter, the manufacturer or importer of the typewriter may make delivery to him either directly or through a dealer.

In the past the delivery of second-hand typewriters and some new typewriters has been controlled by the Office of Price Administration. Control of deliveries of new typewriters owned by dealers, and of deliveries of all second-hand typewriters, including rebuilt typewriters, has been discontinued. Deliveries of new typewriters by manufacturers will continue to be controlled by the orders of the War Production Board instead of the orders of the Office of Price Administration.

(d) *Sequence of deliveries.* Regardless of Priorities Regulation No. 1, when authorized pursuant to the preceding paragraph, deliveries of each model of typewriter must be made in the order indicated by the delivery dates specified in the approval forms or other authorizations, unless the War Production Board specifically tells a manufacturer or importer in writing to do something else. If a manufacturer or importer receives two or more authorizations requesting the same delivery date for the same model of typewriter, and cannot make all deliveries on time, he must deliver them in the order in which the authorizations were received by him. If an authorization requests delivery before the date on which the authorization is received by the manufacturer or importer, the order must be treated as if the delivery date requested was the day when the authorization was received by the manufacturer or importer.

(e) *Shipment of sets of parts by manufacturers.* Manufacturers may ship sets of parts to foreign countries only in accordance with written instructions from the War Production Board. Those who wish to make such shipments may apply by letter to the War Production Board for authorization to do so.

(f) *Inventories of repair parts.* No manufacturer may produce more repair parts than he needs to produce in order to maintain a practicable minimum working inventory of them. This is the only restriction in this order which applies to repair parts.

(g) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States, is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of or from processing or using material under priority control and may be deprived of priorities assistance.

(h) *Applicability of regulations.* This order and all transactions affected thereby, are subject to all applicable regulations of the War Production Board, as amended from time to time, with the exception of those provisions of Priorities Regulation No. 1 inconsistent with paragraph (d).

(i) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to produce more typewriters or sets of parts than he has been authorized to produce under paragraph (b) (including a person who has not been authorized to produce typewriters or sets of parts under this order), may apply for permission to do so as explained in Priorities Regulation 25. The restrictions on delivery contained in paragraphs (c), (d) and (e) continue to apply to typewriters and sets of parts authorized under Priorities Regulation 25.

(2) *Appeals.* Any appeal from the provisions of this order, other than the restrictions of paragraph (b), may be made by filing a letter with the War Production Board, Washington 25, D. C., Ref: L-54a, referring to the pertinent provisions of the order and stating fully the grounds for the request. No appeal should be filed from the restrictions of paragraph (b).

(j) *Communications.* All communications concerning this order should be addressed to the War Production Board, Service Equipment Division, Washington 25, D. C., Ref: L-54-a.

Issued this 1st day of September 1944.

Recording Secretary.

PART 3302—SERVICE EQUIPMENT

[Limitation Order L-190, as Amended Sept. 1, 1944]

SCALES, BALANCES AND WEIGHTS

The fulfillment of requirements for the defense of the United States has created a shortage in the materials used in the manufacture of scales, balances, and weights for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3302.21 *Limitation Order L-190*—(a) *Definitions.* For the purpose of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(2) "Scales" means devices used for weighing persons, materials, objects or substances, or for grading, classifying, counting or evaluating materials, objects or substances in terms of weight, or the measuring of forces expressed in terms of weight. The term includes scales, balances, attachments, and weights.

(3) "Weights" means objects of established weight used in connection with the operation of scales and necessary to the operation or testing thereof.

(4) "Scales for household use" includes all scales commonly used for household purposes except dietetic scales graduated in the metric system for personal use by a person whose diet is regulated by a licensed physician and baby weighing or nursery scales.

(5) "New" scales are all scales other than those which have been used, or sold, rented or lent for the purpose of being used; except that scales which have been used solely for demonstration, trial loans or emergency repair loans are "new" scales.

(6) "Emergency repair loan" means the temporary leasing or lending of a scale to replace a similar scale while the latter is being repaired.

(7) "Class One scales" means coin-operated person weighing scales, spring type scales equipped with postal charts and having a retail list price of five dollars or less, and scales for household use, including bathroom scales and kitchen scales.

(8) "Class Two scales" means person weighing scales for clinical use and baby weighing or nursery scales.

(9) "Class Three scales" means mailing and parcel post scales, except spring type scales equipped with postal charts and having a retail list price of $5.00 or less.

(10) "Class Four scales" means all scales other than those in Class One, Class Two, Class Three, Class Five, Class Six or Class Seven.

(11) "Class Five scales" means egg grading scales, milk scales, cotton beam scales, cotton spring scales, and grain sampling, grading, and testing scales.

(12) "Class Six scales" means dietetic scales, graduated in the metric system, for personal use by a person whose diet is regulated by a licensed physician.

(13) "Class Seven Scales" means cylinder type scales, fan type scales, hanging scales, and even-balance scales of the kinds, sizes and models commonly used in making sales of merchandise direct to ultimate consumers.

(b) *Restrictions on production.* (1) No person shall fabricate parts for new Class One scales or assemble new Class One scales.

(2) During the twelve calendar months commencing April 1, 1943, and during any period of twelve calendar months commencing April 1 of any subsequent year, no person may fabricate or assemble a total number of new Class Two scales in excess of one-fourth of the total number of such scales billed by him to customers during the calendar year of 1941.

(3) During the twelve calendar months commencing April 1, 1943, and during any period of twelve calendar months commencing April 1 of any subsequent year, no person may fabricate or assemble a total number of new Class Three scales in excess of one-fourth of the total number of such scales billed by him to customers during the calendar year of 1941.

(4) No person engaged in the manufacture of scales shall increase his inventory of new scales in Class Four if that inventory following such increase will exceed one-twelfth of the total number of such scales billed by him to customers during the calendar year of 1941.

PART 3302—SERVICE EQUIPMENT

[Limitation Order L-222, as Amended Sept. 1, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply for defense, for private account, and for export of the materials used in the manufacture of floor sanding, floor finishing, floor maintenance, and portable rug scrubbing machines, industrial vacuum cleaners, and blowers for cleaning purposes; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 3302.26 *Limitation Order L-222*—(a) *What this order does.* This order controls the production of floor sanding, floor finishing, floor maintenance, and portable rug scrubbing machines, industrial vacuum cleaners, and blowers designed for cleaning purposes. It also regulates the distribution of some of these machines.

Floor Sanding Machines

(b) *What is meant by "floor sanding machines."* "Floor sanding machines" are machines designed for the smoothing of floors or decks, by using abrasives, such as sand paper and steel wool. However, floor sanding machines do not include any machines used for smoothing stone or tile floors. The latter are floor finishing machines, and are controlled by a different part of this order.

(c) *Production of floor sanding machines is prohibited.* No person may produce any floor sanding machines.

(d) *Distribution of these machines is not restricted.* In the past the War Production Board restricted the distribution of certain sizes of floor sanding machines. Those restrictions are no longer in effect, and it is not necessary to get permission from the War Production Board to sell or deliver floor sanding machines.

Portable Electric Hand Blowers

(e) *What is meant by "blowers."* As used in this order, "blowers" means combination blowers and exhausters designed for removing dust, reclaimable materials or refuse by either air pressure or suction. These machines consist of a combination of a motor operated air pressure producer, an air impeller line, and a portable tool with attachments. Blowers do not include any machines used solely for the handling of air or other gaseous mixtures.

(f) *Production of blowers is limited.* A person may produce blowers only to fulfill an authorized production schedule under the Controlled Materials Plan (CMP), as explained in CMP Regulation No. 1. Production will be authorized so that the total production will not exceed the approved War Production Board program and so that the production in any one plant, or labor requirements therefor, will not interfere with war production in that plant or in any other plant located in the same area.

(g) *Distribution of blowers is not restricted.* In the past the War Production Board restricted the distribution of blowers. Those restrictions are no longer in effect, and it is not necessary to get permission from the War Production Board to sell or deliver blowers.

Industrial Vacuum Cleaners, Portable Rug Scrubbing Machines, and Floor Finishing and Floor Maintenance Machines

(h) *What is meant by "industrial vacuum cleaners."* "Industrial vacuum cleaners" are machines (either stationary or portable) which consist of a combination of a motor-operated vacuum producer, an air impeller line, and a portable tool with attachments, and which are designed primarily for the collection and removal of dust, oil, and reclaimable materials or refuse by suction, in either the wet or dry state. Industrial vacuum cleaners do not include any vacuum cleaners designed primarily for household use, or any motor-operated vacuum producing units which are part of floor sanding, floor finishing or floor maintenance machines.

(i) *What is meant by "portable rug scrubbing machines."* "Portable rug scrubbing machines" means motorized portable devices for cleaning rugs, including portable rug shampooing machines. Stationary rug cleaning machines are not restricted by this order but are restricted by Limitation Order L-91.

(j) *What is meant by "floor finishing and floor maintenance machines."* A "floor finishing or floor maintenance machine" is a motorized or handpowered mechanical device used for grinding, staining, sealing, scraping, oiling, waxing, scrubbing, or polishing floors or decks, or for collecting and removing dust, grime, oil, reclaimable materials or refuse from floors or decks. Some machines do these things separately. In other cases the floors and decks are also washed, sterilized or wiped. Typical floor finishing and floor maintenance machines include terrazo grinders, waxing and polishing machines, wet or dry scrubbers, combination scrubbers with water pick-up, drum type sweepers, and scarifying machines. Floor finishing and floor maintenance machines do not include floor sanding machines, or machines specifically designed for manipulating wet cement.

(k) *Delivery of industrial vacuum cleaners, portable rug scrubbing machines, and some floor finishing and floor maintenance machines is restricted.* New industrial vacuum cleaners, new portable rug scrubbing machines, new drum type floor finishing and floor maintenance machines making a six-inch path or wider, and new disk type floor finishing and floor maintenance machines making a ten-inch path or wider, may be delivered only under the following circumstances:

Delivery may be made to anyone whose order has been approved by the War Production Board on Form WPB-1843 before May 16, 1944, or on Form WPB-1319.

Delivery may also be made to any manufacturer or dealer who needs an industrial vacuum cleaner or other restricted machine to fill a specific order, or part of a specific order, which has been approved on Form WPB-1843 before May 16, 1944, or on Form WPB-1319.

(l) *How to get an order approved for delivery.* Those who want to get their orders approved for delivery should apply on Form WPB-1319 to the War Production Board, Service Equipment Division, Washington 25, D. C.: Ref. L-222. The instructions for the use of the form must be carefully followed; otherwise, the application will not be considered by the War Production Board. Copies of this form and the instructions can be obtained from the nearest field office of the War Production Board.

(m) *How to use a Form WPB-1843 or a Form WPB-1319 after approval is given.* If the War Production Board approves an order on Form WPB-1843 or Form WPB-1319, the form on which approval is given will be returned to the applicant, who must then give the form to the person delivering the equipment before the delivery is made. Only the supplier named in the form may deliver the equipment. Moreover, unless the form is given to the supplier within thirty days after the date on which the delivery was officially approved, the War Production Board's approval of the delivery is automatically withdrawn.

(n) *Production of industrial vacuum cleaners, portable rug scrubbing machines, and floor finishing and floor maintenance machines is limited.* The production of portable rug scrubbing machines is prohibited. The production of industrial vacuum cleaners and floor finishing and floor maintenance machines is forbidden, except to the following extent: A person may produce industrial vacuum cleaners, and floor finishing and floor maintenace machines, to fill orders approved by the War Production Board. In addition, a person may produce and maintain a stock of new industrial vacuum cleaners and floor finishing and floor maintenance machines of the sizes restricted under paragraph (k) numbering up to 15 percent of the total number of these machines shipped from his factory during the calendar year 1941.

Restricted industrial vacuum cleaners and floor machines produced before 1944 are not to be counted as part of this stock, but must be held as a stock pile to fill orders approved by the War Production Board just for delivery from that supply. A person may not produce a machine to fill an order approved for delivery only from the stock pile, nor may he produce a machine to replace one taken from the stock pile to fill an approved order.

In approving orders, and in processing applications for priorities assistance on Form CMP-4B, the War Production Board will be guided by the policy that the total production of the entire industry must not exceed the approved War Production Board program for these products, and that the production in any one plant, or labor requirements therefor, must not interfere with war production in that plant or in any other plant located in the same area.

General Provisions

(o) *Production of supplies and repair parts is not limited.* This order does not limit the production of supplies and repair parts for equipment controlled under this order.

(p) *Applicability of other orders and regulations.* This order, and all transactions affected by it, are subject to all applicable provisions of other orders and regulations of the War Production Board as amended from time to time.

(q) *Reports on Form WPB-3495 by producers of blowers are required monthly.* Before the 15th of each month, every person in the business of producing blowers must send to the War Production Board a report on Form WPB-3495. This reporting requirement has the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942.

(r) *Miscellaneous reports.* Subject to the approval of the Bureau of the Budget pursuant to the Federal Reports Act of 1942, each person affected by this order must execute and file with the War Production Board whatever reports, information, and answers to questionnaires the War Production Board from time to time requests.

(s) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(t) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to produce any floorsanding machines or portable rug scrubbing machines may apply for permission to do so as explained in Priorities Regulation 25. Application for permission may also be made as explained in that regulation by any person who wants to produce more blowers than are authorized under paragraph (f) (including a person who has no such authorization), or by any person who wants to produce or maintain a stock of more industrial vacuum cleaners or floorfinishing and floor maintenance machines than are permitted under paragraph (n) (including a person who made no shipments in 1941). A person may still, of course, apply for authority to produce blowers under paragraph (f) if he desires. The delivery restrictions in this order continue to apply to all production authorized under Priorities Regulation 25.

(2) *Appeals.* Any appeal from the provisions of this order, other than the restrictions of paragraphs (c), (f) and (n) should be made by filing a letter referring to the particular provision appealed from and stating fully the grounds of the appeal. No appeal should be filed from the provisions of paragraphs (c), (f) or (n).

(u) *Communications to War Production Board.* All reports required by this order, and all communications concerning its provisions should be addressed to: War Production Board, Service Equipment Division, Washington 25, D. C.: Ref. L-222.

Issued this 1st day of September 1944.

DELIVERIES OF CERTAIN LOW GRADE LUMBER ON UNCERTIFIED AND UNRATED ORDERS

The following direction is issued pursuant to Order L-335:

(a) *What this direction does.* This direction permits a lumber supplier to deliver certain types of lumber on uncertified orders provided such delivery does not interfere with the filing of certified orders. Receipt of such lumber on uncertified orders is also authorized.

(b) *Delivery and receipt of graded lumber.* Any lumber supplier who accumulates Number 4 or lower grades of Douglas fir, Number 4 or lower grades of Southern yellow pine, Number 4 or lower grades of Western hemlock, Number 3 or lower grades of hardwood (all species), Number 4 or lower grades of Western red cedar, or Number 4 or lower grades of Sitka spruce, and who has not been offered certified orders for such lumber is authorized to deliver that lumber on uncertified and unrated orders to any person. Any lumber distributor may place uncertified and unrated orders with his lumber supplier to obtain such lumber and may deliver such lumber to his customers on uncertified and unrated orders after it has been received by him provided the lumber is placed in transit by his supplier prior to October 1, 1944. No sawmill may place lumber in transit to fill an uncertified order after September 30, 1944 except as is permitted by Directions 1 to 5 inclusive and Direction 7 to Order L-335. Receipts of any of this lumber on uncertified and unrated orders by a Class I consumer need not be charged against the amount of lumber that he has been authorized to receive in the third or fourth quarter on Form WPB-3640. No person may deliver and no person may receive ungraded lumber under the provisions of this direction except as provided in paragraph (c).

(c) *Deliveries and receipts of culls and rejects.* Any lumber supplier may deliver culls and rejects on uncertified and unrated orders, and any lumber distributor or consumer may receive culls and rejects. However, no lumber may be treated as cull or reject under this direction if the supplier charges more than 75 percent of the price allowed him by the Office of Price Administration for the lowest standard grade of the same species. A Class I consumer need not charge receipt of such lumber against the amount he is authorized to receive in a particular quarter on Form WPB-3640.

(d) *Directions 1 to 5 inclusive and Direction 8.* Deliveries and receipts of lumber to the extent permitted by this direction are authorized notwithstanding the provisions of Direction 1 to 5 inclusive and the provisions of Direction 8.

TITLE 43—PUBLIC LANDS: INTERIOR

Subtitle A—Office of the Secretary of the Interior

COLONIAL PARKWAY LANDS, VIRGINIA

TRANSFER OF JURISDICTION FROM NATIONAL PARK SERVICE TO FEDERAL WORKS AGENCY

Pursuant to the authority contained in the act of Congress approved October 14, 1940 (54 Stat. 1125), entitled "An Act to expedite the provision of Housing in connection with national defense, and for other purposes," as amended, *It is ordered*, That, for the purposes and subject to the conditions hereinafter set forth, jurisdiction over the following described tract of land, comprising a portion of the Colonial Parkway, Colonial National Historical Park, Virginia, administered by the National Park Service, is hereby transferred to the Federal Works Agency:

A strip of land thirty (30) feet in width being fifteen (15) feet on each side of the following described center line:

Beginning at Station 898 plus 76.81, a point in the southerly line of lands of Williamsburg Restoration, Inc., and in the northerly line of lands of the United States (Colonial Parkway); thence S. 37°33' E., 347 feet to Station 902 plus 23.81; thence S. 36°21' E., 179.5 feet to Station 904 plus 03.31, a point in the southerly line of lands of the United States (Colonial Parkway), and in the northerly line of lands of the City of Williamsburg School Board.

The jurisdiction hereby transferred is limited to the use and occupancy of said parkway land necessarily incident to the construction, operation and maintenance of a 39-inch water line across the parkway as a part of the Chickahominy Water Supply Line, a Defense Public Works project to furnish water to the City of Newport News, Virginia, and shall be exercised by the transferee in such manner as not to interfere with the primary use of the land for parkway purposes.

This transfer of jurisdiction is made and accepted subject to the following conditions:

1. That the said water line shall be installed at such depth that the top of the pipe will not be less than three (3) feet below the bottom of the pavement of the parkway. The installation, operation and maintenance of said water line shall be accomplished, without cost or expense to the Department of the Interior, under the general supervision and approval of the Director of the National Park Service or his authorized representative.

2. That the installation, operation and maintenance of said water line shall be accomplished in such manner as not to disturb the pavement or obstruct travel on the parkway.

3. That any settlements or depressions in said road or parkway resulting from such work, and any damages otherwise caused to the Colonial National Historical Park incident to the installation, operation and maintenance of said water line, shall be promptly repaired by the transferee at its expense and all work in connection therewith shall be accomplished subject to the general supervision and approval of the Director of the National Park Service or his authorized representative.

4. That the transferee shall supervise and inspect the water line regularly and shall immediately repair any leaks found therein. Upon making any repairs thereto, the ground and road will be immediately restored by the transferee, in so far as is possible, to the same condition as that in which it existed prior to the commencement of such work. Any landscape feature scarred or damaged by the transferee shall be restored as nearly as possible to its original condition at the expense of the transferee in a manner satisfactory to the Director of the National Park Service or his authorized representative.

5. That said use and occupancy of parkway land shall be subject to such rules and regulations as the Secretary of the Interior or his duly authorized representative may from time to time prescribe for the government of the parkway.

6. That the Department of the Interior shall not be responsible for any injuries to persons or damage to property which may arise incident to the installation, maintenance and operation of said water line and the grantee under any easement granted by the Federal Works Agency covering the land described in this instrument shall save the United States harmless from any and all such claims.

7. That the jurisdiction hereby transferred shall revest in the National Park Service upon a finding by the Secretary of the Interior, after notice to the transferee and after an opportunity for a hearing, that the said transferee has not complied with the foregoing conditions.

8. That in the event of abandonment or non-use of said Colonial Parkway land by the transferee for a period of two (2) consecutive years, the jurisdiction hereby transferred shall automatically revest in the National Park Service.

9. That in the event of the disposal of the water line by the Federal Works Agency, any easement granted in connection therewith by that Agency, under the authority of the act of October 14, 1940, supra, shall be subject to the terms and conditions as set forth in this order of transfer of jurisdiction.

The license issued to the Federal Works Agency on October 7, 1942, for the construction, operation and maintenance of a water line across Colonial Parkway land, is hereby revoked.

Dated: August 22, 1944.

POSTING REQUIREMENTS IN RHODE ISLAND

For the reasons set forth in an opinion issued simultaneously herewith and under the authority vested in the State Director of the Rhode Island State Office of the Office of Price Administration by section 16 of Restaurant Maximum Price Regulation No. 2, it is hereby ordered:

SECTION 1. *Posting requirements.* If you own or operate an eating or drinking establishment, you must, on or before August 16, 1944, show on a poster to be supplied by the Office of Price Administration, your lawful ceiling prices for 40 food items, and meals, as set forth in this order.

(a) First list on the poster as many of the food items and meals listed in Appendix A of this order, as you offer for sale and your ceiling prices for each. If you find in Appendix A several tables of food items and meals, choose the table most applicable to your establishment.

(b) If you do not offer all the 40 items listed in the applicable table in Appendix A, list first those which you do offer, placing them on the poster in the order in which they appear in Appendix A. Then add as many other items which you usually offer to bring the total number to 40, with your ceiling price for each item.

(c) If you do not offer as many as 40 items, place on the poster all the items which you do offer and your ceiling price for each.

(d) List a la carte items first. In listing meals, list the entree and then indicate the type of meal, for example, steak dinner, leg of lamb dinner, filet of sole lunch, vegetable plate luncheon.

(e) The list of individual items may be printed or hand lettered in ink on the poster in letters large enough so that it can be easily read by your customers.

(f) You must place the poster near the main entrance of your establishment, or in a conspicuous place so that it will be plainly visible to your customers.

SEC. 2. *Filing of lists of posted prices.* When you have made up the list of food items and meals to be posted and your lawful ceiling price for each, you must make three copies of this list, and send or deliver it to your local War Price and Rationing Board on or before August 21, 1944. Each copy must be clear and legible, dated and signed by the owner or manager of your establishment, with the name and address of the establishment following the signature.

The War Price and Rationing Board shall check this list with your filed ceiling prices. If the prices check, the Board shall make a notation to this effect on one copy of the list and return it to you. You shall keep this copy in your establishment, and make it available for examination by any person during business hours.

If the prices on your list do not completely check with your filed ceiling prices, the Board will call you in for a conference, so that corrections can be made.

SEC. 3. *Replacement of posters.* If a poster is mutilated or becomes badly soiled or otherwise damaged, it must be replaced by a new one which may be obtained from your War Price and Rationing Board upon presentation of the damaged poster. Erasures or changes of prices listed on the poster are prohibited. The new poster must be filled out exactly like the old one. Large establishments may receive extra posters.

SEC. 4. *Geographical applicability.* The provisions of this order extend to all eating and drinking establishments located within the State of Rhode Island.

SEC. 5. *Exemptions.* All establishments which are exempted from the provisions of Restaurant Maximum Price Regulation No. 2 are exempted from this order.

(a) *What this order does.* This order determines the limits of the free delivery zones at the five wholesale receiving points of La Crosse, Black River Falls and Eau Claire, Wisconsin, and Winona and Rochester, Minnesota. It also establishes differentials for non-delivered sales in the free delivery zones and for delivered sales beyond the free delivery zones. The order applies to such fresh fruits and vegetable items as are now or may hereafter be subject to the pricing provisions of Maximum Price Regulation No. 285, Imported fresh bananas, sales except at retail, and Appendices H and I of Maximum Price Regulation No. 426, Fresh fruits and vegetables for table use, sales except at retail. (b) *Establishment of delivery zones.* 1. The five free delivery zones established by this order shall be the areas within the city limits of, and within a radius of 5 miles of the city limits of, the Cities of La Crosse, Black River Falls and Eau Claire, Wisconsin; Winona and Rochester, Minnesota.

2. The zones in which charges may be made for delivery are the areas outside the free delivery zones.

Non-delivered sales:* For sales on a non-delivered basis of the commodities covered in Appendices H and I of Maximum Price Regulation No. 426, there shall be deducted from the maximum price for delivered sales in a free delivery zone 5¢ per container for standard shipping containers weighing under 50 pounds gross weight and 10¢ per container for standard shipping containers weighing 50 pounds or over, gross weight. A deduction of 2¢ or 5¢, respectively, shall be made for non-delivered sales of half standard shipping containers or more, or for bulk sales weighing as much as or more than half a standard container of the items being sold. No deductions need be made for sales in less than half containers and for bulk sales in less than half containers and for bulk sales which weigh less than half a standard container of the item being sold.

2. *Delivered sales in a free delivery zone.* The maximum price for delivered sales in a free delivery zone shall be the maximum delivered price computed under Maximum Price Regulation No. 426 for the type of sale being made without any deduction from or addition thereto.

3. *Delivered sales beyond a free delivery zone.* For deliveries beyond a free delivery zone, the amount set out below may be added to the maximum price for delivered sales in the free delivery zone. Mileage beyond the free delivery zone shall be computed via the nearest publicly traveled route. The prices set forth below shall be computed on the gross weight, whether in bulk or in containers:

25 miles or less	25 to 50 miles	50 to 75 miles	Beyond 75 miles
Beyond free delivery zone: 20¢ cwt. but not less than 10¢ per stop.	Beyond free delivery zone: 25¢ cwt. but not less than 10¢ per stop.	Beyond free delivery zone: 30¢ cwt. but not less than 15¢ per stop.	35¢ cwt. but not less than 15¢ per stop.

Customary discounts and price differentials, including any differential or discount for f. o. b. seller or non-delivered sales, must be maintained.

2. *Delivered sales beyond a free delivery zone.* For deliveries beyond a free delivery zone, the amount set out below may be added to the price for delivered sales in the free delivery zone. Deliveries beyond a free delivery zone shall be computed via the nearest publicly traveled route. Delivery charge shall be computed for the net weight of bananas delivered.

25 miles or less	25 to 50 miles	50 to 75 miles	Beyond 75 miles
Beyond free delivery zone: 30¢ cwt.	Beyond free delivery zone: 25¢ cwt.	Beyond free delivery zone: 30¢ cwt.	35¢ cwt.

(e) *Definitions and explanations.* 1. Unless the context otherwise requires, the terms used herein shall have the same meanings as given them in Maximum Price Regulation No. 285 and Maximum Price Regulation No. 426.

2. "Delivery" means physical delivery to the premises of a retail store, hotel, restaurant or institution.

3. Delivery within a free delivery zone or "delivered within a free delivery zone" means delivery by a seller who maintains distribution facilities within that zone. Delivery by a seller in a free delivery zone, who has his distribution facilities in a different free delivery zone, shall not constitute a delivery in a free delivery zone as herein defined, and such seller shall be entitled to add the delivery charges beyond the free delivery zone in which he has his distribution facilities.

Order No. G–11 under Maximum Price Regulation No. 165, as amended. Services. Adjusted prices for custom lumber sawing services in Southwestern Wisconsin.

For the reasons set forth in the accompanying opinion and under the authority vested in the Regional Administrator of the Office of Price Administration by § 1499.114 (d) of Maximum Price Regulation No. 165, as amended, Services, it is hereby ordered:

(a) *Geographical applicability.* This order applies to all custom sawing services performed in the counties of La Crosse, Monroe, Juneau, Vernon, Sauk, Richland, Crawford, and Grant in the State of Wisconsin, and to all custom sawing services performed by persons whose residence and principal place of operations are located within these counties.

(b) *The maximum prices established.* The following maximum prices are hereby established for the enumerated custom lumber sawing services:

	Per M board feet
Custom sawing alive	$0.50
Custom sawing for grade	11.00
Piling of custom sawn lumber	1.50

(c) *Evasion.* This order may not be evaded by any agreement, scheme, or device of any character. For example, no agreement or arrangement may be made whereby the purchaser pays any part of the saw mill employees' wages. It shall be considered an evasion for any saw mill operator to compel a customer desiring live sawing to purchase grade sawing or to compel any purchaser requiring merely sawing to buy piling services.

(d) *Definitions.* (1) "Custom sawing" means the manufacture into lumber, as a service for others, of logs in which the person performing the services has no financial interest.

(2) "Sawing for grade" refers to a method of sawing in which the log is turned and three or more faces are cut so as to gain the highest quality of lumber obtainable from the log, conforming to standard sizes and grades generally accepted by the lumber industry. For purposes of this order, "custom sawing for grade" shall not include the sawing of lumber departing from standard sizes or grades, nor to that intended for special uses (e. g., railroad ties).

(3) "Sawing alive" refers to a method of sawing (commonly used in the production of farm lumber) whereby the log is not turned as in sawing for grade but is sawn through and through in a manner that will produce two slabs.

(4) "Piling" means an orderly arrangement of lumber that facilitates handling, seasoning, and storage, in which lumber is flat piled so that the face of the board is horizontal, and each course or layer of boards rests upon stickers that permit air circulation below and above the course.

(e) *Other custom sawing services.* Custom sawing services of a type not specifically covered by this order are governed by the provisions of Revised Maximum Price Regulation No. 165. Except as herein specifically modified, all provisions of Revised Maximum Price Regulation No. 165 shall remain in full force and effect.

(f) *Revocability.* This order may be revoked, amended, or corrected at any time. This order shall become effective on July 31, 1944.

Issued this 31st day of July 1944.

STANDARD GAS AND ELECTRIC CO.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pa., on the 30th day of August 1944.

Standard Gas and Electric Company, a registered holding company, having, on March 24, 1943, filed a plan for its recapitalization pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935, and the Commission having on the aforesaid date issued an order instituting proceedings pursuant to sections 11 (b) (2), 15 (f) and 20 (a) of said act with respect to said company, which order also set the issues presented by the plan and the proceedings so instituted for consolidated hearings; hearings having been held on the matters so consolidated; and the Commission having, on May 29, 1944, issued its findings and opinion disapproving the provisions in said plan with respect to the note and debenture holders;

Notice is hereby given that on August 28, 1944, Standard Gas and Electric Company filed an amended plan for its recapitalization pursuant to the provisions of said section 11 (e). All interested persons are referred to said amended plan, which is on file at the office of this Commission, for a statement of the transactions therein proposed which may be summarized as follows:

1. Standard Gas and Electric Company (hereinafter sometimes referred to as Standard Gas) proposes to discharge and retire all of its outstanding notes and debentures in the principal amount of $59,000,000 by the distribution and delivery of the following cash and securities for each $1,000 principal amount of such notes or debentures:

(a) $90 in cash;

(b) A new five-year 4% debenture of Standard Gas in the principal amount of $400;

(c) 3 shares of the common stock of Pacific Gas and Electric Company;

(d) 12 shares of the common stock of Oklahoma Gas and Electric Company;

(e) 5 shares of the common stock of The California Oregon Power Company;

(f) 2 shares of the common stock of Mountain States Power Company.

The amended plan provides that holders of notes and debentures of other principal amounts will participate ratably according to their holdings, except that payment of cash will be made in lieu of the delivery of fractional shares of common stock of Pacific Gas and Electric Company, Oklahoma Gas and Electric Company, The California Oregon Power Company, and Mountain States Power Company (herein sometimes referred to as "the operating public utility companies") and in lieu of the delivery of new debentures of Standard Gas of denominations less than $100. Accrued interest will be paid in cash on all notes and debentures at the regular semi-annual dates fixed therefor until the amended plan becomes effective, and then will be paid on each issue for the period elapsed since the last preceding interest-payment date; when the amended plan becomes effective, interest will cease. The new debentures will bear interest from the date upon which the amended plan shall become effective.

For the purposes of the computations required in the determination of the amounts of cash to be paid to the holders of the outstanding notes and debentures in partial discharge thereof and the amounts of cash to be paid to such holders in lieu of the delivery of fractional shares of common stock of the operating public utility companies, a basic value is assigned to each share of such stock. The basic value of each share and the aggregate basic value of the shares to be distributed for each $1,000 principal amount of notes and debentures, as so assigned, are as follows (subject to adjustment under certain condition as hereinafter provided):

Company	Number of shares to be distributed	Basic value per share	Aggregate basic value
Pacific	3	$33	$99
Oklahoma	12	21	252
California Oregon	5	24	120
Mountain States	2	21	42
Total aggregate basic value for shares to be distributed for each $1,000 principal amount of notes or debentures			513

The plan further provides for an increase or decrease of such aggregate basic value, but by not more than three percent thereof, with corresponding adjustment of the amount of cash payable, in proportion to any increase or decrease in the average market value of certain public utility companies between August 15, 1944, and the day the amended plan shall be approved by the Commission.

2. Standard Gas proposes that the new debentures to be issued to its note and debenture holders shall have the following characteristics:

(a) They will be dated as of the effective date of the amended plan and will be payable five years after that date;

(b) They will be in bearer form, with the privilege of registration as to principal only, will be in denominations of $100, $500 and $1,000, and will bear interest from the date thereof at the rate of 4% per annum, payable in equal semi-annual installments.

(c) They will be issued under a trust agreement in which Standard Gas will covenant, among other things, substantially as follows:

(i) No pledge will be made of, and no other lien (except for taxes or charges which are not overdue or which are being contested) will be placed upon, any of the property or assets of Standard Gas;

(ii) Standard Gas will not borrow any money, or become indebted other than for current debts incurred in operation and administration in the ordinary course of business, except that it may from time to time borrow, or become indebted for, not to exceed $500,000 in principal sum at any time outstanding;

(iii) Standard Gas will not declare or pay any dividends in cash on its capital stock or make any other distribution thereon unless and until the principal amount of the outstanding new debentures shall have been reduced to $5,000,000 or less; and in no event will it declare or pay any dividends from any source other than earned surplus accumulated after the effective date of the amended plan.

(iv) Standard Gas will pay into a sinking fund on a specified date in each

year an amount equal to 66⅔% of its net income (as determined in accordance with the Uniform System of Accounts for Public Utility Holding Companies prescribed by the Commission as amended effective January 1, 1943) for the preceding calendar year, the moneys so paid to be used for the purchase of new debentures or, to the extent not so used within a specified time, to the redemption thereof, and with the privilege to Standard Gas of tendering to the sinking fund (at the cost thereof to it), in lieu of cash, new debentures purchased from time to time by Standard Gas with funds other than those representing proceeds of the sale of capital assets by it; and

(v) Standard Gas will pay into a sinking fund the proceeds received in cash (after deduction of expenses and taxes) from all sales of capital assets or collections of indebtedness (other than current indebtedness) by Standard Gas, such proceeds to be used for the purchase or redemption of new debentures;

(d) The new debentures will be redeemable as a whole or in part, at any time, at the option of Standard Gas, at the principal amount thereof and accrued interest thereon, upon at least thirty days' published notice;

(e) Provision will be made in the trust agreement whereby the new debentures may become due and payable prior to the date fixed for their maturity in the event of the occurrence of certain defaults, including the violation of any of the covenants to be made therein by Standard Gas.

3. Standard Gas proposes to reclassify all of its presently outstanding stock into 5,020,135 shares of new no par value stock, each share of which will be represented by capital in the amount of $10.00 and be entitled to one vote. No holder of the new common stock shall have any preemptive right to purchase any additional shares of stock which may thereafter be issued. No dividends shall be declared upon the new common stock until such time as the principal amount of the indebtedness represented by the new debentures, or by any renewal thereof or substitution therefor, has been reduced to $5,000,000 or less.

4. Standard Gas proposes to retire its outstanding prior preference and preferred stock by the distribution to the holders thereof of the new common stock as follows:

(a) 10.5 shares of new common stock for each share of Prior Preference Stock, $7.00 Cumulative, and all accumulated and unpaid dividends thereon, or a total of 3,867,654 shares representing 77% of the new common stock to the holders of the Prior Preference Stock, $7.00 Cumulative;

(b) 9 shares of the new common stock for each share of Prior Preference Stock, $6.00 Cumulative, and all accumulated and unpaid dividends thereon, or a total of 900,000 shares, representing 18% of the new common stock, to the holders of the Prior Preference Stock, $6.00 Cumulative;

(c) ½ share of the new common stock for each share of $4.00 Cumulative Preferred Stock and all accumulated and unpaid dividends thereon, or a total of 252,480⅔ shares, representing 5% of the new common stock, to the holders of the $4.00 Cumulative Preferred Stock.

No certificates for fractional shares of the new common stock of Standard Gas will be issued. In lieu thereof, scrip certificates will be issued representing rights to such fractional shares and exchangeable, when accompanied by other certificates in such amount as to represent in the aggregate one or more full shares of stock, for certificates for such full shares. The holders of scrip certificates will not be entitled to any rights as shareholders until the scrip certificates are so exchanged. If not so exchanged within two years from the date upon which the amended plan shall become effective, all such scrip certificates will become void.

5. Standard Gas proposes to eliminate its presently outstanding common stock from participation in its recapitalization.

6. The amended plan provides that when it shall have become effective, Standard Power and Light Corporation, a Delaware corporation, the issuer of the Standard Power and Light Corporation 6% Gold Debentures, due February 1, 1957, in respect of which the payment of the principal and interest was assumed by Standard Gas on January 7, 1930, shall forthwith become and be free and discharged from all liability (if any there be) as to the payment of the principal of, and the interest on, such debentures and the performance of the covenants, obligations and conditions on its part expressed in the Trust Agreement, dated February 1, 1927, between Standard Power and Light Corporation and Guaranty Trust Company of New York, as Trustee, under which such debentures were issued.

If this Commission should approve the amended plan for the recapitalization of Standard Gas, that company requests that this Commission apply to a United States District Court pursuant to sections 11 (e) and 18 (f) of said act to enforce and carry out the terms and provisions of the amended plan.

The Commission being required by the provisions of section 11 (e) of the act to find, after notice and opportunity for hearing and before approving any plan filed thereunder, that such plan, as submitted or as amended, is necessary to effectuate the provisions of section 11 (b), and is fair and equitable to the persons affected thereby; and it appearing appropriate that notice be given and a hearing held on the amended plan to afford all interested persons an opportunity to be heard with respect thereto; and

It appearing that the common issues of fact and law arising in connection with the amended plan and the proceedings pursuant to sections 11 (b) (2), 15 (f) and 20 (a) heretofore instituted and now pending make it appropriate that hearings on said matters be consolidated;

It is hereby ordered, (a) That the hearings on the amended plan of Standard Gas and Electric Company and on the pending proceedings pursuant to sections 11 (b) (2), 15 (f) and 20 (a) with respect to Standard Gas and Electric Company be consolidated, subject to a reservation of jurisdiction to separate, whether for hearing, in whole or in part, or for disposition, in whole or in part, any of the issues, questions or matters which may arise in these proceedings, or to consolidate with these proceedings other filings or matters pertaining to said amended plan or to take such other action as may appear conducive to an orderly, prompt and economical disposition of the matters involved;

(b) That the consolidated hearings be held on the 21st day of September, 1944, at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 18th and Locust Streets, Philadelphia, Pennsylvania, in such room as may be designated on such date by the hearing room clerk in room 318. All persons desiring to be heard or otherwise wishing to participate in the proceedings should notify the Commission in the manner provided by its rules of practice, Rule XVII, on or before the 18th day of September, 1944.

It is further ordered, That Richard Townsend or any other officer or officers of the Commission designated by it for that purpose shall preside at the hearings in such matter. The officer so designated to preside at any such hearing is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of said Act and to a trial examiner under the Commission's Rules of Practice.

It is further ordered, That notice of this hearing be given to Standard Gas and Electric Company and to all other persons; such notice to be given to Standard Gas and Electric Company, Pacific Gas and Electric Company, Oklahoma Gas and Electric Company, The California Oregon Power Company, Mountain States Power Company, Standard Power and Light Corporation, Guaranty Trust Company of New York, Pam, Hurd and Reichmann, A. J. Fleischmann and Continental National Bank and Trust Company of Chicago by registered mail and to all other persons by publication in the FEDERAL REGISTER, and by general release of this Commission which shall be distributed to the press and mailed to the mailing list for releases issued under said act; and

It is further ordered, That Standard Gas and Electric Company mail a copy of the amended plan and this notice and order at least fifteen days prior to September 21, 1944, to each of its security holders at his last-known address; and

It is further ordered, That without limiting the scope of issues presented by said amended plan, by said amended declaration and application, or by the pending proceedings instituted pursuant to sections 11 (b) (2), 15 (f) and 20 (a) of said act, particular attention will be directed at said hearing to the following matters and questions:

1. Whether the amended plan as proposed or as modified is necessary to effectuate the provisions of section 11 (b)

of the act and is fair and equitable to the persons affected thereby;

2. Generally, whether the proposed transactions of Standard Gas and Electric Company are in all respects in the public interest and in the interest of investors and consumers and consistent with all applicable requirements of the act and the rules thereunder, and, if not, what modification should be required to be made therein and what terms and conditions should be imposed to satisfy the statutory standards.

(b) The hiring of a new employee for work of less than seven days' duration, or for work which is supplementary to the employee's principal work; but such work shall not constitute the individual's "last employment" for the purposes of this program, unless the employee is customarily engaged in work of less than seven days' duration;

(c) The hiring of an employee in any Territory or possession of the United States, except Alaska and Hawaii;

(d) The hiring by a foreign, State, county, or municipal government, or their political subdivisions or their agencies and instrumentalities, or to the hiring of any of their employees, unless such foreign, State, county, or municipal government or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the Constitution and laws applicable to it, with the program;

NOW, THEREFORE, by virtue of the power and authority vested in me by the Constitution and laws of the United States, including section 9 of the Selective Training and Service Act of 1940 (54 Stat. 892) as amended by the War Labor Disputes Act (57 Stat. 163), as President of the United States and Commander in Chief of the Army and Navy of the United States, it is hereby ordered as follows:

He shall provide such protection of the employees as may be necessary to maintain production, and shall take such appropriate disciplinary action, not inconsistent with law, as may be necessary to effectuate the purposes of this order.

3. In carrying out this order, the Secretary of the Interior shall act through or with the aid of such public or private instrumentalities or persons as he may designate. All Federal agencies, including but not limited to the War Manpower Commission, the National Selective Service System, the War Department, and the Department of Justice, are directed to cooperate with the Secretary of the Interior to the fullest extent possible in carrying out the purposes of this order.

4. The Secretary of the Interior shall permit the managements of the mines, collieries, and facilities taken under the provisions of this order to continue with their managerial functions to the maximum degree possible, consistent with the aims of this order.

5. Possession of the mines, collieries, and facilities taken under this order shall be terminated by the Secretary of the Interior within sixty days after he determines that the productive efficiency of the mines, collieries, and facilities has been restored to that prevailing prior to the interruption of production referred to in the recitals of this order.

If a processor elects not to honor a certificate of designated buyer pursuant to this paragraph, he shall return such certificate to the issuing officer and he may dispose of the oilseed meal covered by such certificate free from the restrictions of this order. The expiration date for any certificate of designated buyer issued under this order shall be not later than October 16, 1944, unless a later date (but in no event later than October 20, 1944) is authorized by the Chief of the Feed Management Branch, Office of Production, War Food Administration. No processor, however, shall be required to honor any certificate bearing an expiration date later than October 16, 1944, unless required to do so by notice from the Chief of the Feed Management Branch received before midnight of that date. In such case, the processor will be required to honor certificates of designated buyers bearing expiration date later than October 16, 1944, but not later than October 20, 1944. Any oilseed meal set aside pursuant to this order for which the processor has received no certificate before midnight of October 16, 1944 (or later, but not later than October 20, 1944, if the notice provided for herein is received from the Chief of the Feed Management Branch), may be disposed of by the processor free from the restrictions of this order: *Provided, however,* That the provisions of this paragraph shall not apply to oilseed meal required to be set aside by this order which has not heretofore been reported to the Director.

(c) *Existing contracts.* If this order makes it impossible for a processor to fill all of his contracts for the delivery of oilseed meal, which are in existence on the date of the issuance of this order, he shall not, by reason of this order, refuse to make delivery of more than 20 percent of the oilseed meal covered by any such contract.

(d) *Processor's reports*—(1) *Report of tonnage for September delivery for credit against October set aside.* If a processor wishes to make deliveries of oilseed meal pursuant to this order in September 1944 for credit against his set aside in October 1944, he must report to the Director in writing (or by telegraph) not later than September 25, 1944, the estimated tonnage of each kind of oilseed meal which will be available at each of his processing plants for delivery in September 1944 for such credit. Each processor may also submit such additional information as he deems pertinent to the allocation or distribution of oilseed meal to be set aside under this order.

(2) *Report of tonnage set aside and deliveries made.* Each processor subject to this order shall file a report with the Director on FPA Form 2 not later than November 10, 1944, for each plant operated by him. Certificates of designated buyers, pursuant to which oilseed meal has been delivered, shall be attached to and made a part of FPA Form 2.

(e) *Certificates issued by County Agricultural Conservation Committees.* No County Agricultural Conservation Committee shall issue certificates of designated buyers unless authorized to do so by its State Agricultural Conservation Committee.

(f) *Release of oilseed meal set aside under prior orders.* Any processor who has on hand oilseed meal, which has been reported pursuant to any set aside order prior to War Food Order No. 9–12 (9 F.R. 9582) as set aside for sale and delivery to designated buyers and for which the processor has received no shipping instructions from the designated buyers prior to the issuance of this order, may sell and deliver such oilseed meal free from the restrictions of the order under which it was set aside.

(g) *Communications.* All reports required to be filed hereunder and all communications concerning this order, unless instructions to the contrary are issued, shall be addressed to the Director of Production, War Food Administration, Washington 25, D. C., Ref: WFO 9–14.

NOTE: The record keeping and reporting requirements of this order have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(3) The term "sub-handler" means any handler, such as a peddler, vendor, sub-dealer, or secondary dealer, who (i) receives in a previously packaged and processed form milk, cream, or milk byproducts for delivery, and (ii) does not operate facilities for the processing and bottling of milk.

(4) The term "industrial user" means a person, as determined by the market agent, in his capacity as a manufacturer of products using as an ingredient therein milk, cream, or milk byproducts, which products are disposed of primarily for resale to consumers off the premises where made.

(5) The term "base" means the total pounds delivered by a handler within the sales area during the base period (i) of milk solids in milk, (ii) of butterfat in cream, or (iii) of milk solids in milk byproducts, minus the quota exempt deliveries described in (j) hereof, and then divided by the number of days in the base period. (For the purpose of this order, the milk solids content of milk or milk byproducts shall be computed as follows: Each hundredweight of milk, or milk byproducts other than cottage, pot, or baker's cheese, shall be considered the equivalent of 9.375 pounds of milk solids plus the number of pounds of solids calculated by multiplying the pounds of butterfat content of such milk or milk byproducts by .906, and each hundredweight of cottage, pot, or baker's cheese shall be considered the equivalent of 65.63 pounds of milk solids minus .953 pounds of milk solids for each one-half percent of butterfat content of such cheese.)

(b) *Milk sales area.* The following area is designated as a "milk sales area" to be known as the Memphis, Tennessee, metropolitan milk sales area, and is referred to hereinafter as the "sales area":

The city of Memphis and all of Shelby County, Tennessee, and the city of West Memphis in Crittenden County, Arkansas.

(3) For milk byproducts, multiply his base of milk solids in milk byproducts by 100 percent; and

(4) Multiply each of the foregoing results by the number of days in the quota period.

(f) *Quotas for handlers who are also producers.* Quotas for each handler who is also a producer and who purchases no milk shall be computed in accordance with (e) hereof, except:

(1) His base period shall be either June or December, 1943, whichever represents his larger total deliveries; and

(2) The applicable percentages shall be 100 percent in lieu of those specified in (e).

(g) *Quota adjustments.* Each handler may, within any quota period, (1) increase his quota of milk solids in milk by one pound for each one pound of milk solids by which he decreases his quota for milk byproducts: *Provided,* That his quota of milk solids in milk shall not be so increased by more than 3 percent, and

(h) *Handler exemptions.* Quotas shall not apply to any handler who delivers in a quota period a daily average of less than 250 units of milk, cream, and milk byproducts, unless more than 125 units of such daily average shall consist of cream. For the purpose of this order, a unit shall be the equivalent in volume of the following: (1) One quart of milk, buttermilk, or fluid milk byproducts; (2) one-half pint of cream; and (3) one-half pound of cottage, pot, or baker's cheese.

(j) *Quota exclusions and exemptions.* Deliveries of milk, cream, or milk byproducts, (1) to other handlers, except for such deliveries to sub-handlers, (2) to plants engaged in the handling or processing of milk, milk byproducts, cream, or other dairy products, from which no milk, milk byproducts, or cream is delivered in the sales area, (3) to industrial users, and (4) to the agencies or groups specified in (d) of WFO 79, shall be excluded from the computation of deliveries in the base period and exempt from charges to quotas.

(k) *Consumer priorities.* In the distribution of milk subject to quotas established hereunder, a handler shall give preference in the order listed, taking into consideration the type of purchasers served by him in the base period, to:

(1) The need of children, expectant mothers, and invalids requiring milk;

(3) Establishments serving milk for consumption on the premises.

(3) Handlers exempt from quotas pursuant to (h) hereof shall, upon the request of the market agent, submit the information required by the market agent to establish volumes of deliveries of milk, cream, and milk byproducts.

(n) *Records.* Handlers shall keep and shall make available to the market agent such records of receipts, sales, deliveries, and production as the market agent shall require for the purpose of obtaining information which the Director may require for the establishment of quotas.

(o) *Violations.* The market agent shall report all violations to the Director together with the information required for the prosecution of such violations.

(3) The term "sub-handler" means any handler, such as a peddler, vendor, sub-dealer, or secondary dealer, who (i) receives in a previously packaged and processed form milk, cream, or milk byproducts for delivery, and (ii) does not operate facilities for the processing and bottling of milk.

(4) The term "industrial user" means a person, as determined by the market agent, in his capacity as a manufacturer of products using as an ingredient therein milk, cream, or milk byproducts, which products are disposed of primarily for resale to consumers off the premises where made.

(For the purpose of this order, the milk solids content of milk or milk byproducts shall be computed as follows: Each hundredweight of milk, or milk byproducts other than cottage, pot, or baker's cheese, shall be considered the equivalent of 9.375 pounds of milk solids plus the number of pounds of solids calculated by multiplying the pounds of butterfat content of such milk or milk byproducts by .906, and each hundredweight of cottage, pot, or baker's cheese shall be considered the equivalent of 65.63 pounds of milk solids minus .953 pounds of milk solids for each one-half percent of butterfat content of such cheese.)

(b) *Milk sales area.* The following area is designated as a "milk sales area" to be known as the Winston-Salem, North Carolina, milk sales area, and is referred to hereinafter as the "sales area":

PART 93—SPECIAL REGULATIONS GOVERNING EXPORT AND IMPORT OF LIVESTOCK TO AND FROM MEXICO

MISCELLANEOUS AMENDMENTS

Pursuant to the authority conferred upon the Secretary of Agriculture by the Act of Congress approved August 30, 1890, as amended (26 Stat. 416, 44 Stat. 775, 46 Stat. 1460; 21 U.S.C. 101–105), Part 93, Chapter I, Title 9, Code of Federal Regulations [B. A. I. Order 368], as amended, is hereby further amended as follows:

Section 93.13 [regulation 13] is amended to read as follows:

§ 93.13 *Diagnostic tests for dairy and breeding cattle.* No dairy or breeding cattle shall be exported to Mexico unless they are shown by proper certificates to have passed a negative test for tuberculosis and, if they are more than 6 months old, a negative blood test for brucellosis (Bang's disease) within 30 days of the date of shipment from origin. However, the test for tuberculosis may be waived in respect to cattle from a tuberculosis-free accredited herd and the test for brucellosis may be waived in respect to animals that have been officially vaccinated as calves within the previous 12 months.

The said tuberculin test may be applied by an inspector, a duly authorized veterinarian of the Mexican government in the United States, or a veterinarian accredited by the Bureau. Certificates issued by such accredited veterinarians shall be endorsed by an inspector. Blood tests for brucellosis shall be made in laboratories recognized by the Bureau and State authorities for that purpose, and the certificate shall be issued or endorsed by the inspector in charge of disease-eradication work in the State of origin. Test charts and certificates shall include descriptions of the cattle with ages and markings.

The following new section, designated as § 93.16 [regulation 16] is added:

§ 93.16 *Accommodations for animals transported on vessels.* Owners or masters of vessels carrying animals from the United States to Mexico shall provide for such animals feed, water, space, ventilation, fittings, and other facilities determined by the Chief of Bureau to be necessary for their safe and proper transportation and humane treatment. Such owners or masters shall not accept for transportation any animal that in the judgment of the inspector is in an unfit condition to withstand the rigors of such transportation.

This amendment, which for purpose of identification is designated Amendment 2 to B. A. I. Order 368, shall be effective on and after September 20, 1944.

Done at Washington this 1st day of September 1944. Witness my hand and seal of the Department of Agriculture.

PART 602—GENERAL ORDERS AND DIRECTIVES

SHIPPERS OF BY-PRODUCT AND OTHER SPECIAL PURPOSE COAL MOVING VIA THE GREAT LAKES

Under § 602.502[1] of SFAW Regulation No. 23, shippers of by-product coal and other special purpose coal who ship such coal by lake are to spread their shipments throughout the current season of navigation and to conclude them on or before November 1, 1944. Both shippers and consumers of such coal have inquired whether it is permissible to continue such shipments beyond November 1 because of present lack of shipping facilities, inadequate storage space on consumers' docks, or for other reasons.

It is the intention of the regulation to encourage completion of lake shipments of by-product and other special purpose coal by November 1, but shippers are not prohibited from making shipments thereafter. Shippers should arrange to complete their shipments to docks on Lake Superior prior to November 1, if they possibly can, and then arrange to complete their shipments to the docks on the west bank of Lake Michigan and to the Detroit area.

REDEMPTION OF UNITED STATES SAVINGS BONDS THROUGH QUALIFIED BANKS AND TRUST COMPANIES

SEPTEMBER 5, 1944.

The general payment and redemption provisions of the regulations governing United States Savings Bonds as set forth in Subpart H of Department Circular No. 530, Fifth Revision, dated June 1, 1942 (7 F.R. 5158), as amended, are supplemented as follows, effective October 2, 1944:

Payment at banks and trust companies. Notwithstanding the foregoing provisions of this subpart, the provisions of Treasury Department Circulars Nos. 529, 554, 571, 596, and 653, all as supplemented, amended, or revised, and any instructions on the bonds, an individual (natural person) whose name is inscribed on the face of a bond of Series A, B, C, D, or E, either as owner or coowner in his own right, may present such bond (unless marked "duplicate") to any incorporated bank or trust company which has qualified as a paying agent under the provisions of Department Circular No. 750, dated September 5, 1944, and upon identification to the satisfaction of such paying agent and upon signing the request for payment, may receive immediate payment for the bond at the current redemption value if presented prior to maturity, or at full maturity value if presented at or after maturity. No charge will be made to the owner.

Payment at qualified banks or trust companies is confined to bonds of Series A, B, C, D, and E and will be made only to a person named on the face of the bond as owner or coowner in his own right. Redemption of bonds of Series F and G, and partial redemption of bonds of any series, may not be effected at incorporated banks or trust companies.

The provisions of this supplement do not supersede the procedure heretofore established for the redemption of savings bonds, which will continue in full force and effect. However, they provide certain additional facilities for the redemption of savings bonds, which may be availed of by owners concerned, under the conditions set forth herein and when offered by qualified banks and trust companies.

SUBPART A—AUTHORITY TO ACT

§ 321.1 *Banks and trust companies authorized to act.* All banks and trust companies, incorporated under general or special laws of the United States, the District of Columbia, any State, territory or insular possession of the United States, or the Canal Zone, are eligible and are hereby authorized, on and after October 2, 1944, to make payments in connection with the redemption of United States Savings Bonds, subject to the provisions of this circular and any instructions issued hereunder: *Provided, however,* That each bank or trust company must be duly qualified by the Federal Reserve Bank of the district[1] before it may make any such payment. Federal Reserve Banks, as fiscal agents of the United States, are authorized to qualify eligible banks and trust companies hereunder, and to terminate any such qualifications as hereinafter provided.

§ 321.2 *Application and qualification.* Any eligible bank or trust company which desires to qualify to make payments in connection with the redemption of United States Savings Bonds should make application to the Federal Reserve Bank of the Federal Reserve District in which it is located on Application-Agreement Form PD 1958 (see appended exhibit A), copies of which may be obtained from the appropriate Federal Reserve Bank. If the application is approved, the Federal Reserve Bank will forward to the bank or trust company a Notice of Qualification Form PD 1959 (see appended exhibit B), establishing that it is qualified to make payments in connection with the redemption of the United States Savings Bonds hereinafter specified. If the application is not approved, the bank or trust company will be so advised in writing by the Federal Reserve Bank of the District.

§ 321.3 *Termination of a bank's qualification to pay bonds.* The Secretary of the Treasury or under authority of the Secretary the appropriate Federal Reserve Bank, as fiscal agent of the United States, may, by written notice, at any time and without previous demand or notice, terminate the qualification of any bank or trust company to pay United States Savings Bonds. A duly qualified bank or trust company may discontinue making payments at any time upon written notice to the Federal Reserve Bank, and its qualification shall thereupon cease.

SUBPART B—GENERAL

§ 321.4 *Meaning of terms.* Hereinafter, for the purposes of this part, unless otherwise indicated specifically, or by context, the terms:

(a) "Bank(s)" shall mean any eligible incorporated bank or trust company duly qualified pursuant to the provisions of this circular to make payments in connection with the redemption of the United States Savings Bonds hereinafter specified, including such branches and facilities thereof located within the United States (including the territories and insular possessions of the United States and the Canal Zone) as it may desire to utilize for this purpose. The term "facilities," as used herein, is defined as those bank facilities at army and navy installations and at defense plants which have been established for the duration of the war with the specific approval of the Treasury Department.

(b) "Bond(s)" shall include only United States Savings Bonds of Series A, B, C, D or E, including bonds of Series E designated "Defense Savings Bonds" or "War Savings Bonds." (Savings Bonds of Series F and G are not included.)

(c) "Owner(s)" shall mean an individual (natural person) whose name is inscribed as an owner (or coowner) in his own right on a bond which is registered in any of the following forms:

(1) In the name of a single individual in his own right, e. g. "John A. Jones";

(2) In the names of two individuals as coowners, e. g. "John A. Jones or Mrs. Ella S. Jones" (each is considered as an "owner," and payment may be made to either without the consent of the other); or

(3) In the name of one individual, payable on death to another, e. g. "John A. Jones, payable on death to Mrs. Ella S. Jones," or "John A. Jones, p. o. d. Mrs. Ella S. Jones." (In this example, John A. Jones is the "owner" and Mrs. Ella S. Jones is the beneficiary. Payment under this circular to a beneficiary is not authorized.

(d) "Federal Reserve Bank" includes each Federal Reserve Bank and each Branch of a Federal Reserve Bank which has been or may hereafter be utilized by such Federal Reserve Bank to conduct any of the transactions in connection with which the term is used in this circular.

§ 321.5 *Reimbursement of banks' costs.* A bank shall not make any charge against the owners of bonds for payments made hereunder. However, each bank shall be entitled to receive, for its service in paying bonds hereunder, reimbursement for bonds paid and forwarded to the Federal Reserve Bank each calendar quarter according to the following scale, which shall be applicable separately to each bank and each of its branches and facilities, if utilized, and if the bonds paid by each are separately scheduled and accounted for:

15 cents each for the first 1,000 bonds.
12 cents each for the second 1,000 bonds.
10 cents each for all over 2,000 bonds.

The date such bonds are forwarded to the Federal Reserve Bank will govern the rate of reimbursement, and the payment of such amount as the bank is entitled to receive shall be made by the Federal Reserve Bank on behalf of the Treasury Department.

§ 321.6 *Announcements, etc., of authority to pay bonds.* Any announcement of or any reference to a bank's authority to pay savings bonds may be made only in a form or manner or contain such statements or substance as may be approved by the Secretary of the Treasury or, under authority of the Secretary, by the Federal Reserve Bank of the District, as fiscal agent of the United States. A bank shall not make such announcements or references unless and until it is officially qualified to pay bonds.

[1] For the purpose of this circular, banks and trust companies in Puerto Rico, the Virgin Islands and the Canal Zone shall be considered as being within the Second Federal Reserve District and shall make application to the Federal Reserve Bank of New York, and banks and trust companies in Alaska and Hawaii shall be considered as being within the Twelfth Federal Reserve District and shall make application to the Federal Reserve Bank of San Francisco.

SUBPART C—SCOPE OF AUTHORITY OF BANKS

§ 321.7 *General.* In order to protect the interests of the owners and to insure receipt by the proper persons of the proceeds thereof, savings bonds are registered, are not transferable, and are payable only to the owner named on the bond (except as otherwise specifically provided in the regulations governing the bonds). This policy must be understood and effectuated by each bank, notwithstanding the authority granted herein to make payments of bonds, since it is of the utmost importance that payment of the appropriate redemption value of the bonds be made to and received by only the persons entitled under the terms and conditions of the bonds and applicable regulations.

§ 321.8 *Payments authorized.* Subject to the terms of the bonds and to the provisions of the regulations governing them (Treasury Department Circular No. 530, as currently in effect on the date of payment) and the provisions of this circular, a bank may make payment of any United States Savings Bond of Series A, B, C, D or E, to the individual (natural person) whose name is inscribed as the owner (or coowner) in his own right on the bond: *Provided,* That such individual presents the bond to the bank for payment and that the individual is known to the bank or establishes his identity to the complete satisfaction of the bank. This authority to make payments to the owner named on the bond will be held to include the following exceptional cases:

(a) Where the name of the owner as inscribed on the bond has been changed by marriage and the bank knows or can establish to its complete satisfaction the identity of the owner whose name has been so changed. The signature to the request for payment should show both names, for example: "Miss Mary T. Jones, now by marriage Mrs. Mary J. Smith." A bank is not authorized to pay a bond for an owner whose name as inscribed on the bond has been changed in any other manner.

(b) Where the name of the owner inscribed on the bond is that of a minor child who is not of sufficient competency and understanding to execute the request for payment and comprehend the nature of such act but upon whose behalf request for payment is made by a parent with whom the child resides: *Provided, however,* That the form of registration does not indicate a guardian or similar representative of the estate of the minor owner has been appointed or is otherwise legally qualified. The parent requesting payment on behalf of the minor child must be known or his or her identity established to the complete satisfaction of the bank, and the parent must sign the request for payment in the form: "John A. Jones, on behalf of John C. Jones" and affix an endorsement in substantially the following form, which may be typed on the back of the bond: "I certify that I am the _____ (father or mother) of John C. Jones and the person with whom he resides. He is _____ years of age and is not of sufficient competency and understanding to sign the request." Such a payment may not be made to any person other than a father or mother.

§ 321.9 *Specific limitations of payment authority.* A bank is not authorized hereunder to pay a bond:

(a) If the bond is presented for payment prior to the expiration of 60 days from the issue date (the issue date should not be confused with the date appearing in the issuing agent's dating stamp).

(b) If the bank does not know or can not establish to its complete satisfaction the identity of the person requesting payment as the owner of the bond (including the establishment of the identity of parents requesting payment on behalf of minor children, as set forth in § 321.8 (b)).

(c) If the owner requesting payment (form for which appears on the back of each bond) does not sign his name in ink as it is inscribed on the face of the bond and show his home or business address. (See also §§ 321.8 (a) and (b) and 321.10 (d).)

(d) If the bond appears to bear a material irregularity, for example, an altered, illegible, incomplete or unauthorized inscription, issue date or issuing agent's validating stamp impression; or if a bond appears to be altered, or is mutilated or defaced in such a manner as to create doubt or arouse suspicion with respect to the bond or any essential part thereof.

(e) If the bond is marked "Duplicate."

(f) If Treasury Department regulations require the submission of documentary evidence to support the redemption of the bond, as in the case of deceased owners, incompetents or minors under legal guardianship or the change of an owner's name as inscribed on a bond if for any reason other than marriage.

(g) If the owner named on the bond and requesting payment is a minor who, in the opinion of the bank, is not of sufficient competency and understanding to execute the request for payment and comprehend the nature of such act. (Note the authority granted to banks to make payments of bonds to either parent on behalf of a minor child under the provisions of § 321.8 (b).)

(h) If it is known to the bank that the owner has been declared in accordance with law, incompetent to manage his estate.

(i) If partial redemption is requested. Attention is directed to § 321.17 hereof for handling bonds of the foregoing classes of cases which may not be paid by banks.

SUBPART D—PAYMENT AND ACCOUNTING

§ 321.10 *Examination of bonds presented for payment.* Before making payment of bonds presented hereunder the bank:

(a) Shall determine that the person requesting payment as the "owner" (as defined in this circular) is known or his identity is established to the satisfaction of the bank.

(b) Shall examine the bond and determine that it is a bond which the bank is authorized to pay under the provisions of this circular.

(c) If the request for payment on the back of the bond is already executed, shall determine that the request is properly signed by the registered owner presenting the bond and that his home or business address is shown.

(d) If the request for payment on the back of the bond has not been executed or has been improperly executed by the owner presenting the bond, shall require such owner to properly sign the request and show his home or business address.

§ 321.11 *Certification of requests for payment.* In view of the provisions of this circular governing payment of bonds and the requirements as to the data to be endorsed on each bond, under § 321.12, a bank will not be required in the case of any bond paid to it to complete the certification form at the end of the request for payment, nor determine the authenticity of any certification which may appear on the bond at the time it is presented for payment: *Provided, however,* That each bank submitting paid bonds shall be understood by such submission to have represented and certified that the identity of the owner requesting payment has been duly established to the satisfaction of the bank by one of its officers or by an employee duly authorized by the bank.

§ 321.12 *Determination of redemption values and payment of bonds.* The redemption value of a bond is determined from the period of time (years and full half-year) that it has been outstanding, and the table of redemption values on each bond. The Federal Reserve Bank of the district will furnish each bank with a table of redemption values from which it will be possible, after determining the month and year of issue of any bond, to immediately establish its current value. After establishing such value, payment thereof to the owner requesting payment shall be made in cash. No objection will be made to an arrangement between the owner and the bank under which the owner accepts in lieu of cash, a credit to his checking or savings account with the bank, or a check or similar instrument payable to his order. Each bank shall place on the face of each bond paid by it the word "Paid", the amount and date of payment and the name, location and transit (or code) number of the bank. Other data pertinent to the payment procedure of a bank may be included if approved by the Federal Reserve Bank of the District. The Federal Reserve Bank will furnish rubber stamps for this purpose or, in lieu

thereof, will approve suitable stamps prepared by a bank. The affixation of such data shall be construed by and between the bank and the Treasury Department to be a certification by the paying bank that the bond has been paid in accordance with the terms and requirements of this circular and that payment of the proceeds of the bond has been made to the owner.

§ 321.13 *Forwarding paid bonds to the Federal Reserve Bank.* After payment, the bonds shall be forwarded to the Federal Reserve Bank of the district in accordance with instructions issued by such Federal Reserve Bank.

§ 321.14 *Redemption of paid bonds by Federal Reserve Banks.* Upon receipt of the paid bonds the Federal Reserve Bank will make immediate settlement with the forwarding bank for the total amount of payments made on such bonds; however, such settlement shall be subject to adjustment if any discrepancies are discovered at a later date.

§ 321.15 *Losses resulting from payments.* Section 22 of the Second Liberty Bond Act, as amended, provides:

(l) Any losses resulting from payments made in connection with the redemption of savings bonds shall be replaced out of the fund established by the Government Losses in Shipment Act, as amended, under such regulations[1] as may be prescribed by the Secretary of the Treasury. The Treasurer of the United States, any Federal Reserve Bank, or any incorporated bank or trust company authorized or permitted to make payments in connection with the redemption of such bonds, shall be relieved from liability to the United States for such losses, upon a determination by the Secretary of the Treasury that such losses resulted from no fault or negligence on the part of the Treasurer, the Federal Reserve Bank, or the incorporated bank or trust company • • •. The provisions of Section 3[2] of the Government Losses in Shipment Act, as amended, with respect to the finality of decisions by the Secretary of the Treasury shall apply to the determinations made pursuant to this subsection. • • •.

(a) *Consideration of facts concerning loss.* In any case in which a loss occurs, the paying bank shall be afforded ample opportunity to present all of the facts pertaining to the circumstances of the payment for consideration by the Secretary.

§ 321.16 *Preservation of rights.* Nothing contained in these regulations shall be construed to limit or restrict any existing rights which holders of savings bonds may have acquired under the circulars offering such bonds for sale and the regulations prescribed thereunder.

§ 321.17 *Redemption of bonds not payable by banks.* Any bonds which a bank is not authorized to pay pursuant to the provisions of this circular should be forwarded by the owner, or his agent, after certification of the requests for payment, to the Federal Reserve Bank or Branch of the District for redemption. If a bank should undertake to forward such unpaid bonds at the request and in behalf of the person entitled to payment, such bonds must be sent separate and apart from bonds which the bank has paid. Any documentary evidence required to support the redemption should accompany the bond or bonds when forwarded to the Federal Reserve Bank.

§ 321.18 *Functions of Federal Reserve Banks.* The Federal Reserve Banks, as fiscal agents of the United States, are authorized to perform such duties, and prepare and issue such forms and instructions, as may be necessary to the fulfillment of the purpose and requirements of this circular. SUBPART A—REGULATIONS PRESCRIBED

§ 322.1 *Application of regulations.* Pursuant to the authority of the Second Liberty Bond Act, as amended, the following regulations are hereby prescribed for the replacement out of the fund established by the Government Losses in Shipment Act, as amended, of any losses to the United States resulting from payments made in connection with the redemption of United States Savings Bonds, and shall apply to losses resulting from payments made (1) by the Treasurer of the United States, (2) by the Federal Reserve Banks and Branches, as fiscal agents of the United States, and (3) by incorporated banks and trust companies qualified pursuant to Treasury Department Circular No. 750, to pay savings bonds.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-608]

L. B. Nauss & Sons, Inc., of Railroad Avenue, Gloucester, Massachusetts, is engaged in the business of selling at retail

lumber and other building supplies. Between about November 19, 1943, and February 11, 1944, it sold Number 2 Douglas Fir to certain of its customers on unrated orders in violation of Conservation Order M–208. During approximately the same period of time, it also applied unauthorized ratings to orders for lumber and other materials in violation of Priorities Regulation 3. The responsible officers of L. B. Nauss & Sons, Inc., were aware of Conservation Order M–208 and Priorities Regulation 3 and the violations were the result of gross negligence.

These violations of Conservation Order M–208 and Priorities Regulation 3 have diverted critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.608 *Suspension Order No. S–608.* (a) L. B. Nauss & Sons, Inc., its successors or assigns, shall not receive any lumber as defined in or governed by Order L–335 (as amended from time to time) except by the extension of certified orders received from its customers or other distributors, unless hereafter specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve L. B. Nauss & Sons, Inc., its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(c) This order shall take effect on September 1, 1944, and shall expire on December 31, 1944.

[Order L–335 Direction 15]

DELIVERY OF FLITCHES

The following direction is issued pursuant to Order L–335:

(a) *Definition.* For the purpose of this direction a flitch is any segment of a log which has been produced so that it can be converted into veneer.

(b) *Delivery of flitches to veneer manufacturers.* Any person may deliver flitches to a veneer manufacturer and any veneer manufacturer may receive flitches without regard to the provisions of Order L–335. The veneer manufacturer in determining whether he is a Class I Consumer does not include flitches in his requirements for lumber. Flitches that a veneer manufacturer receives under the provisions of this direction may not be used for any purpose other than producing veneer.

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L–335, Direction 16]

FARMER'S RECEIPT OF LUMBER PRODUCED FROM HIS OWN TREES

The following direction is issued pursuant to Order L–335:

(a) *Definition.* For the purpose of this direction "farmer" means a person who engages in farming as a business, by raising crops, livestock, bees, or poultry. It does not include a person who has just a "victory garden" or a person who raises food or other agricultural products entirely for his own use.

(b) *Farmer's receipts of lumber cut from his own trees.* Any farmer who cuts trees on his own farm may have them sawed into lumber by a sawmill and may receive up to 5,000 board feet of lumber sawed from such trees in a calendar year without giving the sawmill a certificate or rating as required by Order L–335. This direction will be authority for the sawmill to deliver back to the farmer this amount of lumber without requiring a certificate or a rating. If a farmer wishes to receive more than 5,000 board feet of lumber which has been cut from his own trees he may do so only by providing the sawmill with a certificate which he has obtained from his County Agricultural Conservation Committee or any other certificate he is authorized to use, or by extending a certificate that he has received from another lumber consumer. Certificates that the farmer receives from another lumber consumer may be extended in the same way that a distributor extends certificates that he receives from his customers. This is explained in paragraph (o) (1) of Order L–335.

Issued this 2d day of September 1944.

Before filing WPB–1319, applicants should consult the current instructions booklet relating to this form.

In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using material under priority control and may be deprived of priorities assistance.

The small order exemption without use certificate is 100 pounds in the aggregate of all kinds of synthetic organic detergents per person per month.

(c) *Deliveries against "special military orders."* Beginning October 1, 1944, each supplier shall make deliveries of critical synthetic organic detergents during any month against "special military orders" only to the extent authorized or directed by the War Production Board, without regard to preference ratings.

(d) *Deliveries against "regular orders".* Beginning October 1, 1944, each supplier shall make deliveries of critical synthetic organic detergents against "regular orders" during any month in accordance with applicable preference ratings, subject to the following conditions:

(1) No deliveries against "regular orders" shall be made if such deliveries will prevent fulfilling all deliveries against "special military orders" which have been specifically authorized by the War Production Board.

(2) The aggregate quantity of critical synthetic organic detergents delivered against "regular orders" during any month shall not exceed the quantity specifically authorized for each category by the War Production Board.

(e) *Suppliers' applications on WPB-2947.* Each supplier seeking authorization to use or deliver critical synthetic organic detergents shall file application on Form WPB-2947 (formerly PD-602). The unit of measure is pounds. In Table I, first, in Column 1 list names of customers placing "special military orders" and specify in Column 1a contract numbers and in Column 4 the quantity ordered for delivery in the next month. Second, list in Column 1 the names of all suppliers who have specified resale in their certificates, in Column 1a specify whether the resale is to be authorized or is to be in exempt 100-pound lots, and in Column 4 specify the requested quantities. Third, specify in Column 1 "regular orders", without specifying customers' names, specify the end use categories separately in Column 1a, and in Column 4 specify the aggregate quantity for each category of use. Fourth, specify in Column 1 "100 lb. exempt orders", without listing customers' names, leave Column 1a blank, and specify the aggregate quantity in Column 4. Fill in the other columns as indicated.

If the applicant supplier is seeking authority to use any part of his own production or stock, he shall apply as if the consuming part of his organization had filed a purchase order and use certificate with the production or distribution part of his organization (the actual filing of such order and certificate is not necessary).

In Table II each producer of critical synthetic organic detergents shall fill in Columns 8 through 16 as indicated. Distributors who purchase for resale shall fill in Columns 8, 10, 12 and 13 and leave the other columns of this table blank. In Columns 10 and 13, suppliers shall enter only those stocks not authorized for use or delivery on the dates specified.

The test of similarity is whether the synthetic organic detergent in question is capable of filling "special military orders" as defined in paragraph (a) (2).

(h) *Budget Bureau approval.* The above reporting requirements have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(i) *Communications to War Production Board.* Communications concerning this schedule shall be addressed to: War Production Board, Chemicals Bureau, Washington 25, D. C., Ref: M-800-44.

(iii) Any agency of the United States Government for delivery to or for the account of any country listed above or any other country pursuant to the Act of March 11, 1941, entitled "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(5) *Restrictions on manufacture of stirrup pumps.* No person shall manufacture any stirrup pump, or part thereof, except to fill purchase orders from the Army or Navy of the United States, the United States Maritime Commission, War Shipping Administration, Defense Supplies Corporation, or from any agency of the United States Government for delivery to or for the account of the government of any country pursuant to the Act of March 11, 1941, entitled, "An Act to Promote the Defense of the United States" (Lend-Lease Act).

(6) *Restriction on manufacture of soda-acid fire extinguishers.* No person shall manufacture any soda-acid fire extinguisher.

(7) *Restrictions on sale and delivery of signal and alarm equipment and air raid warning devices.* (i) No person shall sell, deliver or install any signal and alarm equipment costing $200 or more or any air raid warning device costing $25 or more except to fill the following kinds of orders:

(a) Orders from or for the account of the Army or Navy of the United States, the United States Maritime Commission or the War Shipping Administration;

(b) Orders for equipment (signal and alarm equipment and air raid warning devices), the delivery of which has been specifically authorized by the War Production Board on Form WPB–1319. (Any person receiving specific authorization on Form WPB–1319 must notify his supplier by placing on his purchase order the following certification, in addition to the certification in Priorities Regulation 7: "Delivery approved on Form WPB–1319, case no. —, under Order L–39". The supplier may get delivery of the equipment from his supplier to fill the order, if necessary, by placing the same certification on his order.)

(c) Orders for equipment the delivery of which has been specifically authorized on Form GA–1456.[1] (A person receiving an authorization for this equipment on Form GA–1456 must notify his supplier by placing on his purchase order the following certification, in addition to the certification in Priorities Regulation 7: "Delivery approved on Form GA–1456 under Direction 1 to CMP Regulation 6". The supplier may get delivery of the equipment from his supplier to fill the order, if necessary, by placing the same certification on his order.)

Cost is determined under this paragraph by taking the installed cost to the purchaser. If the equipment is leased rather than sold, cost is determined by taking the price which would be charged to the building owner if the equipment were installed and sold outright.

(ii) [Revoked Feb. 16, 1944]

(iii) In conjunction with the granting of specific authorization to receive signal or alarm equipment or air raid warning devices on Form WPB–1319, the War Production Board may also assign preference ratings to the authorized deliveries on such form. Any preference rating so assigned shall be applied and extended only in accordance with the terms of Priorities Regulation 3.

(8) *Restriction on the manufacture of signal or alarm equipment.* Except upon specific authorization by the War Production Board, no person shall manufacture, install, deliver or accept delivery of any smoke, fire, or intrusion detector employing photo-electric principles, except to fill purchase orders from a purchaser listed in paragraph (b) (4) of this order and unless such item is for use on board ship.

(9) *Restrictions on the manufacture of air raid warning devices.* No person shall manufacture, sell, purchase, deliver, install or accept delivery of any air raid warning device which requires for its operation a motor in excess of three (3) horse power.

---

[1] Authorization on Form GA–1456 is issued for approved construction projects upon application on Form WPB–617, and persons needing signal and alarm equipment or air raid warning devices for use in a project should ask for the equipment on their project application. However, when a person wishes only to get this equipment for installation in an existing structure and no other construction is involved, he should follow these rules:

1. If the cost of installation materials is not more than $500, the application should be filed on Form WPB–1319.

2. If the cost of installation materials is more than $500, the application should be filed on Form WPB–617.

"Installation materials" include such items as wire, tubing and conduit used to install the equipment in the structure, but of course the equipment itself is not included.

(10) *Restrictions on sale and delivery of cotton rubber-lined fire hose.* No person shall sell or deliver any new cotton rubber-lined fire hose except to fill the following kinds of orders:

(i) Orders bearing a preference rating of AA–5 or higher;

(ii) Orders which had been placed prior to August 23, 1943, and which bear a preference rating of A–9 or higher; or

(iii) Orders from distributors. (Distributors may sell or deliver only to persons to whom sale or delivery is authorized to be made by this paragraph (b) (10).)

No person shall purchase or accept delivery of any cotton rubber-lined fire hose if he knows or has reason to believe that the sale or delivery of such hose is prohibited by this paragraph.

(11) *Restrictions on manufacture of incendiary bomb control equipment.* Effective thirty days after January 20, 1943, no person shall manufacture any incendiary bomb control equipment, except when and to the extent authorized by the War Production Board, or to the extent permitted by paragraph (b) (5) of this order.

(c) *Exceptions to paragraph (b) (1).* The restrictions of paragraph (b) (1) shall not apply to:

(1) Brass fire hose couplings, provided that such couplings are delivered to or for the account of:

(i) The Army or Navy of the United States, the United States Maritime Commission or the War Shipping Administration, and are for use on board ship; or

(ii) Any person whose purchase order bears a rating which was assigned for the specific couplings on Form WPB–646 (formerly Form PD–300); or

(iii) The Panama Canal; or

(iv) Any person for use on board ships warranted by the United States Maritime Commission.

(2) Carbon dioxide extinguishers manufactured in accordance with specifications of the Army or Navy of the United States, the United States Maritime Commission, or the War Shipping Administration.

(d) *Representations on orders from government agencies.* Any purchase order or contract from any agency or government named in subparagraphs (i), (ii), or (iii) of paragraph (b) (4) of this order shall constitute a representation that the conditions exist under which such purchase order or contract may be filled within the terms of this order. Said representation may be relied upon by the person with whom the purchase order or contract is placed and by his subcontractors and suppliers.

(e) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(f) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to manufacture more fire protective, signal and alarm equipment than is permitted under paragraphs (b) (4), (b) (5), (b) (8) and (b) (11) (including a person who cannot manufacture such equipment under this order), or who wants to manufacture any soda-acid fire extinguishers prohibited by paragraph (b) (6), or any air raid warning devices requiring a motor in excess of three horsepower (prohibited by paragraph (b) (9)), may apply for permission to do so as explained in Priorities Regulation 25. A person may still apply for authorization under paragraphs (b) (8) for signal or alarm equipment and (b) (11) for incendiary bomb control equipment, if he desires. The restrictions on delivery contained in paragraphs (b) (3), (b) (7) and (b) (10) and the restrictions on use of material in paragraph (b) (1) continue to apply to fire protective, signal and alarm equipment authorized under Priorities Regulation 25.

(2) *Appeals.* Any appeal from the provisions of this order other than the restrictions of paragraphs (b) (4), (b) (5), (b) (6), (b) (8), (b) (9) and (b) (11) shall be made by filing a letter in triplicate with the War Production Board, Washington 25, D. C., Ref: L–39, referring to the particular provision appealed from and stating fully the grounds of the appeal. No appeal should be filed from the provisions of the above paragraphs.

(g) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable regulations of the War Production Board, as amended from time to time.

(h) *Correspondence.* Reports to be filed and other communications concerning this order shall be addressed to the War Production Board, Safety and Technical Equipment Division, Washington 25, D. C., Ref.: L–39.

Issued this 2d day of September 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-604]

ATLAS MANUFACTURING CO.

D. L. King, T. J. Morris and R. A. Beaux, are partners doing business as the Atlas Manufacturing Company at Rogers, Arkansas, and are engaged in the manufacturing of poultry feeders and poultry waterers. During the period from October 8, 1943 to March 1, 1944, they manufactured and sold at least 16,289 poultry feeders and poultry waterers of the aggregate value of $17,226.60. During this period, by the terms of General Limitation Order L-257, their manufacture of these items was limited to an amount not exceeding the value of $2500, for the reason that they had not been engaged in such manufacture during the years 1940 or 1941. The manufacture of $14,726.60 aggregate value of poultry feeders and poultry waterers in excess of this permitted amount was a violation of General Limitation Order L-257. During the period from November 1, 1943, to March 1, 1944, the respondents placed orders for, and obtained delivery of 71,088 pounds of galvanized steel sheets certifying that this material was required for maintenance, repair and operating supplies, when, in fact, it was used for production purposes, in violation of CMP Regulation No. 5 and Priorities Regulation No. 3. The respondents were familiar with General Limitation Order L-257, and their actions constituted wilful violations of that Order. Respondents' violations of CMP Regulation No. 5 and Priorities Regulation No. 3 resulted from their gross negligence.

These violations have hampered and impeded the war effort of the United States by diverting critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.604 *Suspension Order No. S-604.* (a) D. L. King, T. J. Morris and R. A. Beaux, doing business as Atlas Manufacturing Company or otherwise, their and its successors or assigns, shall not manufacture, fabricate, process or machine any sheet metal poultry feeders as specified in General Limitation Order L-257.

(b) Deliveries of material to D. L. King, T. J. Morris and R. A. Beaux, individually or doing business as Atlas Manufacturing Company, or under any other name, their or its successors or assigns, shall not be accorded priority over deliveries under any other contract or order and no preference rating shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders or any other orders or regulations of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) No allocations, including allotments, shall be made to D. L. King, T. J. Morris, and R. A. Beaux, doing business as Atlas Manufacturing Company, or otherwise, their and its successors or assigns, of any materials or products, the supply or distribution of which is governed by any order or regulation of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(d) Nothing contained in this order shall be deemed to relieve D. L. King, T. J. Morris and R. A. Beaux, individually or doing business as Atlas Manufacturing Company, or otherwise, their or its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(e) This order shall take effect on September 2, 1944, and shall expire on January 2, 1945.

Issued this 23d day of August 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S-605]

ROGERS PLUMBING CO.

J. M. Henderson of Rogers, Arkansas, doing business as Rogers Plumbing Company, is engaged in the manufacture of poultry feeders and waterers. On or about July 24, 1943, respondent filed Form PD-629 in which he falsely represented to the War Production Board that he had manufactured 16,000 poultry feeders in 1940 and 1941, when, in fact, he was not engaged in manufacturing such items of any farm machinery or equipment in either of the years 1940 or 1941. These misstatements subjected J. M. Henderson to administrative action under the provisions of General Limitation Order L-257 and Priorities Regulation No. 1. On the basis of these false representations, respondent obtained substantial allotments of controlled materials in the third and fourth quarters of 1943, and purchased controlled materials during such quarters greatly in excess of the allotments obtained by his prior false representations, in violation of CMP Regulation No. 1. During the period from May 1, 1943, to August 17, 1943, respondent placed orders for, and obtained delivery of 10,370 lbs. of galvanized sheet steel, certifying that this steel was required for maintenance, repair and

[3] See footnote on p. 10859.

operating supplies. Such steel was not used by him for essential maintenance and repair operations, but was, in fact, used for production purposes, in violation of CMP Regulation No. 5. The respondent was familiar with the provisions of CMP Regulation No. 1 and CMP Regulation No. 5, and his actions constituted wilful violations of these regulations.

These violations have hampered and impeded the war effort of the United States by diverting critical materials to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.605 *Suspension Order No. S–605.* (a) J. M. Henderson, doing business as Rogers Plumbing Company or otherwise, his and its successors or assigns, shall not manufacture, fabricate, process or machine any sheet metal poultry feeders as specified in General Limitation Order L–257.

(b) Deliveries of material to J. M. Henderson, doing business as Rogers Plumbing Company or otherwise, his and its successors or assigns, for use in the manufacture, fabrication, processing or machining of sheet metal poultry feeders or poultry waterers as specified in General Limitation Order L–257, shall not be accorded priority over deliveries under any other contract or order and no preference rating shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders or any other orders or regulations of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) No allocations, including allotments, shall be made to J. M. Henderson, doing business as Rogers Plumbing Company or otherwise, his and its successors or assigns, of any materials or products for use in the manufacture, fabrication, processing or machining of sheet metal poultry feeders or poultry waterers as specified in General Limitation Order L–257, the supply or distribution of which is governed by any order or regulation of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(d) Nothing contained in this order shall be deemed to relieve J. M. Henderson, doing business as Rogers Plumbing Company or otherwise, his and its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(e) This order shall take effect on September 2, 1944, and shall expire on January 2, 1945.

Issued this 23d day of August 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–63, Revocation]

ILLINOIS PURE ALUMINUM CO.

Suspension Order No. S–63 was issued against the Illinois Pure Aluminum Company, Lamont, Illinois, a manufacturer of aluminum kitchen utensils, effective July 2, 1942. An appeal was filed with the Chief Compliance Commissioner on June 25, 1943. The case was reviewed by the Chief Compliance Commissioner, as a result of which on July 31, 1943 the appeal was dismissed. The Chief Compliance Commissioner has further reviewed the matter in the light of changed conditions affecting aluminum and the issue of General Limitation Order L–30–e on August 15, 1944. As a result of this review he has directed that Suspension Order No. S–63 be revoked forthwith. In view of the foregoing:

It is hereby ordered, That: § 1010.63 *Suspension Order No. S–63* be revoked.

Issued this 2d day of September 1944.

[1] Refiners requiring copper-clad or copper-base alloy-clad steel scrap should apply by supplementary letter setting forth the copper raw material involved, the amount required, and other pertinent data such as inventory, receipts, production, consumption and shipments, on the basis of which authorization to accept delivery is requested.

[2] Footnote 2 deleted Sept. 4, 1944.

[3] Foundries and ingot makers may exchange copper-base alloy ingot on an equivalent copper content basis without charging such deliveries against their authorizations.

(c) *Restriction on disposal of scrap and copper-clad and copper-base alloy-clad steel scrap.* (1) No person (other than one who is in the business of producing copper raw materials or copper controlled materials) shall melt or process any scrap or copper-clad or copper-base alloy-clad steel scrap, generated in his plant through fabrication or accumulated in his operations through obsolescence, except as specifically authorized by the War Production Board, or dispose of such material in any way other than by delivery to a person authorized to accept such delivery. In no event shall any such person keep on hand more than thirty (30) days' accumulation of scrap or copper-clad or copper-base alloy-clad steel scrap unless such accumulation aggregates less than five tons.

(2) Any material purchased as scrap, if not sold as scrap, may be sold in controlled material form only to fill authorized controlled material orders including orders identified by a CMP allotment symbol whose initial letter is Z or with the specific authorization of the War Production Board in writing. However, any CMP allotment symbol or number received as a result of such sales may not be used to replace the material sold.

(3) Nothing herein contained shall prohibit any public utility from using in its own operations wire or cable which has become scrap by obsolescence, provided the lengths of such wire or cable are in excess of five feet and the quantity of such material so used by such public utility in any calendar month does not exceed five tons.

(d) *Specific authorization and directions.* This order is designed to prescribe the general regulations under which deliveries of copper raw materials may be accepted. At times the provisions of this order will not fit the needs of a particular person. In any such case, the person affected may apply by letter to the Copper Division, War Production Board, for a specific authorization to cover his needs. Situations may arise which will require the War Production Board, from time to time, to issue specific authorizations or directions to a person as to the source, destination, amount or grade of copper raw materials to be delivered, acquired or used by him.

(e) *Definitions.* (1) "Copper" means unalloyed copper.

(2) "Copper-base alloy" means any alloy in the composition of which the percentage of copper metal by weight equals or exceeds 40% of the total weight of the alloy. Copper-base alloy does not include alloyed gold produced in accordance with United States Commercial standards CS 51–35 and CS 67–38.

(3) "Scrap" means all copper or copper-base alloy materials or objects (except those containing 0.10% or more beryllium and governed by supplemental order M–160a) which are the waste or by-product of industrial fabrication, or which have been discarded on account of obsolescence, failure or other reason. This does not include fired cartridge and artillery cases or copper-clad or copper-base alloy-clad steel scrap.

(4) "Copper wire mill product" means bare, insulated or armored wire and cable for electrical conduction made from copper, copper-base alloy, or copper-clad steel containing over 20% copper by weight.

(5) "Brass mill product" means sheet, rod, wire or tube made from copper or copper-base alloy. This does not include copper wire mill products.

(6) "Foundry copper or copper-base alloy product" means cast copper or copper-base alloy shapes or forms suitable for ultimate use without remelting, rolling, drawing, extruding or forging. PART 3216—MATERIAL ENTERING INTO THE OPERATION OF TRANSPORTATION SYSTEMS

[Preference Rating Order P–142, Direction 4]

REDUCTION IN TRACK MATERIAL AUTHORIZATIONS

The following direction is issued pursuant to Preference Rating Order P–142 (§ 3216.1):

(a) Each authorization on form letter GA–1844 (dated June 1, 1944) permitting a railroad operator to place advance orders for track materials for the first and second quarters of 1945 is hereby reduced by 25% of the amount authorized for the first quarter and

by 18% of the amount authorized for the second quarter. This means that the advance authorizations for each category of track materials ("for new rail" and "for maintenance" as indicated in GA–1844) are reduced by the above amounts for each quarter. "Track materials" means those items of track material listed in paragraph (b) (2) of Order P–142.

(b) Railroad operators must cancel outstanding purchase orders for track materials already placed for the first and second quarters of 1945 to the extent necessary to conform with advance authorizations as reduced by paragraph (a). Final authorizations will be issued on a firm basis, as usual, when firm allotments of new rail are made for each quarter.

(c) This direction applies only to railroad operators under Order P–143 (serial numbers below 1,000) and not to transit or other operators.

PART 3284—BUILDING MATERIALS[1]

[Limitation Order L–205, as Amended Sept. 4, 1944]

HOUSE TRAILERS AND EXPANSIBLE MOBILE HOUSES

The fulfillment of requirements for the defense of the United States has created a shortage in the supply, for defense, for private account and for export, of the metals and other materials entering into the production of house trailers and expansible mobile houses; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense.

Section 3284.126 *Limitation Order L–205*[1] is hereby amended to read as follows:

§ 3284.126 *Limitation Order L–205*—(a) *Purpose of this order.* This order tells what house trailers and expansible mobile houses may be made, what material may be used in making them, and how they may be sold.

(b) *Restrictions on production*—(1) *House trailers.* No person shall manufacture, fabricate, or assemble a house trailer, except as authorized by a production schedule issued by the War Production Board, or except as permitted by paragraph (f).

(2) *Expansible mobile houses.* No person shall manufacture, fabricate or assemble an expansible mobile house, except as permitted by paragraph (f).

(c) *Authorization and scheduling of production*—(1) *Applications to produce.* Applications to produce house trailers should be submitted to the War Production Board on Form CMP–4B, addressed to the War Production Board, Building Materials Division, Washington 25, D. C. Authorized production schedules will be made on Form GA–1850. Each house trailer manufacturer is expected to produce during the specified period the number of trailers he is authorized to manufacture.

(2) *Policy in authorizing production schedules.* Manufacture of house trailers will be authorized so that the total production by the industry will not exceed the approved War Production Board program and so that production in any one plant or labor requirements therefor will not interfere with the war production in that plant or in any plant located in the same area.

(3) *Transfer of production schedules.* If a manufacturer finds that he is unable to complete his authorized production schedule within the specified period, he shall immediately notify the Building Materials Division of the War Production Board. The War Production Board may transfer from one manufacturer to one or more other manufacturers that portion of an authorized production schedule which cannot be completed during the specified period. Any arrangement by one manufacturer to have house trailers produced for him by another must first be submitted to the War Production Board for approval.

(4) *Information.* The War Production Board will, on request of any manufacturer of house trailers, give notice to all manufacturers of the total production authorized and the production authorized to each individual manufacturer.

(d) *Restrictions on use of material in production of house trailers.* No person shall use more than 678 pounds of steel and 4 pounds of copper, exclusive of Class B products, in the manufacture, fabrication or assembly of a single-axle house trailer, nor more than 751 pounds of steel and 4 pounds of copper, exclusive of Class B products, in the manufacture, fabrication or assembly of a tandem-axle house trailer. The maximum exterior body length of any house trailer shall not exceed 24 feet.

(e) *Restrictions on delivery of house trailers.* Except as deliveries of house trailers are made to dealers for resale, no manufacturer or dealer shall deliver a new or used house trailer manufactured after July 15, 1943, unless delivery has been specifically authorized by the War Production Board on Form WPB–3538. Permission may be aplied for by filing an original and two copies of Form WPB–3538 with the War Production Board's nearest local office for his District. A copy of the application will be returned to the seller with approval or denial indicated on the Form. The approved Form will be authority for the seller to deliver. No person shall deliver or accept delivery of a house trailer if he knows or has reason to believe that such house trailer was manufactured contrary to paragraphs (b) or (d).

(f) *Exemptions from provisions of this order.* This order does not apply to any house trailer or expansible mobile house manufactured to fill a specific order from or for the account of the Army, Navy, Maritime Commission, War Shipping Administration, or the National Housing Agency.

(g) *Reports.* Each person affected by this order shall execute and file with the War Production Board such reports and questionnaires as may be requested by the Board from time to time, subject to the approval of the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(h) *Communications.* All reports required hereunder and all communications concerning this order (except appeals, and applications on Form WPB–3538) shall be addressed to the War Production Board, Building Materials Division, Washington 25, D. C., Reference L–205.

(i) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

(j) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to manufacture more house trailers than permitted under paragraph (b) (1) (including a person who has not been permitted to make any house trailers), and any person who wants to manufacture expansible mobile houses not permitted by paragraph (b) (2), may apply for permission do so as explained in Priorities Regulation 25. A person who wants to make house trailers may still file an application to make them under paragraph (c) (1). The restrictions of this order on the use of material and on deliveries will apply to production of house trailers authorized under Priorities Regulation 25.

(2) *Appeals.* Any appeal by a manufacturer from the provisions of this order other than the restrictions of paragraphs (b) (1) and (b) (2) should be filed on Form WPB–1477 with the Field Office of the War Production Board for the district in which is located the plant of the appellant to which the appeal relates. An appeal from any action taken by the War Production Board on an application filed on Form WPB–3538 pursuant to paragraph (e) of this order may be filed by letter in triplicate with the Field Office of the War Production Board where the original application was filed. No appeal should be filed from the restrictions of paragraphs (b) (1) or (b) (2).

(k) *Definitions.* For the purpose of this order:

(1) "House trailer" means a portable shelter designed and constructed to be used as a human habitation and to be towed or transported on wheels without being dismantled or substantially changed in form. "House trailer" does not include an "expansible mobile house".

(2) "Expansible mobile house" means a portable shelter designed and constructed to be used as a human habita-

propriate in the public interest and to promote the national defense:

§ 3288.41 *General Limitation Order L–173*—(a) *Definitions.* For the purpose of this order, "floor or wall furnaces" means any device (except electric) for the direct heating of the space in and adjacent to that in which the device is located, designed for use without heat distribution ducts or pipes as integral parts of such heating devices. "Floor and wall furnaces" does not include direct fired gas unit heaters or any domestic heating stoves as defined in Limitation Order L–23–c.

(b) *General restrictions.* (1) No person shall produce any floor or wall furnaces except:

(i) For delivery to or for the account of the Army, Navy, Maritime Commission or War Shipping Administration; or

(ii) As authorized by the War Production Board on Form GA–1850.

(2) The restrictions of paragraph (b) (1) do not apply to the production of repair and replacement parts. However, no person shall produce repair or replacement parts in excess of the quantity required to maintain a minimum practicable working inventory.

(3) A person wishing to produce floor or wall furnaces which will not be delivered to or for the account of the Army, Navy, Maritime Commission or War Shipping Administration should apply for authorization by letter addressed to the War Production Board, Plumbing and Heating Division, Washington 25, D. C., Ref: L–173. This letter should state the proposed production in units per quarter. Where the applicant will need controlled materials in order to produce the equipment, the letter requesting authorization should be accompanied by an application on Form CMP–4B for the controlled materials.

(4) A limited production will be authorized on these applications, but only where the applicant's proposed use of labor will not interfere with local and inter-regional recruitment of labor. This production is in addition to the production of repair and replacement parts and of equipment to be delivered to or for the account of the Army, Navy, Maritime Commission or War Shipping Administration.

(c) *Reports.* (1) Manufacturers of floor and wall furnaces shall report on or before the tenth day of each month on Form WPB–3316, following the instructions on the Form. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(d) *Exceptions and appeals*—(1) *Production under Priorities Regulation 25.* Any person who wants to manufacture, fabricate or assemble more floor or wall furnaces than he has been authorized to make on Form GA–1850 (including a person who has no authorization) may apply for permission to do so as explained in Priorities Regulation 25. He may still, of course, apply for authorization under paragraph (b) (3) if he desires.

(2) *Appeals.* Any appeal from the provisions of this order, other than the restrictions of paragraph (b) (1), should be filed on Form WPB–1477 with the field office of the War Production Board for the district in which is located the plant or branch of the appellant to which the appeal relates. No appeal should be filed from the restrictions of paragraph (b) (1).

(e) *Applicability of regulations.* All persons and transactions affected by this order are subject to all applicable provisions of the regulations of the War Production Board, as amended from time to time.

(f) *Communications.* All communications concerning this order, except appeals, shall, unless otherwise directed, be addressed to the War Production Board, Plumbing and Heating Division, Washington 25, D. C., Ref: L–173.

(g) *Violations.* Any person who willfully violates any provision of this order, or who, in connection with this order willfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

CORDAGE FIBER, CORDAGE YARN AND CORDAGE

Section 3290.221 *General Conservation Order M–84* is amended as follows:

1. Subparagraph (ii) of paragraph (a) (1) shall read:

(ii) To fill orders placed by or for the account of any United States Government agency having in effect a plan approved by the War Production Board, to screen its orders and requisitions for rope and to eliminate unnecessary end uses of rope manufactured from critical fibers. Only the Army, Navy, and Maritime Commission now have such approved plans in effect. The Army and Navy approved plans require that orders for their account for rope made in whole or in part from Manila or agave, shall be approved by the War Production Board, and therefore no processor shall accept any such order unless the acceptance is approved by the War Production Board on application from or on behalf of the processor: Application may be made by the processor or on his behalf by letter or telegram addressed to the War Production Board, Cordage Branch, Washington 25, D. C., stating government contract and item number, quantity and kind of fiber required, and the size of the rope to be made. The War Production Board will consult with the Service or agency involved and approve applications if the proposed end use of the rope, in view of current supplies, justifies the use of the fiber.

2. In paragraph (c) (2), delete present subparagraph (iv), and substitute "(iv) Purse lines", to be immediately followed by a new paragraph, "Any processor may, however, elect at his own option to include American hemp line fiber as an extender in the manufacture of any of the rope products listed in paragraph (c) (2) (i), (ii), (iii), (iv), above."

MAXIMUM PRICES FOR STAPLE WORK GLOVES

This compilation of Revised Maximum Price Regulation 506 includes Amendment 2, effective September 1, 1944. The text added or amended by Amendment 2 is underscored. The prices in Tables I through 12 of Appendix A and Tables I and II of Appendix B are amended by Amendment 2.

A statement of the considerations involved in the issuance of this Revised Maximum Price Regulation No. 506 has been issued simultaneously herewith and filed with the Division of the Federal Register.[2] In the judgment of the Price Administrator the maximum prices established by this regulation are and will be generally fair and equitable and will effectuate the purposes of the Emergency Price Control Act of 1942, as amended. Such specifications and standards as are used in this regulation were, prior to such use, in general use in the trade or industry affected.

§ 1389.604 *Maximum prices for staple work gloves.* Under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Orders No. 9250 and No. 9328, Revised Maximum Price Regulation No. 506 (Maximum Prices for Staple Work Gloves) which is annexed hereto, and made a part hereof, is hereby issued.

AUTHORITY: Sec. 1389.604 issued under 56 Stat. 23, 765; 57 Stat. 566; Pub. Law 389, 78 Cong.; E.O. 9250, 7 F.R. 7871; E.O. 9328, 8 F.R. 4681.

SECTION 1. *Scope of this regulation—*(a) *Kinds of work gloves covered.* The specified staple work gloves covered by this regulation are work gloves of the following kinds:

(1) Single thickness canton flannel gloves.

(2) Canton flannel gloves with double thickness palm.

(3) Fully-lined canton flannel gloves.

(4) Two-thumbed canton flannel gloves.

(5) Jersey gloves.

(6) Combination leather and canton flannel or jersey gloves. However, grain leather palm gloves are not covered by this regulation.

For the purposes of this regulation (except Appendix A) "gloves" means both gloves and mittens.

(b) *Kinds of sales covered.* This regulation applies to all sales including sales at retail, sales at wholesale and sales by manufacturers. These kinds of sales are defined as follows:

(1) *Sales at retail.* All sales to individual consumers are "sales at retail." Such sales may, of course, be made by someone who is primarily a wholesaler or a manufacturer.

Sales to industrial, commercial, governmental, and charitable institutions which do not resell are also considered "sales at retail" if made by a person who sells principally to individual consumers, and only incidentally to institutions of these kinds. If not made by such a person, sales to these institutions are considered sales at wholesale or sales by manufacturers.

(2) *Sales at wholesale.* A sale at wholesale is any sale which is neither a sale at retail as explained in (1) nor a sale by a manufacturer as explained in (3). For example, a sale by a jobber, who buys work gloves from a manufacturer and resells them to a retailer or to an industrial user, is a sale at wholesale. Sales from jobber to jobber, and from retailer to retailer are also sales at wholesale, but are called "special sales", as explained in section 3.

(3) *Sales by a manufacturer.* A sale by a manufacturer is a sale of work gloves by a person:

(i) Who fabricated the gloves sold; or

(ii) Who sold or consigned to the fabricator of the gloves any of the principal materials from which they were made; or

(iii) Whose business is under the same ownership or control as the person who fabricated the gloves.

(c) *Where this regulation applies.* This regulation covers sales in the 48 states and the District of Columbia.

SEC. 2. *How to find retail ceiling prices.* Ceiling prices for sales at retail are listed in the tables in Appendix B. Two tables of ceiling prices are provided. Table I lists retail ceiling prices for gloves purchased from a wholesaler (the term "wholesaler" is defined in section 3 (a)). Table II lists retail ceiling prices for gloves purchased direct from the manufacturer.

The ceiling prices in the tables are not given by the kind of glove, but by the supplier's net ceiling price. The tables show the retail ceiling price which corresponds to each different supplier's net ceiling price. Before using the tables, the retailer must find his supplier's net ceiling price according to the instructions given below. Retailers should also pay particular attention to section 6 (Marking of gloves).

[Above paragraphs amended by Am. 2, effective 9–1–44]

(a) *Where retailer does not know the supplier's ceiling price.* If the retailer does not know the ceiling price of the manufacturer or wholesaler who supplies him, he may inquire of the supplier, who is required to disclose his ceiling price. Moreover, if the gloves to be priced are those specified in Appendix A, the retailer can find the ceiling prices for manufacturers in column (a) of the tables in Appendix A, and the ceiling prices for wholesalers in column (b) of these tables.

(b) *Where retailer's suppliers have different ceiling prices.* Some manufacturers have two ceiling prices for the same number—a Group I ceiling and a Group II ceiling. If the retailer pays the Group I ceiling price (or less), he takes that ceiling to figure his retail price; but if he pays the manufacturer a higher price, he takes the Group II ceiling. If, however, he buys gloves with the identical manufacturer's lot number or brand name at different prices, making one purchase at or below the Group I ceiling and another above, he must use the Group I ceiling to figure his retail price on all gloves of this lot number or brand name. Moreover, if he buys gloves with the identical manufacturer's lot number or brand name from a wholesaler and also from the manufacturer, he must use Table II in determining his retail ceiling price, and must take the manufacturers' ceiling, not the wholesalers' ceiling, to figure his retail ceiling for this number.

Example. Retailer B buys work gloves of lot No. 908, manufactured by the X Company for $1.55 per dozen, which is the manufacturer's ceiling. Later he gets more gloves of lot No. 908 from a wholesaler who charges him $1.85 per dozen, the wholesaler's ceiling. In figuring his retail ceiling for work gloves of this lot number, B takes $1.55 as his supplier's ceiling price. In Table II of Appendix B, he finds $0.17 per pair as his ceiling price for this lot number (not $0.21).

[Paragraph (b) amended by Am. 2, effective 9–1–44]

(c) *Where gloves are bought at a "special sale".* Sales which are neither sales by a manufacturer nor "regular sales" at wholesale are called "special sales". These include sales by retailers to retailers, sales by brokers, commission merchant, job-lot dealers or like persons and sales of other types. (The difference between "regular" and "special" sales is more fully explained in section 3.)

If the retailer has bought a glove at a "special sale", he does not figure his ceiling price by taking the price of his own supplier. Instead, he takes the ceiling price of the supplier of the person who made the "special sale". If a succession of special sales has been made, he takes the ceiling price of the supplier of the person who made the first of these special sales. Thus, the retail ceiling price of a pair of gloves is the same as if the retailer had bought directly from the original supplier, without any special sale intervening.

Example 1. C, a retail chain, buys one dozen 8 oz. canton flannel gloves from a manufacturer at $1.55, which is the manufacturer's ceiling. C sells them to D, another retail chain at $1.60 (which is equal to C's cost plus freight actually paid by him).

In figuring his retail ceiling D assumes his supplier's ceiling to be $1.55 (the ceiling of C's supplier) not $1.60 (the price D actually paid). Accordingly, from Table II in Appendix B, D finds a retail ceiling of $0.17 per pair.

Example 2. E, an independent retailer, buys one dozen 18 oz. double palm cotton flannel gloves from a wholesaler at $2.85 (the jobber's ceiling). He decides to liquidate and sells them to an auctioneer for $2.50 a dozen. The auctioneer resells them to F, another retailer, for $2.90 (this being the price paid by E, plus transportation charges incurred by the auctioneer).

In figuring his retail ceiling F takes $2.85 as his supplier's ceiling, so that his retail ceiling, found from Table I in Appendix B, is $0.32 (not $0.33).

[Examples 1 and 2 amended by Am. 2, effective 9–1–44]

(d) *Where a retail sale is made by manufacturer.* Where a sale at retail is made by a manufacturer, the retail ceiling is found from Table II in Appendix B. But since the manufacturer has no "supplier," he takes the Group I manufacturers' ceiling for these gloves (found in column (a) of the tables in Appendix A) and uses this as his "supplier's ceiling price."

[Paragraph (d) amended by Am. 2, effective 9–1–44]

SEC. 3. *How to find wholesale ceiling prices.* Under this regulation, there are two kinds of sales at wholesale. They are called "regular sales" and "special sales", and are explained in this section. Different methods of pricing are provided for these two kinds of sales.

(a) *Regular sales at wholesale—*(1) *What is a regular sale.* A "regular sale" is a sale by a wholesaler to a person who sells principally at retail or is an industrial user, and whose business is not under the same ownership and control as the seller's.

A "wholesaler" is a person or business organization to which all the following statements apply:

(i) It sells goods to retailers in general, and not primarily to a single retailer, or to a group of retailers which are under common ownership.

(ii) It buys and sells goods in "wholesale quantities", as understood in the trade, and sells through traveling salesmen or circulated catalogs.

(iii) It carries at all times at its principal place of business a representative stock of work gloves, and makes at least 50% of its work glove deliveries from stock (as opposed to drop shipments).

(iv) It is not under the same ownership or control as the person who fabricates the work gloves which it sells.

(v) It extends credit, and carries its own accounts. It may, of course, entrust or assign its delinquent accounts to others for collection.

(vi) It is not (*a*) a buying office or other agency representing retailers, (*b*) a stock-carrying affiliate of retailers, (*c*) a central office or warehouse for stores which are commonly owned or controlled, (*d*) a drop shipper, (*e*) a broker, (*f*) a commission-merchant, (*g*) a selling-agent, or (*h*) a job-lot dealer.

A person who wishes to qualify as a "wholesaler" but was not such a wholesaler in 1942, must, before making any sales at ceilings for regular sales at wholesale, send a statement by registered mail to the Office of Price Administration ("Men's Clothing Section"), Washington 25, D. C. The statement must give the "wholesaler's" name and address, and the date on which he commenced business as a wholesaler.

(2) *Ceiling prices for "regular sales".* For the work gloves specified in Appendix A, ceiling prices for regular sales at wholesale are those stated in column (b) of the tables in that Appendix.

For work gloves not specifically priced in Appendix A and which a wholesaler had in stock on the effective date of this regulation, the ceiling prices for regular sales at wholesale are those established under the prior applicable price regulation (either the General Maximum Price Regulation[3] or Maximum Price Regulation 210[4]).

In some cases, the Office of Price Administration may establish by individual order manufacturers' ceiling prices for work gloves not specifically priced in Appendix A. The individual order will also establish ceiling prices for regular sales at wholesale of these gloves and will require the manufacturer to notify the wholesaler of his maximum resale prices.

(b) *Special sales.* Sales at wholesale which are not "regular sales" as explained in paragraph (a) are "special sales". They include (but are not confined to) sales by wholesalers to wholesalers, sales by retailers to retailers, and all sales by brokers, commission merchants, job-lot dealers, and like persons.

(1) *Ceiling prices for special sales.* The ceiling prices for a "special sale" is the net price actually paid by the seller (not exceeding the ceiling price), plus any charges for transportation actually paid by him. Moreover, any person who buys at a special sale and resells at another special sale must figure his ceiling price by taking the price paid by the seller in the first special sale.

Example 1. G, a large retailer, buys a dozen 8 oz. canton flannel gloves from a manufacturer at $1.55 per dozen, the manufacturer's ceiling price, and pays $0.10 per dozen for freight. He now wants to resell them to H, a second retailer.

G's ceiling price for this sale is $1.65, his cost plus freight.

Example 2. L, a wholesaler, buys a dozen hot mill gloves from a manufacturer at $3.65 per dozen, the manufacturer's ceiling price. L now liquidates and resells the gloves to auctioneer M for $3.25 per dozen. Now M wants to resell the gloves to another wholesaler.

In figuring his price for this second special sale, M takes as his cost $3.65 (the price paid by L) and adds freight paid by him. If M pays $0.07 for freight, M's ceiling price is $3.72.

[Examples 1 and 2 amended by Am. 2, effective 9–1–44]

(2) *Disclosure in special sales.* In any special sale, the seller must mark the bill or invoice with the words "special sale", and must disclose any information required by the provisions of section 7 (a).

SEC. 4. *How to find manufacturers' ceiling prices—*(a) *Work gloves specified in Appendix A.* For the work gloves specified in Appendix A, ceiling prices for sales by manufacturers are those stated in column (a) of the tables in that Appendix. Column (a), however, states two manufacturers' ceiling prices for each glove specified—a Group I ceiling and a Group II ceiling. Some manufacturers must use the Group I ceiling only, some may use the Group II ceiling only, and some may use both, according to the rules stated in the following subparagraphs (1), (2), and (3).

(1) *How a manufacturer finds his "wholesale percentage".* (i) In order to find what proportion of his sales must be made at Group I prices, a manufacturer must find the percent of his 1941 deliveries which were made at wholesale prices. This is called the manufacturer's "wholesale percentage". A "wholesale price" means (*a*) any price at or below which a manufacturer, during

1941, normally supplied wholesalers, or any other large volume purchaser (e. g., chain stores and mail order houses) commonly known or regarded as "wholesale trade"; (b) any price at which industrial users or other purchasers (e. g., independent retailers) were supplied during 1941, if, during this period, the manufacturer's price to them was no higher than his price to "wholesale trade"; (c) any price during 1941 at which a manufacturer, who did not sell to "wholesale trade" during this period, normally supplied industrial users or other purchasers, if this price was no higher than the prices at which manufacturers supplying "wholesale trade" sold to such trade during 1941. In determining whether certain sales were made at "wholesale prices," allowance must be made for differences in gloves sold.

Example 1. During 1941, W, a work glove manufacturer, supplied only wholesalers, chain stores, and mail order houses. For the purposes of this regulation, all of the prices at which W sold these purchasers are "wholesale prices."

Example 2. During 1941, Y, a work glove manufacturer, supplied only wholesalers and industrial users. He sold the same gloves to both types of purchasers at the same prices. For the purposes of this regulation, all of the prices at which Y sold these purchasers are "wholesale prices."

Example 3. During 1941, Z, a work glove manufacturer, supplied only wholesalers and independent retailers. He sold the same gloves to independent retailers as he sold to wholesalers, but at higher prices. Only the prices at which Z sold to wholesalers are "wholesale prices."

Example 4. During 1941, V, a work glove manufacturer, supplied wholesalers and independent retailers. He sold a number to wholesalers at $4.75 a dozen. He also sold to independent retailers at $5.00 a dozen, a number which was similar except for an extra feature that was worth 25¢ a dozen. Both the $4.75 and the $5.00 sales would be considered sales at "wholesale prices."

(ii) A manufacturer will figure his "wholesale percentage" as follows:

(*a*) Find the number of dozens of staple work gloves covered by this regulation delivered to all purchasers in 1941.

(*b*) Find the number of these which were delivered at wholesale prices.

(*c*) Divide the number delivered at wholesale prices by the total of all deliveries (divide (*b*) by (*a*)). The resulting figure, expressed as a percent, is the manufacturer's "wholesale percentage".

Example 1. P, a work glove manufacturer, delivered 10,000 dozen staple work gloves in 1941. All these were delivered at prices generally charged to independent retailers, and none at "wholesale prices."

P's "wholesale percentage" is zero.

Example 2. R, a work glove manufacturer, delivered 100,000 dozen staple work gloves in 1941. All these deliveries were made to volume purchasers including jobbers, chain stores and industrial users and none were delivered at higher prices.

R's "wholesale percentage" is 100%.

Example 3. S, a work glove manufacturer, delivered 80,000 dozen staple work gloves in 1941. 20,000 of these were delivered to his volume trade at "wholesale prices", and 30,000 to independent retailers at higher prices.

S's "wholesale percentage" is 40% (20,000 divided by 50,000).

(2) *How a manufacturer uses his wholesale percentage.* Each manufacturer who delivered staple work gloves at "wholesale prices" in 1941 must, during the remainder of 1944 and each subsequent calendar year, make a certain quota of his deliveries of staple work gloves at Group I prices. This quota is that percentage of his total annual deliveries which is equal to his "wholesale percentage" (found under (1)). For example, if a manufacturer's "wholesale percentage" is 40%, and he delivers 300,000 dozen staple work gloves during the remainder of 1944, 120,000 dozen must be delivered at Group I prices. If, at the end of a year, a manufacturer fails to meet his quota, he has exceeded his ceiling prices to the extent of the deficiency, and will be liable to civil and criminal penalties accordingly. In calculating the annual quota of deliveries which must be made at Group I prices, follow these instructions:

(i) *What deliveries are counted in finding the quota.* In figuring the quota of deliveries which must be made at Group I prices in 1944, the manufacturer takes all deliveries made from May 16, 1944, to December 31, 1944, inclusive. In any subsequent year, all deliveries for the entire calendar year will be included.

Example 1. In 1941 the ABC Company sold 70% of its staple work gloves at "wholesale prices" and 30% at higher prices. Its "wholesale percentage" is 70%. From May 16, 1944, to December 31, 1944, its anticipated deliveries of work gloves are 250,000 dozen.

The ABC Company will determine its obligation as follows:

	Dozen
Anticipated deliveries	250,000
Quota to be delivered at Group I prices (70% of 250,000)	175,000
Remainder which may be sold at Group II prices	75,000

For convenience in meeting the quota of deliveries which must be made at Group I prices, it is suggested that a manufacturer keep a current record of deliveries at Group I and Group II prices made after May 16, 1944, in this form:

Date	Number of dozens delivered at Group I prices	Number of dozens delivered at Group II prices	Total number of dozens delivered

At periodic intervals (e. g., at the end of each month), the manufacturer should total deliveries at Group I prices and all deliveries. He should then divide the former total by the latter. If the proportion of deliveries at Group I prices is below his wholesale percentage, it would be advisable for him to ship only at his Group I ceilings until the proportion of deliveries at Group I prices equals the wholesale percentage. This procedure should be repeated for subsequent periods, until the end of the year.

Example 2. In 1941 the X Company sold all of its staple work gloves at "wholesale prices". Its "wholesale percentage" is thus 100%. In 1944, all of its deliveries must be made at Group I prices.

Example 3. In 1941 the Z Company sold none of its staple work gloves at "wholesale prices". Its "wholesale percentage" is thus zero. In 1944, all of its deliveries may be made at Group II prices.

(ii) *Sales to particular purchasers not required.* A manufacturer who may make deliveries at Group II prices may make these deliveries to any class of purchaser. Likewise, a manufacturer may make deliveries at Group I prices to any class of purchaser. Moreover, a manufacturer who delivers the required proportion of his work gloves at Group I prices may deliver as many more at Group I prices as he wishes.

(iii) *Calculating and filing the "wholesale percentage."* Every manufacturer of staple work gloves must keep available for inspection by the Office of Price Administration the records and the tabulation or work sheets which he used in figuring his "wholesale percentage". He is also required to file a statement of his wholesale percentage, as provided in section 8 (c) (2).

(3) *Inability to calculate a wholesale percentage.* Any manufacturer who sells staple work gloves but did not do so in 1941, or who, because of other reasons, is unable to determine a wholesale percentage, must apply to the Office of Price Administration (Men's Clothing Section), Washington 25, D. C., for the authorization of a "wholesale percentage."

This application must set forth: (i) the manufacturer's name and address; (ii) the date when he commenced business; and (iii) the total number of dozens of staple work gloves delivered to each class of purchaser during the first 12 months of business, or, if the manufacturer does not have one year's experience, during such other portion of time as he has been in business. Until this authorization is granted the manufacturer must make all deliveries at or below Group I ceiling prices.

[Subparagraph (3) amended by Am. 2, effective 9-1-44]

(b) *Other work gloves covered by this regulation.* For work gloves covered by this regulation but not specified in Appendix A, a manufacturer's ceiling prices are those authorized by the Office of Price Administration, on application by the manufacturer.

An application for the fixing of a ceiling price must be filed with the Office of Price Administration (Men's Clothing Section) Washington 25, D. C. The application must contain information in the detail indicated by the suggested form in Appendix C, and must be accompanied by a sample of the glove.

Pending action on such an application a person must not sell or deliver the glove except in accordance with the provisions of section 10 (b) (Adjustable pricing agreements).

SEC. 5. *When taxes may be added.* When a tax on a particular sale or delivery is imposed by a statute or ordinance which permits stating the tax separately from the price, the tax may be separately charged or collected in addition to the ceiling price. This applies only to sales taxes, gross receipt or gross proceeds taxes, and compensating use taxes, and does not apply to any tax imposed on a prior sale or delivery.

SEC. 6. *Marking of gloves*—(a) *Marking required at retail.* Every person is forbidden to sell or offer to sell at retail or display in a retail store any pair of staple work gloves which is not marked as required by this section. If any part of the required marking has not been performed by the manufacturer, it must be supplied by the retailer.

(1) On and after June 21, 1944, the marking must show the retail ceiling price.

(2) On and after September 15, 1944, the marking must show, in addition to the retail ceiling price, the manufacturer's lot number or brand name for the glove and a statement of defects (if any).

(b) *Marking and information required of manufacturers.* Every manufacturer is forbidden to deliver any pair of work gloves which is put into the process of manufacture on or after August 6, 1944, unless it contains markings showing the manufacturer's lot number or brand name for the glove, and a statement of defects (if any). Moreover, each manufacturer must supply each retail purchaser with a list of retail ceiling prices for staple work gloves supplied him. If the gloves are distributed through wholesalers, the manufacturer must supply the wholesaler who in turn must supply each retailer. This list must be forwarded by the manufacturer or wholesaler not later than the first invoicing or billing of any pair of staple work gloves covered by this regulation, or before June 6, 1944 (whichever is later). The manufacturer or wholesaler must keep this list up to date thereafter by sending supplemental lists to each retailer at the time of shipment of any new numbers subsequently sold. The list must be in substantially the following form:

[Paragraphs (a) and (b) amended by Am. 1, 9 F.R. 6239, effective 6-6-44]

RETAIL CEILING PRICE LIST

AS REQUIRED BY THE OFFICE OF PRICE ADMINISTRATION

(Retail ceiling prices for ABC Company staple work gloves [1]—for work gloves bought from manufacturers at Group I prices [2])

Mfrs' lot No. or brand name	Description of glove	Appendix A, RMPR 506, No.[3] (if any)	Retail price per pair

XYZ brand	Gunn pattern, men's split palm, ¾ leather thumb, leather pull, leather knuckle strap, 8 oz. canton flannel back, waterproof safety cuff.	Table 12, 14B	.65

NOTICE: Each pair of gloves must be marked with the ceiling price. A pair of gloves must not be sold above the ceiling price, but may be sold for less. This list must be promptly displayed to any person on request during regular business hours.

[1] The gloves may be identified by trade-mark, or by manufacturer's or distributor's name.

[2] In appropriate cases, the list would be entitled "for work gloves bought from wholesalers" or "for work gloves bought from manufacturers at Group II prices".

[3] The number of the table, and the place in the table where the glove is described in Appendix A of RMPR 506. If the glove is not specified in Appendix A, write "none".

(c) *Elements of marking.* The elements required to be marked are explained in this paragraph.

(1) *Lot number or brand name.* The lot number or brand name must be different for each pair of gloves having a different manufacturer's ceiling price.

(2) *Ceiling price.* This must be the correct ceiling price for the circumstances in which the pair of gloves is offered for sale at retail.

(3) *Defects, if any.* If the pair of gloves is a "second" or imperfect, it must be so marked.

(d) *Manner of marking.* The required markings must be attached to at least one glove of each pair. The required marking must be attached by stitching, adhesive, pins or staples, or stamped on the glove itself, except where some other method is authorized. The required markings may be in one or more parts, and may be accompanied by other information, but all portions must be clearly visible to the purchaser.

EXAMPLE OF MARKING

LOT NO. 903
RETAIL CEILING 17¢

(e) *Exceptions to marking requirements.* (1) Industrial users need not attach the markings required by this section to any gloves which they sell to their employees at or below the net prices actually paid by the industrial user plus any charges for transportation actually paid by him. On all other sales by industrial users to their employees the industrial user is required to mark only the retail ceiling price.

(2) On sales and deliveries by manufacturers to industrial users it is not necessary to attach the required markings to each pair of gloves. In such cases, the seller may place the required markings on the package, wrapper or other container in which the gloves are packed.

[Paragraph (c) added by Am. 1, 9 F.R. 6239, effective 6-6-44]

(3) In the case of sales at retail which are based on orders received by mail pursuant to a mail order catalog, the retail seller need not mark each pair of gloves, as required by section 6 (a), if he forwards with the gloves a sales memorandum stating the retail purchase price (not exceeding the ceiling price), and the identity of the gloves.

[Subparagraph (3) added by Am. 2, effective 9-1-44]

SEC. 7. *Disclosure*—(a) *Description of gloves.* Any person who has sold for resale any staple work gloves may be required to supply any subsequent buyer with any information needed by him for the marking and pricing of these gloves. This information must be furnished in writing promptly upon receipt of a written request from the buyer. Unless he has reason to believe it is erroneous, the buyer may rely on the information so furnished. If the buyer does have reason to believe the information is erroneous, he may nevertheless act on it, providing he immediately sends to a district or state office of the Office of Price Administration a statement of the circumstances and a request for a determination of the facts.

(b) *Sales slips and receipts.* Any seller who has customarily given a purchaser a sales slip, receipt or similar evidence of purchase must continue to do so. Upon request from a purchaser any seller, regardless of previous custom, must give the purchaser a receipt showing the date, the name and address of the seller, the type of gloves sold, and the price received for it.

(c) *Retail ceiling price list.* Any retailer who has received from his supplier a "retail ceiling price list" must display it promptly to any person who requests to see it during regular business hours. If the retailer sells through more than one department or selling establishment, a copy of the list must be made available in each separate unit where staple work gloves are sold.

(d) *Invoices.* Every manufacturer selling staple work gloves and every person selling these gloves at wholesale, must give the purchaser an invoice showing: (1) the name and address of the purchaser; (2) the manufacturer's lot number or brand name for each different pair of gloves sold; (3) a description of each pair of gloves bearing a different lot number or brand name, similar to the description in Appendix A, or some identifying reference to the description set forth in the "retail ceiling price list" (described in section 6 (b)) previously supplied the same purchaser for the same lot number or brand name; (4) the quantity sold and the selling price of each different lot number or brand name; and (5) the terms of sale (e. g., 2/20 net 40, freight prepaid to city of destination).

[Item (3) amended by Am. 1, 9 F.R. 6239, effective 6-6-44]

SEC. 8. *Records and reports*—(a) *Records to be kept by retailers.* Every person who sells staple work gloves governed by this regulation at retail must keep the following records, and make them available on request, to the Office of Price Administration.

(1) Invoices and other documents received by the seller showing costs, descriptions and sources of work gloves sold by him.

(2) Such records as he has customarily kept showing prices charged by him for work gloves sold at retail.

(b) *Records to be kept and filed by persons selling at wholesale.* Every person who sells work gloves covered by this regulation at wholesale must keep the following records, and make them available on request to the Office of Price Administration:

(1) Invoices and other documents received by the seller showing costs, descriptions and sources of work gloves sold by him.

(2) Copies of invoices and other documents showing prices and identification by name, trademark, lot number, etc., of work gloves sold by him at wholesale.

Moreover, every person who wishes to qualify as a "wholesaler" under section 3 (a) (1), but was not such a wholesaler in 1942, must file the statement therein described before making any sales at ceilings for regular sales at wholesale.[6]

(c) *Records to be prepared, kept, and filed by manufacturers*—(1) *Price list.* Every manufacturer of staple work gloves must prepare a list of all staple work glove items which he delivers on or after May 16, 1944. This list must show the lot number of each such work glove, and, following each lot number, a description of the glove and the manufacturer's ceiling price. If the lot number is sold at Group I prices, the list must show whether it is sold to retailers or to wholesalers or to both. The description, like the descriptions in Appendix A, should specify cut or pattern, weight, and kind of materials used, thickness of glove, type of wrist, additional features (if any), and size classification. This record must be prepared on or before June 6, 1944, and must be kept up to date thereafter by adding any new numbers or any changes in the description of old numbers. This list must be kept and made available on request to the Office of Price Administration, but need not be filed.

(2) *Records and statement of wholesale percentage.* Every manufacturer of staple work gloves must keep the records and work sheets from which he found his "wholesale percentage" as provided in section 4 (a) (1). These records must include a list showing: (i) each lot number of staple work gloves covered by this regulation delivered during 1941; (ii) a description of each such number, in detail similar to descriptions in Appendix A; (iii) each class of purchaser (e. g., jobbers, chain stores, mail order houses, industrial users, independent retailers) to which each number was delivered; (iv) the quantity (in dozens) delivered to each class of purchaser, and (v) the prices at which delivery was made to each class of purchaser. The records required by this subparagraph must be prepared on or before June 6, 1944, and thereafter must be kept and made available on request to the Office of Price Administration. Further, the manufacturer must file with the Office of Price Administration (Men's Clothing Section) Washington 25, D. C., on or before June 6, 1944, a statement showing the total number of dozens of staple work gloves delivered by him in 1941, and the number delivered at wholesale prices.

SEC. 9. *Excessive prices forbidden.* On and after the effective date of this regulation, the following practices are forbidden regardless of any contract or other obligation:

(a) *Charging more than ceiling price.* Every person is forbidden to sell or deliver any staple work gloves at a price higher than the ceiling price set by this regulation. A lower price may, of course, be charged.

(b) *Buying for more than the ceiling price.* Every person is forbidden to buy or receive any staple work gloves, in the course of trade or business, at a price higher than the price set by this regulation.

(c) *Combination sales.* Every person is forbidden to require any purchaser to buy or agree to buy any other article, service, package or wrapper, in connection with the sale or delivery of any staple work gloves. But any seller may refuse to sell less than a minimum quantity of any one style number, if this minimum has been customary for the seller.

(d) *Indirect price increases.* Every person is forbidden to do any other act which directly or indirectly increases above the ceiling price the consideration paid by the purchaser for any staple work gloves. Any practice which is a device to secure the effect of a higher than ceiling price is as much a violation as outright raising of the ceiling price. This applies to devices making use of commissions, services, transportation charges, premiums, taxes, special provisions, tying agreements, trade understandings and all similar practices.

(e) *Indirect violations.* Every person is forbidden to offer, attempt or agree to do any of the acts forbidden by this section.

(f) *Stating prices above the ceiling price.* Every person is forbidden to state a gross price above the ceiling price, except where the seller customarily allows a percentage discount on all sales to one or more classes of customers. To customers of these classes, a seller may state a price which gives the net ceiling price after deducting the percentage discount. Wherever such a gross price is stated, the seller must also state expressly the discount allowed, the net ceiling price and the retail ceiling price. The amount actually collected or paid must never exceed the net ceiling price.

Example. X, a wholesaler, customarily grants terms of 2% 10 days to all its customers. In selling gloves with a ceiling of $1.85 per dozen, it may prepare the invoice as follows:

Terms: 2% 10 days

Lot No.	Quantity	Description	Price	Amount
902	Doz. 50	Men's 8 oz. single thickness canton flannel gloves, knit wrist, $1.85 per dozen. Retail ceiling price 21¢ per pair.	$1.887	$94.35

[Example amended by Am. 1, 9 F.R. 6899, effective 6-6-44 and Am. 2, effective 9-1-44]

SEC. 10. *Adjustable pricing agreements.* Adjustable pricing agreements may be entered into notwithstanding the provisions of section 9, to the extent permitted by this section.[6]

(a) *When regulation fixes a ceiling price.* In cases where this regulation fixes a ceiling price, a person may sell at that ceiling price, subject to an agreement with the buyer to charge a higher price if it becomes the legal ceiling price by the time of delivery. But one must never charge a price which is higher than the maximum price in effect at the time of delivery. Moreover, unless specifically authorized by the Office of Price Administration, a person must not deliver or agree to deliver at a price which is to be adjusted upward in accordance with action by the Office of Price Administration after delivery.

(b) *Where regulation does not fix a ceiling price.* In cases where a ceiling price is not fixed by the regulation, a person must not make any contract or sale unless the price is expressly subject to adjustment in accordance with any action which may be taken by the Office of Price Administration. Moreover, unless specifically authorized by the Office of Price Administration, a person must not make any delivery until a ceiling price has been fixed by the Office of Price Administration.

(c) *When specific authorization will be given.* Specific authorization to deliver or agree to deliver at a price which is to be adjusted in accordance with action by the Office of Price Administration after delivery will be given only where:

(1) A request for the fixing or changing of a ceiling price has been filed; and

(2) The authorization is necessary to promote distribution or production; and

(3) It will not interfere with the purposes of the Emergency Price Control Act of 1942, as amended.

This authorization may be given by the Administrator or by any other official of the Office of Price Administration to whom the power to grant such authorization has been delegated, and may be given by order, letter or telegram.

SEC. 11. *Licensing and enforcement*—(a) *Licensing.* The provisions of Licensing Order No. 1,[6] licensing all persons who make sales under price control, are applicable to all sellers subject to this regulation. A seller's license may be suspended for violations of the license or this regulation. A person whose license is suspended may not, during the period of suspension, make any sale for which his license has been suspended.

(b) *Penalties.* Any person who violates any provisions of this regulation is subject to the criminal penalties, civil enforcement actions, suits for treble damages, and proceedings for suspension of licenses provided by the Emergency Price Control Act of 1942, as amended.

SEC. 12. *Relation to other regulations*—(a) *Regulations superseded.* The coverage of this regulation is stated in section 1. Where this regulation applies, it supersedes (except as indicated in section 3 (a) (2), the provisions of the following regulations:

(1) General Maximum Price Regulation.

(2) Section 3.5 of Revised Supplementary Regulation No. 14 (formerly § 1499.73 (a) (37) of Amendment 49 to Supplementary Regulation 14).

(3) Maximum Price Regulation 210 (Retail and Wholesale Prices for Fall and Winter Seasonal Commodities).

(b) *Contractors' services.* This regulation does not apply to charges for contractors' services, which are governed by Maximum Price Regulation 172[6] (Charges of Contractors in the Apparel Industry).

"Contractor" is defined in § 1389.52 of that regulation.

(c) *War procurement agencies.* This regulation does not apply to sales of work gloves made according to military specifications, when the sales are made to any war procurement agency as defined in Maximum Price Regulation 157[6] (Sales and Fabrication of Textiles, Apparel and Related Articles for Military Purposes).

(d) *Export sales.* This regulation does not apply to export sales of work gloves. Such sales are covered by the Second Revised Maximum Export Price Regulation.[7]

(e) *Import sales.* The provisions of this regulation do not apply to deliveries made from points outside the 48 states and the District of Columbia. Such sales and deliveries are governed by the provisions of the Maximum Import Price Regulation.[8] This regulation does, however, apply to domestic sales when the articles sold were originally imported.

SEC. 13. *How this regulation may be amended.* (a) Any person who seeks a modification of any provision of this regulation may file a petition for amendment of general applicability in accordance with Revised Procedural Regulation No. 1[9] issued by the Office of Price Administration.

(b) Pending an amendment, a person must not sell or deliver work gloves at prices other than those fixed in the regulation except in accordance with the provisions of section 10 (Adjustable pricing agreements).

APPENDIX A—TABLES OF CEILING PRICES FOR SALES BY MANUFACTURERS AND SALES AT WHOLESALE

(a) *Instructions for manufacturers.* 1. In using the following tables, bear in mind the rules for pricing by manufacturers which are stated in section 4 (How to find manufacturers' ceiling prices).

2. Prices are stated in column (a), per dozen pair of gloves. On shipments weighing 100 pounds, or more, the seller must prepay or allow transportation costs to the city of destination. However, where such shipments are made at transportation rates higher than freight rates, the seller is required to allow or prepay only that portion of the transportation cost which is equal to the freight cost on such shipments. On less than 100 pound shipments, the seller need not allow or prepay any transportation costs.

3. All prices are net 40 days, less 2% in 20 days. If the seller wishes, he may extend more favorable terms. But no seller may change these terms if the change would result under any circumstances in a higher net price.

(b) *Instructions for wholesalers.* 1. In using the following tables, bear in mind the rules for wholesale pricing in section 3 (How to find wholesale ceiling prices). Notice especially that these prices apply only to "regular sales", not to "special sales".

2. Prices are stated in column (b), per dozen pair of gloves, f. o. b. seller's place of business.

3. Terms for sales at wholesale are net 30 days. If the seller wishes, he may extend more favorable terms. But no seller may change these terms if the change would result under any circumstances in a higher net price.

NOTE.—The ceiling prices listed for manufacturers and wholesalers in the tables below apply to first quality gloves. The ceiling for a pair of work glove "seconds" is determined by dividing the appropriate dozen ceiling price in the tables for the same gloves of first quality by 12, and then multiplying the quotient by 75%.

APPENDIX B—TABLES OF CEILING PRICES FOR SALES AT RETAIL.

Instructions. Ceiling prices for staple work gloves are not given by kind of glove but by the supplier's net ceiling price. This price must be found according to the rules in section 2 (How to find retail ceiling prices). Read this section before using the tables.

Two tables of retail ceiling prices are provided. You must use Table I to find the retail ceiling price for gloves purchased from a wholesaler. Table II must be used to find the retail ceiling price for gloves purchased direct from the manufacturer.

When you have found your supplier's net ceiling price, look in Column 1 of the appropriate table for the bracket in which this price belongs. Then look at the figure opposite in Column 2; this is your retail ceiling price per pair of gloves.

For example, suppose your supplier's net ceiling price is $1.55, and that you purchased the gloves from the manufacturer. Your ceiling price will be found in Table II. Follow down Column 1 in Table II until you find the bracket $1.49–1.57+. Opposite these figures, in Column 2, you find the retail ceiling of $.17. If your supplier's ceiling had been $1.57½, your price would still be $.17, since $1.57+ includes any fraction of a cent over $1.57.

However, if you purchase gloves at a "special sale", you are not permitted to use these tables, but you must find your ceiling according to the rule given in section 2 (c).

Any boneless beef for canned meat which has been rejected by a war procurement agency or any of its authorized agents or representatives shall not be sold as boneless beef for Army canned meat.

3. Paragraph (r) is added to § 1364.452 to read as follows:

C. on OPA Form No. 635-1088, (see § 1364.532, Appendix G for a copy which may be reproduced by you) for a maximum selling price setting forth in such application (1) a description of the product including (i) the wholesale cut and grade of meat used, (ii) a description of the complete processing operation, (iii) the type of wrapping and packaging and (iv) the weight of the individual packages; (2) a break-down of the costs involved in the preparation of the product including (i) ingredient costs (separately itemized), (ii) costs of packaging materials, (iii) direct labor costs, (iv) indirect labor costs, (v) administrative costs, (vi) selling costs and (vii) other costs (itemized). The application shall also indicate the approximate time necessary to dispose of the inventory stocks.

Upon receipt of an application filed pursuant to this paragraph (r), the Price Administrator may authorize a maximum selling price for the specialty steak product subject to such conditions as he deems necessary and proper in the interest of effective price control.

The Price Administrator may at any time adjust any maximum price established under this paragraph (r) so as to bring it in line with the level of maximum prices otherwise established by this regulation.

PART 1389—APPAREL

[MPR 547,[1] Amdt. 1]

MAXIMUM PRICES FOR SPECIFIED LOW PRICE-LINE GARMENTS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

Maximum Price Regulation 547 is amended in the following respects:

1. Section 1 is amended by inserting after the phrase "issued June 20, 1944," the following phrase: "and Maternity Dresses and Slips Program No. 1, issued July 11, 1944."

2. The text of paragraph (a) of section 2 is amended by designating it as subparagraph (1) and by adding thereto, after the examples which follow items 1 through 4, a new subparagraph (2) to read as follows:

Item	Sales by manufacturers (per dozen)	Sales other than by manufacturers and other than at retail (per dozen)	Sales at retail (per garment)	
			Garments purchased from persons other than manufacturers	Garments purchased from manufacturers
5. Maternity dresses (sizes 12-20)	$15.75 less 8%	$16.75 net	$2.00	$1.80
6. Maternity slips (sizes 32-44)	$8.95 less 8%	$9.50 net	1.15	1.05

For all items, the time limit for payment will be the seller's customary business practice to purchasers of the same class. Sales other than at retail are f. o. b. point of shipment.

Examples: 1. A retailer purchases maternity slips from a manufacturer at $8.95 per dozen less 8%. His ceiling price for a sale at retail is $1.05 each.

2. A retailer purchases maternity slips from a wholesaler at $9.50 net per dozen. His ceiling price for a sale at retail is $1.15 each.

3. A wholesaler purchases maternity slips from a manufacturer at $8.95 less 8%. The wholesaler's ceiling price for a sale to a retailer is $9.50 per dozen net.

4. A wholesaler purchases maternity dresses from another wholesaler at $16.75 net. He now wishes to sell to a retailer. His ceiling price is $16.75 net, the same as his cost.

5. A manufacturer's ceiling price for a sale of maternity dresses to a retailer or a wholesaler is $15.75 per dozen less 8%.

3. Section 9 (a) (2) is amended by inserting after the phrase "June 20, 1944," the phrase "and July 11, 1944."

This amendment shall become effective September 7, 1944.

Issued this 2d day of September 1944.

PART 1407—RATIONING OF FOOD AND FOOD PRODUCTS

[Rev. RO 16,[1] Amdt. 21]

MEAT, FATS, FISH AND CHEESES

A rationale for this amendment has been issued simultaneously herewith and has been filed with the Division of the Federal Register.*

Section 7.6 (1) is added to read as follows:

(1) *Allotments for industrial users of pork having a point value.* An industrial user who, during the third quarter of his base period, used pork which on August 13, 1944 has a point value (other than zero) may apply for an allotment covering such pork. The application shall be made before September 11, 1944 on OPA Form R-315, to the board or district office with which he is registered, and must estimate the number of pounds of such pork, separately for each item (as listed in section A of the Official Table of Trade Point Values—No. 17-18) which he used during the third quarter of his base period. The board or district office may grant the application if it finds that the industrial user, during the third quarter of his base period, used pork which has a point value other than zero on August 13, 1944. The amount of his allotment shall be computed in the following way:

(1) The number of pounds of each such item of pork which he used during the third quarter of his base period is multiplied by the point value in effect for that item on August 13, 1944 as shown on the Official Table of Trade Point Values (No. 17-18);

(2) The resulting figures are added together and multiplied by 0.35.

The result represents his allotment for the third allotment period of 1944 for pork having a point value on August 13, 1944. (Section 7.6 (d) applies in determining whether an industrial user who receives an allotment under this paragraph is entitled to a certificate, and in determining the amount of the certificate.) If the application is made on or after September 11, 1944, the allotment shall be reduced five percent for each day which has elapsed since September 10, 1944.

This amendment shall become effective September 7, 1944.

NOTE: All reporting and record-keeping requirements of this amendment have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

PART 1377—WOODEN CONTAINERS

[RMPR 186,[1] Amdt. 10]

WESTERN WOODEN AGRICULTURAL CONTAINERS

A statement of the considerations involved in the issuance of this amendment, issued simultaneously herewith, has been filed with the Division of the Federal Register.*

The text of § 1377.110 (d) is amended to read as follows:

(d) *Additions for use of specified grades of lumber.* On sales to customers who certify in writing that they will not use the increase in prices of containers as a basis for requesting an increase in the prices of commodities which they pack, a manufacturer who uses the grade and species of lumber shown in Table 3A, below, in the manufacture of agricultural containers, may make additions shown in the table to the maximum f. o. b. factory prices established by the regulation. The footages of any grade on which these specified additions may be made shall not exceed in any one quarter the percentage of the total footage of the manufacturer's agricultural container shook production in which the same grade was used in the corresponding quarter during the year August 1, 1943–August 1, 1944.

Any manufacturer who did not use the grades and species shown in Table 3A in the manufacture of agricultural containers in a corresponding period of August 1, 1943–August 1, 1944, may apply to this Office for permission to make additions under this section. The footages for which authorization to make the additions will be granted will be based upon the applicant's estimated total quarterly production and the average percentages of higher grades used by competitive manufacturers in the area.

On or before the 10th day of November, February, May and August, each manufacturer who has made additions under this section must submit to the Lumber Branch, Office of Price Administration, Washington, D. PART 1439—UNPROCESSED AGRICULTURAL COMMODITIES

[MPR 426,[1] Amdt. 55]

FRESH FRUITS AND VEGETABLES FOR TABLE USE, SALES EXCEPT AT RETAIL

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.[*]

Maximum Price Regulation No. 426 is amended in the following respects:

1. The first three paragraphs of the preamble to Maximum Price Regulation No. 426 are revoked.

2. In section 1 (e), the last two sentences are revoked.

3. In section 1 (f) (1) the sentence, "The ceiling price for carlot or trucklot sales at a particular wholesale receiving point is the same regardless of the number and type of prior handlers, regardless of the seller's size or type of operations, and regardless of the purchaser's size or type of operations.", and the last undesignated paragraph are revoked.

4. Section 1 (f) (2) is amended to read as follows:

(2) *Less than carlot or trucklot sales in the market.* A ceiling price is established for less than carlot or trucklot sales at wholesale receiving points.

5. Section 1 (f) (4) is revoked.

6. Section 2 is amended to read as follows:

SEC. 2. *Sales of imported fresh fruits and vegetables.* Unless otherwise specifically provided, the maximum price per unit at any wholesale receiving point for each unit of a particular kind of fresh fruit or vegetable (standard container, other container or pound) imported from any country, possession or territory, shall be the maximum price per unit for sales delivered to that wholesale receiving point for the most closely similar variety of the same kind of domestic fresh fruit or vegetable applicable to the particular seller.

In determining the maximum price applicable, an importer (the person who makes the first sale of the particular goods being priced in the United States) shall price as if he were a grower or country shipper with respect to commodities covered by Appendices H and I, a grower-distributor with respect to commodities covered by Appendix J, and a shipping point distributor with respect to commodities covered by Appendix K.

7. Section 8 (a) (7) is amended to read as follows:

(7) "Freight from basing point to wholesale receiving point" or "freight from shipping point to wholesale receiving point" means the cost per package for transportation by the cheapest customary and generally available means. It does not include the cost of refrigeration, other protective services, diversions, demurrage, local cartage or unloading; but the transportation tax imposed by section 620 of the Revenue Act of 1942 is included.

To wholesale receiving points in principal markets where carlot or trucklot quantities are customarily received, this freight factor will ordinarily be based on the railroad carload rate from the basing point or f. o. b. shipping point. However, to some wholesale receiving points in principal markets, located relatively near the basing point or shipping point, motor or water transportation may be customary and cheaper than rail transportation and generally available. In these cases the freight factor for motor or water transportation would be applicable.

To wholesale receiving points in secondary markets, where it is not customary to receive carlots or truckIots, the freight factor will ordinarily be based on the carlot or truckIot factor to a nearby wholesale receiving point in a principal market, plus the cost of transportation by the cheapest customary and generally available means from the wholesale receiving point in the principal market to the wholesale receiving point in the secondary market.

For example, it is customary for carlots of lettuce to be received at Philadelphia, Pa., and the cheapest customary and generally available means of transportation from the basing points (El Centro and Salinas, Cal.) is by rail. The freight factor for determining lettuce prices at Philadelphia is therefore based on the railroad carload rate. On the other hand, it is not customary for carlots of lettuce to be received at Atlantic City, New Jersey. Intermediate sellers in Atlantic City customarily purchase lettuce in less-than-carlot quantities from carlot receivers in Philadelphia and transport it to Atlantic City by truck or rail. The freight factor to be used in determining prices at Atlantic City, therefore, would be the Philadelphia freight factor, as determined above, plus the cost at the customary truck rate or rail rate (whichever is the cheapest customary and generally available method from Philadelphia to Atlantic City).

However, in the event a carlot or truckIot is sold by a country shipper on a delivered basis direct to a wholesale receiving point in a secondary market the seller's maximum price shall be figured direct to that wholesale receiving point. In the example above, a carlot or truckIot of lettuce sold directly to a wholesaler at Atlantic City would be priced on the basis of the railroad carload rate from the basing point to Atlantic City.

Regional Directors of the Office of Price Administration, and such district officers as they in turn may authorize, shall determine the cheapest method of transportation which is customary and generally available from the basing point or shipping point to each wholesale receiving point within their jurisdiction, and shall figure the freight to be used in determining maximum prices at each wholesale receiving point in markets within their jurisdiction.

8. Appendix H in section 15 is amended in the following respects:

a. The first sentence of paragraph (a) is amended to read as follows:

This appendix establishes maximum prices for certain sales of spinach, snap beans (green and wax), carrots, green peas, eggplant, sweet peppers, cucumbers, cabbage, lettuce, sweet potatoes, black raspberries, red raspberries, dewberries, watermelons, cantaloupes and other melons, red sour cherries, and such other fresh fruits and vegetables as may later be added.

b. The phrase "for California-Arizona carrots," in footnote 1 to Table 1 is deleted.

c. Footnote 1 to Table 9 in paragraph (b) is deleted.

d. Column 4 of Table 14 in paragraph (b) is amended to read as follows:

Col. 4

e. The heading of the table in paragraph (c) is amended to read as follows:

TABLE OF MAXIMUM MARKUPS TO BE ADDED TO THE APPLIANCE MAXIMUM PRICE F. O. B. SHIPPING POINT OR THE MAXIMUM DELIVERED PRICE, AS THE CASE MAY BE

[See columns 5 and 6 of tables in paragraph (b)]

f. Subparagraph (1) is added to paragraph (b) to read as follows:

(1) For sales of listed commodities covered by this appendix made f. o. b. shipping point by growers or country shippers, if the seller furnishes precooling, initial icing or refrigeration services in any case, he may charge, in addition to the named f. o. b. shipping point price (see Column 5 of the applicable table in paragraph (b)), for the services furnished not in excess of the lowest of the following: (i) The lowest available common or contract carrier rates for the same services, (2) the amount the seller may charge for such services under Maximum Price Regulation No. 165, or (3) the applicable amount permitted for protective services in the case of sales delivered to any wholesale receiving point. However, in each case the grower or country shipper shall show separately on his invoice the specific nature of the services furnished and the amount charged for the services.

For sales of listed commodities on a delivered basis, the maximum prices named include protective service allowances which cover any precooling, initial icing, refrigeration, or other services.

g. In paragraph (d) (1), the phrase "for precooling, initial icing or refrigeration services in sales f. o. b. shipping point;" is inserted after the phrase "for sales through agents;" in the first sentence following the headnote of subparagraph (1).

h. Paragraphs (d) (2) (i), (e) (3) and (e) (4) are amended by deleting the phrases "the listed commodity", "the listed commodity being priced" and "a listed commodity" wherever they appear and substituting therefor in each case the words "the particular goods being priced".

d. Paragraph (g) is amended by deleting the first sentence immediately following the headnote.

e. Paragraph (j) is added to read as follows:

(j) *Fractions of a cent*—(1) *Standard containers.* Any maximum price, figured for citrus fruit in a standard container, which contains a fraction of a cent shall be reduced to the nearest lower cent if the fraction is less than one-half cent and increased to the nearest higher cent if the fraction is one-half cent or more.

(2) *Non-standard containers and in bulk.* Any maximum price, figured for citrus fruit on a pound basis, shall be carried to the second decimal place of a cent (hundredths of a cent). Any final calculation of a total maximum price applicable to an individual sale which contains a fraction of a cent shall be reduced to the nearest lower cent if the fraction is less than one-half cent and increased to the nearest higher cent if the fraction is one-half cent or more.

Each of the carriers forthwith shall file a copy of this order with the appropriate regulatory body or bodies having jurisdiction over any operations affected by this order, and likewise shall file, and publish in accordance with law, and continue in effect until further order, tariffs or supplements to filed tariffs, setting forth any changes in rates, charges, operations, rules, regulations, and practices of the carrier which may be necessary to accord with the provisions of this order and of such plan; and forthwith shall apply to such regulatory body or bodies for special permission for such tariffs or supplements to become effective on the shortest notice lawfully permissible, but not prior to the effective date of this order.

3. In the event that compliance with any term of this order, or effectuation of any provision of such plan, would conflict with, or would not be authorized under, the existing interstate or intrastate operating authority of any carrier subject hereto, such carrier forthwith shall apply to the appropriate regulatory body or bodies for the granting of such operating authority as may be requisite to compliance with the terms of this order, and shall prosecute such application with all possible diligence. Upon a transfer of any operation involved in this order, the successor in interest and the other carriers named in this order forthwith shall notify, in writing, the Office of Defense Transportation of the transfer and, unless and until otherwise ordered, the successor in interest shall perform the functions of his predecessor in accordance with the provisions of this order.

8. The plan for joint action hereby approved and all contractual arrangements made by the carriers to effectuate the plan shall not continue in operation beyond the effective period of this order.

[MPR 491, Order 1]

FOREST PRODUCTS

ADJUSTMENT OF MAXIMUM PRICES

Order No. 1 under Maximum Price Regulation No. 491. Pressure preservative treatment of forest products and pressure treated forest products. Order authorizing adjustable pricing in sales on specified-length orders.

A petition has been filed by a treating company selling poles and piling subject to MPR 491, seeking amendment of the regulation to restore, in whole or in part, the former allowance of an addition to the maximum price for selection of specified lengths where the material is so ordered by the buyer. Specified-length additions were authorized in the original regulation, but such authority was withdrawn in Amendment 1 to the regulation, effective July 24, 1944.

A meeting with the Industry Advisory Committee was held on August 22, 1944, and further study of the question is being made. Since the regulation is nation-wide in scope, a proper disposition of the question must be based on consideration of price history and industry practices which may vary from one region to another as well as with different species. For that reason some time will be required before final action is taken in the matter.

It has been shown that authorization to use adjustable pricing on sales in specified lengths where so ordered by the buyer, is necessary to promote distribution of pressure-treated poles and piling and that such authorization will be consistent with the purposes of the Emergency Price Control Act of 1942, as amended. Therefore, under the authority vested in the Price Administrator by the Emergency Price Control Act of 1942, as amended, and Executive Orders 9250 and 9328, and pursuant to section 12 of Maximum Price Regulation 491, *It is hereby ordered*, That:

(a) Treating plants subject to MPR 491 may sell and deliver, and any person may buy and receive, pressure-treated poles and piling on orders calling for specified lengths, at prices not over the prevailing ceiling at time of shipment but by agreement between buyer and seller subject to any addition for specified lengths authorized by the Office of Price Administration after delivery.

(b) This order shall be automatically revoked upon the establishment by the Office of Price Administration of permissible additions for specified lengths as hereinbefore described, or upon denial of the petition. It may be revoked or amended by the Administrator at any time.

(c) This order shall become effective September 5, 1944.

Issued this 4th day of September 1944.

SECURITIES AND EXCHANGE COMMISSION.

[File No. 70-957]

CRESCENT PUBLIC SERVICE CO. AND OKLAHOMA UTILITIES CO.

NOTICE OF FILING AND ORDER FOR HEARING

At a regular session of the Securities and Exchange Commission, held at its office in the City of Philadelphia, Pennsylvania, on the 31st day of August, A. D. 1944.

Notice is hereby given that declarations or applications (or both) have been filed with this Commission pursuant to the Public Utility Holding Company Act of 1935 by Crescent Public Service Company ("Crescent"), a registered holding company, and its wholly owned subsidiary, Oklahoma Utilities Company ("Oklahoma").

All interested persons are referred to said documents which are on file in the office of the Commission, for a statement of the transactions therein proposed, which may be summarized as follows:

Oklahoma proposes to sell to Oklahoma Natural Gas Company, a gas utility company, all of its natural gas production, transmission, and distribution properties and systems located in the counties of Creek, Lincoln, Tulsa, Okfuskee, and Okmulgee in the State of Oklahoma, together with all leases, franchises, and easements, for a base price of $280,000, subject to certain adjustments.

Oklahoma proposes to utilize the proceeds of the aforesaid sale to reduce its 7% unsecured Promissory Note outstanding in the principal amount of $719,648, as of June 30, 1944. Both the aforesaid unsecured Promissory Note and the common stock of Oklahoma (both owned by Crescent) are pledged under the Trust Indenture securing Crescent's Collateral Trust 6% Income Bonds, Series B, due October 1, 1954, outstanding as of June 30, 1944 in the principal amount of $2,802,000. The amount to be paid by Oklahoma on its unsecured Promissory Note will be paid to the Trustee under the aforementioned Indenture.

After the consummation of the proposed sale it is contemplated that Oklahoma will convert its remaining assets to cash and pay such amount to the Indenture Trustee in reduction of the principal of its outstanding unsecured Promissory Note. Oklahoma will, thereupon, request the Trustee to surrender the aforesaid Note, on which a balance of the principal amount will remain unpaid, and Oklahoma's common stock, and will thereafter dissolve.

Crescent states the proposed transactions are the final steps in disposing of its interest in Oklahoma as part of its plan for compliance with section 11 of the act. Crescent represents that at or before the consummation of the proposed sale of the utility assets of Oklahoma, a plan under section 11 (e) providing for its liquidation will be filed with this Commission and that cash to be paid to the Indenture Trustee by Oklahoma will be used by Crescent in effectuating the distribution of its assets in accordance with the said plan.

The Indenture securing Crescent's Collateral Trust Income Bonds requires, among other things, that as a prerequisite to the voting of the securities of Oklahoma in favor of the sale of properties owned by Oklahoma sixty days' written notice be given to holders of Crescent's bonds, written consents be obtained from at least 25% in principal amount of outstanding bonds, and that written objections of 25% or more in principal amount of outstanding bonds shall not have been filed with the said Trustee. The material to be sent to registered holders of Crescent's Income Bonds in the solicitation of their consents will be filed as part of the present application or declaration (or both), and it is requested that the declaration in this respect be permitted to become effective pursuant to Rule U-62.

It appearing to the Commission that it is appropriate in the public interest and in the interest of investors and consumers that a hearing be held with respect to said matters and that said applications or declarations (or both) shall not be granted or permitted to become effective except pursuant to further order of this Commission;

It is ordered, That a hearing on said matters under the applicable provisions of said act and rules of the Commission thereunder be held on September 15, 1944, at 10:00 a. m., e. w. t., at the offices of the Securities and Exchange Commission, 16th and Locust Streets, Philadelphia, Pennsylvania. On such day the hearing room clerk in Room 318 will advise as to the room in which the hearing will be held.

It is further ordered, That the Secretary of the Commission shall serve notice of the aforesaid hearing by mailing copies of this order by registered mail to Crescent Public Service Company, Oklahoma Utilities Company and The Corporation Commission of the State of Oklahoma; and that notice of said hearing be given to all persons by publication of this order in the FEDERAL REGISTER. Any person desiring to be heard in connection with these proceedings, or proposing to intervene herein shall file with the Secretary of the Commission on or before September 13, 1944 his request or application therefor, as provided by Rule XVII of the rules of practice of the Commission.

It is further ordered, That Charles S. Lobingier or any other officer or officers of the Commission designated by it for that purpose shall preside at such hearing. The officer so designated is hereby authorized to exercise all powers granted to the Commission under section 18 (c) of the act and to a trial examiner under the Commission's rules of practice.

It is further ordered, That, without limiting the scope of the issues presented by said applications and declarations, particular attention will be directed at the hearing to the following matters and questions:

(1) Whether the consideration to be received for the assets of Oklahoma is fair and reasonable;

(2) Whether the solicitation material to be sent to the bondholders of Crescent contains full disclosure of all pertinent facts involved in the proposed transactions;

(3) Generally, whether in any respect, the proposed transactions are detrimental to the public interest or to the interest of investors or consumers or will tend to circumvent any provisions of the Act or the rules and regulations promulgated thereunder;

(4) Whether, if the proposed transactions are authorized, the imposition of terms and conditions is necessary and appropriate in the public interest or for the protection of investors and consumers and, if so, what terms and conditions should be imposed.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

(a) The "Fitchburg Area" is comprised of the territory designated in appendix A.

(b) "Agriculture" means those farm activities carried on by farm owners, or tenants on farms in connection with the cultivation of the soil, the harvesting of crops, or the raising, feeding, or management of livestock, bees and poultry, and shall not include any packing, canning, processing, transportation or marketing of articles produced on farms unless performed or carried on as an incident to ordinary farming operations as distinguished from manufacturing or commercial operations.

(c) "State" includes Alaska, Hawaii, and the District of Columbia.

(d) "New employee" means any individual who has not been in the employment of the hiring employer at any time during the preceding 30 day period. For the purpose of this definition, employment of less than seven days' duration and employment which is supplemental to the employee's principal work shall be disregarded.

(e) "Essential activity" means any activity included in the War Manpower Commission List of Essential Activities.

(f) Locally needed activity means any activity approved by the Regional Manpower Director as a locally needed activity.

(g) The terms "employment" and "work" as applied to an individual engaged in principal and supplementary employment mean his principal employment.

(h) "Employment ceilings" will represent the maximum number of employees or specific types of employees which an establishment may have in its employ during a specified time period.

(i) "Priority referral" is a requirement that workers secure jobs and that employers hire workers only upon referral by, or in accordance with arrangements with the United States Employment Service.

SEC. 3. *Control of hiring and solicitation of workers.* All hiring and solicitation of workers in, or for work in, the Fitchburg Area shall be conducted in accordance with this employment stabilization program.

This shall include any hiring or solicitation, whether conducted within or outside the area, if the work is to be performed within the area.

SEC. 4. *Authority and responsibilities of Management-Labor Committee.* The Area Management-Labor War Manpower Committee for the Fitchburg Area is authorized to consider questions of policy, standards, and safeguards in connection with the administration of this employment stabilization program, and to make recommendations concerning the same to the Area Manpower Director.

It shall be the responsibility of this committee to hear and decide appeals or to delegate such responsibility to an Area Appeals Committee in accordance with regulations of the War Manpower Commission governing appeals.

SEC. 5. *Encouragement of local initiative and use of existing hiring channels.* The War Manpower Commission shall encourage local initiative and cooperative efforts to the end that the maximum use shall be made of existing hiring channels, such as private employers, labor organizations, professional organizations, schools, colleges, technical institutes and government agencies.

This section shall not be interpreted or deemed to be a waiver of any of the provisions of this program.

SEC. 6. *General.* No employer in the Fitchburg Area shall hire any new worker except upon referral by or in accordance with arrangements with the United States Employment Service.

Notice of referral received by any employer pursuant to this program shall be retained during the continuance of this program and for a reasonable time thereafter. They shall be made accessible to the Area Manpower Director or his representative upon request.

SEC. 7. *Issuance of statements of availability by employers.* An individual whose last employment is or was in an essential or locally needed activity shall receive a statement of availability from his employer if:

(e) Such employment is or was at a wage or salary below a level established or approved by the National War Labor Board (or other agency authorized to adjust wages or approve adjustments thereof) as warranting adjustment, and the employer has failed to adjust the wage in accordance with such level or to apply to the appropriate agency for such adjustment or approval thereof.

Workers receiving statements of availability from their employers may not be hired upon presentation of the statement of availability to a new employer. A worker shall present the statement of availability to the local office of the United States Employment Service of the War Manpower Commission for referral by it to a new job.

SEC. 8. *Referrals by the United States Employment Service.* (a) When any of the circumstances set forth in section 7 are found to exist in an individual's case and the employer fails or refuses to issue a statement of availability to an individual entitled to such statement, the United States Employment Service of the War Manpower Commission, upon finding that the individual is entitled thereto, shall refer such individual to a job opening. Pending such finding the United States Employment Service shall either request the worker to remain on his job or return to it in instances where the worker has voluntarily terminated his employment. When none of the circumstances set forth in section 7 are found to exist in an individual's case the United States Employment Service shall attempt to persuade such individual to return to his former employment in an essential or locally needed activity providing the employer will reemploy the worker without prejudice.

(b) The United States Employment Service shall refer any individual in the employ of an employer who the War Manpower Commission finds after notice, hearing, and final decision has not complied with any War Manpower Commission stabilization program, regulation, or policy, or has not made a reasonable effort to comply with a recommendation of a duly authorized representative of the War Manpower Commission with respect to the more effective utilization of labor and for so long as such employer continues his non-compliance after such finding. An employer who continues to be in non-compliance after notice, hearing, and final decision shall not receive any referrals of labor from the United States Employment Service.

(c) If an individual is employed at less than full time or at a job which does not utilize his highest recognized skill for which there is a need in the war effort, the United States Employment Service may, upon his request, refer him to other available employment in which it finds that the individual will be more fully utilized in the war effort.

(d) The United States Employment Service, upon the request of an individual, shall refer him to a former employer, when it is found that he has received from such employer with whom he has reemployment rights under an existing collective bargaining agreement, a notice that he must return to his former employment in order to preserve his seniority status.

(e) The United States Employment Service shall refer any worker who has not been engaged in an essential or locally needed activity during the preceding 60-day period.

(f) If a worker's last regular employment was in agriculture, he shall not be referred to non-agricultural work except after consultation with a designated representative of the War Food Administration: *Provided*, That such an individual may be hired for non-agricultural work for a period not to exceed six weeks without referral.

SEC. 9. *Hiring contrary to the program.* An employer shall, upon written request of the United States Employment Service promptly release from employment any worker hired in violation of this program.

SEC. 10. *Exclusions.* No provision of this employment stabilization program shall be applicable to:

(a) The hiring of a new employee for agricultural employment;

(b) The hiring of a new employee for work of less than seven days' duration, or for work which is supplementary to the employees' principal work; but such work shall not constitute the individual's "last employment" for the purpose of the

program, unless the employee is customarily engaged in work of less than seven days' duration;

(c) The hiring of an employee in any Territory or possession of the United States, except Alaska and Hawaii;

(d) The hiring of a foreign, State, County, or Municipal Government, or their political subdivisions or their agencies and instrumentalities, or to the hiring of any of their employees, unless such foreign, State, County, or Municipal Government or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the Constitution and laws applicable to it, with the program;

SEC. 13. *Solicitation of workers.* No employer shall advertise or otherwise solicit for the purpose of hiring any individual if the hiring of such an individual would be subject to restrictions under this employment stabilization program, except in a manner consistent with such restrictions.

SEC. 14. *Hiring.* The decision to hire or refer a worker shall be based on qualifications essential for performance of or suitability for the job, and shall be made without discrimination as to race, color, creed, sex, national origin, or except as required by law, citizenship.

The Area Manpower Director may fix for all or any establishments in the Fitchburg Area, fair and reasonable employment ceilings, limiting the number of employees or other specified types of employees which such establishments may employ during specified periods. Such ceilings will be determined on the basis of the establishment's actual labor needs, the available labor supply, and/or, the relative urgency of the establishment's products or services to the war effort. Except as authorized by the Area Manpower Director no employer shall hire any new employee for work in such establishment if the hiring of such employee would result in such establishment's exceeding the employment ceiling currently applicable to it.

The Federal Government shall be considered as a single essential employer for the purpose of this program, and all hiring for departments and agencies of the Federal Government subject to the Civil Service Act, rules and regulations, shall be conducted by the U. S. Civil Service Commission which shall recruit in accordance with the policies of the War Manpower Commission.

SEC. 15. *Representation.* Nothing contained in this program shall be construed to restrict any individual from seeking the advise and aid of, or from being represented by, the labor organization of which he is a member or any other representative freely chosen by him, at any step in the operation of this program.

SEC. 16. *General referral policies.* No provision in this program shall limit the authority of the United States Employment Service or any other governmental agency designated by the War Manpower Commission to make referrals in accordance with approved policies and instructions of the War Manpower Commission.

SEC. 17. *Effective date.* This program shall become effective as of August 18, 1944, and is in substitution for and supersedes the employment stabilization plan in effect prior to such date. (a) Such individual is hired for work in an essential or locally needed activity or for work to which he has been referred by the United States Employment Service, and

(b) Such individual presents a statement of availability from his last employment in an essential or locally needed activity, or is referred by the United States Employment Service of the War Manpower Commission, or is hired with its consent, as provided herein.

SEC. 6. *Issuance of statements of availability by employers.* An individual whose last employment is or was in an essential or locally needed activity shall receive a statement of availability from his employer if:

(a) He has been discharged, or his employment has been otherwise terminated by his employer, or

(b) He has been laid off for an indefinite period, or for a period of seven or more days, or

(c) Continuance in his employment would involve undue personal hardship, or

(d) Such employment is or was at a wage or salary or under working conditions below standards established by State or Federal law or regulation, or

(e) Such employment is or was at a wage or salary below a level established or approved by the National War Labor Board (or other agency authorized to adjust wages or approve adjustments thereof) as warranting adjustment, and the employer has failed to adjust the wage in accordance with such level or to apply to the appropriate agency for such adjustment or approval thereof.

SEC. 7. *Issuance of statements of availability by United States Employment Service.* (a) A statement of availability shall be issued promptly to an individual when any of the circumstances set forth in section 6 is found to exist in his case. If the employer fails or refuses to issue a statement of availability to an individual entitled to such statement, the United States Employment Service of the War Manpower Commission, upon finding that the individual is entitled thereto, shall issue a statement of availability to the individual. Pending such finding the United States Employment Service shall either request the worker to remain on his present job, or to return to it in instances where the worker has voluntarily terminated his employment.

When none of the circumstances set forth in section 6 is found to exist in an individual's case, the United States Employment Service shall attempt to persuade such individual to return to his former employment in an essential or locally needed activity providing the employer will reemploy the worker without prejudice.

(b) A statement of availability shall be issued by the United States Employment Service to any individual in the employ of an employer who the War Manpower Commission finds, after notice, hearing and final decision, has not complied with any War Manpower Commission Employment Stabilization Program, regulations, or policy, or has not made a reasonable effort to comply with a recommendation of a duly authorized representative of the War Manpower Commission with respect to the more effective utilization of labor and for so long as such employer continues his non-compliance after such finding.

An employer who continues to be in non-compliance after notice, hearing and final decision, may not hire any new employee, whether or not such person has a statement of availability.

(c) A statement af availability shall be issued by the United States Employment Service to an individual upon his request, when it is found that he has received from a former employer with whom he has reemployment rights under an existing collective bargaining agreement a notice that he must return to his former employment in order to preserve his seniority status.

(d) A temporary statement of availability, valid for a period not in excess of 60 days, may be issued by the United States Employment Service to an individual at his request, who because of seasonal or temporary lay-off is not employed at his customary work. In such cases, an employer may hire such a worker for the period designated in the temporary statement of availability and shall release such worker at the end of such period. Upon release of such a worker, the employer shall not issue a statement of availability to him but shall instruct him to return to his former employment.

A temporary statement of availability shall contain in addition to the provisions of the regular form the words:

> The Employer hiring the above-named worker shall not retain such worker in his employ after _____ and shall not issue a statement of availability to such worker upon his release.

SEC. 8. *Referral in case of under-utilization.* If an individual is employed at less than full time or at a job which does not utilize his highest recognized skill for which there is a need in the war effort, the United States Employment Service may, upon his request, refer him to other available employment in which it finds that the individual will be more fully utilized in the war effort.

SEC. 9. *Workers who may be hired only upon referral by the United States Employment Service.* Under the circumstances set forth below, a new employee may not be hired solely upon presentation of a statement of availability, but may be hired only upon referral by, or

in accordance with arrangements with, the United States Employment Service:

(a) The new employee is to be hired for work in a critical occupation or his statement of availability indicates that his last employment was in a critical occupation;

(b) The new employee is to be hired for work in an additional controlled occupation or his statement of availability indicates that his last employment was in such an occupation;

(c) The new employee has not lived or worked in the locality of the new employment throughout the preceding 30-day period (in such cases the local office of the United States Employment Service shall require that the worker obtain a statement of availability from the local office of the United States Employment Service, serving the locality where such worker was most recently employed, except that the latter local office may delegate authority to issue a statement of availability to such a worker in a specific case to the office where the referral is to be made);

(d) The new employee's last regular employment was in agriculture and he is to be hired for non-agricultural work, provided that no such individual shall be referred to non-agricultural work except after consultation with a designated representative of the War Food Administration, and provided further that such an individual may be hired for non-agricultural work for a period of not to exceed six weeks without referral or presentation of a statement of availability.

SEC. 10. *Hiring contrary to the program.* An employer shall, upon written request of the United States Employment Service, promptly release from employment any worker hired,

(a) In violation of this program, or

(b) Upon referral by the United States Employment Service, if made as a result of any misrepresentations on the part of such worker pertaining to previous employment, when otherwise a referral would not have been made, or if it is found that it should not have been made in the first instance.

SEC. 11. *Exclusions.* No provision of this employment stabilization program shall be applicable to:

(a) The hiring of a new employee for agricultural employment;

(b) The hiring of a new employee for work of less than seven days' duration, or for work which is supplementary to the employee's principal work; but such work shall not constitute the individual's "last employment" for the purposes of the program, unless the employee is customarily engaged in work of less than seven days' duration;

(c) The hiring of an employee in any Territory or possession of the United States, except Alaska and Hawaii;

(d) The hiring by a foreign, State, county, or municipal government, or their political subdivisions or their agencies and instrumentalities, or to the hiring of any of their employees, unless such foreign, State, county, or municipal government or political subdivision or agency or instrumentality has indicated its willingness to conform, to the maximum extent practicable under the Constitution and laws applicable to it, with the program;

(e) The hiring of a new employee for domestic service, or to the hiring of a new employee whose last regular employment was in domestic service;

(f) The hiring of a school teacher for vacation employment or the rehiring of a school teacher for teaching at the termination of the vacation period;

(g) The transfer of workers between agencies and departments of the Federal Government.

SEC. 12. *Appeals.* Any worker or employer may appeal from any act or failure to act by the War Manpower Commission under this employment stabilization program, in accordance with regulations and procedures of the War Manpower Commission.

SEC. 13. *Content of statements of availability.* A statement of availability issued to an individual pursuant to the program shall contain only the individual's name, address, social security account number, if any, the name and address of the issuing employer, or War Manpower Commission officer and office, the date of issuance, a statement as to whether or not the individual's last employment was in a critical occupation or in an additional controlled occupation, and such other information not prejudicial to the employee in seeking new employment as may be authorized or required by the War Manpower Commission.

Statements of availability received by any employer pursuant to this program shall be retained during the continuance of this program and for a reasonable time thereafter. They shall be made accessible to the Area Manpower Director or his representative upon request.

SEC. 14. *Solicitation of workers.* No employer shall advertise or otherwise solicit for the purpose of hiring any individual if the hiring of such an individual would be subject to restrictions under this employment stabilization program, except in a manner consistent with such restrictions.

SEC. 15. *Hiring.* The decision to hire or refer a worker shall be based on qualifications essential for performance of or suitability for the job, and shall be made without discrimination as to race, color, creed, sex, national origin, or except as required by law, citizenship.

The Federal Government shall be considered as a single essential employer for the purposes of this program, and all hiring for departments and agencies of the Federal Government subject to the Civil Service Act, rules and regulations, shall be conducted by the U. S. Civil Service Commission which shall recruit in accordance with the policies of the War Manpower Commission.

SEC. 16. *Representation.* Nothing contained in the program shall be construed to restrict any individual from seeking the advice and aid of, or from being represented by, the labor organization of which he is a member or any other representative freely chosen by him, at any step in the operation of the program.

SEC. 17. *General referral policies.* No provision in the program shall limit the authority of the United States Employment Service or any other governmental agency designated by the War Manpower Commission to make referrals in accordance with approved policies and instructions of the War Manpower Commission.

SEC. 18. *Effective date.* This program shall become effective as of November 15, 1943, and is in substitution for and supersedes the employment stabilization plan in effect prior to such date. It shall, subject to such amendments as the War Manpower Commission may promulgate, continue in effect for six months following the termination of the war, unless sooner terminated by the War Manpower Commission.

Area Director.

TORRINGTON, CONN., AREA

EMPLOYMENT STABILIZATION PROGRAM

The employment stabilization program for the Torrington Area, dated November 15, 1943, is hereby amended in the following respects:

1. Section 2 (f) of said program is hereby amended by inserting after the word "Area" in the second line, the words "with the approval of the Regional Director" and by inserting the same phrase after the word "Director" in the last paragraph of said section, so that the same shall read as follows:

(f) "Additional controlled occupation" means an occupation fund by the Area Manpower Director for the Torrington Area with the approval of the Regional Director to be either:

(1) One of a category of occupations in an activity in which manpower shortages threaten critically needed production in such area, or

(2) An occupation in which the demand for workers in the Area exceeds the available supply.

A list of the "additional controlled occupations" designated by the Area Manpower Director is attached to this program as Appendix A and may be amended from time to time by the Area Manpower Director with the approval of the Regional Director.

2. Section 7 is hereby amended by deleting subparagraph (c) in its entirety, thereby making subparagraph (d) of said section, subparagraph (c), and adding the following sentence after the word "employment" at the end of the first paragraph of said subparagraph:

Nothing in this section shall be construed to supersede the provisions of section 9 (d).

3. Section 8 is hereby amended by changing the title from "Referral in Case of Under-Utilization" to "Referral by the United States Employment Service" and adding the following as the second paragraph:

The United States Employment Service shall, upon the request of an individual, refer him to a former employer when it is found that he has received from such employer with whom he has reemployment rights under an existing collective bargaining agreement, a notice that he must return to his former employment in order to preserve his seniority status.

4. Section 9 is hereby amended by deleting the words in subparagraph (c) enclosed in parenthesis, so that said paragraph shall read as follows:

(c) The new employee has not lived or worked in the locality of the new employment throughout the preceding 30-day period:

5. Section 10 is hereby amended by striking out the semi-colon after the word "hired" in the second line, inserting the phrase "in violation of this program" and by striking out paragraphs (a) and (b) of said section so that the same shall read as follows:

An employer shall, upon written request of the United States Employment Service, promptly release from employment any worker hired in violation of this program.

[C-205]

SPALSBURY STEIS DEEVERS SHOE CO.

Spalsbury Steis Deevers Shoe Company, a corporation, with its general office and factory in Fredericktown, Missouri, is engaged in the manufacture of women's and growing girls' shoes. On or about May 1, 1944, it began the production of a line of misses' shoes at $2.01 per pair and manufactured a total of 21,552 pairs of such shoes. During the base period selected by the company it did not produce any misses' and children's shoes so that the manufacture of such shoes without an established quota was in violation of Conservation Order M-217. On July 3, 1944, the War Production Board gave authorization to complete the manufacture of 5,706 pairs of such shoes out of materials on hand so that the company manufactured a total of 15,846 pairs of such shoes without authorization and in violation of Conservation Order M-217.

Spalsbury Steis Deevers Shoe Company admits the production of 15,846 pairs of misses' and children's shoes for which it had no established quota and in violation of M-217 and has consented to the issuance of this order.

Wherefore, upon the agreement and consent of Spalsbury Steis Deevers Shoe Company, the Regional Compliance Chief and the Regional Attorney, and upon the approval of the Compliance Commissioner, *It is hereby ordered*, That:

(a) Spalsbury Steis Deevers Shoe Company, its successors and assigns, shall not manufacture any line of foot wear (except military foot wear) not manufactured by it in its six months base period.

(b) Spalsbury Steis Deevers Shoe Company, its successors and assigns, shall reduce its production of women's and growing girls' shoes in the established price line of $2.95 to $3.25 so that its total production of such shoes for the period commencing September 1, 1944, and ending February 28, 1945, shall be 15,846 pairs less than it would otherwise be permitted to produce under the provisions of Conservation Order M-217.

(c) Nothing contained in this order shall be deemed to relieve Spalsbury Steis Deevers Shoe Company, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Produc-

tion Board, except in so far as the same may be inconsistent with the provisions hereof.

(d) This order shall take effect on the date of issuance, and shall expire on February 28, 1945.

Issued this 2d day of September 1944.

FIRST FEDERAL SAVINGS AND LOAN ASSOCIATION OF WILKINSBURG

First Federal Savings and Loan Association of Wilkinsburg, a corporation, located at 1010 Center Street, Wilkinsburg, Pennsylvania, is engaged in the business of financing residential properties. During the latter part of March, 1944, it did construction on a building which it owned at 711 Penn Avenue, Wilkinsburg, Pennsylvania, at a cost of $2,384.24, including new construction at a cost of $1,267.98, without securing approval from the War Production Board, in wilful violation of Conservation Order L-41. First Federal Savings and Loan Association of Wilkinsburg admits having done this construction. It does not desire to contest the issue of wilfulness and has consented to the issuance of this order.

Wherefore, upon the agreement and consent of the First Federal Savings and Loan Association of Wilkinsburg, the Regional Attorney and the Regional Compliance Chief, and upon the approval of the Compliance Commissioner, *It is hereby ordered*, That:

(a) Neither First Federal Savings and Loan Association of Wilkinsburg, its successors and assigns, nor any other person shall do any further construction on the property located at 711 Penn Avenue, Wilkinsburg, Pennsylvania, unless specifically authorized in writing by the War Production Board.

(b) Nothing contained in this order shall be deemed to relieve First Federal Savings and Loan Association of Wilkinsburg, its successors or assigns, from any restriction, prohibition or provision contained in any order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

Issued this 1st day of September 1944.

Regulations

TITLE 32—NATIONAL DEFENSE

Chapter IX—War Production Board

Subchapter B—Executive Vice-Chairman

AUTHORITY: Regulations in this subchapter issued under sec. 2 (a), 54 Stat. 676, as amended by 55 Stat. 236 and 56 Stat. 176; E.O. 9024, 7 F.R. 329; E.O. 9125, 7 F.R. 2719; W.P.B. Reg. 1 as amended March 24, 1942, 8 F.R. 3666, 3696; Pri. Reg. 1 as amended May 15, 1943, 8 F.R. 6727.

PART 937—ZINC

[Conservation Order M-11-b, as Amended Sept. 5, 1944]

The fulfillment of requirements for the defense of the United States has created a shortage in the supply of zinc for defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 937.3 *Conservation Order M-11-b*—(a) *Scope of the order.* This order controls generally the use of zinc and zinc products. Under the order some uses are entirely prohibited, other uses are permitted free of any restriction, and still other uses are permitted but with a limitation on the amount of zinc and zinc products which may be used. Special restrictions may also be found in other orders of the War Production Board relating to particular articles or parts. In such case the more restrictive provision governs. In no case shall any person use any zinc or zinc products in violation of this order.

(b) *Definitions.* For the purpose of this order:

(1) "Zinc" means zinc metal which has been produced by an electrolytic, electro-thermic, or fire refining process. It includes zinc scrap, zinc metal produced from scrap, and any alloy in which the percentages of zinc metal by weight is more than 50%.

(2) "Zinc products" means zinc in the form of sheet, strip, rod, wire, castings, or dust.

(c) *Prohibited articles; List A.* The use by any person of zinc and zinc products in the manufacture of articles on List A of this order, and of parts for these articles, is prohibited. This prohibition includes the use of zinc and zinc products to apply any protective coating or plating (other than paint) of zinc to articles on List A. It does not include the use of zinc or zinc products in the manufacture of repair parts to replace similar parts of zinc, or to the protective coating of such repair and replacement parts.

(d) *Unrestricted articles and uses; List B.* There are set forth in List B of this order certain articles and uses for which zinc and zinc products may be used with no restriction insofar as this order is concerned. For articles on this list, other orders of the War Production Board may limit production; this order does not remove any such limitation, but merely authorizes free use of zinc and zinc products providing other orders of the War Production Board are not violated.

(e) *Restricted articles.* For articles not on either List A or List B, the use of zinc and zinc products is permitted, but with the following limitation on the amounts which may be used; namely, that no person shall in any calendar quarter use more:

(1) Zinc in the production of any zinc products not requiring further processing, assembling, or finishing; or

(2) Zinc products in the manufacture of any article or parts;

Than 20% of the amount by weight of zinc or zinc products used by him for the same purpose during the entire calendar year 1941. As in the case of List A articles (see paragraph (c) above), this restriction does not apply to the use of zinc or zinc products in the manufacture of repair parts to replace similar parts of zinc or to the protective coating of such parts.

(f) *General exceptions.* The prohibitions and restrictions in paragraphs (c)

PART 1010—SUSPENSION ORDERS

[Suspension Order S–607]

MIDWEST HEATER CO.

Midwest Heater Company, a Nebraska corporation with its principal place of business at Omaha, Nebraska, is engaged in the business of manufacturing direct fired gas and electric water heaters. Between January 15, 1943, and July 28, 1943, respondent produced, fabricated and assembled 247 gas fired water heaters to fill contracts or orders which were not for the account of the National Housing Authority or for war housing requirements, in violation of General Limitation Order L–185. Between July 1, 1943, and February 25, 1944, it manufactured, fabricated, assembled and installed metal jackets on 755 gas fired water heaters in violation of General Limitation Order L–185. Between June 17, 1943, and March 25, 1944, the corporation produced and transferred physical possession and title to 259 electric water heaters which were not in fulfillment of preferred orders, in violation of General Limitation Order L–65. In the third and fourth quarters of 1943, the respondent failed to return unused or excess portions of allotments, and used allotments for purposes not authorized, in violation of CMP Regulation No. 1. In addition, the respondent failed to file reports required by L–65, and failed to keep accurate and complete records as required by General Limitation Order L–65, General Limitation Order L–185, Priorities Regulation No. 1, and CMP Regulation No. 1.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–575, Reinstatement and Amendment]

ATLAS FURNACE & ENGINEERING, INC.

The Atlas Furnace & Engineering, Inc., of Minneapolis, Minnesota, a corporation engaged in the business of cleaning and repairing furnaces and heating apparatus and in installing new heating systems was suspended on July 22, 1944 by Suspension Order No. S–575. It appealed from the provisions of the suspension order and, pending determination of the appeal, the suspension order was stayed by the Chief Compliance Commissioner on August 3, 1944. The appeal has been considered by the Chief Compliance Commissioner who has concluded that the present suspension order might permanently affect the business of the respondent in a manner unforeseen, and has therefore directed that the stay be terminated, the suspension order be reinstated and that the suspension order

These violations arose through the gross negligence of the president of the corporation in his failure to make any efforts to familiarize himself with the orders and regulations of the War Production Board affecting his business. As a result of these violations, critical materials have been diverted from the war effort to uses not authorized by the War Production Board. In view of the foregoing, it is hereby ordered, that:

§ 1010.607 *Suspension Order No. S–607.* (a) Midwest Heater Company, its successors and assigns, shall not manufacture or assemble any direct fired water heaters as defined and governed by General Limitation Order L–185, unless hereafter specifically authorized in writing by the War Production Board.

(b) Deliveries of material to Midwest Heater Company, its successors or assigns, shall not be accorded priority over deliveries under any other contract or order, and no preference ratings shall be assigned, applied or extended to such deliveries by means of preference rating certificates, preference rating orders, general preference orders or any other orders or regulations of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(c) No allocation, including allotments, shall be made to Midwest Heater Company, its successors or assigns, of any material or product the supply or distribution of which is governed by any order or regulation of the War Production Board, unless hereafter specifically authorized in writing by the War Production Board.

(d) Nothing contained in this order shall be deemed to relieve Midwest Heater Company, its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

(e) This order shall take effect on September 2, 1944, and shall expire on January 2, 1945.

Issued this 23d day of August 1944.

PART 1010—SUSPENSION ORDERS

[Suspension Order S–613]

BARRY & ZETZEL SHOE CO.

Maurice Barry and Samuel Zetzel, doing business as Barry & Zetzel Shoe Company, 11 Liberty Square, Lynn, Massachusetts, are manufacturers of civilian footwear. From June, 1943, to July, 1944, they put into process leather and fabric for the manufacture of, and manufactured 72,505 pairs of civilian footwear, although they had no quota as required by Conservation Order M–217 and, therefore, acted in violation of the order. Some of the footwear so manufactured were Roman sandals with multiple straps and prohibited by Conservation Order M–217. Maurice Barry and Samuel Zetzel knew of the requirements of Conservation Order M–217 and their actions were wilful violations of that order.

These violations of Conservation Order M–217 have diverted critical materials to uses not authorized by the War Production Board and have hampered and impeded the war effort of the United States of America. In view of the foregoing, it is hereby ordered, that:

§ 1010.613 *Suspension Order No. S–613.* (a) Neither Maurice Barry nor Samuel Zetzel, whether doing business as Barry & Zetzel Shoe Company or otherwise, their and its successors or assigns, shall manufacture any civilian footwear as defined in or governed by Conservation Order M–217, as amended from time to time, without specific written authorization from the War Production Board.

(b) The prohibitions contained herein shall apply severally to Maurice Barry and Samuel Zetzel (doing business as Barry & Zetzel Shoe Company or under any other name), their and its successors or assigns, or persons acting on their or its behalf. Prohibitions against the taking of any action include the taking indirectly as well as directly of any such action.

(c) Nothing contained in this order shall be deemed to relieve Maurice Barry and Samuel Zetzel, whether doing business as Barry & Zetzel Shoe Company or otherwise, their and its successors or assigns, from any restriction, prohibition or provision contained in any other order or regulation of the War Production Board, except insofar as the same may be inconsistent with the provisions hereof.

Issued this 2d day of September 1944.

(1) [Revoked Sept. 5, 1944.]

(2) *Restrictions of materials.* (i) In the manufacture of self-contained drinking water coolers, no producer shall use:

(*a*) [Revoked Sept. 5, 1944.]

(*b*) Block tin tubing, or tin coatings;

(ii) In the manufacture of self-contained drinking water coolers (exclusive of condensing units, motors, controls, and wiring) no producer shall use copper or copper base alloy except in the following parts:

(*a*) Low sides,
(*b*) Pre-coolers,
(*c*) Bubblers,
(*d*) Water valves,
(*e*) Water lines,
(*f*) Liquid and suction lines,
(*g*) Refrigerant or temperature controls,
(*h*) Glass- or pitcher-fillers; and the aggregate weight of copper or copper base alloy used in all of such parts contained in any such water coolers shall not exceed ten (10) pounds, plus an additional ½ pound for each gallon of water cooled per hour based on an ambient temperature of 90° F. while reducing water from 80° F. inlet to 50° F. outlet.

(c) *Exceptions from* (b) (2). The restrictions in paragraph (b) (2) shall not prohibit the production, delivery, and acceptance of self-contained drinking water coolers, for use aboard ship, delivered to or for the account of, and for direct use by, the United States Army, or Navy, the Maritime Commission, or the War Shipping Administration, where (a) such coolers are manufactured in accordance with plans which have already (prior to July 3, 1942) been drawn and accepted by or for the account of such an agency, or (b) such coolers are manufactured in accordance with the specifications issued prior to July 3, 1942, by such an agency (including performance specifications) requiring materials not in accordance with the restrictions of this schedule; but in any case such coolers may vary from the restrictions of the schedule only to the extent required by such plans or specifications.

PART 1260—RUBBER PROCESSING MACHINERY AND EQUIPMENT

[General Limitation Order L–143–a as Amended Sept. 5, 1944]

The fulfillment of requirements of the national defense has created a shortage in the supply of certain critical materials used in the manufacture of rubber processing machinery and equipment for the national defense, for private account and for export; and the following order is deemed necessary and appropriate in the public interest and to promote the national defense:

§ 1260.2 *General Limitation Order L–143–a*—(a) *Definitions.* For the purpose of this order:

(1) "Person" means any individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons, whether incorporated or not.

(2) "Rubber processing machinery or equipment" means machinery or equipment of the kinds listed in Groups I, II, III, IV and V, of List A, designed for use in the manufacture of products from natural crude rubber, latex, reclaimed rubber, scrap rubber, and all types of synthetic rubber. The term also means and includes any such machinery or equipment (except "plastics molding machinery" and "fixtures" controlled by Allocation Order L–159) for experimental use or for use in the manufacture of products from plastics or rubber substitutes. The term does not mean or include "retreading, recapping and repair equipment," which is subject to the provisions of General Limitation Order L–61.

(3) [Deleted Sept. 5, 1944.]

(4) [Deleted Sept. 5, 1944.]

(5) [Deleted Sept. 5, 1944.]

(6) [Deleted Sept. 5, 1944.]

(7) [Deleted Sept. 5, 1944.]

(8) [Deleted Sept. 5, 1944.]

(b) *Production and delivery.* No person shall manufacture or deliver any new rubber processing machinery or equipment except to fill orders in accordance with the following restrictions:

Any order for new rubber processing machinery or equipment may be accepted, but orders which are not specifically rated on Form WPB–1277 or scheduled under paragraph (c) shall be treated as unrated orders.

Orders classified as "unrated" may be filled by a supplier only to the extent that he is able to do so without interfering with, or in any way delaying, his production or shipment of orders specifically rated on Form WPB–1277 or orders scheduled under paragraph (c).

Blanket MRO ratings or other forms of priorities assistance (except as authorized on Form WPB–1277) may not be used to obtain new rubber processing machinery or equipment. MRO ratings may, however, be used to the extent authorized by other War Production Board orders and regulations, for the purpose of obtaining parts for the maintenance and repair of machinery or equipment.

(c) *Scheduling and shipping directions.* (1) The War Production Board may from time to time request all the manufacturers of a particular item of rubber processing machinery or equipment to file operation reports and schedules of unfilled orders. When so requested, each manufacturer shall file forms WPB–3100 and WPB–3101 in accordance with the instructions accompanying them. Form WPB–3101 will be returned to the manufacturer with shipping directions noted thereon and shall be deemed a "frozen" schedule within the meaning of Priorities Regulation 18 for the number of calendar months designated by the War Production Board.

(2) Each manufacturer must make shipments in accordance with his frozen schedule, notwithstanding any other preference order, directive or regulation of the War Production Board, but subject to Priorities Regulation 18, and must so schedule his production as to meet the shipping dates prescribed in his frozen schedule.

(3) If a manufacturer is unable, for reasons beyond his control, to fulfill his frozen schedule on time, or if he is able to make shipments ahead of schedule, he must in either case make shipments, as far as practicable, in the same sequence as required by the schedule. In any case where the delay or acceleration in shipments will affect dates of shipment by more than 15 days, the manufacturer shall notify the War Production Board of the following facts:

(i) The reason for the delay or acceleration.

(ii) The revised dates on which he expects to make shipments under each purchase order affected.

(4) In the absence of specific shipping directions issued pursuant to this paragraph (c), any manufacturer shall produce rubber processing machinery or equipment, and make shipments thereof in fulfillment of orders authorized pursuant to paragraph (b) of this order, in accordance with applicable preference ratings, allotments, regulations or directions issued by the War Production Board.

(d) *Application for preference rating.* Any person who requires new rubber processing machinery or equipment to fulfill essential Government or civilian orders may apply for a preference rating on Form WPB–1277 in accordance with the instructions accompanying the form. If a preference rating is granted, the applicant may use the rating only to obtain new rubber processing machinery or equipment specified on the form, by certifying to the supplier named in his application, in substantially the following form:

The undersigned hereby certifies, subject to the criminal penalties for misrepresentation contained in section 35 (A) of the United States Criminal Code, that he has been granted a preference rating of ---------- on Form WPB–1277, Case No. ----------, for the acquisition of the particular rubber processing machinery or equipment specified in the attached purchase order or contract.

Date:

Signature and Title of Authorized Official

A dealer who accepts an order certified under this paragraph may extend the rating to his supplier by using the general form of certification specified in Priorities Regulation 7.

(e) [Deleted Sept. 5, 1944.]

(f) [Deleted Sept. 5, 1944.]

(g) *Miscellaneous provisions.*

(1) [Deleted Sept. 5, 1944.]

(2) *Applicability of regulations.* This order and all transactions affected thereby are subject to all applicable Regulations of the War Production Board, as amended from time to time, except to the extent that any provision hereof may be inconsistent therewith, in which case the provisions of this order shall govern.

(3) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in triplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(4) *Communications to War Production Board.* All reports required to be filed hereunder, and all communications concerning this order, shall, unless otherwise directed, be addressed to: War Production Board, Office of Rubber Director, Washington 25, D. C., Ref.: L–143–a.

(5) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 3133—PRINTING AND PUBLISHING

[Limitation Order L-240, as Amended Sept. 5, 1944]

NEWSPAPERS

§ 3133.6 *Limitation Order L-240—(a) The purpose of this order.* This order does two things: First, it limits the tonnage of print paper which may be used by a publisher in printing a newspaper. This is called his "consumption quota". Second, it limits the tonnage of print paper which may be ordered or accepted by a newspaper publisher. This is called his "delivery quota". A publisher's consumption quota is on a quarterly basis and his delivery quota is on a monthly basis.

Definitions and Explanations

(b) *Newspaper.* "Newspaper" means any publication generally recognized as a newspaper in the newspaper industry, regardless of the frequency of issuance. The term includes all supplements, inserts and other printed matter physically incorporated into a newspaper or delivered together with it.

Where two or more newspapers are published by the same publisher, whether in the same city or in different cities, each newspaper shall operate under a separate consumption quota and a separate delivery quota. In computing his consumption quota a publisher must make separate calculations for morning, evening and Sunday editions, but these figures must be consolidated into a single consumption quota for each newspaper, in accordance with the instructions contained in paragraph (k).

However, morning, evening, Sunday and other editions of the same newspaper shall operate under a single consumption quota and a single delivery quota.

In determining whether a publisher issues separate newspapers or separate editions of the same newspaper, the number and form of the reports customarily filed by the publisher with the Audit Bureau of Circulations will be controlling, in the absence of special circumstances. Thus, if a publisher filed consolidated statements with the Audit Bureau of Circulations covering morning, evening and Sunday issues, even if these issues had different names, different formats and different staffs, they will ordinarily be considered as a single newspaper for the purposes of this order. If a publisher filed separate statements with the Audit Bureau of Circulations covering his morning, evening, Sunday and other publications, they will ordinarily be considered as separate newspapers for the purposes of this order.

(c) *Camp papers and free distribution publications.* Army or Navy camp, post, station or unit "newspapers" or news sheets generally are not recognized as newspapers in the newspaper industry. They are covered by Order L-241 (commercial printing). Shopping guides, want ad periodicals and publications in newspaper format distributed free or at nominal cost also are not recognized as newspapers within the meaning of this order and are governed by Order L-241, Schedule II. If a publisher issued a free distribution newspaper in 1941, his consumption quota shall be determined in accordance with Schedule II to Order L-241 and that order shall govern even if the circulation of the publication has subsequently been changed in whole or in part to a net paid basis.

(d) *Publisher.* "Publisher" means a person who publishes a newspaper, including an individual, partnership, association, business trust, corporation, governmental corporation or agency, or any organized group of persons whether incorporated or not.

(e) *Print paper.* "Print paper" means any grade, quality, type or basis weight of paper used in publishing a newspaper. The term includes paper reclaimed wholly or partly from printed or unprinted waste, as well as paper made entirely from virgin fiber. It also includes roll wrappers, newsprint used as wrappers, identification sheets and labels for newspapers, and production waste, whether or not this waste is subsequently salvaged for other uses.

(f) *Use.* All production waste shall be included in the tonnage of print paper "used" in printing a newspaper. Transit damage shall not be included in a publisher's "use" of print paper. A roll of print paper is considered "used" when it is first opened and placed in production.

(g) *Net paid circulation.* "Net paid circulation" means the number of copies of a newspaper which have been sold (exclusive of bulk sales), as audited by the Audit Bureau of Circulations or (in the case of newspapers which are not members of the Audit Bureau of Circulations) as verified in accordance with the standards of the Audit Bureau of Circulations of January 1, 1942.

(h) *Inventory.* "Inventory" means all the print paper which is owned by a publisher or is available for his use. It includes the print paper which he has on hand, in storage, and in transit, and paper held for his use by a paper merchant, warehouseman or other person, regardless of its physical location. However, it does not include print paper shipped by water and held in warehouse by a paper manufacturer or merchant as part of the inventory of the manufacturer or merchant; such paper does not become part of a publisher's inventory until it is delivered to him.

(i) *Transfer of quotas—(1) Quotas established by different orders.* Quotas provided by one War Production Board order may not be used for the purposes set forth in any other order. Thus, for example, a publisher may not use for the printing of a newspaper any part of a consumption quota established under Orders L-241 (commercial printing), L-244 (magazines) or L-245 (books) and he may not permit any part of his consumption quota established under this order to be used for commercial printing, magazines or books. If a newspaper publisher also conducts a job printing business, he must keep these two operations separate for quota purposes. The amount of print paper which he is permitted to consume and the amount which he is permitted to order or accept for the publication of his newspaper is limited by this order. The amount of print

paper which he is permitted to consume and the amount which he is permitted to accept for his commercial printing business is limited by Order L–241.

(2) *Transfer of quotas to different persons.* The rules governing the assignability of quotas are set forth in Priorities Regulation 7a.

Consumption Quota

(j) *Allowable consumption.* In the first quarter of 1944, and in each calendar quarter after that, no publisher may use or cause to be used, in the publication of a newspaper, print paper in excess of:

(1) His quarterly consumption quota, which shall be computed in accordance with the instructions set forth in paragraph (k), plus

(2) Any less-than-quota savings carried over from previous calendar quarters, as provided in paragraph (l), plus

(3) Ex-quota tonnage, if any, which may have been granted on appeal for consumption in that quarter.

(k) *Computation of consumption quota*—(1) *Base tonnages.* Ascertain, separately, the tonnage of print paper comprising the net paid circulation of morning, evening, Sunday or other issues of the newspaper in the corresponding quarter of 1941. Add 3 per cent to each figure. (This 3 per cent is an arbitrary allowance to compensate for production waste and should be added whether the actual production waste in 1941 was greater or less than 3 per cent). These are the "base tonnages" for morning, evening, Sunday or other issues of the newspaper, which shall be adjusted in accordance with instructions 2, 3, and 4.

(2) *Circulation increase.* Ascertain, separately, the percentage increase or decrease in average net paid circulation of morning, evening, Sunday or other issues of the newspaper in the calendar year 1942 as compared with the calendar year 1941. (The average net paid circulation for each year shall be determined by adding together the average net paid circulation for each of the four quarters of the year and dividing by four).

(3) *Tonnage equivalent of circulation increase.* Apply, separately, the respective percentages of circulation increase or decrease determined under instruction number 2 to the respective base tonnages determined under instruction number 1 for morning, evening, Sunday or other issues of the newspaper.

(4) *Adjustment of base tonnages.* Adjust the respective base tonnages determined under instruction number 1 by adding or subtracting the number of tons represented by the percentage circulation gain or loss determined under instruction number 3.

(5) *Total adjusted base tonnage.* Total the respective base tonnages for morning, evening, Sunday or other issues of the newspaper determined under instruction number 1. Total the respective adjusted base tonnages for morning, evening, Sunday, or other issues of the newspaper determined under instruction number 4. The larger of these two totals is the publisher's "total adjusted base tonnage" from which the required reductions shall be applied.

(6) *Sliding scale of reductions.* Reduce the total adjusted base tonnage by the following sliding scale of percentage cuts:

(i) Deduct 4% of the amount over 25 tons but not over 125 tons.

(ii) Deduct 8% of the amount over 125 tons but not over 250 tons.

(iii) Deduct 12% of the amount over 250 tons but not over 500 tons.

(iv) Deduct 20% of the amount over 500 tons but not over 1000 tons.

(v) Deduct 24% of the amount over 1000 tons.

(7) *Consumption quota.* The balance remaining after subtraction of the above reductions from the total adjusted base tonnage determined under instruction number 5 is the publisher's consumption quota for the quarter.

(8) *Adjustment for print paper lighter than 32-pound basis weight.* Beginning July 1, 1944, if a publisher orders print paper lighter than 32-pound basis weight, his consumption quota for the current calendar quarter shall be reduced proportionately as follows: First, determine the percentage by which 32-pound paper exceeds such lighter paper in weight. Second, multiply the tonnage of lighter paper so ordered by this percentage. Third, subtract the result from the publisher's consumption quota. For example, if a publisher has a consumption quota of 200 tons and orders 100 tons of 30-pound basis weight paper, his consumption quota shall be reduced by 6⅔ tons, since 32-pound paper is 6⅔% heavier than 30-pound paper.

(9) *Borrowing for 14th Sunday.* Inasmuch as there are 14 Sundays in the fourth quarter of 1944 and only 12 in the first quarter of 1945 the publisher of a Sunday newspaper may deduct the tonnage of print paper consumed in his December 31, 1944 issue from his first quarter 1945 consumption quota rather than his fourth quarter 1944 consumption quota.

(l) *Carry-over.* If a publisher uses less print paper than he is permitted to use in the fourth quarter of 1943, or in any calendar quarter after that, he may add this tonnage to his consumption quota in any succeeding quarter.

(m) *Exceptions for small newspapers.* Excepted from the provisions of paragraph (k) are certain small newspapers and special types of newspapers described in this paragraph (m).

(1) During the third calendar quarter of 1944, the restrictions on the consumption of print paper established by this order do not apply to:

(i) *Special types of newspapers.* Any newspaper containing 8 pages or less which is authorized to be admitted to the mails as second class matter under the provisions of section 521 of the Postal Laws and Regulations of 1940 (Title 39, U. S. C., sec. 229) pertaining to the publications of benevolent, fraternal, trades-union, professional, literary, historical, and scientific organizations and societies.

(ii) *Newspapers using less than 25 tons per quarter.* Any newspaper which shall consume less than 25 tons of print paper in the third calendar quarter, regardless of the tonnage of paper consumed previously. The publisher of any such newspaper is authorized, in addition, to increase his permitted usage by the tonnage of print paper consumed in printing copies of his newspaper furnished to the Armed Services of the United States, whether such copies are sold or are distributed free of charge.

(2) Beginning October 1, 1944, paragraph (m) (1) shall be inoperative and thereafter the consumption quotas of small newspapers and special types of newspapers described in this paragraph (m) (2) shall be computed as follows:

(i) *Special types of newspapers.* Any newspaper containing 8 pages or less which is authorized to be admitted to the mails as second class matter under the provisions of section 521 of the Postal Laws and Regulations of 1940 (Title 39, U. S. C., sec. 229) pertaining to the publications of benevolent, fraternal, trades-union, professional, literary, historical and scientific organizations and societies shall have a consumption quota of print paper in any calendar quarter equal to either its average quarterly consumption of print paper in the first three calendar quarters of 1944 or its consumption of print paper in the corresponding calendar quarter of 1943, whichever is greater. Having selected one of these two methods, the publisher must use that method thereafter.

(ii) *Small newspapers.* Any person may use or cause to be used in the publication of a newspaper during any calendar quarter a tonnage of print paper equal to 1¼ tons multiplied by the number of days per week on which the newspaper is published. For example, any person may use 1¼ tons of print paper per calendar quarter for the publication of a weekly newspaper, 2½ tons per calendar quarter for the publication of a semi-weekly newspaper, etc. It makes no difference whether the publisher used that much paper, or any paper, in the publication of a newspaper during any previous period.

(iii) *Other newspapers using less than 25 tons per quarter.* If, prior to October 1, 1944, a publisher used less than 25 tons of print paper per calendar quarter for civilian readers, his quarterly consumption quota shall be equal to either his average quarterly consumption of print paper for civilian readers in the first three calendar quarters of 1944 or his consumption of print paper for civilian readers in the corresponding calendar

quarter of 1943, whichever is greater. Having selected one of these two methods, the publisher must use that method thereafter. The publisher of any such newspaper is authorized, in addition, to increase his permitted usage by the tonnage of print paper which shall be consumed in printing copies of his newspaper sold to United States Armed Services personnel on a subscription basis and copies sold to units of the United States Armed Services or organizations, which distribute them exclusively to service men, *Provided, however,* That such additional tonnage shall not exceed in any calendar quarter either his average quarterly consumption of print paper in the first three calendar quarters of 1944 for copies furnished to United States Armed Services personnel or his consumption of print paper for such copies in the corresponding calendar quarter of 1943, whichever is greater. Having selected one of these two methods, the publisher must use that method thereafter.

Delivery Quota

(n) *Computation of delivery quota.* In August 1944, and in each calendar month after that, no publisher may order or accept delivery of print paper in excess of his monthly delivery quota, which shall be computed in accordance with the following instructions:

(1) *Monthly base.* Total the publisher's consumption quotas for the third and fourth quarters of 1944. Add the ex-quota tonnage, if any, which may have been granted on appeal for use in the third and fourth quarters of 1944. Subtract the publisher's consumption in July 1944. Divide by 5.

(2) *Inventory ceiling.* The above amount shall be reduced accordingly if a publisher's inventory is, or by virtue of such order or acceptance will become, at the end of the current calendar year, greater than: (i) 40 days' supply for publishers in the states named in List A, (ii) 65 days' supply for publishers in the states named in List B, or (iii) 60 tons for publishers who would be limited to a smaller amount by subdivision (i) or (ii) above.

[NOTE: Last sentence of subparagraph (2) deleted Sept. 5, 1944.]

(3) *Exclusions.* In computing the maximum tonnage which a publisher may have in his inventory, he shall exclude any less-than-quota savings under his consumption quota carried over from previous quarters. He shall also exclude print paper which he has received by Great Lakes or coastal water-borne shipments; provided on May 1 of any calendar year he shall have on hand or available for use not more than (i) a 40 days' supply if he is located in one of the states named on List A above, or (ii) more than a 65 days' supply if he is located in one of the states named in List B above and provided further that no publisher may order or accept delivery of a total amount of print paper by water, rail or otherwise in any calendar year (including both the open and closed navigation seasons) in excess of his delivery quota for that calendar year.

[Paragraphs (4), (5), (6), and (7), formerly (3), (4), (5), and (6) redesignated Sept. 5, 1944]

(4) *Computation of rate of consumption.* The number of days' supply shall be computed at the average daily rate of allowable consumption for the first six months of 1944.

(5) *Fractional carloads.* If a publisher's delivery quota for any month is less than one carload it may be increased to one full carload. If it is a whole number of carloads plus a fraction of another carload, the fraction may be added to his delivery quota for any succeeding month.

(6) *Transit damage.* If print paper in inventory is destroyed or damaged to such an extent that it becomes unusable in publishing his newspaper, whether this occurs while the paper is in transit or after it has reached its destination, the publisher may increase his delivery quota (but not his consumption quota) in the same or any subsequent month by an amount sufficient to replace such paper. It is immaterial whether or not the publisher is reimbursed for the destroyed or damaged paper by the shipper, the carrier, or an insurance company. It is also immaterial whether or not the publisher salvages all or part of the damaged paper for use other than in publishing his newspaper.

(7) *Report on transit damage.* Any publisher who increases his delivery quota to replace destroyed or damaged print paper in accordance with subparagraph 5 above shall, within 15 days after placing the order for such replacement, file a letter with the War Production Board stating the number of tons comprising the publisher's delivery quota for that month, the number of tons destroyed or damaged, the manner in which such print paper was rendered unfit for use in publishing his newspaper, and the number of tons ordered in excess of his delivery quota. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(o) *Exceptions.* Permission to order or accept delivery of print paper in excess of the tonnage allowed under paragraph (n) may be granted by the War Production Board upon a written request for specific authorization stating the number of tons and the number of days' supply of print paper which the publisher has in inventory, the number of tons comprising his delivery quota, the number of additional tons he desires to order and accept, and the reasons why the denial of the request would create undue hardship.

(p) *Certification.* On and after December 24, 1943, each order by a publisher for delivery of print paper shall contain substantially the following certification, signed manually or as provided in Priorities Regulation 7 (§ 944.27) by an official duly authorized for such purpose:

> The undersigned purchaser certifies, subject to the penalties of section 35 (A) of the United States Criminal Code, to the seller and to the War Production Board, that, to the best of his knowledge and belief, the undersigned is authorized under applicable War Production Board regulations or orders to place this delivery order, and to receive the item(s) ordered for the purpose for which ordered.

No person may deliver print paper to a publisher except upon a delivery order which bears the above certification.

(q) *Copies of orders.* On and after March 1, 1944, the publisher of every newspaper which consumes 25 tons of print paper or more in any calendar quarter shall file with the War Production Board copies of all orders for the delivery of print paper placed by him or for his account. Such copies must be mailed within three days after the orders are placed. On or before March 15, 1944, every such publisher shall mail to the War Production Board copies of all orders for the delivery of print paper placed by him or for his account since January 1, 1944. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(r) *Intra-company transfers.* The foregoing restrictions apply not only to deliveries from one person to another, including affiliates and subsidiaries, but also to deliveries from one branch, division, or section of a single enterprise to another branch, division, or section of the same or any other enterprise under common ownership or control.

Miscellaneous Provisions

(s) *Loans of print paper.* Any loan of print paper made by a publisher shall be reported to the War Production Board by letter within 15 days after the date of the loan. This reporting requirement has been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

(t) *Applicability of regulations.* This order and all transactions affected by it are subject to all present and future regulations of the War Production Board.

(u) *Appeals.* Any appeal from the provisions of this order shall be made by filing a letter in duplicate, referring to the particular provision appealed from and stating fully the grounds of the appeal.

(v) *Communications to the War Production Board.* All reports required to be filed hereunder, requests for specific authorization, appeals and other communications concerning this order shall be addressed to: War Production Board, Printing and Publishing Division, Washington 25, D. C. Ref: L–240.

(w) *Violations.* Any person who wilfully violates any provision of this order, or who, in connection with this order, wilfully conceals a material fact or furnishes false information to any department or agency of the United States is guilty of a crime, and upon conviction may be punished by fine or imprisonment. In addition, any such person may be prohibited from making or obtaining further deliveries of, or from processing or using, material under priority control and may be deprived of priorities assistance.

PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 2 as Amended Sept. 5, 1944]

INVENTORIES

§ 3175.2 *CMP Regulation 2—(a) Definitions.* For the purposes of this regulation:

(1) "Item of controlled material" means any item in any class of controlled material listed in the attached Schedule A which is different from all other items in that class by reason of one or more of its specifications, such as length, width, thickness, temper, alloy, finish, method of manufacture, etc.

(2) "User of controlled material" means any person, including government operated consuming establishments, who uses any item of controlled material for production, construction, operating supplies, or maintenance or repair.

(b) *General maximum inventory limitation.* (1) No user of controlled material shall, after April 1, 1943, accept delivery of any item of controlled material if his inventory of such item is, or will by virtue of such acceptance become, greater than the quantity of such item he will be required by his current practices to put into use during the succeeding 60-day period for production, construction, operating supplies, or maintenance or repair, in order to carry out his authorized operations. The provisions of this subparagraph shall not apply to the acceptance of delivery of controlled material if the delivery is made under a specific direction of the War Production Board issued pursuant to paragraph (t) (3) (iii) of CMP Regulation 1 and the person accepting delivery, in the course of his operations, will convert such controlled material into another form of controlled material.

(2) The War Production Board may, by specific inventory direction, fix longer or shorter periods or otherwise vary the inventory limits under subparagraph (1) of this paragraph (b), for any specified person or class of persons. Any such action will be governed by the principle that inventories of materials are to be kept at the minimum consistent with sound production practice.

(3) Nothing in this regulation shall be deemed to permit any person to accept delivery of any item of controlled material if his inventory of such item is, or will by virtue of such acceptance become, in excess of a minimum practicable working inventory thereof.

(c) *Exceptions to paragraph (b).* Notwithstanding the provisions of paragraph (b), any person may accept delivery of material in excess of the prescribed limits under the following circumstances.

(1) If any producer of controlled material exercises his privilege under CMP Regulation No. 1 of making delivery prior to the delivery date specified by the user of controlled material, such delivery may be accepted and the prescribed limits exceeded to the extent that such excess results from such prior delivery.

(2) If a user of controlled material has promptly instructed a producer or other supplier to reduce, postpone, or cancel a delivery, and the material has been shipped or loaded for shipment before receipt of such instruction, delivery of such material may be accepted and the prescribed limits exceeded to the extent that such excess results from such delivery, *Provided*, The producer or supplier promptly advises such user why the delivery has been made despite the receipt of reduction, postponement, or cancellation instructions.

(3) If a user of controlled material would be authorized under paragraph (b) to accept delivery of a quantity of an item of controlled material less than the minimum shown opposite the appropriate class of controlled material on the attached Schedule A, he may accept delivery of the full minimum shown on Schedule A.

(4) If a user of controlled material has promptly instructed a producer to reduce or postpone a delivery of a special item which cannot be readily disposed of in the course of the producer's business, and the producer advises such user that he has already started production thereof, specifying the minimum quantity which he will have to complete in the light of the production he has started, such user may accept delivery of such minimum quantity and exceed the prescribed limits to the extent that such excess results from such delivery. This exception applies only to the acceptance of delivery of such special items before they are needed and not to acceptance of such special items which will not be needed at all.

(d) *Scheduling of deliveries.* Every user of controlled material must apply for allotments, schedule deliveries, and place orders in such manner that deliveries may be made without violating the provisions of this regulation. If by reason of change in authorized operations, slowing or stoppage of production, delayed delivery by a producer or other supplier, or other cause, a person who has ordered material for future delivery would, if he accepted delivery on the dates specified, exceed the limits prescribed by this regulation, he shall promptly revise and adjust his applications, outstanding orders and scheduled deliveries and, if necessary, postpone or cancel the same, directly or through his claimant agencies, so that deliveries will conform to this regulation.

(e) *Separate inventories.* (1) In determining his inventory, a person shall include all controlled material in his possession and all material held for his account by another person, but not material held by him for the account of another person.

(2) A person who has more than one operating unit may divide his operations and apply this regulation to each division independently, but he may not thereafter change such divisions without specific authorization of the War Production Board. Any person who has been operating under the Production Requirements Plan shall continue to divide his operations in the same manner as under that plan to the extent that such division is consistent with this paragraph.

(f) *Geographical application.*—This regulation shall not apply to persons outside the forty-eight states and the District of Columbia except pursuant to specific direction of the War Production Board.

(g) *Prohibited deliveries.* No person shall deliver any item of controlled material if he knows or has reason to believe that acceptance of such delivery would be in violation of this regulation.

(h) *Redistribution of excess inventories.* Excess inventories of controlled materials, including inventories of materials which are not in such form as to be usable by the holder, shall be subject to redistribution to other persons by voluntary action, pursuant to Priorities Regulation No. 13, or if necessary, through requisitioning by the War Production Board.

(i) *Reports.* Users of controlled materials, including government operated consuming establishments, shall file such reports on Form CMP–7 or other designated forms, as may be required from time to time by the War Production Board.

(j) *Appeals.* Any person affected by this regulation who considers that compliance therewith would work an exceptional and unreasonable hardship upon him may appeal to the War Production Board, Redistribution Division, Reference: CMP Regulation No. 2, setting

forth the pertinent facts and the reasons he considers he is entitled to relief.

(k) *Miscellaneous provisions*—(1) *Applicability of other orders and regulations.* All persons affected by this regulation shall remain subject to all applicable provisions of other War Production Board regulations and orders as amended from time to time.

(2) *Communications.* All communications concerning this regulation shall be addressed to: War Production Board, Redistribution Division, Washington, D. C., Reference: CMP Regulation No. 2.

Issued this 5th day of September 1944.

WAR PRODUCTION BOARD,

Recording Secretary.

INTERPRETATION 1

INVENTORY MATERIAL

Paragraph (b) (1) of CMP Regulation No. 2 prohibits the acceptance of delivery of any item of controlled material if the user's inventory of such item is, or will by virtue of acceptance become, greater than the maximum prescribed. For the purpose of this regulation, material is considered to be inventory until it is actually put into process or is actually installed or assembled. Putting into process does not include minor initial operations, such as painting, and does not include any shearing, cutting, trimming or other operation unless such initial operations are part of a continuous fabricating or assembling operation. Nor does it include operations such as inspection, testing and ageing nor segregation or earmarking for a specific job or operation.

For example, if a manufacturer who uses wire or rod cuts a sufficient quantity of it to length at one time to maintain his operations for a considerable period of time, the cut pieces remain as inventory until processed into another form or until assembled or installed.

If a manufacturer purchases and stores steel castings in the form purchased, the steel castings are not put into process when the castings are painted and stored. Consequently the inventory of castings includes those painted and stored.

If a manufacturer shears steel sheet and stocks in sheared form, such stock is still part of his inventory, if the material does not continue in production. [Issued June 19, 1943.]

INTERPRETATION 2

PROMPT CANCELLATION AND SPECIAL ITEMS

(a) CMP Regulation No. 2 requires a user of controlled material to promptly cancel, postpone, or reduce delivery when his requirements of controlled materials are reduced. Such cancellations must be made as rapidly after he discovers that his requirements are reduced as is practicable.

(b) Paragraph (c) (4) of the regulation permits the receipt of a special item of controlled material in greater amounts than presently needed under the following circumstances: (1) if the user has promptly instructed the producer to reduce or postpone the delivery of the item and (2) if the user has received from the producer a statement that the item is a special item on which production has been begun and that the producer must complete a minimum amount in order to prevent undue loss in production. This exception applies only to special items the user will need and does not permit acceptance of items which will not be needed at all.

(c) Before a producer may deliver such special items he must notify his customer in writing that the item is a special item stating the amount which is the minimum amount he must complete without undue loss of production. The customer is entitled to rely on this notice and need make no further inquiries. A special item, as the term is used in the regulation, means one that the producer does not usually make, stock or sell, and which he cannot readily dispose of in the course of his business. An item which is a special item to one producer may not be a special item to another producer.

(d) The producer, on receipt of a notice from his customer to reduce or postpone delivery, must be diligent in taking the special item out of his schedule or in stopping production if it has already been started. [Issued March 20, 1944.]

INTERPRETATION 3

EFFECT OF REDUCTION IN CONSUMPTION RATE OF PERMITTED INVENTORIES

(a) Paragraph (b) of CMP Regulation No. 2 prohibits the acceptance of delivery of an item of controlled material if a person's inventory will become, because of the delivery, or already is, in excess of the amount permitted by the regulation. Priorities Regulation No. 1, § 944.14, makes a similar restriction. If material is acquired within these restrictions, neither regulation prohibits the mere possession of an inventory if a change in circumstances makes it greater than the amount they permitted. For instance, if based upon current rate of production a manufacturer's permitted inventory of one item of steel is 100 tons and he has in inventory 60 tons, he may receive a further delivery of 40 tons. If after receiving the delivery of 40 tons his rate of consumption, because of contract cancellation or the like, is reduced drastically, the mere fact that he has an inventory of 100 tons, although his permitted inventory may be only 10 tons, is not a violation of the regulation. He may not, of course, accept any further deliveries of steel until his inventory has been reduced below 10 tons (except as provided in paragraphs (c) (2) and (c) (4) of CMP Regulation No. 2, relating to material already shipped and special items).

(b) Similarly, the regulation does not affect the liability of a customer for material in inventory when the customer cancels his contract. Such liability is controlled by the provisions of the contract between them and by contract law. [Issued June 14, 1944.]

PART 3175—REGULATIONS APPLICABLE TO THE CONTROLLED MATERIALS PLAN

[CMP Reg. 1, Direction 56]

ELIMINATION OF FORMS IN WHICH ALUMINUM IS ALLOTTED

The following directive is issued pursuant to CMP Regulation 1:

(a) Allotments of aluminum will no longer be made in the eight forms formerly specified in Schedule I of CMP Regulation 1. Allotments will be made only in terms of "aluminum" without further specification. However, applications for allotments must continue to be made in terms of the eight forms.

(b) A person who has received an allotment in terms of the eight forms may combine such allotments into one account and may thereafter allot to his suppliers in terms of "aluminum" without further specification, and, in placing authorized controlled material orders for aluminum, may charge against such single account irrespective of the forms or shapes ordered. If a person receives an allotment in one or more of the specified shapes, he may treat it as an allotment of "aluminum" without regard to such shapes.

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L-335, Direction 2, as Amended Sept. 4, 1944]

SAWMILLS' SHIPMENTS FROM WESTERN PINE REGION

The following direction is issued pursuant to Order L-335:

(a) *What sawmills are covered by this direction.* This direction applies only to sawmills located in the States of Washington, Oregon, California, Idaho, Montana, Wyoming, Nevada, Utah, Colorado, Arizona, New Mexico, and South Dakota which produce the following species of lumber: Ponderosa pine, sugar pine, lodgepole pine, Idaho white pine and white fir (except Idaho white pine and white fir produced west of the crest of the Cascade mountain range in the States of Oregon and Washington), Western white spruce, and Engelmann spruce.

(b) *Military orders placed with sawmills that take precedence over other orders.* This paragraph applies to every sawmill mentioned in paragraph (a) above which currently produces 10,000 or more board feet of lumber (whether one of the named species or not) per average day of eight hours of continuous operation or which produced an average of 10,000 or more board feet of lumber per day during the days from June 3, 1943 to December 3, 1943 on which it was in operation. Starting with the month of August, 1944, sawmills that receive orders of the types described in pargaraph (c) below must accept and ship such orders in preference to all other orders (except orders rated AAA) to the extent that such orders do not require more than 20 percent of the sawmill's anticipated monthly shipments. Such an order may not be accepted by a sawmill after the beginning of the month preceding the month of shipment if the acceptance of the order would result in displacing other certified and rated orders amounting to more than 10 percent of the sawmill's anticipated monthly shipments. A sawmill's shipment on such orders shall be in the sizes required by the agency or person placing the order.

(c) *Military orders.* The following types of certified and rated orders placed with a sawmill shall be accorded the treatment provided for in paragraph (b) above and shipments made on such orders may be credited against the percentage that a sawmill is required to ship under that paragraph in preference to other orders:

(1) Orders for the account of the United States Government placed by the U. S. Army, U. S. Navy, U. S. Marine Corps, U. S. Coast Guard, U. S. Maritime Commission, and War Shipping Administration;

(2) Orders for the account of the United States Government placed by the Treasury Department, Procurement Division on behalf of the Foreign Economic Administration bearing the symbol DA-TPS;

(3) Orders placed by any other persons which bear a certification of the Central Procuring Agency, Procurement Division of the United States Corps of Engineers to the effect that the lumber purchased thereby is for the use of one of the agencies mentioned in subparagraph (1) of this paragraph, or is for "command construction" or "advance base procurement". A person who receives such a certification from the Central Procuring Agency may extend that certification in placing orders with his supplier to the extent necessary to obtain the lumber required for delivery on the order bearing the original certification of the Central Procuring Agency.

[NOTE: Undesignated paragraph deleted Sept. 4, 1944]

(d) *Other military orders.* The amount of lumber that must be made available to the military on orders receiving the preferential treatment described in paragraph (b) is the minimum and a sawmill must continue to accept other orders coming from the same sources for lumber in excess of the required percentage mentioned in paragraph (b) in accordance with paragraphs (x) (1) and (x) (2) of Order L-335, but orders placed with a sawmill over and above the required 20 percent shall be treated like any other order and they will not take precedence over other orders which are equally or higher rated.

(e) *Sawmills producing less than 10,000 board feet not getting certified orders may ship on uncertified orders.* Any sawmill defined in paragraph (a) which is smaller than the type of sawmill included in paragraph (b) must accept certified orders (whether military or not) of consumers and distributors offered it in accordance with paragraphs (x) (1) and (x) (2) of Order L-335 but if such a sawmill has not been offered certified orders for all of its lumber it may ship the balance to lumber distributors on uncertified and unrated orders. A shipment of lumber on a distributor's uncertified and unrated orders must not be made if it will interfere with the filling of a certified order. Retail sales by sawmills are subject to the provisions of paragraphs (u) and (v) of Order L-335 and the provisions of Directions Nos. 6, 8, and 8 (a) to Order L-335.

Issued this 4th day of September 1944.

PART 3285—LUMBER AND LUMBER PRODUCTS

[Order L-335, Direction 8a]

TEMPORARY PROVISIONS RELATING TO THE DELIVERY OF CERTAIN LUMBER ON UNCERTIFIED AND UNRATED ORDERS.

The following direction is issued pursuant to Order L-335:

(a) *What this direction does.* This direction permits lumber distributors to deliver to "all other consumers" accumulated stocks of slow moving items which are not adaptable to war uses if the delivery of such lumber does not interfere with the filling of certified orders. It also permits sawmills and distributors in certain areas to dispose of their excess stocks of Douglas fir, larch, and Red cedar to farmers in those areas when they are not required to fill certified orders.

(b) *Sale of inventory by distributors.* Any lumber distributor as defined in paragraph (b) of Direction 8 to Order L-335 is authorized to deliver to "all other consumers" as defined in paragraph (m) of Order L-335 on uncertified and unrated orders up to an amount of lumber not exceeding ⅓ of his

lumber inventory as of September 1, 1944. Delivery of this lumber may be made at any time between September 1 and December 31, 1944. However, no lumber in the grades of No. 2, No. 3, or No. 4 common in Idaho White pine, Ponderosa pine or Sugar pine may be delivered under the above provision. This direction makes no provision for replacement of lumber in inventory which is sold under this paragraph.

(c) *Delivery of Douglas fir, larch, and Red cedar to farmers.* Any Douglas fir, larch, or Red cedar produced east of the Cascade mountain range in the States of Washington and Oregon and in the States of California, Idaho, Montana, Wyoming, Nevada, Utah, Colorado, Arizona, New Mexico, and South Dakota may be sold by sawmills and lumber distributors on uncertified and unrated orders of farmers located in the States of Washington, Oregon, California, Arizona, New Mexico, Nevada, Utah, Colorado, Idaho, Montana, Wyoming, North Dakota, South Dakota, Nebraska, Kansas, Iowa, and Minnesota. For the purposes of this direction a "farmer" means a person who engages in farming as a business, by raising crops, livestock, bees, or poultry. It does not include a person who has just a "victory garden" or a person who raises feed or other agricultural products entirely for his own use.

(d) *Deliveries may not interfere with filling of certified orders.* No delivery may be made under the provisions of this direction if the delivery will interfere with the filling of a certified order.

PART 1351—FOOD AND FOOD PRODUCTS

[FPR 1,[1] Amdt. 8 to Supp. 7]

PACKED FRUITS, BERRIES AND VEGETABLES OF THE 1944 AND LATER PACKS

A statement of the considerations involved in the issuance of this amendment has been issued and filed with the Division of the Federal Register.*

Supplement 7 to Food Products Regulation No. 1 is amended in the following respects:

1. The table in section 1 (a) is amended by adding item 9 to read as follows:

Column 1 Item No.	Column 2 Product	Column 3 Section	Column 4	
			Section	Appendix
9	Tomatoes	8	15	E

2. In section 15, Appendix E is added to read as follows:

APPENDIX E—TOMATOES

Explanation of how maximum prices for packed tomatoes are figured. For packed tomatoes, the order in which conversions are to be made for grade and container type and size under subparagraph (2), (3) or (4) of section 8 (a) of this supplement differs from that specified in the note at the beginning of section 8 (a) (2). In figuring maximum prices for packed tomatoes under those subparagraphs, steps are to be taken in the order indicated below in all cases (although in many cases not all of the steps are necessary):

1. Convert for container size.
2. Add the permitted increase specified in Table 3 for the grade sold in the base period.
3. Convert for grade.
4. Apply the limitations of the price range.
5. Convert for container type and size.
6. Subtract subsidy payable per unit of the finished product, for sales to purchasers other than government procurement agencies.

Conversions from metal containers to glass containers must be made after applying the limitations of the price range (see step 5) and not in base period prices, since permitted increases and price ranges are based on cost increase and base period price data for metal containers only. The processor must first construct a maximum price for the item when packed in metal containers and then add (or subtract) the appropriate amount named in Table 6, even though he sold the item in glass containers during the base period.
